As you can see, I have returned to duty here at the ol' moderator's desk after a (way too short) C-mas break. Despite my request to hold submissions, I did come back to over 100 articles. Imagine what would have been here if I had NOT asked people to hold their submissions :-).

Anywat, due to the excessive number of posts in the mail queue today, I have had to do what I have never done before, that is to delete some articles that would have been used otherwise. I did this so as not to flood subscribers with 10 or more issues of AIRWAVES at one time. I tried to use all timely and/or informative articles in this posting/mailing.

If you held your articles, now is a good time to send. If you sent an article and you didnt see it here, try re-sending it. I used about 3/4 of the usable articles in this posting.

Thanks to all who wished me and my mom a great holiday.

William Pfeiffer

This year certainly was more interesting than most for the #40 market, due to a lot of station buying. To wit:

-Keymarket,whose purchase of WBEN(NewsTalk 930)and WMJQ(Q102)was still pending when the year began,added WKSE(Kiss 98.5)and WWKB(The Big 1520)to their portfolio,paying about $10 million for both.
-American Radio Systems,actively searching for new properties in the area, bought WJYE and WECK from E.B.E.Buffalo Limited Partnership for about $10 million.(They also own WYRK.)
-Pyramid acquires WBUF from the Lincoln Group for just under $5 million, making a 3rd duopoly with WHTT-AM/FM(Oldies 104).
-Rich Communications,operating WUFX-FM(103.3 the Fox)and WWWS-AM(3WS-Your Money 1400)under one of the industry's first LMAs,acquires the two from Metroplex(which was merging with Clear Channel).

What about format changes?

-After acquiring WBUF,Pyramid shifts it to a regular AC format and repackages it as B93.
-Kitchener,Ont.'s CFCA moves to classic rock as 105.3 Cool FM.
-In probably the most talked about change in a while,CKEY throws out the "Key(FM 101.1)" and its AC format to go to modern rock as FM 101 The Planet.

Other big stories:

-WBEN reacquires the radio rights to the Bills from WGR.
-Telemedia announces plans to shift its sports format from CJCL(The Fan 1430)to CKYC(Country 59),when it acquires the station next year.
-Rogers Communications and MacLean Hunter announce that they will merge; in late December,the CRTC OKs it-but one of the conditions is that must separate their radio/TV operations from publishing in markets where both exist. CFNY was sold from MacLean Hunter to Edmonton's Shaw Communications.

Now,the Muckoni awards(for the moronic and weird in radio):

The Deal-a-show Award:To WWKB,still trying to find a lineup after Howard Stern. Heading out were G.Gordon Liddy and Don & Mike,while The Fabulous Sports Babe,Dr.Laura Schlessinger,J.R.& Suzie(ex-WGRers)and Tom Leykis arrived. Plus,KB gets..

The Now You Hear It,Now You Don't Award:for the short tenure of Leslie Marshall. She lasted only a few weeks before Ron Barr's Sports Byline USA returned.

The Truth in Sweepers Award:To WKSE(Kiss 98.5),for claiming that they're "Arbitron rated #1 for today's music",even though they aren't tops-not even in their prime demo,18-34 year olds.

The Polarizer Award:To Kerry Gray,PD/PM driver at CKEY(FM 101 The Planet). People either love him or hate him-'nuff said.

The Gross Us Out Award:To J.R.& Suzie at WWKB,for having a guest talk about celebrity penises and J.R.'s adventures with canned air and his wife.

The Too Close to Call Award:To Toronto's The Fan 1430 and 680 News. The latter had wanted to broadcast the calls of the Breeders Cup races,but the Fan beat them to it-they aired the races instead.

The I Can Still Be Hip Award:To Jon Summers. After getting booted as WBUF's AM driver,he landed at The Planet as AM driver-proving that you can still get a good laugh...even if it isn't the main purpose.

The NBA Trash Talking Award:To WGR. After losing the Bills rights to WBEN, they return to the days when they bashed WBEN every chance they got. But,it backfired-it drew no one and drove many away.

The Head Like a Hole Award:To WGR's Rich Michaels. In 'GR's seemingly neverending quest to dupilcate Rush Limbaugh(and its last attempt,Jay R.Gach, admitted as much),Michaels proved that you can stick your foot in your mouth by simply opening it. From a Secret Service investigation and confusing tribes in Rwanda(i.e.calling the Hutus and Tutsi the Tutus)to getting the Am-Pol Eagle,Jewish groups and the Buffalo Teachers Federations on his case (and banning a caller in the Polish group case;ironically,that caller used that status in a radio ad as a joke),he's done it all. I won't even get into his double dipping.

Enjoy-let's hope 1995 isn't as nuts.(OK,I'm wishing too much. :))

C.K.G.

"Rock 'em if they can't take a joke." -TV ad,WNEW-FM(New York City)

Here's the new trends from Winston-Salem / Greensboro / High Point (check out WXRA, formerly country, now alternative rock):

--- --- --- --- --- --- --- --- --- --- --- ---

12+
CALLS SUMMER SE-OC-NO
WTQR-FM 15.2 14.1 (country)
WJMH-FM 5.6 6.7 (urban)
WXRA-FM 4.1 6.4 (alternative rock)
WKZL-FM 6.2 6.3 (adult contemporary)
WMAG-FM 4.8 6.2 (adult contemporary)

Adults 18-34
CALLS SUMMER SE-OC-NO
WXRA-FM 5.8 12.6 (alternative rock)
WTQR-FM 13.5 11.5 (country)
WKRR-FM 13.3 10.7 (classic rock)
WJMH-FM 9.2 9.6 (urban)
WKZL-FM 6.2 6.3 (adult contemporary)

Adults 25-54
CALLS SUMMER SE-OC-NO
WTQR-FM 15.9 13.3 (country)
WKZL-FM 8.4 9.5 (adult contemporary)
WXRA-FM 5.0 7.4 (alternative rock)
WKRR-FM 10.3 7.2 (classic rock)
WMAG-FM 5.8 5.7 (adult contemporary)

--- --- --- --- --- --- --- --- --- --- --- ---

Top 5 only...

4. Kansas City Radio in 1994

Newsgroup: rec.radio.broadcasting
Date: 1995-01-01 03:47:45 UTC
From: transvox@interstate.net
Message-ID: <3e58l1$3n1@vixen.cso.uiuc.edu>
Source record: 35712

In Kansas City radio, the year 1994 may be like the dog that didn't bark in the Sherlock Holmes stories. While there were changes and shifts in Kansas City radio, the 29th market continues to be a place where country rules, and "alternative" means going deep on a Tom Petty album.

Note: An indexed version of this article is available on http://www.interstate.net/~transvox/review1994.html in browsable form. Likewise, point to http://www.interstate.net/~transvox/kcfm.html for an article on the KCFX format change.

Duopolies consolidate

This was a year for the new Apollo and Bonneville duopolies to consolidate staffs and reposition their stations so co-owned stations would not compete directly against one another. For Apollo, the strategy was to reposition KMXV(FM) as a contemporary-hit station, without implementing much of a CHR playlist. Apollo's KUDL(FM) remained an adult-contemporary station, and achieved ratings success with KMXV's former morning team of Gloria Goodwin and Dan Hurst.

Eventually, Bonneville's strategy became clear: position KMBZ as a news-oriented station with a lot of sports talk and Rush Limbaugh; position KCMO as a personality-driven talk station with not much news. KMBZ's news staff and coverage was beefed up as a result; still, despite a fine staff, KMBZ still showed too much reluctance to interrupt programming for breaking news -- or even for scheduled news, such as the November elections.

Numerous AM station changes

This year, the AM dial showed the greatest volatility, with the following format changes, all satellite relays:

* KBEQ(AM) picked up the People's Radio Network in February, becoming the market's fourth news/talk station.
* KJLA(AM) dumped big bands and went for all sports, becoming one of the first affiliates of "The Team," programmed by WCTE(AM) in the Washington, D.C. market.
* After a false start in September, daytimer KCXL(AM) made it back on the air in November after two and a half years off the air, relaying the Jones Satellite Network's oldies service.
* In October, KBEA(AM) brought children's radio to Kansas City by picking up the "Radio Aahs" service from WWTC(AM) Minneapolis.

FM stations reposition but did they really change?

On Christmas Eve, KCFX(FM) announced, "we gave our disk jockeys the week off for Christmas," and promoted a new, all-70s format. Since KCFX was previously a classic rock station, the format change amounts to ordering new slogans and positioning statements, and purging the playlist so that, as the station says, there is "no disco," "no hard rock," "no heavy metal," "no doo-wop oldies," and "no weird stuff."

As previously mentioned, KMXV (Mix 93.3) changed the "mix" from adult contemporary to CHR on March 28. However, the playlist subsequently froze for several months, until a disappointing summer book forced some changes. The station now seems to have an identity crisis, bouncing among 80s oldies, modern rock crossovers, and urban contemporary crossovers on almost a weekly basis.

Country continues stranglehold on market

The market's five country stations continued to maneuver, with the FM upstarts threatening but never dethroning the longtime AM country leader.

KBEQ-FM continued to profit from its risky move two years ago away from CHR to young country," giving KFKF a run for its money. Meantime, KFKF persisted with its LMA of KKCJ and a "new country" format that was not well promoted and that has only once gotten a 2.0 share in the ARB. KFKF's well respected program director, Don Crawley, left the station in October to join a United Methodist church's music ministry in Kansas City.

An AM station continued to rule the market. WDAF(AM), "61 Country," was #1 for seven survey periods up 'til summer 1994. WDAF was so confident of its position that it declined to renew its contract to carry Kansas City Royals baseball. KMBZ(AM) will once again carry the Royals games next season, assuming there is a season.

More changes expected in northeast Kansas in 1995

The northeast Kansas markets of Lawrence, Topeka, and Manhattan had their share of changes in 1994. Topeka will see even more in 1995.

Lawrence's KLZR(FM) continued with its modern-rock format. Because the format inexplicably continues to be unavailable from a Kansas City station, "The Lazer" has developed a cult following despite a weak signal, especially on the Missouri side of the metropolitan area. KLZR's cult status obscures some of its weaknesses -- carrying any Kansas University sports event at the drop of a hat, a ban on any late-80s/early-90s synthpop, and a presentation style that sounds like a parody of badly executed late-70s FM radio.

Also in the Lawrence market, KZTO(FM) went off the air in January. Like KLZR, KZTO was marginally receivable in the Kansas City metropolitan area. Though licensed to Ottawa, the station has at various times tried to be a Topeka and a Lawrence station. The station had announced plans to return to the air this fall; the station remains silent.

Newspaper chain Morris Communications has purchased Stauffer Communications and announced plans to spin off its broadcast properties, including WIBW-AM/FM/TV in Topeka. A new station, KWIC(FM), came on the air in April with a format that's best described as "all news part of the time; oldies the rest of the time." Topekans wanting full-time oldies had to wait until December when KQTP(FM) came on the air.

In 1995, aside from the Stauffer sale, duopoly will come to Topeka when the sale of KTOP/KDVV to the owners of KMAJ-AM/FM is complete. Duopoly in the form of an LMA arrived in Manhattan in September, when KXBZ(FM) was leased by KMAN(AM)/KMKF(FM) and came on the air with the market's first country format. Even more notable is the fact that the format is locally programmed, not a satellite relay.

Non-commercial turmoil in central Missouri radio

One of the nation's longest-lasting open-access stations, KOPN(FM) in Columbia, instituted numerous programming changes the first day of 1994, generating howls of protests from annoyed volunteers but fatter coffers during pledge drives. To make KOPN's format more predictable and relevant to listeners, specialty programs were restricted to evenings and weekends. Daytime programming was devoted to an adult-alternative format.

University of Missouri student-run station KCOU(FM) went through so much turmoil that it changed its call letters twice. The station instituted a tightly-formatted modern rock playlist in the spring with the KEJJ(FM) call letters. But the station couldn't use the slogan "The Edge" because a consultant had copyrighted it. KEJJ's general manager was dismissed; new management recovered the KCOU call letters three months later, and ditched the playlist.

CD jukeboxes go on the air

In mid-Missouri, two new stations came on the air, both amounting to little more than CD changers plugged into transmitters. KTLH(FM) went on the air, licensed to Boonville, in July, offering a soft-AC format as "Lite 93.9." In November, KOQL(FM) began broadcasting from a downtown Columbia hotel room, offering automated oldies. "Kool 102" picked the format despite its availability from Jefferson City's KJMO(FM) and Fulton's KKCA(FM), both easily received in Columbia.

Other Mid-Missouri changes included the transition of Jefferson City's KTXY(FM) from album-oriented rock to a hot adult-contemporary format, Columbia's KARO(FM) changing call letters to KPLA, California's KZMO(AM) going silent and the sale of its FM to KTXY/KLIK(AM) owner Brill Media, and Moberly's KZZT(FM) networking its hot AC format to stations in Brookfield and Montgomery City.

Also of interest was the July conviction of KFMZ(FM) owner Michael Rice on 12 counts of sex crimes with teenage boys. Rice is now serving an eight-year prison sentence. Although convicted felons are not allowed to own radio stations, there is no indication that Rice's Contemporary Media chain is up for sale.

Trends and predictions for 1995

In Mid-Missouri, it's evident that there will be changes in the Jefferson City market. There are at least three applications for a new FM allocation at 104.1. When Brill completes its purchase of KZMO-FM, it will have a duopoly. It is rumored that either KZMO-FM or KTXY will become a country station allied with KLIK(AM).

In Columbia, there may be adjustments at KBXR(FM) when KFRU(AM)/KPLA(FM) owners Dave Baugher and Al Germond complete their purchase of the adult-alternative station; however, the format will probably remain.

In Kansas City, there are unconfirmed reports that an adult-alternative (AAA) station will take to the air early in 1995 after changing ownership. I can think of only two FM stations that could possibly be up for sale:

* KXTR(FM), whose owner is now 77 and just leased his AM to another station, or
* KKCJ(FM), whose three-year LMA contract with KFKF(FM) runs out in February.

However, do not expect a full-fledged modern rock station to penetrate this market any time soon. Even open-access station KKFI(FM) is hostile toward alternative music.

Likewise, syndicated morning "shock jocks" are not welcome at Kansas City radio stations. I would not expect that to change in 1995, given the conservatism of most broadcasters in this market. Either KMXV(FM) or KISF(FM) should eventually give up the CHR game: neither station does the format well and both are sharing a relatively small audience.

News/talk KNHN(AM) may be in for a rough year as competitor Bonneville continues to solidify its hold on the Kansas City news/talk market with "hot talk" KCMO complementing news and sports oriented KMBZ. However, Bonneville needs to show more willingness to use the talents of a fine news staff on breaking news that happens outside morning drive.

Modern-rocker KLZR(FM) will continue to have a solid base in the college town of Lawrence, with its Kansas City cult audience providing the extra revenue kick that should keep the format on the air. The other station based in Lawrence, KZTO(FM), should come back on the air sometime in 1995, but it's hard to see what it could do. A physical move into the Kansas City market would require a reduction in power, and would no doubt be tied up at the FCC for years.

And, of course, expect the unexpected. The following list comprises events least likely to happen:

* KCMO going all-news
* KMBZ dropping Rush Limbaugh
* KNHN, KLZR, or KISF getting better Kansas City signals
* KCFX giving up on 70s-oldies and going country
* KYYS flipping to modern rock, KITS (San Francisco)-style

* Urban contemporary KPRS(FM) getting a modulation monitor
* KBEQ-FM leaving young country to resume its 20-year run as a CHR station

Thanks go to the many people who have corresponded with me in
1994, including but not limited to, Chris Carmichael, Brandt
Maxwell, Powell Way, John Higdon, Bill Pfeiffer, Scott Fybush,
Stan Jones, Ken Gore, George Davison, Mark Cooper, Neil Griffin,
Stephen Margolies, and anyone else I've left out.
Also big thanks to Interstate Networking Corporation, who finally
made it possible for me to have a Web home page! Happy New Year!

5. Re: WOWO is *bigger* than WOWO

Newsgroup: rec.radio.broadcasting
Date: 1995-01-01 03:47:46 UTC
From: rrb@deja-vu.aiss.uiuc.edu
Message-ID: <3e58l2$3n3@vixen.cso.uiuc.edu>
Source record: 35713

} JDL@alaska.net (Jeremy D. Lansman) responds to my post on FCC and WOWO...
}
} Your writings cause me significant emotional response. This thread is quite
} interesting. I love it when people rail at FCC policy.

It is an emotional issue, but it is more than that.

}I suspect you really want radio to be the way it was in 1940. A few stations,
}national nets, big audiences.

No, not exactly...

} Things have changed, and will continue to change. So what? So, I do not
} think you are clear about what you want. I doubt you really want a return
} to the time when you could twist the dial at night and hear the same NBC
} program from LA, Denver, Chicago and New York. (I actually remember hearing
} that at night as a kid in Missouri.)

But above you said you thought I *did* want that. You are right,
though, I am not interested in a return to past days. But that
doesn't mean that there are not some aspcts of those days which are
still good ideas, or that it is somehow unnatural to want to preserve
some semblance of sanity in these 'changing' days.

Of course things change, Jeremy. That is as inevidable as the
rotation of the earth. It is the direction of that change and my
perception of the lemming-like rush into an uncertain future, merely
for the sake of change.

} So, I suggest, instead, thinking about how you would like mass media to work
} in the digital age. I think we need to be concerned about
} diversity, access, and concentration of control of outlets by a few
} entities.

That is precicely what I am thinking about. I am not pineing away for
a juvinile dream of tuning in some distant station on my 6 transistor
radio. That is fun, but that is not what I am talking about at all.
I am amazed at the fact that despite efforts (and substantial ones
too) on my part to explain my position, some people seem bent on
putting words and concepts in my mouth, rahter than to simply take me
at my word. They insist on lumping me in with some familiar group,
rather than simply take my specific words at face value.

} By the way, don't you think it strange that the FCC under Democratic
} leadership is advancing a more "business oriented" policy? I wonder about
} what difference we can find between Democrats and Republicans.

Actually, I find very little difference between the Democrats and the Republicans of today. I know there is a great civil divide in this country (fostered in large part by the Limbaughs and Liddys of the world) between the so-called liberals and so-called conservatives (and the Republican/Democrat split). I know there are great words of division over the supposed differences in these groups, but when push comes to shove, but the Dems and the Reps are staunchly behind the same basic projects. The unprecidented agreement between the Clinton administration and Limbaugh on Nafta is evidence of this.

Also, the degradation of the FCC started long before there was a (pseudo) Democratic president.

Suffice it to say that I am not advocating a return to some illusory *good ole days*, I am advocating that we look carefully at the trends which are shaping our future, radio-wise, and to look critically at what is happening to the public's rights as it pertains to broadcasting. A have said many times the main two gripes I have about the WOWO deal are ...

1) The fact that a company is being allowed to buy a successful broadcasting outlet, a *dominant* full time signal which is run all live. and have no intention of operating it. I find that reprehensible, especially since other options are available to that company.

2) The FCC has blatantly thrown out public omment because the plain folks who attempted to 'petition the government for redress' and to protest this *sale*, were not communications lawyers and were not versed in the arbitrary 'format' that the FCC demands for such comment. This part is absolutely abominable and makes any other factors of this sale seem like harmless details by comparison.

On the same token, I am absolutely amazed at the number of people who see no problem in this situation. Most see this as merely a business deal, a simple matter of buying and selling properties. On one hand it is just that. But this FCC thing is a clear case of the public's rights being blatantly violated and the lack of concern on the part of those on this group (who should be very concerned) is amazing and very frightening.

We talk about a free country, but it is all empty words and bullshit if we can allow substantial comment to be tossed out because it didnt follow a convention and format. So now are we saying that only those with communications degrees are allowed to petition for redress?

As I ahve said, people, this is about more than WOWO. If it were just about WOWO I would, perhaps post a note of opposition, maybe even send a letter of protest... Or maybe do nothing. But this is not about the fate of a single station in Indiana and another in New York, it is about a glaring descrepancy in the function of the government agency with which we as broadcasters must deal on a regular basis. This is more than whether *your* ox is being gored right now,

it is about the whole process of buying, selling and operating radio in the USA. It is about the whole notion of public service, the notion that we, the people are owners of the airwaves that stations *use* to transmit on.

Had the FCC read, considered and rejected the protests, that would have been one thing. But they did not, they simple wrote the people off because the letters did not conform to some format code that moist of us dont even know about.

We are in danger of losing some very basic rights as citizens here. You can call me paranoid, and all that and say I am just ranting, but this is a very real threat. Not at this moment, but if we dont stand up and say wait a cotton-pickin minute, then one day, while we are so busy worrying about the Liberals, Conservatives, Democrats, Republicans, and all the other meaningless horseshit, we might wake up,to find that what were once rights are now memories, and the Repubicrats will be laughing all the way to the bank.

Bill

Does anyone know the whereabouts of Bill Quinn? He was on WQEW in New York in the late evening hours. Earlier he was on WNEW in New York in the morning.

Thanks for any information.

Bob

8. Announcing the Boston Radio Archives!

Newsgroup: rec.radio.broadcasting
Date: 1995-01-01 03:47:48 UTC
From: Garrett Wollman <wollman@halloran-eldar.lcs.mit.edu>
Message-ID: <3e58l4$3n6@vixen.cso.uiuc.edu>
Source record: 35716

A strange urge has possessed me this month, and I wasted a lot of potentially useful time putting together a number of WWW pages. However, my loss is your gain!

Announcing the Boston Radio Archives, a new public service maintained by Garrett Wollman and Scott Fybush (and hopefully Peter George).

The archives currently include the following information:

o The Boston Radio Dial: a station listing and (slowly added) station information pages; links to stations' own WWW services.

o The Boston TV Dial: likewise for television stations.

o The Group Owner Listing: Boston-area stations listed by group owner.

o The Sound Collection: sampled legal IDs from 47 Boston-area stations, 8 Reno stations, and 17 other stations (including the late WBSB Baltimore, WXTY Ticonderoga, and WGFM Schenectady). (If you don't have audio capability over your net connection, I'll trade for a tape of your local stations.)

We hope to soon add Scott's New England RadioWatch postings, and complete the station information section (as I write, only WRKO and WBZ are finished). We welcome your comments, input, and (especially) document contributions; please send all correspondence to:

>>>>> radio-nerds@radio.lcs.mit.edu <<<<<

The URL for the archives' main access point is:

ftp://radio.lcs.mit.edu/radio/bostonradio.html

As the URL indicates, the entire collection is also available via FTP. (This machine does NOT support HTTP.) Here is a text version of the access page:

==========

Welcome!
****

The Boston Radio Archives are provided as a public service by Garrett Wollman and some friends. The information presented here is believed to be accurate, but we take no responsibility for any errors therein. This service is neither provided nor sanctioned by the radio and television stations listed here, and is subject to change or discontinuation without notice.

With that out of the way, here's what we presently offer:

o The Boston AM Dial
o The Boston FM Dial
o The Boston TV Dial
o Stations by Group Owner
o Index of Samples
o Garrett Wollman's reception listing

Here are some other radio-related links which you may find useful:

o AIRWAVES Radio Journal
o Current AIRWAVES issues
o WOWO Listeners' Guild
o Mark Shneyder's Boston RadioWatch
o Reni Kahle's Ottawa Radio Page

We welcome your input! Please send any interesting local radio- or TV-related information to one of the addresses below.

wollman@lcs.mit.edu
radio-nerds@halloran-eldar.lcs.mit.edu

9. Mario Cuomo and Rush Limbaugh

Newsgroup: rec.radio.broadcasting
Date: 1995-01-01 03:47:49 UTC
From: richwood@commspec.com
Message-ID: <3e58l5$3n8@vixen.cso.uiuc.edu>
Source record: 35717

IM>Apparently there are reports that EFM Media founder Edward F. McLaughlin, th
IM>man who plucked Rush Limbaugh from a KFBK local talk show and brought him to
IM>the national audience, is trying to get outgoing New York governor
IM>Mario Cuomo to do a talk show.

Mike,
They'll have to stand in line with the rest of us at the
take-a-number machine. ABC is reportedly interested, as is WOR and many
others. The real question is whether or not anyone can make money after
paying the salary.

The other question is whether or not he'll be content to sit in a
studio for three hours a day. Will he be off the air when some political
event happens, like Buchanan?

It's always a crapshoot when the talent's real interests lie elsewhere.

Rich
Director - WOR Radio Network

10. WANTED: Radio Playlist Program/Database

Mornin' all ....

Question: Can anyone poitnme/supply a copy a decent databasestyle system for listing/programming tracks for radio?

Used to use a system in my commercial radio past that was track-based and captured info on titel, composer, tempo, time in+out+total etc.

Using this info, it could thus program tracks for generic portion of the day (in radio jargon, "Day parting").

Not looking for a rocket science program here foks - just something more than a song/album database system.

With thx ....db....

Don't bet the farm on "radio on demand". At the NAB Radio Show I sat in on a session where the results of a national survey of media use were presented. It seemed that quite a few people out there have no idea how to set the push-buttons on their cars.

Also, it seems that even people who have CD players in their cars spend more time listening to the radio.

Part of radio's attractiveness is that you need not interact with it to enjoy it. You just turn it on, sit back and listen to somebody else pick the music. "PC radio", "radio on demand" and similar concepts fly in the face of the essence of the medium.

Yes, there are some would-be armchair PD's out there who will love to program their radios to produce a particular sound... until they get bored with it.

Also, has anybody given any thought to how "radio on demand" would affect advertisers? I sure as hell wouldn't advertise on a station if its listeners could program their radios to ignore my spots.

12. was: Radio on Demand-Ick!; What about artistic expression?

>Then we have a playlist of the top 100 CDs from each era in a server and
>all progressive and interesting music suffers the same fate as the Buggles
>outlined "Video Killed the Radio Star". Now we'll have to get John Wetton
>and Trevor Rabin back for a new hit "Servers Killed the Future Star".
>When 10 million people can choose between 10 subjects and 100 CDs each,
>who will bother to look for new stuff? Please don't say Empty-Vee,

I beg to differ. What do we have now, on the radio? We have the top 100 CDs, being played in an endless rotation. When those wear out, there are another 100 behind them, all with the same sound and formula. Artistic expression? You've gotta be joking! The music industry wants product that it can sell, packaged for mass consuption, and programmed to "the lowest common denominator.

I've been trying for a year and a half now to get a syndicated radio show, Exposure, on mainstream radio stations. The music is artistic, complex and challenging. Of course, the mainstream stations won't go for it - it's too different. Ok. So I talk to college stations. They feel it is either "not different enough," or the station programs itself with a set format, just like a commercial station. Can you imagine the frustration?

If radio dies, I will not mourn it's death. People like me, who belive in the music that the artists on our show make, feel completely passed by and shut out of the radio world. We're tired of the formats, the tight playlists, recylcled and homogenous sound. Where can we turn? The answer is new technologies. Maybe someone with a lot of bandwidth to spare will put an "avant-garde" or "syndicated show" channel on some audio-on-demand service. Maybe then, our type of music will have a chance.

I'm still persuing radio stations to carry our show. I belive very deeply in the type of music we play. If a new technology comes along that will allow for more room for art instead of exclusively McMusic, I will celebrate.

The National Radio Club is this country's largest DX club dedicated to DXing the AM band. The newest AM logbook has just been published with the very latest info (call letters, addresses, formats, facilities, networks, etc). The cost is $19.95 to non-NRC members ($16.95 to members). Write to National Radio Club, Box 164, Mannsville, NY 13661 to order, or for more info on the club. DX News, published 30 times per year, is the club's magazine which features the latest in AM station facilities/call letter changes, members' loggings of their DX (both domestic and international) and a column called musings, which are like a letter from the member to the entire club. Also featured throughout the year are technical articles (how-to-build antennas, etc), sports networks, and other radio-related articles. Membership is $24.00 for new members and $22.00 for renewals.

Workstations such as the PR&E ADX and Orban DSE-7000 are excellent machines. Other systems worth a look at that I have seen are Sadie, Sonic Solutions, and DigiDesign Pro Tools, all Macintosh based systems. Also, a great economical choice as some of the above listed systems can cost $20,000+ when heavily loaded (especially things with the old PR&E label on the front) is the SAW system for Windows. Software runs around $600 and audio card another $600. It is a solid system and for your average :30 or :60 second radio spot can work wonders and save a lot of time. Be warned though, don't skimp on the platform. The minimum requirments specified are to minimum. Go for a 486-66 or faster, 16 megs RAM, and as much hard drive as you can afford. The hard drive not only needs to be big but fast...this is very important. If possible, get a small hard drive to store the program and Windows on and dedicate the big drive to audio only. Avoid using a DAW computer for other applications then audio! Don't try to use a DAW workstation to print music logs in the morning... Digital isn't coming, it was here years ago.

In article <3ctpbt$gpr@vixen.cso.uiuc.edu>, Andrew Reninger
<andrewr@gate.net> writes:

"I'm close to wanting a PD gig and figure I'd better start writing so I'm ready when someday that GM calls me up and asks for my `programming philosophy.'"

In essence, a Programming Philosophy answers the questions, "how should a radio station sound," and "why?"

A good programming philosophy shows that you understand principles of how to attract and hold an audience, and that you know how to push the buttons and turn the knobs of your programming to achieve particular results for your station.

You always start with the audience. Who is the audience? What rules or principles describe their preferences? What elements of progamming can be adjusted, emphasized, in keeping with those rules?

Does a particular type of programming suit your audience best? What type of programming, and why? Is it better to pursue a "pure format" or some kind of "hybrid format" (e.g. "block programming") to serve the intended audience best?

In brief, a programming philosophy is an audience analysis and general set of operating principles, which answers the following questions (among many others):

Who is my audience?
Does my programming "find its audience," or is it "pre-tailored" for a specific audience? (The difference between leading and following the market.)
How long can I legitimately expect someone to tune in for a single stretch? Can I expect (and if so, how will my programming promote) audience loyalty? In the long-term (months or years), how soon will my audience "turn over"?
How much of each programming element (music, news, sports, DJ/announcer patter, public affairs, talk, commercial announcements, promotions, etc.) does my audience want/need?
Where are the most advantageous points in the hour/day/week to place programming elements?
What are the limits of good taste/acceptability for the intended audience; when do I start alienating my audience, or appealing to a different audience? What are the bounds, beyond which we will not go?

The GM wants to see that you

1. Have a coherent view of radio and the audience.
2. Can articulate and communicate a set of principles that will be the foundations for your decisionmaking at the GM's station.
3. Are in touch with the business bottom-line.

One thing, though. Unless you HAVE some principles or deeply held convictions about radio and how it should be done, preferrably tempered by several years of experience in the field and first-hand knowledge of what works and what doesn't, you probably shouldn't waste your time writing a "Programming Philosophy" document. GMs have seen many a PD come through the revolving doors, and they will generally be able to spot a bogus "philosophy." If you really don't understand/believe your own "philosophyat
works and what doesn't, you probably shouldn't waste your time writing a "Programming Philosophy" document. GMs have seen many a PD come through the revolving doors, and they will generally be able to spot a bogus "philosophy." If you really don't understand/believe your own "philosophy," that will expose you as a posturing phony. If having a "programming philosophy" is a true prerequisite to being a PD, and you don't yet live and breathe your own such philosophy, perhaps you are not yet ready to be a PD. You can't buy these things off the shelf. But you can assist the PDs at the stations you work, in hopes of broadening your outlook enough to formulate or adopt a coherent philosophy.

USA DIGITAL RADIO IN-BAND ON-CHANNEL
DIGITAL AUDIO BROADCAST SYSTEM DESCRIPTION

USA Digital Radio
332 South Michigan Avenue
Suite 605
Chicago, Illinois 60604
USA

December 1, 1994

EXECUTIVE SUMMARY

The radio listening public is ready for top notch audio performance on demand. The market is also ready for new digital data services. In-Band On-Channel Digital Audio Broadcasting (IBOC-DAB) has been developed by USA Digital Radio to offer the highest quality audio to the listening public (ISO/MPEG-Audio Layer II MUSICAM up to 256 kbit/s) while also offering expanded data services to the marketplace. IBOC-DAB has been designed for cost effective deployment which leverages existing broadcast and transmission infrastructure. Backwards compatibility with existing broadcasts ensures an efficient seamless transition to digital broadcasting with no disruption of existing services while remaining consistency with existing spectral usage and regulations. USADR has developed IBOC-DAB to offer new high-quality high-performance music and data services that are affordable, practical, backwards compatible with existing services and very low risk. USADR's development of practical affordable IBOC-DAB systems will allow widespread deployment of IBOC-DAB in the United States in a short time. USA Digital Radio has hosted successful field trials of AM and FM IBOC-DAB in the United States.

USA Digital Radio is now in the process of finalizing the design on its AM and FM IBOC-DAB systems. USADR is also preparing to work with integrated circuit and receiver manufacturers on the rapid commercialization of receiver technology. Since USADR IBOC-DAB will re-use existing transmission infrastructure at a low incremental cost, deployment of DAB transmitters in all United States markets will proceed very quickly.

This paper describes recent technical advances in source coding, error correction and digital modulation which enable FM-IBOC to successfully deliver high performance audio and unprecedented ancillary data capacity through harsh multipath in the mobile environment. This paper also describes the challenges met by AM-IBOC.

USADR FM-IBOC DAB

The USADR FM-IBOC system for digital audio broadcast is an efficient and multipath robust information system for the transmission and reception of CD quality stereo (ISO/MPEG-Audio Layer II at 256 kbits/s) and ancillary data (typically 64 kbit/s). FM-IBOC DAB delivers a flexible platform for audio and data broadcasting while preserving and enhancing the existing VHF commercial FM economic and technical infrastructure. The USADR FM-IBOC system is in-band on-channel, complying with existing spectral emission regulations. Careful organization of the DAB spectrum permits the DAB and analog FM signals to coexist in the emissions mask without interfering. Challenges facing the practical implementation of FM-IBOC DAB include severe multipath, limited assigned channel bandwidth and aggressive requirements for music quality and data channel capacity. Major advances in the areas of audio source encoding, error correction and digital modulation have allowed the USADR FM-IBOC DAB system to meet these challenges.

Audio Source Encoding

The audio source encoding for the USADR FM-IBOC DAB system is based upon the ISO/MPEG- Audio Layer II MUSICAM standard.

A desirable characteristic of analog FM transmission is the soft failure mechanism - graceful degradation - in eventual audio impairment. In the presence of increasingly severe channel distortion, the audio recovered from an analog FM signal is commensurately distorted but is usually intelligible. Furthermore, the use of monophonic/stereo blending in mobile receivers can mask many transient multipath-induced impairments altogether. The USADR FM-IBOC DAB system mimics the soft failure characteristic of analog FM by implementing hierarchical ECC and advanced error concealment methods to provide for a gradual deterioration of music quality as the channel bit error rate increases.

A hierarchical ECC coding approach is used to accomplish gradual "graceful" audio degradation in the presence of severe channel impairments which may overwhelm the capability of the adaptive equalizer. Critical MUSICAM framing information and toll-grade audio bandwidth are protected most carefully. Additional MUSICAM data are encoded in accordance with their relative importance in music reconstruction.

Error Correction

The allocation between the audio source encoding and error correction is dynamic in order to maximize the number of bits available for error correction coding (ECC) or ancillary data channel transmission. Unlike conventional digital QAM systems based on orthogonal frequency division multiplexing (OFDM), which must rely upon the used of forward error correction (FEC) codes to operate adequately in the presence of narrowband fades or interference, the USADR FM-IBOC DAB

signal set is inherently robust, and in many circumstances
requires only modest ECC to provide sufficient performance. An
interleaver (less than 500 ms) is used to accomplish time diversity and
data randomization.
Modulation

The principles of the USADR FM-IBOC DAB modulation system design are
drawn from the demonstrated robustness of spread
spectrum correlation receiver systems which utilize wideband, noise-like
signals. Although originally developed for military applications,
spread spectrum techniques have found diverse application in consumer
telecommunications in areas such as the global positioning
system (GPS) and wireless local area networks (wireless LANs). The USADR
FM-IBOC DAB modulation scheme improves upon these
principles by incorporating a novel signal set design that maintains a
high degree of spectrum efficiency, a feature which most spread
spectrum systems lack.

The USADR FM-IBOC DAB modulation scheme utilizes a non-constant envelope
signal set in order to obtain high information density
while remaining compliant with the sharp spectral features and narrow
available bandwidth of the FM mask. A linear transmitter is
required. However, only a small fraction of the power that is required
to produce a strong analog FM signal level is required for a strong
DAB signal.

Despite the requirement for linear amplification, the DAB signal set is
robust against small amounts of compression nonlinearity. An
advantage of this signal set when compared to many other non- constant
envelope digital transmission schemes is that the signals
exhibit only a mild crest factor expansion of 6 dB with respect to that
of a sinusoid. Large transient peak-to-average power handling
capability in the transmitter is unnecessary.

The VHF channel is plagued by significant multipath, particularly in dense
urban environments where most listeners are situated. These
environments can be characterized as having short strong multipath
delays under 5 microseconds in duration with additional weak
echoes of up to 20 microseconds in duration. Multipath echoes create
strong interchannel interference (ISI) in digital communication
systems because of echoes at various amplitudes, phases and delays with
respect to the direct or strongest path signal. A widely
accepted approach for combatting ISI is the use of a multicarrier
modulation method. This has the effect of increasing the baud interval
to a length much greater than the expected multipath delay. To
compensate for the decrease in baud rate, a plurality of carriers is
required to convey the same amount of information. The USADR FM-IBOC
DAB system employs 48 separate subcarriers, each
operating at 8 kbit/s, to achieve an overall aggregate channel data rate
of 384 kbit/s.

The signal set employed in the USADR FM-IBOC DAB system was designed using a novel method. The resulting signals can be described as being wideband, noiselike and mutually orthogonal. The DAB signal and the analog FM waveform are not coherent.
When observed individually, each of the DAB carrier signals has a spectrum which spans the entire 450 kHz DAB bandwidth with a 200 kHz void centered about the analog FM carrier. Data is impressed on the DAB subcarrier signals using biphase keying. The signals are generated from digitized sample amplitudes stored in the DAB exciter and converted to analog waveforms using conventional DACs.
A unique characteristic of the USADR FM-IBOC DAB signaling set, particularly when compared to code division multiple access (CDMA) techniques, is that the transmit and receive filter shaping is directly incorporated into the design of the signal set. Further filtering is unnecessary, avoiding possible disruption of the signal set properties. The orthogonal property of the signals insures that carrier to carrier interference is minimized whether or not channel impairments are present. The wideband nature of the signals is responsible for their robust performance in multipath. Specular multipath, caused by large signal reflections, is particularly disruptive to communication systems because it causes deep notches in the signal spectra which significantly attenuate some frequency components. The principle of wideband signals is that although a narrowband multipath notch will affect all of the signals at some frequencies, there will still be sufficient remaining energy at other frequencies to permit error-free reception. This approach is in contrast to other digital modulation techniques, such as OFDM, which utilizes many narrowband sinusoidal carriers, some of which may not be altered by the multipath notch, and others which may be completely disrupted.

Although primarily intended to combat multipath, the wideband signals help to mitigate narrowband interference as well. A practical IBOC system demands robust performance in the presence of narrowband interference because of the analog FM cochannel and the potential first adjacent channel interference. The analog FM signal is generated with nonlinear modulation. Although the deviation is limited to 110 percent of 75 kHz, transient sidebands are generated by the modulation process which extend into the region where the DAB signal is present, particularly when significant audio processing (clipping) is used. In addition, in crowded markets with older stations that are subject to grandfather regulations, the FM spectral peaks from the possible first adjacent FM station are situated only 200 kHz from the on-channel FM carrier and similar in amplitude to the DAB signal. Wideband signal reception is effective in spreading both types of interference to minimize their impact on receiver performance.

Synchronization

Adaptive equalization is key to adequate DAB receiver performance in multipath. In order to facilitate rapid synchronization and training of the adaptive equalizer, a reference signal which does not vary from baud to baud is added to the composite DAB signal at a reduced power level. Although the use of a buried reference diminishes the power that is available for the data modulation because of the ceiling set by compliance with the emissions mask, it has been found that channel corruption, not signal fading, is the dominant source of impairment in the critical urban environment. The reference signal can thus be considered as a "pilot tone." However, the reference signal itself is designed to be wideband so that it approximates the frequency response of the modulated data signals. This insures that sufficient amplitude and phase information is available in the reference, when recovered in the receiver, to accurately equalize the wideband signals.

A further benefit of the reference signal is that its presence facilitates the design of a robust power amplifier for the DAB signal. By
incorporating an adaptive equalizer, in the transmitter, which is trained on the reference, frequency variations and phase errors due to component aging and thermal variations can be minimized.

Spectrum Usage

The spectrum of the USADR FM-IBOC DAB signal is situated primarily in the protective sidebands associated with the 600 kHz FM
station mask used in the United States. The sidebands begin at a 100 KHz offset from either side of the unmodulated analog FM carrier and extend to 225 kHz from the carrier. The amplitude of these sidebands is attenuated by between 25 and 30 dB with respect to an unmodulated carrier in a 1 kHz resolution bandwidth.

USADR AM-IBOC DAB

The USADR AM-IBOC DAB system is designed to meet several fundamental design requirements. The system is in-band on-channel,
fitting within the 40 kHz portion of the United States emissions mask for AM. The AM-IBOC system is backwards compatible,
maintaining existing analog AM broadcast signal quality and coverage. The AM-IBOC system employs ISO/MPEG Layer II MUSICAM
source coding at 96 kbits per second and supports a data channel. The IBOC-DAB coverage regions meet or exceed existing analog
AM primary coverage areas. AM-IBOC DAB is made affordable by leveraging existing broadcast infrastructure and assets. Affordable
receiver implementation is also being realized.

The USADR AM-IBOC DAB system employs a 40 kHz total modulation bandwidth. Due to this stringent bandwidth requirement,
USADR AM-IBOC DAB employs ISO/MPEG Layer II MUSICAM at a bit rate of 96 kbits per second joint stereo, lower than that of
USADR FM-IBOC DAB. Transmission of music, ECC and ancillary data for a total of 128 kbits per second in this bandwidth requires an

average bandwidth efficiency on the order of 3.5 bits per second per Hertz while avoiding interference with the analog AM already in place. The USADR AM-IBOC DAB modulation format is carefully designed so as to not interfere with the existing analog transmission.

The AM channel has been found to be somewhat less hostile than the multipath plagued FM channel. While adaptive equalization and phase correction are still necessary, the less stringent channel characteristics allow for the AM-IBOC implementation of higher bandwidth efficiency signaling than FM-IBOC.

Since AM is a nonconstant envelope signaling format, the AM transmitters used to date for AM-IBOC DAB demonstrations and testing have been found to require very little modification to transmit the USADR AM-IBOC DAB signal.

CONCLUSION

The radio listening public is ready for top notch audio performance on demand. The market is also ready for new digital data services. In-Band On-Channel Digital Audio Broadcasting (IBOC-DAB) has been developed by USA Digital Radio to offer the highest quality audio to the listening public (ISO/MPEG-Audio Layer II MUSICAM) while also offering expanded data services to the marketplace. IBOC-DAB has been designed for cost effective deployment which leverages existing broadcast and transmission infrastructure. Backwards compatibility with existing broadcasts ensures an efficient seamless transition to digital broadcasting with no disruption of existing services while remaining consistency with existing spectral usage and regulations. USADR has developed IBOC- DAB to offer new high-quality high-performance music and data services that are affordable, practical, backwards compatible with existing services and very low risk. USADR's development of practical affordable IBOC-DAB systems will allow widespread deployment of IBOC-DAB in the United States in a short time. USA Digital Radio has hosted successful field trials of AM and FM IBOC-DAB in the United States.

USA Digital Radio is now in the process of finalizing the design on its AM and FM IBOC- DAB systems. USADR is also preparing to work with integrated circuit and receiver manufacturers on the rapid commercialization of receiver technology. Since IBOC-DAB will re-use existing transmission infrastructure at a low incremental cost, deployment of DAB transmitters in all United States markets will proceed very quickly.

Guess I should let you all know who I am so we can be friends. y name is Dan Feliz and I am presently working at KEDG, Las Vegas(modern Rock). I am the technical director and love doing what I do... everything. I originally started at KROQ in LA until I blew the whistle on the Kevin and Bean with their stupid little prank called "confess your Crime." I won't go into anymore detail unless asked cause I would hate to bore you all. I then went to KKLZ, Las Vegas as a production assistant for a year then on to WBAB, Long Island for another year doing production and producing "Homegrown" their local music show. After enough snow I ended up back here in Vegas about 2 years ago. i am more or less interested in all facets of radio and production and am really enjoying reading all you guys have to say on the variety of topics you talk about. Well thanks for your time and I hope you all are having a great holiday season.

LVEDGE@AOL.COM

PS I'm wondering if any other station out there is running a BBS. Please let me know if you are or are interested.

My wife recently lost her part-time air shift due to an LMA in New Orleans, WRNO-FM was bought by WEZB-FM's company. She has three years of on air work at WRNO and 4 years before that at WLDC at Loyola U. in New Orleans.

If there are any openings out there for part-time weekend or other shifts please let us know and she'll send out her tape/resume ASAP.

Also, what are some good sources BBS's etc. (other than R&R) for looking for radio work for a three year part-timer, who I feel is good at what she does (but I'm biased, of course)

Any replies would be most welcome at my Prodigy account e-mail.

This great show once was broadcast in Winston-Salem, but has been
off the air for at least a year. Is this the place to find out where
I might hear the current shows, or to find someone who might be willing
to share tapes?

>The point is we as a broadcastrer pay ASCAP and BMI fees for using the
>music in the operation of our business. We have not paid for the
>business owner to use the music we broadcast in the operation of their
>business.

This is correct. Another way to look at it is this way:

If I purchase a CD, a significant component of the cost is the individual license that I receive to utilize that CD for my personal use. There is no way that it can be argued that since the "fees have already been paid" on that CD (they HAVE as far as my use is concerned), there is no reason for a radio station to pay ASCAP/BMI if they play MY CD.

Those responsible for collecting fees for the use of the music do not care about the mechanism used to transport the music to the store. "Stairway To Heaven" is "Stairway To Heaven" whether it is played from a CD player in the back room or from a radio in the back room. The fact that it comes from a radio station does not "purify" the programming, making it fair game for any and all use. The radio station pays fees to feed that music to the ether; what happens to the music after that is still a matter of concern to BMI/ASCAP.

: provision for numerous local options for the station....

That's great if your local "programming" consists of spot inventory. How much really local programming can fit into the 2.5 minute holes many of these syndie services have? Maybe 1 spot, a :30 weather, and a :30 announcement about the next city council meeting. That ain't much. I've seen a lot of smalltown radio where there is significant local content, even in "all-music" formats.

Any satellite-delivered service eliminates the need for a DJ or news reader to be present at the station. For anywhere from $300 to ?? per month depending on the size of the market, a station can have professionally-produced programming. No bother with buying music, a news service, or whatever. This makes any radio station operable by 1 or two personnel (GM and/or engineer). A lot of stations in Podunk sound like they're in downtown LA or NYC, simply because of satellite.

36. Alternatives to Satellite programming (was: benefits of satellite..)

This makes any radio station operable by 1 or two personnel (GM and/or engineer). A lot of stations in Podunk sound like they're in downtown LA or NYC, simply because of satellite.

How wonderful. Now every place on earth can have homogenized, slick, vapid sounding radio. Who needs pesky, demanding air talent? Certainly we dont need any news staff, hell what could you possible want to report? A local tornado? Maybe a traffic tie up, overturned semi, lost kid... Naw gimme more Madonna, Michael Bolton, Clint Black and Garth Brooks. Gimme that 1-800 number again... Yep I want my "Ten Minutes Before The Hour..." ! I DEMAND my endless re-runs of Bruce Williams!

But seriously...

If your station is in such deep soup that you are entertaining such a move... think again. Try something different, give the people of your community something to listen to, like local information. You can get volunteers from the community to man your small station. You can offer local merchants air time to take calls on their specialty. Such as a home-improvement show hosted by the local carpenter or lumber yard. If you are in an agricultural area, offer ideas on farming from local farm & fleet shops. If there is a college in your listening area, offer internships. Let them find out what real radio feels like. It wont cost you anything (above operating the transmitter) and it will be local and live. Try promoting your station as 'true community radio'. Gear the format to the audience. Let the garden club come on the air and talk about roses or day-lilies, let the local preacher on the air live Sunday Morning instead of the taped evangelist from some other place. Do remotes from the local school basketball games. Promote the local fairs, talk about your town, Involve other, nearby, towns...

The possibilities are endless and you will not have to pay for some vapid faceless satellite feed. Instead these businesses could pay YOU for blocks of time which will act as both community service AND promotion of local businesses which will improve your local economy.

It won't sound like New York or LA, but then again you are not serving New York or LA, you are serving YOUR listening area. So let

the programming reflect that service area.

It is not that difficult to be *the* station that provides something in your area instead of yet another slick, over-produced jukebox from the sky. There are countless alternatives to satellite, but you have to be a gutsy station owner, GM or PD who is willing to make your station into something that is worth looking for on the dial and listening to.. You have to be willing to stand by your station and your community and *serve* them. Finally you have to be willing to blaze a trail, rather than follow . In the short run it is harder, but in the longer run you will be the place people turn for *real* programming for *their* lives, instead of the *one-size-fits-all* feel of the satellites. Remember that great minds in history didn't follow, they led the way. Be a visionary, be creative, show the people in your community that you care about them and their lives.

Best of all, with creativity and courage (two traits that dont cost anything but repay so much), and by including your community in the programming, instead of shutting the doors and opting for satellite, you will be able to do a lot for NO (or next to no) outlay of cash, instead you will be able to charge for shows that both serve your community, promote local commerce and bring you increased operating revenues.

I am sure I will be flamed for this idea, and told it is stupid, but if you are ready to flip the satellite switch, you aint got much lower to sink, or much left to lose.

I would be glad to discuss this further with anyone who is considering satellite. Please dont bother with flames, "it can't work" comments and such.

Hello - thank you for reading this.

I'm looking for recordings of Jean Shepard, from his radio show on WOR 710 AM in New York. He had been on the air once a week with a sort of "story hour"; a little over ten years ago he made his last broadcast on the
radio airwaves (commercially - he's also a ham radio operator). You may also know his work - he wrote and produced a very popular movie for this time of year entitled "A Christmas Story".

It was a story of a boy and his search for the "Red-Rider bee-bee gun" for Christmas. The movie is narrated in traditional Jean Shepard style; the radio
shows were capsule versions of sub-plots which appeared in the movie and more.

Please direct any information to me at: N1GDR@AOL.COM

Thank you and Merry Christmas!

Craig

Tom,
I'm a regular listener in N.W. Iowa but KSOO in Sioux Falls S.D. goes to low power at 5:15 in December which is about when I get out of work (radio).
I've been searching for your show on another affiliate but so far no luck.
Is there a way to get the lists of stations that carry you? I'd appreciate being put on the right track!
In the meantime I'm hoping January brings better reception.
Give 'em Hell Tom!

Jeff,

This is in response to your "first in wins" article. I am 31 years old and have dabbled in radio since I was very young. You definetly have a point about the first in scenerio. It seems as though many people in your business feel that if you did not start as early as they did in radio then they are outsiders. Further, these same broadcasters that are charged with the job of entertaining and catering to the public seem to have an arrogance about them that seems to be a very pervasive one. It is seemingly and increasingly becoming a truism that broadcasters (broad casters --an oxymoron perhaps?) have lost touch with their public.

If you indeed are shaking your head right about now then that is my proof in point. If you are indeed continuing on with my response then good for you. I have somewhat of an education. I have been in a job that has paid well for most of my career of some 12 years with the same company. I left that company to pursue a career in the entertainment industry (radio to be specific) and although I have been in a steady pursuit in a local market here in Atlanta for the past 2 years I have found that the opportunity for getting a foot in the door is going nowhere. I don't pretend to know it all; in fact I now realize how little I really do know. I have dealt with apathetic PD's not only about my sincere pursuit; but with their complacency when approached with new, fresh ideas.

As I said, I don't pretend to know it all, but what I am coming to know is that there is a 'better than you' attitude (in general) from ahost of talent and PD's out there that really shows an insecurity and a lack of interest in anyone that does not have a long history in hands-on work in the industry. My rebuttal is this: I may not have had the time in your business (and some broadcasters out there act as if it is in fact 'their business' and no one else's) but then again I'm not just shelving my duties as a person responsible for the entertaining and informing of tens of thousands of people either.

I am not jaded by a few failed pursuits; life is full of dissappointments. I realize that this may appear to be a very negative depiction as seen from 'the other side' but the truth is not always ear candy.

In defense of the business that I will one day call my life I will say this: I have encountered a few folks in radio and entertainment in general that have been quite helpful and interested (to the level that they could afford) in seeing me succeed. I DO believe that there are people out there that have a genuine intterest in all things pertaining to their work. I will continue to pursue working with and around those people.

Regards,

Mike

I wish to take an opportunity for all who have contacted the WOWO
Listeners' Guild, over the past several months. There have been a few
folks that have contacted the Guild over the past several weeks to ask how
they could help. Due to an unfortunate error, some of the replies have been
lost. If you have contacted the Guild over the past few weeks and have not
gotten a note of acknowlegement from us, we ask that you drop us a line again.
We appreciate your help in what ever way you possibly can. Were not asking
for money or any tangible thing. Your individual help on this matter is
of the utmost importance....mainly in writing your informal comments to the
FCC with the WLIB/WOWO Application File Numbers prominently listed on the
envelope and on the letters you send. Also, you need to send it in TRIPLICATE
to the FCC address in the AM Branch. It wont hurt to send a copy to both
legal teams who are doing all of the "wheeling and dealing" of this event.
And if you are even more ambitious, send a copy to both WLIB and WOWO for
use in their public files (which is an FCC mandated requirement).
It is needless to say that we need a REAL "Christmas Miracle" to keep
WOWO alive. Lets all do our share and maybe we might get the best Holiday
Present in 1995, we will all still be able to listen to WOWO for now and ine
the FUTURE ! Season's Grettings to all and God bless.

Peter Q. George (N1GGP)
The WOWO Listeners' Guild

That is awful. I had heard about this elsewhere. Worse still would be
if KGBS in Dallas (also on 1190) were to file to increase it's power at
night from 5k and change their patter to eliminate the need to operate
at night with their 12 tower array. They run nothing but infomercials at
night.

46. ADMINISTRIVIA: Christmas Shutdown of rrb/AIRWAVES

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:45 UTC
From: wdp@airwaves.com
Message-ID: <3ed1nl$iq1@vixen.cso.uiuc.edu>
Source record: 35604

Hello all:

I am going to take a much needed haitus from my daily chores of moderating this group for the week between Christmas and New Years.

I will return to active status on Jan 2 1995. Please hold your submissions until then. I will try to log in before then but I am not promising anything. We arehaving family in from out of town and I will be dealing with that.

I am recovering fairly well from my accident and my mother was released from the hospital on Friday and she went to the local country dance on Wednesday <yay mom>. She is walking with a cane.

Again, thanks for all your letters and cards over our accident. Mom was quite touched that perfect strangers sent to her.

See ya next year..

Bill

47. Indianapolis RadioWatch 1-1-95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:46 UTC
From: jimgrey@iquest.net
Message-ID: <3ed1nm$iq4@vixen.cso.uiuc.edu>
Source record: 35605

Happy New Year! Happiness and success to you and yours in 1995.

***WIBC Morning Show to Be On TV in 1995: Local TV station WRTV (Ch. 6) will begin telecasting the WIBC-AM (1070) morning show live from 5:00 to 6:00 a.m. This gives WRTV a dirt-cheap extra hour of news, traffic, and weather weekday mornings. WRTV's move may be in response to competitor WISH-TV (Ch. 8) expanding its morning news program in the fall to begin at 5 a.m.

***Annual Indianapolis _Star_ Media Poll Results Published: Steve Hall, _Star_ media critic, has compiled votes for the best in Indianapolis broadcast media in 1994. Unfortunately, only two of 15 categories highlight radio. Best Indianapolis radio station went to news/talk WIBC-AM (1070), with AOR WFBQ (94.7, "Q95) in second place, and alternative rock WRZX (103.3, "X103") tied for third with Bloomington's AAA WTTS (92.3). Best Indianapolis radio personality/team went to WFBQ's Bob and Tom, with WIBC's afternoon talker Jeff Katz in second place, and controversial talker Stan Solomon (of WXLW-AM (950) and WGGR-FM (106.7)) in third place.

***This Town Ain't So Big After All: I stopped by my apartment complex's office to pay my rent last Friday, and there met a gentleman, also paying his rent, wearing a denim jacket bearing the "93.1 WNAP" logo. Conversation was struck, and sure enough, it turned out he's one of their part-time board ops. We talked briefly about the station, which is still jockless after four months on the air. He told me that management there is not even telling the staff when real, live jocks will finally hit the airwaves. He also mentioned that they need one or two more part-timers.

***A Note From Me: I've received a comment or two since I've started making these reports that I focus too much on WIBC, WNAP, and WFBQ. I agree! Unfortunately, I don't hear much about other stations in the market. These guys just seem to make the most news. I do my best to listen around, see what everyone's up to. I follow Steve Hall's column in the Indianapolis _Star_. I'm not even above posting blind speculation from time to time! Just so you don't think I write about only my faves, here's what I listen to (when I'm not listening to a tape or CD). During breakfast, it's Jeff Pigeon and the Morning Team on WIBC-AM (1070). The news/weather/traffic is the best in town; unfortunately, the rest of the program is schlock city. I wish they'd just shut up and play music! On the way to work, and for the first hour or two after I arrive, it's Bob and Tom on WFBQ-FM (94.7). I usually listen to Rush Limbaugh on WIBC from noon to 3. I sometimes listen to WJEL (89.3), the Washington Township School Corp. noncomm with a very listenable pop-music format, while I'm at work. I catch the last of Fresh Air and then All Things Considered on WFYI-FM (90.1), on those days I don't hit the fitness room before I leave work at 4:30. When I work out before

coming home, and around the house after work, I listen to urban WTLC-FM (105.7, "Power 105.7). These guys need a little polish -- their jocks aren't very "big market", and their sweeper package sounds like it dates from the mid-80s. But they're very community-oriented, which I respect. Later in the evening, when I'm here by the computer, I turn on the SuperRadio behind me and listen to the Carmel Clay Schools station at 91.3 -- which darn near never gives its calls, so I forget what they are. The high school kids have a lot of fun on the air there.

48. Terre Haute Radio News 1-1-95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:47 UTC
From: jimgrey@iquest.net
Message-ID: <3ed1nn$iq5@vixen.cso.uiuc.edu>
Source record: 35606

Rumors have persisted for several weeks about an impending format change at Terre Haute, Indiana's AC WMGI-FM (100.7). Last night, on the way to a New Year's party with my fiancee, when I just did *not* want to hear "Won't Get Fooled Again" on AOR WZZQ-FM (107.5) for the billionth time in a decade, I surfed down to "Magic 101" to find it now the *former* "Magic 101". Its replacement is "100.7 Mix FM" -- and a younger format for the station than it's had since it switched from CHR and calls WVTS back in 1986. The "new Mix FM" was playing some seriously younger-skewing urban-leaning hot AC. I heard a bona-fide *rap* song last night, folks, something that has not been part of Terre Haute's airwaves since 1989 or '90 when CHR WPFR-FM (102.7) went bankrupt, and thus dark. (That frequency now houses easy listening WLEZ.)

In the weeks before the switch, rumors swirled around the radio community that a shakeup was in the works. New station management was trying, apparently, to throw everyone off by hinting they might go AOR, head-to-head with rock stalwart WZZQ. But with WMGI's new PD, fresh from an MD/APD stint at a Flint, MI CHR; and a consultant that's never done a rock format; it didn't seem likely.

A casualty of the change at WMGI is former PD/morning man Bob Day. Rumored gone are middayer RJ Cortwright, a Terre Haute radio fixture for eons; and afternoon guy ....errrrgh, I forget his name. How embarrassing.

Now for my commentary. What a relief to have the BORING "Magic" format gone; too bad I don't live there anymore to truly revel in its passing. The music was moldy and sleepy. The jocks did little more than read marathon liners: "100.7 Magic 101 playing a better variety of continuous light rock favorites from yesterday and today. That's the Magic Difference at 100.7, Magic 101." They said that EVERY time they cracked the mike. And then there was Love Songs in the Night, weeknights from 7 to midnight, featuring the *sappiest*, *drippiest* ballads, with an equally sappy, drippy jock. This stations ratings slid downward book to book over many years' time.

WMGI's new format, of which I heard a mere 20 minutes last night around 8, seemed to be brighter and much more uptempo. I imagine they've got the youngest stuff (i.e., the rap) dayparted into evenings only, and are being much less adventurous mornings. Sweepers are bright and sharp, but not overproduced and not overlazered and overswooshed, with a young, "up", male voice and a bright "100.7 Mix FM" jingle at the end. (The only other station in the market to use jingles is country WTHI-FM (99.9) -- it's refreshing to hear another station use them.) These guys have filled a major programming hole by playing younger pop music at night. Since WPFR, the only CHR, went dark, nobody has served the younger crowd in Terre Haute.

As you might guess, I thought Magic 101 was a joke.

No word whether WMGI will change calls.

50. Annalisa's whereabouts

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:49 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <3ed1np$iqa@vixen.cso.uiuc.edu>
Source record: 35608

Someone was asking about Annalisa, formerly with CR WZLX and, very briefly,
with WBOS....[By the way, when she was axed from 'ZLX in March 1993
the morning shift was filled by their current PM drive man, Chuck Nowlin
for about 4 months until "Captain Ken" Shelton took over the morning
show in late July 1993.]

Currently, she's on irregular schedule(varies from week to week) as
a part-timer at AOR WHJY 94.1FM in East Providence,RI.

I believe Anne Cody and Chuck Nowlin are the only 2 full-timers
left over from pre-Infinity regime....List of former 'ZLX personalities:
Bill Smith,Jeff Gonzer, Annalisa, Liz Solar, Greg Madden, late John
Popovich....Did I miss anyone?

Regards,

-Mark

51. The Arrow Format

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:50 UTC
From: mh5260@cutter.ship.edu
Message-ID: <3ed1nq$iqb@vixen.cso.uiuc.edu>
Source record: 35609

In the last Radio Column of the Washington Post several weeks ago, there was some discussion about Arrow 94.7 (WARW-FM) looking for ways to better their on-air presentation. Apparently, they had an ex-WASH-FMer in to talk about "less talk and more music". The Post article also talked about Arrow 94.7's generally lackluster performance (approx. 2.5 15th place in last book) and its roller coaster ratings between periods.

I personally think that Arrow 94.7 here plays the same music over and over. I have heard "Get Ready" by Rare Earth too much and every big 70's song at least twice a week. Arrow seemes to be concentrating way too much on the Guitar rock of the 70's. Isn't there more to the 70's than just Guitar Rock. I'm not saying Disco, but I am saying that their defintion of classic rock is too narrow. Also, their jocks are too happy sounding on the air. They sound like they aren't themselves - they are artificially happy and they add too much useless chatter to the on-air presentation.

Do others from the Washington/Baltimore area feel the same way? Also, do others in other cities who have an Arrow station find these same things happening or is the music broader? I'm curious because Arrow started out good here in DC, but I think it has turned into another Top 40 station except with Classic Rock. Maybe they should check out Dame Media's "River - Rock 'n Roll Without the Hard Edge" format!

Finally, does anyone in the DC/Baltimore area have trouble getting Arrow? I find that I get alot of encroachment from WDSD (94.7 FM), 50 kW from Dover, DE when I get on the outskirts of Arrow on the East and they just fizzle out to the north around Frederick. Other Washington FMs go much farther than this.

Thanks for you opinions.

Mike

> the morning.
>

He is now doing the "Make Believe Ballroom" for Juke-Box Radio.

Juke-Box radio is the brain child of former WNEW Chief Engineer Jerry Turro. He bought the WNEW record library, logos and program names, hired some of the old WNEW staff and has it running on WJBX, (103.1), an LPFM station he ownes in Ft. Lee, NJ. They have an LMA with a station in Rockland Co. NY and they hope to syndicate the format to other stations in the NY area.

Jack,
I don't think the "suits" had anything to do with it. Just ask anyone who worked here. Bob was tough to deal with and had no numbers. When you put those two things together it's no wonder he went out the door. BTY he's getting his butt kicked in Tampa at WSUN by Brian James at WFLA. Poor Bob, had a shot in the big time and blew it.

Jay Marvin

Message-ID: <3ed1o0$iqq@vixen.cso.uiuc.edu>
Source record: 35612

Happenings in the #40 market:

*Three of WGR's air personalities made news this week.

First,Chuck Dickerson("The Coach")became a target of Bills head coach Marv Levy during the latter's show on the Empire Sports Network(a regional sports channel)Monday night. Levy said that most of the players regarded him as a buffoon,and that what he did as a member of the coaching staff of the Bills was destructive-for that matter,wherever he coached,according to him. Dickerson held an improptu news conference during his show Tuesday to rebut the charges. In regards to the buffoon charge:"Why did he fire me? He hired me,and he kept me for 5 years. I was a buffoon for 5 years?" On the matter of what was done while on staff at the Bills:"He's the last guy in the world that wants to go to the media with anything...He tells you nothing,he says nothing and he hew-haws around. He was very pointed in his comments with me, so I must have hit a nerve." Callers backed Dickerson,while the players sided with Levy. Recall that this isn't the first time that someone in the Bills front office has gone after someone in the media. Many years ago,GM Bill Polian,in a tirade directed at a few media members-but most directly at Art Wander,then doing sports talk on WGKT(now WWWS;it was satellite oldies,then went hard rock/metal as WXBX-Rebel Radio 14X before switching to business)-told them to "get out of town." Polian did,they didn't. He's now GM of the Carolina Panthers.
Second,Rich Michaels(the midday motormouth)organized a carol-singing at a Williamsville school(the town has come under fire for a religion policy instituted in the schools). For all his promotion,it only drew 200 sustained-although he said,at the peak,about 400 were there-if only for a few minutes. I tell you,it does warm the cockles of my heart...:> He said this was intended to show you can have fun during the holidays(or something to that effect). Be honest,Rich...it was only intended to make you look good and get ratings. I was born at night,but it wasn't _last_ night. :) BTW,Channel 7 was the only one that gave you any sort of coverage-about 7 minutes into the newscasts at 5 & 6pm,Channel 4 put you at the _END_ of the 6pm news,and Channel 2 didn't put you on at ALL-instead,they ran stories on what the policy actually does. Another note:Today,he FINALLY brought up the fact,which was noted here weeks ago,that he was doing commentaries in another market. He didn't say which one,but he did say that it paid him $1,000/month. Michaels claimed he ended it because he wasn't going to be PC. Two letters,Rich:BS. Sure you did. I think-but can't prove-that there's more to this that meets the eye. Finally,Tom Bauerle had some sage advice for a person who called his show on Tuesday,when a Wal-Mart stroe on Amherst was robbed(which hit home for me,as my brother was working in the store at the time). The caller was with his children in his apartment,and asked Bauerle what to do. Tom,remembering what former Jimmy Griffin once advised us to do in a snowstorm years ago, told him to grab a six-pack and stay inside. As the Buffalo News' Buzz column

noted,"Yeah,that's what we need-not just a terrifed man sheltering his kids, a terrified,_boozing_dad sheltering his kids."

*Twelve stations are sponsoring individual sites at next Saturday's First Night Buffalo,a drug-&-alcohol-free celebration. Here they are:

-WGR:dance at the Buffalo & Erie Co.Public Library
-WUFO:jazz & blues at Fleet Bank downtown
-WECK:barbershop quartet/puppet theater at Main Place Mall
-WBUF:comedy & kazoos at the YWCA Auditorium
-WBLK:lip-synching at the Convention Center
-WJYE:kid stuff,also at the Conv.Center
-WKSE:The Box(the other music channel)Video Dance Party at the Erie Comm. College Atrium
-CKEY(FM 101 The Planet):McCarthyizm & Wisdom of Children at the Conv.Center
-WDCX:Christian groups at the Buffalo Christian Center
-WGRF:Party Squad & ball drop at the Niagara Mohawk building
-WMJQ:athletics at the ECC City field house
-WHTT:50s & 60s music at the M & T atrium
-WYRK:country at the Conv.Center
(Special note to Mark Shneyder & Scott Fybush:if you're at First Night Boston, you just might see what's happening here,as NYNEX is hooking up all sites in its service area.)

*I fouled up the Fox liner in my last report-it's at the end.

*Finally,I'd like to thank ANYONE who's corresponded with me this year: WBFO's David Benders,Mark Scott & Mark Wozniak,WXXI's Bob Smith,WJYE's Ben Bass,WHTT's Tom Schuh,97 Rock's Darren McKee,Eric Anderson Zych at the Univ. of Rochester,Scott Fybush,Ed Janik,Mark Roberts,Tom Leykis,plus others. I took on the job of doing this because I felt-even more now than then-that Alan Pergament of the Buffalo Lose(oops,News)treated radio like the bastard stepchild you never see. It's not easy,but I do my best. Thanx again!
Next up:1994 in Review and the Muckonis.

See you in 1995 and TTYL...!

C.K.G.

"Real rock 103.3 the Fox...kicking ass and taking initials. We're not slowing down to take names!"

55. Were There Clear Channels in 1927?

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:38:57 UTC
From: transvox@interstate.net
Message-ID: <3ed1o1$iqr@vixen.cso.uiuc.edu>
Source record: 35613

During the latest flare-up in the WOWO clear-channel downgrade controversy, I mentioned a list I had obtained of American radio stations in the fall of 1927.

The list in question is the October 1927 issue of "White's Triple List of Radio Broadcasting Stations." I have combined it with information from Barry Mishkind's OLDRADIO database to try to figure out the structure of the American radio dial.

It does not look anything like the dial we know and, er, love today. Only one Kansas City station, WLBF (ancestor of KNHN), kept the same dial position after the Federal Radio Commission restructured the dial again in November of 1928.

In 1927, it appeared that the FRC was trying to distribute stations evenly on most frequencies throughout the country. Evidently there were clear channels, but not many.

Here is a tally of stations assigned to each frequency, along with an attempt to determine how many licensees could be on the air at night at any one time:

Frequency	Number of Occurrences	Number of Nighttime Stations That Could Be Operating at Same Time
550	3	2
560	5	4
570	4	2
580	4	3 in USA
590	4	3
600	5	3 in USA
610	3	3 (WEAF)
620	6	4
630	4	3 in USA
640	3	3
650	4	3
660	2	2 (WJZ)
670	5	4
680	6	4
690	2	Canadian exclusive
700	3	2
710	3	2
720	4	3
730	2	Canadian exclusive
740	4	3
750	5	2 in USA

760 8 4
770 5 3
780 9 5 in USA
790 4 2 (WGY)
800 5 5
810 4 3
820 5 4
830 5 5
840 2 Canadian exclusive
850 5 4
860 6 4

1180 12 10
1190 11 9
1200 10 10
1210 18 Above 1200 kHz, information simply
1220 12 was not available on many stations.
1230 7 Many of the stations in this area
1240 11 of the spectrum may have been share-time
1250 6 or limited operations.

1260 8
1270 13 Only two operated with more than 1,000
1280 10 watts of power: J. R. Brinkley's
1290 10 KFKB (2.5 kW, 1240 kHz) and
1300 12 St. Louis' KFVE (2 kW, 1280 kHz).
1310 12
1320 14
1330 13
1340 17
1350 8
1360 13
1370 7
1380 9
1390 14
1400 11
1410 10
1420 11
1430 11
1440 14
1450 11
1460 10
1470 16 Eight of these stations were "portable"
1480 8
1490 11 Eight of these stations were "portable"
1500 7

As best as I can tell, ten channels at most could be considered "clear":
610, 660, 790, 950, and 980 appear to be definite candidates; 550, 570,
700, 710, 750 have shakier claims for clean-channel status.

The number of nighttime allocations per frequency gradually rose at
higher frequencies; however, any figures above 1200 kHz have to be
somewhat suspect.

High-power stations were still a rarity, as the following chart shows:

Power Number of Occurrences
---------- ----------
5 5
10 30
15 38
20 3
25 5
30 4
50 97
75 1
100 138
125 1
150 8
200 6
250 71

300 1
400 1
500 161
600 1
750 8
1000 52
1500 4
2000 5
2500 5
3500 1
4000 2
5000 27
7500 1
10000 1
15000 2
30000 3
50000 1

Conclusion: Clear channels may have been contemplated, but they were not used nearly as extensively as they were after 1928. The stations that did seem to have some claim toward nighttime exclusivity were high-powered status, and usually allied with either General Electric or Westinghouse.

What should be clear from statistics such as these is the arbitrary nature of allocating radio stations to fit on a particular piece of "spectral real estate." It's as much a matter of politics and economics as it is a matter of engineering or even tradition.

For the complete October 1927 listing,
point your Web browser to http://www.interstate.net/~transvox/1927list.html --
I did not reprint it here out of respect for space limitations.

WJRR-101.1 Cocoa Beach FL (JRR=Just Ron & Ron, Just Rock N Roll) has
various shirts and hats for sale. The ad is on the back of their bumper
sticker,
available from their plush office in the Maitland FL office park. Check your
M Street Directory for the address. I was incensed for a second because
everything's around $15 but then as I exited the building where Paxson's
WWNZ/WWZN(wprd actually)/WJRR/WMGF are housed, I remembered
that familiar chant "a radio station is a business, and businesses try to make
money." WWKA Orlando has a whole bunch of T Shirts for sale on display
in their front lobby, but most are of country music artists.
WDHA Dover NJ always has a few TShirts/sweatshirts/gym shorts available.

Also the "Stix Tipz" column in "DecalcoMania" sometimes mentions
stations with T Shirts. Although Stickers were the original focus of the column,
all promotional items can be reported to the column. If you would like
a sample of DecalcoMania, send me email. The club publication covers
all radio-related collectibles, including airchecks and jingles.

Hey, I love the Mac...but if I was going to invest 20k in a DAW, I'd be looking for something with more storage than the 17 or so minutes you get on a stock DSE-7000 at 20k...maybe something like the Roland DM-800 - three hours of 8-track digital non-compressed audio in a dedicated workstation with real faders and eq and timesqueeze and more for just over 7k. I then would buy me a Power Mac, big monitor and hard drive to play on...and pocket the 3 or 4 k difference!

BTW, Sadie is Windows based. We do sell the Roland, but I'm also very impressed with the quality of the Sonic and Digidesign stuff which we don't sell.

I'm happy to hear that some of these old shows are being broadcast
again. It got me to thinking, though, that the time period involved for
most of these shows is about 7 years, usually 1941 to 1948. And *that*
got me to thinking that Dan Rather has been doing the CBS Evening News
longer than there's been a Golden Age of Radio.

>A previous post suggested this was ready to go (technology and ease-wise)
>And asked the unfortunately poignant, "What happens then?"

Then we have a playlist of the top 100 CDs from each era in a server and
all progressive and interesting music suffers the same fate as the Buggles
outlined "Video Killed the Radio Star". Now we'll have to get John Wetton
and Trevor Rabin back for a new hit "Servers Killed the Future Star".
When 10 million people can choose between 10 subjects and 100 CDs each,
who will bother to look for new stuff? Please don't say Empty-Vee,
because they've sapped the life out of that for the mainstream. We'd be
deluged by Billie Joel and Elton John songs until our ears bled. They'd
have to call it Neuter Music on Demand. A big pair of scissors comes out
of the set and snips your tape {:-0)

Does anyone know if sports talk host Rod William Stowell is still on the air? The last time I heard him, he was with the Sports Entertainment Network out of Las Vegas. That was at least a year ago, however.

He was one of the few sports radio hosts who seemed to realize that sports isn't a matter of life and death. He approached his broadcasts with a humor and lightheartedness that I miss.

I have a question for Mr. Walden concerning IBOC-AM and FM. How well will a digital AM/IBOC signal fare during Skywave Reception. Does it have a kind of "threshhold" characteristic, in essence...."You either have it or you dont" ? Does the FM/IBOC have the same quality ? I ask this for two reasons....

1. Will the coverage area be similar to the analog signal ?

2. How well will the DX'er fare in the digital universe ?

Thank you,

Peter Q. George (N1GGP)

Subject: Will the last radio broadcaster please turn out the light

Jerry Trowbridge sent out via the super-highway:

>Radio was once a proud pedigreed business. Stations like KFI and
>WLW were parts of families. Their signals were a part of the
>infrastructure of the country.

I'm going to disagree with the above statement: in southern California, KFI is part of many families. The standards they set are paramount, and looked at by others. The same goes for KABC, Los Angeles -- and now KLAX, Long Beach. Nationwide, the sounds of KSL, Salt Lake; KOMA, Oklahoma City; KFAB, Omaha; WIBW, Topeka, and even tiny KFRM, Salina, Kans., are still the institutions built over the years.

Jerry, the fifth estate is changing, and there will be fallout. Who would program a radio station ten years ago for children? Now, Radio AHHS is available [I believe] in over 70-percent of the country. Who would program for an Asian audience ten years ago? Nitch programming will save many stations from being listed as silent broadcasters in the trade journals.

Maybe it's because I have a location for good radio, but I still witness it in cross country travels. The domain of radio is moving, and moving along it is. In twenty years perhaps I too will complain about the state of "analog radio."

I'm proud to contribute to the emerging medium of radio. It's something I believe in, and it's something I'm proud of.

Sedge Thomson's West Coast Live
San Francisco's Live Radio Show to the World

1995 January 01

Happy New Year from all of us at West Coast Live. This Saturday is out 1st anniversary show. It's been an exciting year. We have a live feed to the public radio satellite and we're being broadcast on over 30 stations nationwide. As of February, West Coast Live will be produced in Dolby Surround, with help from Dolby Labs. Listeners who are equipped with Surround decoders will be able to appreciate a sound experience similar to that of an audience member at the Cowell Theater.

You can keep up with West Coast Live by subscribing to our Internet mail list. It's absolutely free. Once subscribed, you will receive a weekly schedule update and special announcements. We also have a weekly drawing for free tickets to that week's live show.

To subscribe to out mail list, just send an email note to;

LISTSERV@netcom.com

with a single line message stating;

subscribe West_Coast_Live

Your mail list subscription is easy to maintain. If at any time you wish to discontinue your subscription, or you just want to change your address, just send a note to;

West_Coast_Live-Request@netcom.com

You will receive an auto-response with complete instructions for maintaining your subscription. The only trick is to keep those underscores, hyphens, and at signs all straight.

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to:

LISTSERV@netcom.com

with a single line message stating;

Northern California News Directors and their friends will talk Talk at the January meeting of NorCal RTNDA. How politicians and others have found their way around the Gatekeeper. Talk shows let them skip reporters and editors and go directly to the public. The panel will include Jerry Brown, a syndicated talk show host and once a high public official in California; Ronn Owens, the once (and future?) KGO talker, and Tracy Gallagher, Producer at Bay TV, KRON's new cable service.

The meeting, which is open to non-members of NorCal RTNDA, will be on Wednesday, January 11 at the San Francisco Tennis Club, 645 Fifth Street at Brannan. Social 11:30, lunch at noon, adjournment 1:30. The tab is $20, with a $5 discount if you call (415) 259-7538 before noon on Monday, Jan. 9.

The deadline for entries in the NorCal Awards competition is 5PM on Jan. 11, so entrants can bring tapes to the meeting.

78. DC-101 / Twas The Night Before Christmas '94

'TWAS THE NIGHT BEFORE CHRISTMAS, 1994
as heard on "Harris In The Morning" on DC-101, 12/22/94
==========
Twas the night before Christmas, And at the White House
Not a creature was stirring, Not even a mouse
When on Pennsylvania Avenue, there arose such a clatter
The whole Secret Service went to see what was the matter
There were tourists and homeless and protesters to boot
And a guy giving the White House a 21-gun salute
Hillary and Bill ran down to the lawn
And Chelsea brought Socks, who did nothing but yawn
The Vice President showed up with Tipper, his spouse
And Al asked, "Who's that on the roof of the White House?"
Every eyeball looked up to see a man with big sneakers
Who shouted, "There's nothing to fear, I'm Gingrich The
Speaker!"
"Remember last month when the voters were pissed?
That's why you're marked naughty not nice on my list!"
"On Thurmond, On Dole, On D'Amato, On Jesse
Not Jackson, but Helms, oh, it's gonna get messy!"
He looked down the chimney with its great roaring fire
And shouted, "Take that Stephanapoulos, and poor Dee Dee
Myers!"
Then he whipped out his contract with the whole USA
While Hillary ran off to a schoolroom to pray
But Bill climbed the roof and yelled out, "Not so fast!
We can work this all out with a friend from the past!"
Then what to their wondering eyes should appear
But a man who could show up and make everything clear
He'd traveled the world making peace in foreign lands
And now he made Bill and St. Newt both shake hands
He made them sit down and just talk for awhile
As the jolly peacemaker watched them with a smile
They both agreed to work together and harder
As they turned to say thanks and goodbye to Santa Carter
He said, "What's important is the people, that's all."
Then he left in his sleigh to end the strike in baseball
As his reindeer started flying, he turned to declare
"Merry Christmas to all, from the ex-President who cares!!"

Does anyone remember either of these two old radio programs?:

1) "QUIET PLEASE" - on the Mutual Network; on air approximately 1947;
narrated by Ernest Chapel.

2) "IT PAYS TO BE IGNORANT" - comedy show; on air approximately
1945-47.

If anyone remembers either of these two programs, or knows how to get ahold of
any recordings of either show, please post or e-mail me
(JayB99@Delphi.com). I'd appreciate any help or leads you might be
able to provide!!

Thanks,
Jay

A more polished, professional sound can be delivered by satellite. For a modest fee, in addition to giving up a couple of minutes of commercial time per hour, a station can have a live staff, 24 hours a day. Virtually no sacrifice is made to local programming, since a network's clock has provision for numerous local options for the station. To really make it work well, the local station should not view a satellite service as an opportunity to turn on the switch and walk away but to use the network as a programming partner for it's local service.
Good luck with your paper,

Jerry

>From what I understand a new Shepherd movie will be out soon.
The Man himself is supposedly now living in Florida and is
active among the ham radio set.

Audio cassettes of Shep reading some of his stories are available from
Dorset Audio, A Division of Marboro Books Corp., 120 Fifth Avenue, New
York, NY 10011.

Shepherd's Pie (six cassettes in all)

Slice One
Red Ryder Nails The Cleveland Street Kid

Slice Two
Wanda Hickey's Night Of Golden Memories
And Other Disasters

Slice Three
Ludlow Kissel And The Dago Bomb That Struck Back
and Little Orphan Annie Or The Counterfeit Secret Circle Member

Slice Four
Leopold Doppler And The Great Orpheum Gravy Boat Riot

Slice Five
Ollie Hopnoodle's Haven Of Bliss

Slice Six
County Fair

His books include: In God We Trust, All Others Pay Cash;
Wanda Hickey's Night of Golden Memories And Other Disasters;
The Phantom Of The Open Hearth; A Fistful of Fig Newtons; and
A Ferarri In The Bedroom. Shep also made at least four LP
recordings that I know of (one is him reading selected works
of Robert Service.)

Needless to say, I grew up listening to Shepherd and greatly miss him.

I too would also be eternally grateful if someone would post information where other Shepherd tapes might be obtained.

Excelsior You Fat Heads!

In Liberation,

Roy

I'm not sure where Jean Shepard is right now, but a few weeks ago I did hear a Chicago station running a very funny spot for Cub Foods, a Minnesota-based supermarket chain. If it wasn't J.S. doing the spot, it was a damn fine imitation of him. Ran just before Thanksgiving and it was about all of the different types of turkey--and turkey buyers--there are at Cub stores.

Also--this time of year TV shows his flick, "A Christmas Story"--has his V/O narration--very funny "family" flick.

I heard Skyradio on a Delta Flight last week. According to Sky Magazine, Skyradio is only available on Delta's 757 and 767 flights and some L-1011 flights.
Skyradio is really "USA Today Skyradio" operated by Gannett. I understand their programming origionates from the USA Today building in Arlington, Virginia. They carry CNNRadio News at the top of the hour and produce their own news at the bottom. Skyradio does their own sports and business. Last I heard, Frank Barneko was the News Director.

Periodic Posting:

==========
FAQ: Where can I find a free database of US radio stations?
Where can I get information on radio station facilities?
==========

The information on radio stations in the US changes constantly.
New call signs and owners, along with changes in facilities are
constantly being updated in the FCC files. Consulting engineers and
communications attorneys need accurate, up-to-date information,
information more accurate than the FCC's database itself.

Often the question is raised as to where on the Internet one can
find such a database of US radio stations. Usually the one
asking means "free".

Since the maintenance of such a database requires *daily* attention
to the information pouring out of the FCC, it is easy to understand that
it is a labor (and therefore money) intensive endeavor. Several companies
do exist to supply such data. Some distribute it by mail, others by
on-line computer. Such access has costs, and the data compilation is
copyrighted.

Is there a source for data on stations? Yes, several.

==========

1. M Street Directory. One of the best annuals, this book contains
station listings for the US and Canada, format information,
and several ratings reports. Current cost is $42.95 & $3 S&H
It can be ordered by phone at 800-248-4242.

2. NRC AM Radio Log. Put out by the National Radio Club, a
DXer organization, the AM Radio Log lists all the AM
stations in the US and Canada. It costs $ 19.95 & $ S&H.

The NRC also produces a book of directional patterns for
the AM stations in the country. This book is not available

at the moment ... apparently it is being updated.

The main publication of the NRC is the DX News, a magazine listing changes in AM stations, and information about how to enjoy the hobby of DX listening. A one year subscription is $24; a sample issue is available for $1.00. There is also a monthly cassette version, with some of the news, and several features including a dial scan from a different city, an historical feature, and taped questions and reports from the field; a one year subscription is $25, a sample issue is available for $3.00.

A catalogue of all current products is $1.00.

Contact the NRC at:
National Radio Club
PO Box 164
Mannsville NY 13661-0164 USA.

3. The Broadcasting Yearbook. Put out by Broadcasting Magazine. This heavy book lists all the radio and TV stations in the US, Canada and Mexico, listing personnel as well as other station data. Allied and Trade orgranizations are included. This publication is expensive, well over $100, but can often be found at public library and university library reference desks.

4. On-line services such as Communications Data Services or Dataworld provide current information on stations, emphasizing the the technical facilities and current applications.

Cost is usually by "record" request, and can be set up for remote interrogation or reports mailed to clients. CDS is at 800-441-0034. CDS also provides free access to registered Ham Operators for part of their topo database. (email to rich\@comm-data.com).

5. PRS, licensors of the ID LOGIC radio system (a superset to RDBS, which identifies every AM/FM station in the country by call, location and format), use the M Street Directory information on stations and formats, and have created a shareware simulator of a car radio. The current version, id_na4a2.zip, is available via ftp from ftp.hk.net in the /shareware/prs directory and should be available via Fido shortly.
The shareware fee is $45.00, good for one year of updates.

6. CD-ROMs

a) the Ham Call Directory, by Buckmaster is reported as having lists of the AM stations in the country. About $50

b) PerCon sells a Master Frequency File for $40. This contains all the freqs/calls/licensees name/transmitter loc/ for

over three million assignments. (713-386-6015)

96. NYT article on talk radio

Newsgroup: rec.radio.broadcasting
Date: 1995-01-04 02:39:47 UTC
From: monchum@phantom.com
Message-ID: <3ed1pj$iuf@vixen.cso.uiuc.edu>
Source record: 35654

On Sunday January 1, 1995, the New York Times published a front-page article on talk radio, its targets, and its political influence. On the jump page, there's also a sidebar entitled "Talk Radio or Hate Radio? Critics Assail Some Hosts." Perhaps someone with access to an electronic version of the article and sidebar can post it to this newsgroup.

One of the most interesting pieces of information was in the sidebar:

"Guns also figured in a decision by the talk show host Don Baker, of KVOR in Colorado Springs, Colo., to step down briefly from his show. Mr. Baker, who had encouraged listeners during the summer to take guns to Washington to protest moves to ban assault weapons, took himself off the air after his callers accused him of inspiring a Colorado Springs man, Francisco M. Duran, to fire shots at the White House. Mr. Duran has been charged with attempting to shoot the President; Federal officials have never commented on whether or not talk radio played a role."

Later in the sidebar, it was noted that KVOR has now instituted a formal policy against advocating violence or retribution.

In a previous article, lancebkost@aol.com (LanceBKOST) says:
>
>[...] There is also an 1190 in the Greater LA area, KORG, which is
>licensed to Anaheim. [...]
>Formatically, it's a REAL melting pot. They are time-brokered.
>During the weekdays, they run Asian programming. Weeknights, (most of the
>time) it is a simulcast with sister Adult CHR KEZY (95.9)
>Weekends can be quite interesting, live talk one hour and Spanish hits the
>next.

I remember when these stations were KEZY AM and FM, both playing rock music
in the early 80's. They played guitar-oriented AOR on the AM, and the
"softer" AOR ballads on FM. Their slogan: "KEZY: FM Kicks Back, AM Kicks Ass"!

>Realistically, this station doesn't serve any purpose, other than to
>collect the checks from the people buying the airtime. WIN Communications,
>who own KORG, could do much better than this. They can't possibly be that
>destitute to have to resort to Time Brokerage. Go satellite, do BBC 24
>hours, do something creative (Hey, There's a thought in radio!).

I'm not *that* down on the time brokered stations, as they do potentially
allow access to the airwaves for certain types of ethnic or special interest
programs/formats that probably would not warrant an entire station. (And, I
bet they would serve the communities better than any so-called "free" radio
station, at least because of signal quality)

I think KIEV-870 and KMAX-107.1, here in Los Angeles, are better run, and
have better programming in general than KORG, though.

>parts of the spectrum.

Many years ago, in an IRS case, it was determined by a Federal Appeals Court that for all practical purposes, a broadcast license is property (in spite of what the Communications Act says). Thus, money spent on a lawyer in pursuit of a broadcast license is considered contribution to capital.

You can bet I didn't like that. It means I have to pay more taxes!

Reed Hundt is hinting at selling broadcast spectrum. Watch out.

Bill-

I find it interesting that those bellyaching about the WOWO situation are those who love listening to the station in distant cities. You and the others should know that stations ae licensed to serve a city --- not 38 or so states. The days of clear-channels are over (I should know...I work at the very first).

It may sound cold --- but radio IS a business --- it IS an antenna with a cash register attached to it. If it weren't, it would not be growing as much as it is.

I am one who accepts that premise and enjoys working in the industry.

My response to: William Pfeiffer - Moderator/Editor

Your writings cause me significant emotional response. This thread is quite interesting. I love it when people rail at FCC policy.

I suspect you really want radio to be the way it was in 1940. A few stations, national nets, big audiences.

Things have changed, and will continue to change. So what? So, I do not think you are clear about what you want. I doubt you really want a return to the time when you could twist the dial at night and hear the same NBC program from LA, Denver, Chicago and New York. (I actually remember hearing that at night as a kid in Missouri.)

So, I suggest, instead, thinking about how you would like mass media to work in the digital age. I think we need to be concerned about diversity, access, and concentration of control of outlets by a few entities.

By the way, don't you think it strange that the FCC under Democratic leadership is advancing a more "business oriented" policy? I wonder about what difference we can find between Democrats and Republicans.

>1930 or so. Radio stations shifted frequencies several times during
>the late 1920s. The first such shift resulted in NO clear channels;

Mark, I trust you'll share the results of your research with us.
Meantime, information I have on hand indicates that when the 550-1350
broadcast band was opened up on May 15, 1923, it was intended that
each frequency between 550 and 1040 would have only one station or
share-time pair, or two stations on opposite ends of the country.

I have several station lists from the 1920s in the form of text
files. I'm pasting in a 6/30/25 list, but just showing stations
below 1080 kHz. It indicates that the plan apparently was adhered
to. However, I don't have any idea when the term "clear channel"
first came into use.

ALL U. S. RADIO STATIONS BELOW 1080 KHZ AS OF 6/30/25

......

I differ with the above. Scarcity should be measured in terms of the demand
for channels to transmit on, not economic viability. If more people want to
broadcast than the spectrum can "support", then spectrum is scarce.

If licenses were not required to broadast, you would hear "casual"
broadcasters, political party stations, full time advertising stations, etc.
I.e., far more variety.

>>Between Duopoly (I am still waiting for all that great
>>programming that was supposed to happen when Duopoly was
>>introduced), LMA's, relaxation of ownership quotas, removal on
>>simulcast restrictions, removal of the 3-year rule and most
>>recently... the allowance of totally unmanned radio stations

Spectrum scarcity is inversly proportional to the bandwidth one entity is
allowed to "own". Multiple stations owned by one entity results in whatever
FCC rules allow and the owner desires.

111. ADMINISTRIVIA: SEEKING READER INPUT

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:50:21 UTC
From: names@airwaves.com
Message-ID: <3eg1at$5bj@vixen.cso.uiuc.edu>
Source record: 35669

Ok, readers. I need your input again.

There havew been numerous comments to me in privatre email about the proliferation of 'handles' used as real names on rrb. Names which are not mere abbreviations or varuiations on real names, but off-the-wall h and untracable handles such as ROCKWARRIOR and such.

Add this to the problem of AOL allowing up to 5 seperate screen names on each account, which do not trace back to the real user, and you have a potential problem.

In a recent discussion with Barry Mishkind, who moderates the Fido broadcast echo, he mentioned that on his forum, real names (or at least real-sounding names) are a requirement for posting. Those who's accounts force handles or strange ID's are accepted, provided a real name is included in the post or in the signature. Barry made convincing arguments that this has increased the credibilityquotient (CQ) of the group and discouraged totally brain-dead and false posts.

I am inclined to agree. But I would like input from the readers as to whether to create a new portion of the charter encouraging or requiring posters to this group to use authentic names. Usenet voting procedures also have recently adopted the requirement of a real name.

Please reply to this note (DO NOT SEND THE NOTE COPY BACK) and let me know if you support the idea of requiring the use of real names on this forum as a way to bolster the CQ here.

Please keep your comments very short, and realize that a "no" vote from someone who uses a non-real name will not carry much weight since they are obviously biased.

Even if this passes, I would make exceptions for very important information or other matters that seem credible.

If you are not replying via USENET, send your comments to

names@airwaves.com

DO NOT send to the newsgroup., I will summarize in a few days or so.,

Catching up after the holidays:

The first of the casualties from the image change at the old KPSN
(Sunny 97) has landed on his feet. Morning man Danny Davis was on the
beach less than three weeks before being hired by the former competition
at oldies KOOL-FM. KOOL moved Lee Baby Simms(ex-KRLA, KYA) to afternoons
on its AM sister(which is now local following the Dec. 31 demise of the
ABC "KOOL Gold" satellite service it originated). Davis is teamed with
Beth Fox and newsman John Gibson. Davis was mornings on the "KOOL Gold"
satellite when he was stolen to replace Charlie Van Dyke (KFRC, WRKO, KHJ)
at Sunny 97.
KOOL-FM has also made room for another Sunny 97 refugee, overnight
jock and Danny Davis' producer Tony McGraw. He'll do weekends at KOOL-FM.
No word on re-teaming him with Davis.
KPSN changed formats to an all-70's oldies and call letters and image
to KCHT...K-HITS...in early December. Afternoon market legend Steve Goddard
(KZZP, Y95, Power 92 and KCBQ, San Diego) and morning news anchor Pat
Powers are still looking.
KESZ("KEZ") has hired a new program director. Dave Winsor joined the
AC station last week. Former PD Mike Del Rosso retains his midday air shift.
KEZ has one of the hottest morning shows in the market, but struggles to
crack the top 10 overall most books. KEZ has also added Dr. Laura Schlesinger
from 8 to 10 pm weeknights.
In mid-December, new Christian FM KGCB (90.9) signed on. The station
is in Wickenburg, 60 miles north of Phoenix, but the signal is good
as far south as the Downtown area.

I haven't listened to American Top 40 in a long time, and I'm not even sure if it's in my listening area. Anyway, I have cassettes of their year-end countdown shows from 1984, and am interested in obtaining countdown lists or tapes of shows from other year-end shows spanning 1980-89, plus their top songs of the 1980s.

Anyone know AT40's address, or wherever else I can obtain this info? Thanks in advance!

THE RADIO WAVE OF DEMOCRACY
IN THE BALKANS

In the Serbian capital town - Belgrade, this summer was extremely hot. At 5 p.m. it is still warm but, for thousands of Belgrade residents, it's time to tune their radios to 92 FM. The controversial theme from the Western movie classic " The Good, the Bad and the Ugly" marks the beginning of the radio B92 news broadcasting, regarded by many here as the most reliable source of information in the former Yugoslavia and the vital voice of opposition to the Milosevic's nationalist government. But, how came? What is B92? Is it a youth radio station or something more? What gives the strength to this small station to oppose the nationalist slogans of the state ruled media? In an interview, Mr. Veran Matic, the B92 32-years-old guiding spirit, was willed to give more details.

- What are your information sources?

One way of receiving information is from our journalists, who are assisting reporters from major international TV stations such as: CNN (USA), SKY (UK) and Radio France International (France). The second information source comes from the reporters from foreign press agencies or from local ones, such as TANJUG, whose information has been previously screened of nationalist presages before being broadcasted.
The third information source is represented by individuals who through amateur radio stations are able to transmit objective information from different regions of the former Yugoslavia.

- How do you process the information before you broadcast it?

Usually, we try to obtain information from different warring fractions (Serbian, Croatian, Muslim) which are concurrently broadcast along with the information received from foreign press agencies. During the news broadcasting no comments are made. However, B92 offers its comments through specialized radio shows and interviews, comments which are mainly based on the criticism of the Serbian side for its actions in the former Yugoslavia.

- What is the relationship between radio B92 and the Milosevic's government?

Radio B92 in itself represents an opposition to the Milosevic's government. Officially, we are still an illegal radio station, however, our closure will only provoke negative publicity

for the ruling government.

On the other hand, B92 is not an instrument of the opposition parties. The majority of opposition parties in Serbia are still strong nationalists especially in regards to the issue involving the Kosovo region (populated, mainly, by Muslim Albanians).

- For how long do you think that B92 will be able to maintain its status as Milosevic's "nasty pet"?

Radio B92 will always be the "nasty pet" of the Serbian society, even after the collapse of the Milosevic's regime. Its collapse will provoke a larger democratization of the Serbian society and consequently will allow B92 to expand further in its work. However, we are aware that, whichever opposition party comes, B92 will still be criticized. The reason why lies in our knowledge of all the secret connections that the opposition parties had with the Milosevic's regime.

- Do you have any contacts with the independent radio stations from other regions of the former Yugoslavia?

It varies from region to region. Radio B92 has strong contacts with independent radio stations from Montenegro and Serbia with whom we are organized in an association. Regarding our connections with the Bosnian radio network we have intense contacts with independent radio stations from Sarajevo such as: Radio Zid and Studio 99. We have a direct phone line with them and we exchange information - mainly interviews. However, the situation is completely different as far as Slovenian, Croatian and Macedonian independent radio stations are concerned. Before the war, B92 had strong contacts, especially, with the Croatian youth radio station 101, recently, all the contacts have been broken.

- What are your plans after the end of the Yugoslavian civil-war and the eventual collapse of the Milosevic's regime?

After the collapse of the Milosevic's regime, we will still try to act as the controlling mechanism of the Serbian future governments, as well as to continue with our activities started before the war.We are a youth radio station and as such we will focus our work on protecting all the segments of the Serbian society which have been marginalized. For example, we will try to achieve a better legal status for homosexuals, advocate for legalization of prostitution and the use of drugs.
At this present moment, we symbolize an open protest against Milosevic's regime and the Yugoslavian civil-war. Apart from the radio broadcast, we want to achieve a solid base for the development of democracy on the Serbian soil by organizing various protests, financing art exhibitions, rock concerts and by publishing books.

- What is the B92 criteria for publishing books?

We are trying to expose a new issue with each book. By publishing books written by radical intellectuals, B92 wants to avoid the creation of the communist type of dissident writers. Primary publications will include critiques of the official Serbian government and of the nationalism of any kind. Books from Croatian writers are also on top of our priority list as well as exclusive publications such as: the "Monograph of the President Milosevic" or publications concerning the Mafia in Belgrade. Radio B92 is also trying to publish translations of foreign books closely related to the Yugoslavian civil-war such as the Misha Glenny's book "The Fall of Yugoslavia". We cooperate with the Bosnian publishing house "Svijetlost" as well.

- During these past three years many young people left Serbia due to economic problems. How is B92 reacting in relation to this?

We are very much concerned, because this phenomena is provoking a greater marginalization of the radio station in the Serbian society. On the other hand, we are trying to connect with some of the young people abroad. We have organized an exhibition of photographs and video tapes in Vancouver. The subject of the exhibition was related to the work of the radio station and to the present political situation in Serbia.

Radio B92 was honoured last year by the "Committee To Protect Journalists" and as Mr. Matic said:"The aim of this award is to give publicity to the honorees in wider international circles in hope that it will make their work and professional survival more easier". Mr. Matic himself is expecting to receive two more awards: Robert Kennedy award for human rights and Egon Scotland award for journalism, established in honour of the first foreigner reporter killed in the former Yugoslavia. "Unfortunately", he replies "the awards are used by the official propaganda as a proof that B92 is a foreign mercenary. Nevertheless, for the B92 crew, the awards symbolizes a big moral support and a possibility of a larger financial support from various foundations abroad". Presently, the station is receiving support from two American organizations: the National Endowment for Democracy and the Open Society Found.

Due to the UN sanctions imposed on Serbia and Montenegro, Radio B92 was enabled to obtain vital spare parts for its equipment. Last year AMARC sent a RadioAction Alert around the world to help the station ccontinue to operate as one of the few existing voices for independent information in the former Yugoslavia.

Hey thanks alot for the tip about 103.1 FM. I never heard of
it, and right now I'm getting it loud and clear on my GE
Superadio!

Everytime I learn something new about the radio I wonder how
much more is out there I'm missing. For example, I just learned
the other day that WBAI (which I had heard of but never
listened to) plays Old Time Radio programs on Saturday night at
8:30 to 10:00.

I'm anxious to check out 103.1 during the day since WQEW during
the day is the pits.

Thanks again!

Hi there! Thanks for reading this.

My name is Wes Johnson, I'm the Morning Show sidekick at WHFS-FM, a modern rock station in Washington/Baltimore. I also work on the newly syndicated Wolfman Jack Show out of Washington DC.

I was wondering if anyone was looking for someone who does all of the things that I've mentioned above for a radio program in any format. I've been looking around recently, and thought I'd check out the waters here on the internet.

I am also the Creative Director here at HFS. If anyone is interested, I can be reached at (301) 306-0991, or at WildWes9@aol.com.

Thanks for your time. I'm interested speaking to anyone who shares my interests in morning show comedy as well.

Thanks again,

Wes

118. KCFX goes from classic rock to 70s oldies -- so what??

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:50:29 UTC
From: transvox@interstate.net
Message-ID: <3eg1b5$5ci@vixen.cso.uiuc.edu>
Source record: 35676

(Written 12-26-94; updated 1-4-95 as noted)

Longtime classic-rock station KCFX(FM) changed to a 70s-oldies format Christmas Eve.

However, the switch may involve just changing slogans and liner cards and not a wholesale upheaval in the station's playlist. It is not known yet whether the station will keep its announcers. One of the station's liners says, "we gave our disk jockeys the week off for Christmas."

(UPDATE: On New Year's Day, the announcers returned to the air. So far, the on-air lineup remains the same.)

Aside from catching the competition off-guard with the Christmas Eve announcement, KCFX was also able to use the Chiefs-Raiders game to promote the 70s-oldies format. KCFX is the Chiefs flagship station.

The station says it is playing "the greatest hits of the 70s," with "no heavy metal," "no weird stuff," "no disco," "no doo-wop oldies," and "no hard rock." With those restrictions, it is amazing that anything could be found for the playlist. The station is not using the term "oldies."

In reality, the station is playing the same tunes it played as a classic rock station, except for some mid-80s and later selections that had crept onto the playlist. KCFX's music selection sounds similar to another station's playlist: KIHT(FM) in St. Louis, also owned by Heritage Media.

KIHT ("K-Hits") went from a bargain-basement position in the St. Louis ARBS to sixth place in the summer 1994 survey, with a 5.6 share 12+.

In Kansas City, KCFX held down ninth place in the summer ARB, with a 4.6 share, below its nine-book average of 5.0 but still showing a slight upward trend. Without the fall survey results, it's not known whether Chiefs football provided another boost to KCFX's audience share this year.

Last year, the station had a 7.3 share 12+, which is 2.3 points above its 5.0 average. It's possible that there wasn't as much of a boost this year, despite the Chiefs hype that permeates Kansas City. Combine that with the success of KIHT on the other side of the state, and it's understandable why KCFX might want to risk its steady yet somewhat unspectacular performance in the classic rock format for potential gains

with something a little different.

(UPDATE: Last week, the Kansas City Star quoted KCFX GM Bill Newman saying just about precisely the same thing. Newman noted the station was a strong performer among male listeners; with the highly restrictive playlist, KCFX is trying to get more female listeners to tune in.)

At this time, the change appears to have little impact on KCFX's closest format competitor, heritage AOR KYYS(FM). However, not much appears to have an impact on KYYS' playlist or presentation, which have been stagnant for several years.

Uncertain is the impact on oldies station KCMO-FM. "Oldies 95" has an hourly "Seventies at Seven" block of 70s oldies. However, KIHT in St. Louis appeared to have little initial impact on oldies station KLOU(FM). Still, in the past few weeks, a new PD at KLOU has changed the station's slogan to "Oldies 103," and has refocused the station's playlist, indicating some concern over the rise of KIHT.

119. Giving Voice to the Voiceless - Micropower Broadcasting

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:50:31 UTC
From: frbspd@crl.com
Message-ID: <3eg1b7$5cm@vixen.cso.uiuc.edu>
Source record: 35677

Giving Voice to the Voiceless - Micropower Broadcasting

By Stephen Dunifer, Free Radio Berkeley

As night rolls across San Franciso Bay and rushes westward, micropower FM transmitters spring to life at the flick of a switch bringing new voices to the FM broadcast band. Voices that defy and challenge the FCC's control of the airwaves. Radio Libre (103.3) operating from the Mission District offers a diverse and multicultural programming mix in both Spanish and English. In the western portions of the city San Francisco Liberation Radio (93.7 FM) provides the only unlicensed call-in talk show broadcast along with excellent documetaries on local and national issues. Comic relief is provided by the Jolly Roger Radio Comedy Troupe who satirize everything from the Olympics to local politicians. SFLR also produces the monthly Food Not Bombs Radio Network program heard on a number of stations across the United States and Canada. New voices will be soon taking to the air in the SOMA (south of Market St.) district and the urban district known as Hunter's Point (107.3 FM) in eastern San Francisco. A new voice (88.1 FM) has made its apperance in North Beach as well.

To the north across the Golden Gate Bridge alternative voices are heard in Sausalito, San Rafael and other areas of Marin County. Meanwhile, covering the East Bay cities of Berkeley, Oakland El Cerito, Albany and Alameda, Free Radio Berkeley (104.1 FM) is continuing its Sunday night broadcasts, soon to be expanded to at least 3-4 nights a week or more. Further to the south in areas populated by migrants and farm workers voices of the mexicano, la Raza and Zapatista are taking to the air as well. Much further to the South across the Rio Grande, transmitters built by Free Radio Berkeley are on the air in the barrios of Mexico City and the state of Chiapas.

Indeed, a revolution is underway here and other parts of the country and world as well. Seeking to break the corporate media stranglehold on the free flow of information, news, ideas, cultural and artistic expression, these low cost and relatively low power (1 to 30 watts) FM broadcast stations are establishing themselves as voices of the voiceless. Futher, most are urging everyone to fight back against a racist and corrupt system by not only providing the poetry, music and spoken word of inspiration but the vital information required for an empowered struggle. Where else can one hear the voices and art of street poets, gang members, homeless persons, activists, punkers, immigrants and many more ? Truly, micropower broadcasting is technology for the people.

Inspired by Mabana Kantako of Black Liberation Radio, Free Radio Berkeley was pivotal in the current micropower broadcasting movement by its open defiance of the FCC and ongoing legal challenge to its regulatory authority aided by the National Lawyers Guild Committee on Democratic

Communications. Free Radio Berkeley offers a complete line of kits which enable anyone with some degree of technical skill to assemble their own tramsitters. A complete station can be put on the air for less than $1000 compared to the $50,000 to $100,000 under FCC guidelines. Workshops and training are offered along with a growing list of technical mentors to aid in the creation of micropower broadcasting stations. If you have electronic skills you can make a very valuable and vital contribution to this movement by teaching and training others.
Of course, this is not happening without reprisals from the Federal Government. Stephen Dunifer of Free Radio Berkeley has not only been threatened with a $20,000 fine by the FCC but is the target of a preliminary injunction sought by the FCC to silence his broadcasts as part of Free Radio Berkeley. A hearing is scheduled for January 20 in Federal District Court to determine whether this injunction, as the first step in the process to obtain a permanent injunction, should be granted or not. Other individuals such as Richard Edmondson of SF Liberation Radio and Bill Dougan of Phoenix, Arizona have been threatened with fines of $10,000 and $17,500 respectively but are not facing the possiblity of court imposed sanctions at this time. All those within travelling distance of Oakland, CA, the site of the Federal Court Hearing, are urged to attend a Free Speech support rally at 9:30 AM and pack the courtroom for the hearing at 10:30 AM on the morning of Friday, January 20th. The Federal Building is located at 1310 Clay St. about 2 blocks from City Center BART.
Micropower broadcasting is more than the leaflet of the 90's it is a tool by which to organize and bring about fundamental social change. For far too long the corporations have been allowed to steal and fence off the natural resources of this planet, including the airwaves. It is time to tear down the fences, grind the no trespassing signs into the ground and take back what belongs to everyone on this planet. We need to use these resources for the good of all instead of the self- agrandizement of the few. If you want to make micropower broadcasting a reality and a revolutionary force in your community, contact Free Radio Berkeley at the following address and phone numbers.

This article in tonight's (January 4) Detroit NEWS...

PNEUMONIA CLAIMS RADIO'S MAC GREGOR AT THE AGE OF 46
by Douglas Ilka

The booming voice of Byron MacGregor, a broadcast legend in Metro Detroit radio and television has been stilled at the age of 46.

MacGregor, who popularized a "20-20" style of radio journalism and stirred a nation with his recording of THE AMERICANS, died Tuesday at Detroit's Henry Ford Hospital from complications of pneumonia.

The Canadian-born MacGregor, who became an American citizen in 1983, exploded on the radio scene in Detroit and Windsor at the age of 19 when he joined 50,000 watt superstation CKLW-AM in 1967.

"He led the way with the 20-20 news style, using phrases like 'nine bloodied battered bodies' in his newscasts" recalled radio personality Tom Ryan.

Channel 2 television reporter Vince Wade recalls competing with MacGregor in the late 1960's when MacGregor anchored the morning news broadcasts on CKLW and Wade led the team at rival WKNR.

"Byron was part of the Bill Drake format that used a deep voice, rapid-fire delivery and a rather staccato urgency to what they were saying," Wade said.

"MacGregor was the rock and roll version of Walter Winchell. One of Byron's favorite phrases was to start off a story about a homicide in Detroit by saying, 'The streets ran red with blood in the Motor City last night..."

Born in Calgary, Alberta, in 1948, MacGregor was an honors graduate of Western Canada High School, the University of Calgary, and Wayne State University.

MacGregor began his broadcasting career while in high school and college, working for small radio stations in Yorktown, Saskatchewan; Winnipeg, Manitoba and Calgary, Alberta.

Noted for his booming voice, golden tones and distinctive brand of journalism, MacGregor became the youngest news director of a major market radio station when he took over the 27 person news department at "The Big Eight", CKLW-AM/Detroit and Windsor.

"Byron made his mark not only as one of the most respected broadcasters in the industry, but will be remembered for his decency and personal kindness to so many --- be they friends or strangers," said Chicago WMAQ-TV reporter Sharon Wright, the sister of MacGregor's wife, Jo-Jo Shutty-MacGregor.

In 1974, MacGregor hired Shutty, a former Miss Teen-age Detroit and World's Baton-Twirling Champion, to be the area's first female helicopter traffic reporter. They were married in 1976, both 27 years old and at the height of their careers.

>From 1977-90, MacGregor anchored the morning or afternoon prime-time newscasts for WWJ-AM. He also anchored the prime time evening newscast for WKBD-TV (Channel 50) in Detroit.

In recent years, MacGregor was the news director and morning anchor for Group W Radio/WLLZ in Detroit and Greater Media's WCSX-FM in Detroit.

MacGregor's greatest fame came with his narrative recording of THE AMERICANS, a tribute to the United States written by Toronto newspaperman Gordon Sinclair.

The patriotic reading, enhanced by the sounds of the Detroit Symphony Orchestra playing in the background, sold more than 3.5 million records and was called "the greatest flag-waving success since Kate Smith".

The recording was a smash hit in 1973 and again during 1991's Operation Desert Storm against Iraq. MacGregor donated his proceeds from the recording, more than $125,000, to the American Red Cross.

Survivors include his wife, Jo-Jo Shutty-MacGregor; mother Murdena Mack, of Calgary, Alberta; sister Leilani Harvie, of Calgary; and brother Hudson Mack, of Victoria, British Columbia.

Funeral arrangements were incomplete.

Hi,
My name is Lauren Holladay I have been in Kansas City (same station) for 8 yrs. Currently doing mornings, first female in city to have own morning show...did the same thing in Denver for 4 yrs and Miami before that.
Looking for new challenge.
15 yr. radio vet (and still young). Guarantee ratings.
Screen name on AOL is Juliet101, send e-mail or will be here looking for responses, willing to leave country, go east, west, north or south if we click.

Regards,
Lauren

John "Records" Landecker is doing mornings on WJMK, Oldies 104.3 in Chicago.
He gets to do some personality...but the boogie check no longer exists...
for a very close facsimile to the Boogie Check, try WLS FM 94.7 talk radio at 5 pm for Jay Marvin's "Shootout". Very similar concept.

Thoughts on mid-Midwest radio from a visitor who lives on the
eastern edge of the Midwest...

Mark Roberts (transvox@interstate.net) wrote:

: In Kansas City radio, the year 1994 may be like the dog that didn't
: bark in the Sherlock Holmes stories. While there were changes and shifts
: in Kansas City radio, the 29th market continues to be a place where country
: rules, and "alternative" means going deep on a Tom Petty album.

I visited Keli, an e-mail pal of mine, for Thanksgiving, at her house
in the sprawling metropolis of Emporia, Kansas :) -- about an hour
south of Topeka; two to two and a half hours southwest of KC.

The drive comprised 930 miles and 14 hours of driving and gave me
a chance to sample radio stations in Columbus and Dayton, Ohio;
Indianapolis and Terre Haute, Indiana; Effingham, Illinois; Saint
Louis and Columbia, Missouri and Kansas City, Missouri/Kansas; and
Topeka and Emporia, Kansas.

(Didn't think to give a listen to KLZR in Lawrence though... :(
Keli doesn't seem to listen to it either, surprising since she is a
Kansas student... she seems to like more of the mainstream stuff;
we listened to KPRC while visiting Lawrence.)

I must say that in my travels between Cleveland and Emporia,
my hands-down favorite was Triple-A KBXR in Columbia. They were
playing "The Greatest Hits from B to X" that weekend... and the
playlist contained a wider variety of music than any other station
I've heard in, oh, probably at least ten years. Fantastic. Great
mix of music, too. I don't know if it's the format or if KBXR just
executes it particularly well, but I really enjoyed listening to
them. I hope they don't change formats when they change ownership.

A surprisingly good station was album-rock station KFFX-FM in
Emporia. Emporia is a small city of about 20,000 in the middle
of nowhere, and for a station in such a small market, KFFX sounds
quite professional. I was impressed. The quality at KFFX was on a
par with the quality at various stations here in Cleveland, which
is the #12 market....

Other stations seemed run-of-the-mill; I listened to KPRC, KYYS and Kiss
107.3 (KISF) in Kansas City, and AC station KMHA (Magic 108) in Topeka. No
big surprises at any of these stations. Oh... is it just me, or are most
of KC's radio stations licensed *outside* KC?

: The market's five country stations continued to maneuver, with
: the FM upstarts threatening but never dethroning the longtime AM
: country leader.

I strongly dislike country music and therefore did not listen to any of
KC's country stations... :)

: In Columbia, there may be adjustments at KBXR(FM) when KFRU(AM)/KPLA(FM)
: owners Dave Baugher and Al Germond complete their purchase of the
: adult-alternative station; however, the format will probably remain.

I will be praying...

: In Kansas City, there are unconfirmed reports that an adult-alternative (AAA)
: station will take to the air early in 1995 after changing ownership. I can
: think of only two FM stations that could possibly be up for sale:

hmmm.... a KBXR repeater maybe? :)

Lesssee... Other Midwest cities? Well, it was interesting to listen
to KMOX in an area where I could actually receive it. :) (I have
found an intersection in Lyndhurst, Ohio where it comes in clear
as a bell but other than that it's hard to get in Cleveland. My
friend and I try to listen to Blues games and have a considerable
amount of trouble.) I got to hear a lot of my old favorites from
my school days at the University of Dayton, none of which have
changed... WGTZ Dayton, WFBQ Indianapolis, WNCI and WWCD Columbus,
WKRQ and WEBN Cincinnati...

(OK... WNCI has changed a bit. They used to be straight Top-40 and
are now more or less AC. But they still sound pretty good.)

I hope Cleveland gets a Triple-A soon, but it has been discussed
in the press and the know-it-all consultants seem to think we
wouldn't be able to handle anything more than a watered-down
modern-rock station. CD-101 in Columbus and 97X in Cincinnati
may or may not be classified as Triple-A, but they are both stations
which go out of their way *not* to play mainstream stuff, and they are
successful and have been for years... why can't someone do that in
Cleveland?

Happy New Year. The Rock & Roll Hall of Fame and Museum opens on
Cleveland's North Coast Harbor on Labor Day, 1995!

Yes. The only thing I can figure is that KSFO is being programmed to be the leader in PI (commission) spots. Their lineup includes the likes of Pat Buchanan and a guy recently fired from KFRC for his racist and homophobic remarks, J. Paul Emerson, noted in another post.

: Now we're stuck with just another conservative, white, angry male talk
: radio bonanza.

Thank Goddess there is still Pacifica -- thankfully there is a good wealth of fine programming on the left end of the FM dial.

Jay,
I'm hardly in a position to defend a show host that is currently cross country from me, but I can tell you that YOU were not at WLS when Bob was there. It was my personal experience that I was speaking from, and although I believe it was in the best interest of the station to let Bob go (partially for the reasons you specified), I still found his show entertaining, and Bob a nice person to work with. With WLS FM just beginning, you should watch those glass houses, Jay, as ratings in Chicago are a tough call.

BTW, I worked at WLS from 1985 to 1992, so I guess I can ask someone who worked there.

Byron MacGregor dead of pneumonia (1949-1995).
~~~~~~

Born and raised as Gary Mack in Calgary, Alberta, Byron MacGregor became the model newscaster for "20/20 News", a key element of the Drake Top 40 format of the late 60's and early 70's. With the loop of a teletype in the background and constant offers of cash for newstips from listeners, MacGregor was the news voice of CKLW Radio 800 in Windsor and Detroit.

Newscasts took an almost comical bent at times with MacGregor at the helm of the news department at CKLW. Teases were beyond sensational in a time when "tabloid" news didn't exist anywhere outside of newsracks on street corners. An often criticized and mocked approach, it was a style that was extremely effective and integral to the stations' sound.

In 1973, Gordon Sinclair, a writer and owner of radio station CFRB 1010 Toronto, originally delivered an editorial called "Americans". The statement expressed the economic and political abuse that the U.S. was taking in the world economic and political arena. An ongoing love/hate attitude held by Canadians toward all that was U.S. at the time, was the inspiration for Sinclair's jumping to the defense of the U.S. in this editorial. The powerful words and current profundity of the issue got it reprinted in several newspapers.

Later in 1973, Byron MacGregor read the editorial as part of one on his newscasts on CKLW. Listeners blew out the phones wanting to hear it again. Armen Boladian, owner of Westbound Records, a label based in Detroit that was swelling with gold records at the time from artists like the Funkadelic, Detroit Emeralds, Denise LaSalle and others. Boladian heard MacGregor's reading of "The Americans" and saw the potential for a record. The single was created with Byron's spoken word over a orchestral background of "America the Beautiful". An Lp was later cut and trailed the single to an eventual success.

CKLW already has a strong reputation for breaking records throughout the U.S. and Canada. Given the Canadian government's enforcement of Canadian content rules regarding airplay of records, this was a natural. "The Americans" placed high on Billboard's charts at #4 during the second week of 1974. It, of course, won the #1 spot on CKLW's surveys for two consecutive weeks and lasted a total of 8 weeks there.
~~~~~~

For all of its success, MacGregor never kept a penny of the royalties from the sale of the record. Proceeds were donated to the American Red Cross.

"The Americans" had a couple more lives as a record and a live performance by MacGregor. It was issued again in 1979 as a limited edition single with contemporary lyrics for the times and the situation in Iran with the Ayatollah. During the Gulf War, it saw a revival in airplay as patriotism ran high in the U.S. This lead to an opportunity for MacGregor to perform "The Americans" live with the Detroit Symphony Orchestra as backup, again a benefit for the American Red Cross. This was an event that had him beaming with joy whenever asked to recall the experience.

MacGregor left CKLW in 1977 to join Newsradio WWJ 950 in Detroit. He also did a long stint at WKBD Channel 50 Detroit as the anchor of the first 10 PM TV News in the market. Later to Westinghouse's Detroit FM - WLLZ 98.7 and also WCSX 94.7 Birmingham/Detroit. MacGregor worked as a disc jockey earlier in his career in both Calgary and Winnipeg.

MacGregor is survived by his wife, a fellow broadcaster and former helicopter-traffic person at CKLW, Jo Jo Shutty.

140. NYC Radio Waves 1/3/95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:50:54 UTC
From: TRRadio@aol.com
Message-ID: <3eg1bu$5e1@vixen.cso.uiuc.edu>
Source record: 35698

NYC Radio Waves - 1/3/95

Here we are--a time for ch-ch-ch-changes.

WNEW-FM moves Carol Miller from late nights to middays. Pat St. John stays at AM Drive (5:30a-10a), then Miller 10a-3p, Scott Muni 3-7p, Tony Piggs shift now runs 7p-12mid. Overnights are Harris Alan and Ian O'Malley. Dennis Elsas and Ken Dashow go to weekends. The 'Mixed Bag' and 'Things from England' shows are dropped.
The curious move is Miller to middays, after just being moved from nights to late nights not too long ago. Ratings for the station have not been a good as in the past, but have stabilized recently. WNEW-FM is the city's only true AOR station, and has been battling WXRK (Stern/Classic Rock)for years.

The NY Daily News says WCBS-FM's Marc Sommers exit from the oldies station may not have been what it seems. Sommers has filed a complaint with the National Labor Relations Board, saying he was fired for being a union representative. CBS-FM declined comment.

A familiar voice was heard in a familiar timeslot--WABC's Curtis Sliwa handled AM Drive the past two weeks, filling in for Lionel. Silwa, who teamed with his now ex-wife Lisa for a couple of years, is currently the overnight host at WABC.

The new KISS-FM hit the air Sunday--with Smooth R & B and Classic Soul.
It's definitely a different sound in NYC Radio--whether or not it's a ratings winner rfemains to be seen.

Happy New Year!!!

141. New York FM list -revised

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:50:55 UTC
From: jeff560@aol.com
Message-ID: <3eg1bv$5e3@vixen.cso.uiuc.edu>
Source record: 35699

Several missed calls in my previous history of FM assignments in New York city have been reported, so I am posting a revised version. The changes which appear in this revision (all in the modern allocation system) are as follows:

94.7 has WJRZ-FM between WNTA-FM and WFME
95.5 shows WPLJ to WWPR, then back to WPLJ
103.5 shows WQHT between WAPP and WYNY
105.1 shows WNSR between WRFM and WMXV
107.5 shows WEVD-FM before WLIB-FM

Here is how the 42-50 MHz band looked toward the end of the band's existence:

42.1 WNYE
43.1 W2XMN/WFMN
43.9 WNYC-FM
44.7 W47NY (WGYN)
45.1 W2XWG (W51NY, WEAF-FM)
45.5 W55NY (WFGG)
45.9 W2XQR (W59NY, WQXQ)
46.3 W63NY (WHNF)
46.7 W67NY (WABC-FM)
47.1 W71NY (WOR-FM, WBAM)
47.5 W75NY (WABF)
49.5 W95NJ (WAAW)
49.9 W99NY CP Frequency Broadcasting Co.

The original 1945 proposed 88-108 MHz assignments were as follows: 96.9 WBAM, 97.3 WABC-FM, 97.7 WEAF-FM, 98.1 WNYC-FM, 98.5 WABF, 99.3 WHNF, 99.7 WFGG, 100.1 WGYN, 100.5 WQXQ, 100.9 WFMN. A second 1945 proposal was as follows: 94.5 WNYC-FM, 95.7 WAAW, 96.1 WGYN, 96.5 WBAM, 96.9 WABC-FM, 97.3 WEAF-FM, 97.7 WQXQ, 98.5 WABF, 98.9 WFMN, 99.3 WHNF, 99.7 WFGG.

The actual 88-108 MHz frequencies in use in 1946-47 were as follows:

91.7 WNYE
92.1 W2XMN/WFMN
95.3 WNYC-FM
95.7 WAAW (WAAT-FM)
96.1 WGYN
96.5 WBAM
96.9 WABC-FM (WCBS-FM)
97.3 WEAF-FM (WNBC-FM)
97.7 WQXQ

98.1 WGYN
98.5 WABF
98.9 WFMN
99.3 WHNF (WMGM)
99.7 WFGG (WGHF)

(During the 1946-47 period and beyond, some stations continued to operate in the 42-50 MHz band also.)

The next list shows the modern allocation scheme, which went into effect in 1947. It appears there was no single date on which stations changed frequencies. Stations generally were off the air for extended periods in order to make the necessary adjustments.

88.3 WBGO
89.1 WNYU and WFDU
89.9 WKCR
90.7 WFUV
91.5 WNYE
92.3 WMCA-FM (WHOM-FM, WKTU, WXRK)
93.1 W2XMN (KE2XCC, WPAT-FM)
93.9 WNYC-FM
94.7 WAAT-FM (WNTA-FM, WJRZ-FM, WFME)
95.5 WJZ-FM (WABC-FM, WPLJ, WWPR, WPLJ)
96.3 WQXQ (WQXR-FM, WQXR)
97.1 WNBC-FM (WRCA-FM, WNBC-FM, WNWS-FM, WYNY, WQHT)
97.9 WGYN (WEVD-FM, WEVD, WSKQ-FM)
98.7 WBAM (WOR-FM, WXLO, WRKS)
99.5 WABF (WBAI)
100.3 WMGM-FM (WNJR-FM, WFHA, WVNJ-FM, WHTZ)
101.1 WCBS-FM
101.9 WGHF (WBFM, WPIX-FM, WQCD)
102.7 WNJR-FM (WNEW-FM)
103.5 WPAT-FM (WTFM, WAPP, WQHT, WYNY)
104.3 WFDR (WNCN, WQIV, WNCN, WAXQ)
105.1 WWRL-FM (WRFM, WNSR, WMXV)
105.9 WHBI (WNWK)
106.7 WRVR (WKHK, WLTW)
107.5 WEVD-FM (WLIB-FM, WBLS)

Source record: 35552

The Ron & Ron Show, which originates from St Petersburg, FL and is heard on a number of stations in the southeast, has lost it's largest affiliate and another top-50 market station.

Paxson Communications has dropped the team from WZTA/Miami and WAIA/Jacksonville, citing falling ratings. Ron & Ron remain on Paxson's Orlando station, WJRR.

Ron & Ron have recently faced serious competition in Orlando and Miami from Howard Stern's syndicated show. In Orlando, Ron & Ron's ratings have dropped nearly 50%.

as general manager of two stations, I can honestly say that although sat. programming is very cost effective and can be geared to a specific audience, nothing can replace the "good 'ol DJ or show host. I am sad to say that I was forced by local economy to cut expenses and go sat.

Well, Bill, all I can do is relate my experience in trying to get my syndicated show on the air. We play prog-rock, which is non-commercial. It does not appeal to the masses, and the owners of stations want a homogenized sound that sells the most spots for the most money. Satellite programming seems to do that. Stations are so tighly formatted they squeek, so shows like mine or the local garden club just don't seem to have any place. Neither does artisitic expression. Radio is about money, big money.

Bill, don't get me wrong...I'm on your side. I think radio should be more for people than robots. Mr. Station Owner, I see your side too - you have bills to pay. I'm just talking reality. There should be more room for the little guy (gender not withstanding), be it the indie musician or local interest group. Radio should have something for everyone, small groups of people or large, and money for the station owner.

So there we have it. The little guy is left out and the station owners are after the big buck. Wouldn't it be nice if reality were somewhere in between?

William Hale <MTFH12A@prodigy.com> writes:

>personnel (GM and/or engineer). A lot of stations in Podunk sound like
>they're in downtown LA or NYC, simply because of satellite.

REALLY? Name one! Every satellite station I've ever heard or been involved with sounded hokey as hell. Totally generic, the local :05 slogan window often sounding noticeably different in intonation and/or voice quality than the network jock (who often steps on his/her own voice). Major Networks, for one isn't even done in real time...all the jocks are voicetracked, detracting even further from any delusion of "being there". There is one reason, and one reason only stations go satellite...they aren't making any money and here's a way to deliver audio at very low cost. Of course, the audience is equally low, but there's no free lunch. Give me bad Podunk radio any day of the week!

Steve

That's precisely the problem with satellite programming. How does "sounding like NY or LA" fit into "serving the public interest, convenience, and necessity"? If it ain't plugged into the community, it ain't worth listening to. Let the TV stations ignore Podunk; we'll serve 'em on radio.

I hope to start producing radio dramas at KALX
the UCBs (University California Berkeley) campus radio station
and am looking for scripts
Im afraid that theirs no money
but If I use your script Ill send you a tape of your story
I would prefer science fiction or science fiction comedy
but Im open to other stuff
we don't have a time slot yet but it will
probably be 30 min long
the plays will probably also be played on 2 or 3 other little
radio stations where I have contacts
I like the work of Joe Frank and ZBS media

The show is produced at KCRW in Santa Monica, CA. I have their number here somewhere, but you can get it from 310 information.

Ask for Sarah Spitz. She's the publicist and (as far as I know) also handles inquiries from listeners (and former listeners). She's not easy to reach (even the people she represents have a hard time getting her on the phone).

The show is still being produced.

Good luck

One place you can find it, at least, is most Sunday evenings at 8
P.M. on WGN Radio in Chicago (720 AM). It gets pre-empted for Bears
football and Cubs baseball broadcasts that spill over into that time slot,
though, and I don't know if there is an alternate time slot. WGN is
clear-channel, they say, so the chances you can pick them up should
be good. Hope this helps.

>From Long Island, it's the Howard Stern Radio List - short form!

Here's what we've got for this month...

New stations in the past 30 days: -None-

Changes to current stations: -None-

The long form of this list, which includes phone numbers for all markets plus
the fax number, is posted to alt.fan.howard-stern.

If you do not have access to the alt heirarchy, e-mail a message to me,
drchuck@netusa.net, and I will e-mail a copy to you.

This list is also available at the Howard Stern FTP site (I don't put it
there myself). This FTP site is accessible through the Airwaves WWW Page
via the following URL:

http://radio.aiss.uiuc.edu/~rrb/

The path is: OTHER COMMUNICATIONS RESOURCES -> Personality Page -> Howard Stern

Alternatively, you may take the direct route:

http://krishna.cs.umd.edu/pub/stern/
ftp://krishna.cs.umd.edu/pub/stern/

Please mail me any info for the list that needs to be added and/or changed,
it will be appreciated. Catch you next month!
--Chuck

** This list will self-destruct November 1995.

>replacement is "100.7 Mix FM"
>WMGI's new format, of which I heard a mere 20 minutes last night around 8,
>seemed to be brighter and much more uptempo.

I have a couple of "radio brothers" working there...Dave Decker does
afternoons and production. Doc Martin (or whatever air name he's using
now) is doing nights. I worked with both of them when they were working
parttime stints at Indianapolis CHR WZPL. Both are strong air talents!

The station operated with just music and liners through the weekend. The
airstaff opened the mics for the first time on Monday.

Everything I've heard points to a real commitment on the part of station
ownership to make the 100.7 Mix FM a major player in the Terre Haute
market.

>No word whether WMGI will change calls.

I hear that a calls change is in the works...no idea as to what or when.

155. A few new years' travels and tidbits

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:51:11 UTC
From: fybush@world.std.com
Message-ID: <3eg1cf$5eu@vixen.cso.uiuc.edu>
Source record: 35561

New Years' weekend for me was spent at a wedding in Binghamton NY, giving me a chance to see some smaller-market radio and TV in action. I was last in Binghamton about 3 years ago, and things have changed a lot on FM. The market list first:

680 WINR Binghamton satellite big bands, CNN news
960 WATS Sayre, PA satellite AC // 102.1 WAVR Waverly NY
1290 WNBF Binghamton talk, mostly satellite, AP news (I think)
1330 WEBO Owego satellite classic country
1360 WKOP Binghamton satellite country
1430 WENE Endicott satellite talk, Imus in the Morning, Binghamton Rangers NHL hockey
88.5 WCII Spencer Family Life religion
89.3 WSKG Binghamton classical, NPR
90.1 WSQX Binghamton not yet on air (co-owned with WSKG)
90.5 WHRW Binghamton SUNY college radio
91.5 WJIK Binghamton not yet on air (this freq was urban WUCI in the late '80s but failed and surrendered license)
92.5 WKGB Susquehanna PA AOR (translator on 92.1 Binghamton)
94.7 WIYN Deposit satellite AC (doesn't hit Binghamton)
96.5 WPEL Montrose PA religion
98.1 WHWK Binghamton country "Hawk" (co-owned with WNBF)
99.1 WAAL Binghamton classic rock (co-owned with WKOP)
100.5 WXEJ Conklin not yet on air
101.7 WGRG Owego CHR "Power 101" (translator on 102.5 Binghamton)
103.3 WMXW Vestal soft AC "Mix" (co-owned with WENE, WMRV)
105.7 WMRV Endicott hot AC "Star 105.7" (co-owned with WENE, WMXW)
107.5 WRGG Endwell not yet on air

In addition, you can hear most of Ithaca, namely:

870 WHCU Ithaca news, talk, full-service
920 WKRT Cortland satellite big bands
1470 WTKO Ithaca CNN Headline News
91.7 WICB Ithaca Ithaca College, rock
97.3 WYXL Ithaca soft rock, "Lite 97.3"
99.9 WIII Cortland AAA, "I-100 FM," Imus in the Morning
103.7 WQNY Ithaca classic rock, "The Wave"

Some notes then: This is not much of an AM market. Everybody's satellite most of the day. I think WNBF is local in the mornings.

On FM, WAAL is the heritage rocker, the WBCN/WCMF/WMMR/WNEW-FM of the market if you will. WKGB is the upstart competition, with a weaker signal. WHWK dominates the ratings as the only country FM. WHRW was only on a few hours a day when I was there and

never showed on New Year's Day at all. WTKO's automation was badly done...their legal ID wasn't firing, so there was just a 5-second gap at the top of the hour.

All the AMs are on hilltop sites for some reason. WINR is on Windy Hill on Binghamton's East Side, with two sticks in use, and a third that has an old UHF antenna at the top, probably the original WINR-TV 40 (now WICZ-TV 40). The studios have moved up there from the old site on George F. Highway in Endwell. There was nobody home when I stopped by, though. You get there through the campus of the Binghamton Psychiatric Hospital -- kinda figures for radio people! :-)

WNBF-AM shares its site on Ingraham Hill south of Binghamton with the former WNBF-TV 12, now WBNG-TV 12. WHWK is also on WBNG's tower. WNBF's towers are well-camouflaged by trees, and the gate barred me from getting in.

Just up Ingraham Hill Road, though, the candelabra tower with WICZ-TV 40, WSKG-TV 46, WSKG-FM 89.3, WMXW-FM 103.3, and WAAL-FM 99.1 was at the end of a road with an unlocked gate, and WMGC-TV 34's towers were right behind its studio across the road. WKOP-AM's three towers are about half a mile to the east, behind Binghamton Town Hall.

I didn't make it to WENE's 4 sticks on a ridge south of Endicott, or WMRV's tall tower north of Endicott, though both are easy to see. Also easily spotted is WBNG's new studio complex on a hill in Johnson City.

One note about TV in Binghamton: All four locals feed their signals to the cable system by microwave, and keep color bars up overnight on cable all night. WICZ goes it one further and puts NBC Nightside up on cable while UHF 40 is asleep!

Of interest was the note that while I was unable to hear any Binghamton stations in Scranton in November, I did hear Scranton in Binghamton (WARM 590, WGBI 910, WILK 980, WVIA 89.9, WMGS 92.9, WBHT 97.1 (!), WKRZ 98.5, WGGY 101.3, and WYMK 107.7 were all heard).

That's about it for Binghamton...next stop will be Sacramento in mid-January...

A few other miscellaneous notes from the road or home:

-- In Albany, WTRY-FM 98.3 has broken its simulcast with oldies WTRY 980, and is now satellite-70's "Star 98.3." Yaaaawwwwnnnnn.... WTRY AM and FM are part of an agglomeration of six stations, all with their ad time sold by Liberty -- WTRY-AM, WGNA-AM (// country WGNA-FM), WWCP-FM 96.7 (WDRE prog rock), WTRY-FM, WPYX-FM (AOR), and WGNA-FM (country). That's something like 35% of the market, but since Liberty doesn't actually own WTRY-FM and WWCP-FM (Jarad Communications does), it's allegedly kosher.

Also in Albany, Amsterdam's WKOL-FM 97.7, after a brief stint as Christmas music, is now classical as WBKK. Still finding its legs apparently, as they were very sloppy about legals (they did one at :40!) Sounded like it might have been the KDFC DAT service...definitely NOT live and local. Sister station WCSS 1490 was off air or at least inaudible.

-- Here in Boston, the switch has happened. WBZ-TV 4 is now CBS, after 46 years with NBC. WHDH-TV 7 is now NBC after 22 years with CBS (and 13 more years before that too, from 1948 till 1961, when ch. 7 went to ABC). Videos available on request.

And despite the promise (threat?) to go religious on 1/1, WSSH-AM 1510 is still brokered Spanish. The Spanish programmers had sued WSSH's owners Noble Communications for selling the station to Communicom just as the brokerage contract was being signed. Maybe it's held up in court. When and if religion happens here, requested calls are WNRB.

And that, as they say, is that. Happy New Year!

-=Scott Fybush - fybush@world.std.com=-

If you enjoy listening to sports radio or just being entertained you have to give this guy a listen.
Most of you will be disappointed because he's on overnights,but Rob Tepper is the best personality I've ever heard.
If your a sports fan I'm sure you've heard of Ron Barr.Don't get me wrong Rons' o.k. but he's got nothing on the T-man.
He's funny, doesn't cut anyone off, isn't arrogant, has a lot of zany callers that contribute a lot to the show on a nightly basis.
Even if your not into sports he's worth a listen.

He comes on the air at 2:a.m. Minnesota time.I think thats 1a.m.E.S.T, 3A.M.pacific.
Some examples of the festivities; callers singing theme songs for him, calling up their girlfriends in wee hours of morn. on air. A preacher, a lowrider, kermit-d-frog, it's a circus .

He's on the SPORTS FAN radio network. some affiliates are:
KSEV- HOUSTON
THE TICKET - DALLAS
XTRA - SAN DIEGO
KFAN - MN
WNFL - GREEN BAY

If you like him let me know .
if you can call him , i can't ,let me know on the air you heard it here.

He is the t-man there is none else, he is the t-man .....

KOOKOOKACHOO!!!!!!!!!!!!!!!!!

TOM -- What's going on with Frank Hardin's contract? Jeffrey Yorke last reported that it was due to run out at the end of 1994 and that there had been no offer made to renew. But it's 1995, and he's still there, clearing his throat 20 times an hour.
I don't mean him any disrespect, and in truth I listen to Imus in the morning. However, I do prefer WMAL to the Best of Imus, and every minute of air time that Frank takes is less air time for that right-wing, know-nothing jock-jerk Tim Brandt.

For what it's worth, the words of 24-year old Geoff Fox,
already working at WPEN in Philly circa 1975,

"if you haven't made it to a big market by the time
you're 25, chances are you won't ever."

This refers to working as a top 40 DJ, at least.

Some respondents have reported problems accessing some of my Web pages.

I believe it's because I am changing the pages fairly often still, causing other users to be locked out temporarily.

Try them again. If there are still problems, I will report them to our admins.

By the way, I now have a St. Louis radio dial (as well as Kansas City and Columbia/mid-MIssouri radio dials) accessible from the radio home page. Complete coverage from Topeka to St. Louis -- which is, what?, 300, 325 miles? I'll stop bragging now <g>.

: San Francisco's Live Radio Show to the World

For people unfamiliar, West Coast Live is a live 2-hour variety show, aired every Saturday morning (or afternoon, depending where you are) from the Cowell Theatre at Fort Mason, in San Francisco (sort of between Fisherman's Wharf and the Golden Gate Bridge). It's available to any non-commercial stations wishing to carry it.

Sedge Thomson has a way of interviewing which brings out some incredibly entertaining stuff from even the most ho-hum guests. It's worth a listen.

And then this:

>Had the FCC read, considered and rejected the protests, that would
>have been one thing. But they did not, they simple wrote the people
>off because the letters did not conform to some format code that
>moist of us dont even know about.

Since this appears to be a major point in your comments addressing this matter, I would like to mention some pertinent items of possible interest.

The FCC (and most other regulatory agencies) have very strict and narrow guidelines for rulemaking, comments to rulemaking, and the application process. These exist for reasons I will get to in a moment. But they are not at all secret and the procedures and formats are clearly defined in government publications.

Understand that the FCC receives a mountain of listener gripes every single day that mail is delivered. The overwhelming majority of these are inane, stupid, trivial, and just plain silly. Many ask the FCC to take unto itself authority that it does not have. Some complain of hearing Martian broadcasts in tooth fillings. Others complain that neighbors are using microwave thought control waves on them. There is an endless stream of complaints that insist upon action against stations who do not play the right music, or who play "offensive" commercials, or that take particular points of view, or who do not read a listener's letter on the air. Some complaints are about stations that do not exist.

With reduced manpower, the FCC is hardpressed to even return these messages with a stock response, let alone read each and every one and "consider" them. So it has set up a procedure wherein serious people with serious comments can bend the ear of the commission. It is admittedly non-trivial so that literal garbage can be weeded out. When comments following those guidelines come in to the commission, they can be separated from the trash and given the due consideration that you feel was lacking in the current discussion.

What you appear to be saying is that the commission should have psychically realized that these public comments, not in prescribed standard form, were

somehow special and deserved _special_ consideration. Just remember that this was not the only action before the commission last year!

Jeremy Lansman knows full well about this. He and Lorenzo Milam filed (in proper form, of course) a petition with the FCC asking to have the educational status removed for religious broadcasters and to discontinue granting sub-92 channel allocations to these licensees. Eventually known as "The Petition Against God" (and spawning a book by the same name), this relatively simple pleading was responsible for deluging the commission with hundreds of thousands of protests from ignoramuses who had been told by their radio preachers that the action would mean ripping religion from the airwaves. Nary a single comment from the public exhibited the slightest understanding of the nature of the petition. The action demonstrated how collectively stupid the public can be.

I would not be surprised that this very action inspired some of the public comment procedures that you are complaining about now. But those procedures are the only thing that stand between an orderly comment process and just bringing the commission to its knees. You cannot waive the rules just because a particular action is "just" or "important".

Think about this: in a criminal proceding where a defendant's life might be at stake, procedures are never waived. All testimony, depositions, briefs, arguments--everything--are presented in standard form. The slightest deviation can cause higher court reversals. Even though an innocent man may be facing execution, pleadings on his behalf must be presented properly. Letters to the judge, blurting out comments in open court, and even postings in Usenet are not acceptable ways of presenting evidence in court.

So it is with the FCC. Some of the comments of the people who offered their opinions in the WOWO case may have been pivotal. But by the same token, if they were that important and the case that crucial, proper care (even the consulting of a broadcast law attorney) to ensure the propriety of the filing would have been in order. If the FCC had violated its own procedures, I might have sympathy for your viewpoint. As it is, if it had accepted those comments, there would have been grounds for objection by the applicants.

The FCC did the right thing.

WOW! WREF! I chose the call letters for the station in 1984-85.

Drew Wilder was the former General Manager of the station and a good friend of mine. We worked together at WLAD in Danbury and I went on to become Program Director of WWCO in Waterbury.
While reviewing several choices, I proposed WREF as "refreshing." Drew agreed and the calls were selected.

166. Wanted: News about Z-Rock

Newsgroup: rec.radio.broadcasting
Date: 1995-01-05 05:51:23 UTC
From: Tony.Yee@news.acns.nwu.edu
Message-ID: <3eg1cr$5fj@vixen.cso.uiuc.edu>
Source record: 35572

I would appreciate any news regarding the Dallas based Z-Rock network. I was a big Z-Rock listener from 1989 to 1993 when I lived in New York City. Unfortuantely, NY's Z-Rock affiliate switched to Korean language programming in '93 and there is no Z-Rock station in Chicago.
Specifically, I would like to know whether any changes have taken place and what songs are on its current playlist. They used to have a countdown program called "The Z-Rock 50." If that show still airs, a list of the Z-Rock 50 will be greatly appreciated.

167. Who is on 66.17 MHz in Eastern Europe ?

Newsgroup: rec.radio.broadcasting

From: steyaert@vvs.innet.be
Message-ID: <steyaert.44.00105559@vvs.innet.be>
Source record: 35575

Can anyone help in finding out which East European FM stations are broadcasting
on 66.17 MHz (+- 200 kHz)?

Until now, there several ones in Poland and Romania, but they seem
to be going out of the air more frequently (the whole night) since
the start of 1995. Publications such as the WRTH aren't particularly
helpful in this case.

This is a nuisance for our meteor scatter experiments, and we
are looking for 24 hours transmitters in the 66-73 MHz band.

Thanks,

168. Indianapolis RadioWatch 1/6/95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-07 00:37:40 UTC
From: jimgrey@dorite.use.com
Message-ID: <3eknok$45m@vixen.cso.uiuc.edu>
Source record: 35576

***WICR "Free Zone" host flies coop: Tim Bauman, host of "The Free Zone" and "Mixing Bored" shows on WICR-FM (88.7), has announced he will leave the station for a new job in Ohio. His last show is January 21. Bauman, who volunteers his time to the station, created "The Free Zone", a program that brought local bands of all kinds into the studio, and featured recorded music of all kinds from all over the country. Bauman's co-hose Tim Ditchley continues to host the show, which airs Sunday nights from midnight to 3 a.m.

***Bob and Tom go on the bird: WFBQ-FM's (94.7, "Q95") Bob and Tom Show will go statewide in the next two weeks on stations in Fort Wayne, Evansville, and South Bend. The show will retain its local Indianapolis references and flavor, but will allow stations a few minutes each hour for local content. Larry Aiken, GM at the Evansville Bob and Tom affiliate, has been after this deal since 1989. He isn't concerned about the Indianapolis references on the program. "Evansfille focuses itself much on the same sports teams, the '500', and other activities that Indianapolis does." The same may not be true of northern Indiana stations, especially South Bend, which identifies strongly with Chicago. South Bend is much nearer to Chicago than Indy. Sportscasts in South Bend tend to focus on Chicago sports, for example, rather than Indianapolis sports. No word on which South Bend station picks up Bob and Tom. South Bend's AOR, WAOR (95.3, licensed to Niles, MI), the station nearest to WFBQ's format, is already top-rated mornings. Rimshot classic rock WZOW (97.7, Goshen) has a signal that doesn't reliably cover South Bend. Fort Wayne and Evansville stations WFWI-FM (92.3) and WGBF-FM (103.1) pick up Bob and Tom. My source for that statement is the Indianapolis _Star_, which was not clear which station belonged to which market. Unfortunately, I'm at work, and my Broadcasting Yearbook is 25 miles away in my apartment, or I'd clarify it for you.

***Review of WIBC Morning Show TV Simulcast: "Spellbinding as Watching Paint Dry": Steve Hall, radio and TV critic for the Indianapolis _Star_, pans the simulcast of WIBC's (1070) morning show on WRTV (Channel 6). "The single camera mounted in a corner of the WIBC studio doesn't offer many [images]. It can pan left to pick up [sportscaster Bob] Lamey, [co-host Steve] Simpson, or news reader Stan Lehr; the rest of the time, we see only their hands. ... Most of the TV screen is filled with the backs of computers and microphones. Behind those, so far away they almost need a telephone calling card to communicate with us, are [hosts] Jeff Pigeon and Terri Stacey. They almost never look at the camera." Looks like I'll have to force myself out of bed one day next week at 5 a.m. to check this out.

***The State of CHR in Indianapolis: I got E-mail the other day from someone interested in Indy's two CHRs. It is kind of unusual, in this day of fractured, narrow formats, for a market as small as Indianapolis to have two

CHRs. So I've spent the week immersed in WHHH (96.3, "Hoosier 96-dot-3") and WZPL (99.5). I thought I'd give you my impressions of these stations. I'm going to throw urban WTLC-FM (105.7, "Power 105.7") into the mix, too, because its format compares. I haven't listened to CHR since I was 12 or 13, growing up on South Bend's WNDU-FM (92.9, "U93") in about 1980, so I'm woefully out of touch with what's happened to the format over the years. But here goes! If you drew a Venn diagram of songs these stations play, you'd find that all three overlap. WZPL plays the widest range of music. They play the expected dollop of MTV-inspied funk and rap, but they choose songs conservatively from this plate. They also play, at the other end of the spectrum, rock-leaning stuff you might hear on Q95 (AOR) or X103 (alternative), like the Cranberries or John Mellencamp. A primary slogan is "All the hits, all the time" -- seems like they live up to that. WHHH, on the other hand, ignores the rock and alternative stuff, sticking to dance, funk, and rap. They're very likely to play remixes, too: both WZPL and WHHH play a recent Madonna tune, but ZPL plays the album cut while HHH plays a dance remix. Being ignorant of the subtleties of funk and rap, I hear a large overlap between WHHH and WTLC. WTLC is much lighter on dance, heavier on rap, and WHHH is the opposite. WZPL's airstaff is typical, "hype, up", which I find annoying. WHHH has a remarkably conversational airstaff -- especially middayer Scott Wheeler. He's nothing short of astonishing -- relaxed, friendly, conversational. I find this to be unusual for the music they play. I'm used to hearing hyper twenty-year-olds segue between such uptempo music as WHHH plays. I wish I could tap into whatever Scott Wheeler's secret is, and apply it to my AOR on-air style! Even morning man Tony Lamont keeps a decent conversational tone. He's known around the state as the announcer for the Hoosier Millionaire TV show, from the Hoosier Lottery. He's extremely annoying in that role, using a fakey, hyped voice. WTLC's airstaff, in contrast, seems nearly small-market, as if they're trying too hard to sound big-market. They try too hard to sound up and hype. Their mike processing is weird, too, making their voices sound narrow and a bit distant. WHHH has typical sweepers, with a deep voice and swooshes and lazers and some voice effects. WZPL uses a refreshing, young, tenor voice in its sweeps -- and they're usually dry. They also use shouts quite a bit. The music is continuous -- nearly all elements are layered on top. WTLC's sweeper package sounds distinctly like it's from the mid-80s, with outdated, tired sound effects, and a strangely muffled, typical deep voice. With so much overlap among these stations, I wonder what effect on ratings there'd be if WHHH went away -- in other words, I wonder whether the funk/dance/rap crowd is overserved here.

>defintion of classic rock is too narrow. Also, their jocks are too happy
>sounding on the air. They sound like they aren't themselves - they are
>artificially happy and they add too much useless chatter to the on-air
>presentation.

The Arrow station in Los Angeles (KCBS 93.1) plays a reasonable spectrum
of music; mostly 70's songs, but not just "guitar rock", a few 60's hits
and music as recent as 1985. There's also very little DJ chatter.

They eschew "bubblegum" rock and disco (although such disco favorites
as the Rolling Stones' "Miss You" and Rod Stewart's "Da Ya Think I'm Sexy"
are heard once in a while . ..

177. Byron MacGregor Dead

Newsgroup: rec.radio.broadcasting
Date: 1995-01-07 01:04:36 UTC
From: aa931@detroit.freenet.org
Message-ID: <3ekpb4$7cd@vixen.cso.uiuc.edu>
Source record: 35584

I would like to pass along the following sad news that appeared on some local newsgroups on the Greater Detroit Free-Net. This article was originally posted by ab387@detroit.freenet.org (Michael R. Lewis) and any replies or follow-ups should be sent to him, not to me. This is truly sad news for me, because at one time CKLW was my absolute favorite radio station in the world, and Byron MacGregor had the announcer's voice and the talent that many of us small-time announcers and announcer wannabe's could only wish for...
Jack

Byron MacGregor dead of pneumonia (1949-1995).
~~~~~~

Born and raised as Gary Mack in Calgary, Alberta, Byron MacGregor became the model newscaster for "20/20 News", a key element of the Drake Top 40 format of the late 60's and early 70's. With the loop of a teletype in the background and constant offers of cash for newstips from listeners, MacGregor was the news voice of CKLW Radio 800 in Windsor and Detroit.

Newscasts took an almost comical bent at times with MacGregor at the helm of the news department at CKLW. Teases were beyond sensational in a time when "tabloid" news didn't exist anywhere outside of newsracks on street corners. An often criticized and mocked approach, it was a style that was extremely effective and integral to the stations' sound.

In 1973, Gordon Sinclair, a writer and owner of radio station CFRB 1010 Toronto, originally delivered an editorial called "Americans". The statement expressed the economic and political abuse that the U.S. was taking in the world economic and political arena. An ongoing love/hate attitude held by Canadians toward all that was U.S. at the time, was the inspiration for Sinclair's jumping to the defense of the U.S. in this editorial. The powerful words and current profundity of the issue got it reprinted in several newspapers.

Later in 1973, Byron MacGregor read the editorial as part of one on his newscasts on CKLW. Listeners blew out the phones wanting to hear it again. Armen Boladian, owner of Westbound Records, a label based in Detroit that was swelling with gold records at the time from artists like the Funkadelic, Detroit Emeralds, Denise LaSalle and others. Boladian heard MacGregor's reading of "The Americans" and saw the potential for a record. The single was created with Byron's spoken word over a orchestral background of "America the Beautiful". An Lp was later cut and trailed the
~~~~~~

single to an eventual success.

CKLW already has a strong reputation for breaking records throughout the U.S. and Canada. Given the Canadian government's enforcement of Canadian content rules regarding airplay of records, this was a natural. "The Americans" placed high on Billboard's charts at #4 during the second week of 1974. It, of course, won the #1 spot on CKLW's surveys for two consecutive weeks and lasted a total of 8 weeks there.

For all of its success, MacGregor never kept a penny of the royalties from the sale of the record. Proceeds were donated to the American Red Cross.

"The Americans" had a couple more lives as a record and a live performance by MacGregor. It was issued again in 1979 as a limited edition single with contemporary lyrics for the times and the situation in Iran with the Ayatollah. During the Gulf War, it saw a revival in airplay as patriotism ran high in the U.S. This lead to an opportunity for MacGregor to perform "The Americans" live with the Detroit Symphony Orchestra as backup, again a benefit for the American Red Cross. This was an event that had him beaming with joy whenever asked to recall the experience.

MacGregor left CKLW in 1977 to join Newsradio WWJ 950 in Detroit. He also did a long stint at WKBD Channel 50 Detroit as the anchor of the first 10 PM TV News in the market. Later to Westinghouse's Detroit FM - WLLZ 98.7 and also WCSX 94.7 Birmingham/Detroit. MacGregor worked as a disc jockey earlier in his career in both Calgary and Winnipeg.

MacGregor is survived by his wife, a fellow broadcaster and former helicopter-traffic person at CKLW, Jo Jo Shutty.

I think the remit of this group requires we consider the ethics and morals
of
the recent interview by Mrs. Povich of Newt's mother.

Those of us who have been active in the industry know that during an
interview,
the interviewee often forgets about the microphone or camera.

Do you think it was appropriate for Connie to say "just between you and me"?

Do you think it was appropriate for CBS to broadcast it?

Should we replace the Evening News with Hard Copy?

Let's try to keep this non-political.

barry

179. Re: Where is Dr. Dimento?

The doctor had ditched his 900 line that he had with the Westwood network.
His new number is (310) 633-8863 or (310) odd-tune. I have not called
this number yet but I believe he may have a list of stations that the
show is heard on.

From: slutsky@tesla.njit.edu
Message-ID: <3ekpba$7cn@vixen.cso.uiuc.edu>
Source record: 35588

I belong to a club of radio enthusiasts consisting of 60 or so men and no women. I also observed there are very few women posters to rec-radio-broadcasting or to any other radio bbs on the commercial services that I use. About 50% of all radio listeners are women. Could it be that men are active and women passive listeners. Many Soft AC stations are programmed to appeal to women.

Any thoughts on this.

Bruce Slutsky
slutsky@tesla.njit.edu

I have no stake in the radio business. I'm just an active listener.

182. Main Studio Rule Forfeiture

------------------------------------------------
FCC ISSUES FORFEITURE FOR
MAIN STUDIO RULE VIOLATION

------------------------------------------------
The FCC has handed down a forfeiture to an
FM station in Texas for violation of its Main
Studio Rule, Section 73.1125. The station in
question was ordered to pay a forfeiture of
$7,500 for not maintaining a "meaningful staff
presence" at its main studio.

Under the FCC's rules, an broadcast station
must maintain a main studio within its principal
community contour (the 3.16 m/vm for FM stations)
and must have a "meaningful management and staff
presence" at that studio. Over the years, the
Commission has never specifically defined the
term "meaningful management and staff presence"
but generally speaking this term has come to mean
at least one management and staff person must be
present at the studio during normal business hours.

In the case of the Texas station, there was
evidence that staff was present at the station
during some of the normal business hours but there
was a question as to whether the person designated
as the station's manager had true management
responsibilities. The licensee pointed to an
agreement with another AM licensee whereby the AM
```

licensee would provide space for the FM station's main studio and one of the AM station's employees was designated "Assistant Station Manager" of the FM station. The FCC had a problem with the fact that the licensee could not adequately describe the "Assistant Station Manager's" duties and the fact that this person had no real decision-making ability and was only available to "answer questions." This did not amount to a true management position and thus the Commission found that the station had not complied with Section 73.1125.

I have drafted a free memorandum on the Commission's Main Studio rule which is available via Internet e-mail upon request at my e-mail address or by fingering me at: maher@cais.com.

183. Where is Frosty?

184. Getting on the air - WGTB

Newsgroup: rec.radio.broadcasting
Date: 1995-01-07 01:04:45 UTC
From: shantech@aol.com
Message-ID: <3ekpbd$7cr@vixen.cso.uiuc.edu>
Source record: 35591

I know this message may seem a bit naive, but please forgive that.

I am the current GM of WGTB at Georgetown Univ. in Wash. DC. Years ago, we were a 50000w FM station. Then, a former (very unpopular) university president sold the station for $1 as a PR move to the Univ. of DC (the city's school). We were brought back as a CC AM station until last year when we switched to cable FM. We are now beginning a multi-year project to return to FM. We have the support of the administration, but I need some idea of the steps involved in such a process. Complications are:

1) All NCE frequencies are already allocated in DC.
2) Our call letters have been taken by a relatively new country station in Ft. Wayne, IN.
3) We are only at the beginning of fundraising.

Silver lining:

1) Several Gtown law grads have been recently appointed to high FCC positions.
2) I am friends with the University Counsel.
3) We still have a pretty good base of listeners who listened to the old station.
4) Many of our station alumni have moved on to good positions in broadcasting including managment and ownership.
5) The administration is pretty supportive.

Your help or words of encouragement would be greatly appreciated.

Thanks!

-Shan

185. Re: Greensboro Trends

From: prm@cbnews.cb.att.com
Message-ID: <3ekpbe$7cs@vixen.cso.uiuc.edu>
Source record: 35512

Great ratings for WXRA, and they deserve it, got to listen to them for about
3 hours last month.

What I wonder is, since you say WXRA dropped country - did WKSI think
they were filling a VOID
by going from hits to country after 94.5 dropped it?
Competing against a legend
(WTQR) and another country station in the market (WPCM-101.1) can't be easy.
And now the market has no hits, just Adult contemp "the Eagle" and dance/
urban at 102.1 and 97.1

186. MacGregor's Bio & Obit from his family

BYRON MAC GREGOR.. VOICE OF "THE AMERICANS"
.NEWSMAN ..ANCHORMAN .....DEAD
FOLLOWING A BRIEF AND SUDDEN ILLNESS.

46-year old MAC GREGOR died today, January 3, 1995, at a Detroit hospital from complications of pneumonia following a brief and sudden illness.

You knew him as the booming voice of "THE AMERICANS"....

The Canadian born MAC GREGOR recharged the country with a spirit of patriotism in the smash hit narrative recording "THE AMERICANS" which twice topped the charts in the 1970's and in the 1990's (knocking the likes of Barbra Streisand, Madonna & Whitney Houston out of the #1 position.).. Recorded with the DETROIT SYMPHONY ORCHESTRA, it sold more than 3 and 1/2 MILLION COPIES and was called "the greatest flag waving success since Kate Smith."

MAC GREGOR unselfishly donated the more than $100-thousand dollar proceeds to the American Red Cross after its first release in the 1970's and again following its second major release during Desert Storm and the Gulf War in 1991.
"THE AMERICANS" earned MacGregor international recognition and an "ACADEMY OF COUNTRY MUSIC AWARDS" nomination.

Presidents Reagan and Carter were among those heads of state who commended MacGregor for "his contributions to the nation"..
..Carter saying "THE AMERICANS extols the good things about the United States that have been overlooked by the rest of the world."

In its highest commendation, the American Red Cross stated "Byron MacGregor..our Canadian good neighbor ..inspired citizens on both sides of the border with his narrative and brought support to the Red Cross in our time of need."

The sounds of "THE AMERICANS" continue to be heard over stations across the country and in Canada particularly on the Fourth of July and Veteran's Day, etc.

Canadian, MAC GREGOR became a broadcasting legend long before "THE AMERICANS" with his unique style, "golden tones", and distinctive brand of journalism.

He became the youngest News Director of a major market station when he took the helm of a 27 person news dept. at "THE BIG 8" CKLW AM-FM radio (Detroit/Windsor)..the Canadian 50,000 watt super station reaching 28 states dayside and 48 states niteside. As NEWS DIRECTOR & MORNING ANCHOR, he and his news team created a new wave of tough..gritty..investigative journalism on the air waves coast to coast from 1967 to 1977.

For the next 13 years,
MacGregor anchored the morning and afternoon prime time newscasts for WWJ NEWSRADIO 950 AM/FM CBS/DETROIT for Detroit's 24 hour news station while at the same time anchoring the prime time evening newscast for WKBD-TV 50/DETROIT.
And most recently MacGregor was the NEWS DIRECTOR and MORNING ANCHOR for GROUP W RADIO/WLLZ-FM (WHEELS RADIO) /DETROIT and Greater Media's WCSX-FM RADIO/DETROIT.

MacGregor was the winner of numerous prestigious journalism awards nationally and locally ...The RTNDA/RADIO TELEVISION NEWS DIRECTORS ASSOCIATION twice honored his spot news reports and his CKLW station newscasts with its highest award. the ASSOCIATED PRESS awarded him its top honor for the 'BEST REGULARLY SCHEDULED NEWSCAST" in 1985 while at WWJ.

The DETROIT NEWS dubbed him 'BEST NEWSCASTER IN DETROIT' in 1989 while at WWJ Radio...saying "sometimes it's hard to put his bombastic '20/20 News' days at CKLW out of your mind and concentrate on his skills alone, but Byron stands as the Voice of Authority in the city's finest collection of on-air news voices." and the MICHIGAN PRESS AWARD cited his outstanding achievement for his documentary on the Detroit/Toronto street crime.

MOST RECENTLY...ON DECEMBER 23,1994..
the BOYS 7 GIRLS CLUBS OF SOUTHEASTERN MICHIGAN honored MacGregor with its "BENEFACTOR'S AWARD" for his support and effort in helping to raise nearly two-million dollars over the past 15 years.

MacGregor was the first Canadian to receive the AMERICAN LEGION'S prestigious "NATIONAL AMERICANISM AWARD" for "his unique contribution to the American way of life."

And the AMERICAN RED CROSS honored him with its highest honor..the "NATIONAL HUMANITARIAN AWARD"

MacGregor was also selected by the U.S. government to share the podium with President Ronald Reagan and act as master of ceremonies as the President conducted the nation's largest naturalization ceremony in 1984 in Detroit.

MAC GREGOR had just recently become a U.S. citizen himself...one year earlier in July of 1983.

But friends say MAC GREGOR'S considered his most important "NORTH AMERICAN ALLIANCE" to be his marriage to American TV-Radio Broadcaster, Jo-Jo Shutty.
Byron interviewed Jo-Jo and hired her at CKLW as DETROIT'S AND THE NATION'S FIRST FEMALE HELICOPTER TRAFFIC REPORTER...
Soon after...his romance with the former "America's Miss Teenage Detroit" & "World's Baton Twirling Champ" filled the air waves as the "BIG 8" radio jocks leaked word of their love story. Their wedding at Marygrove's Sacred Heart Chapel became one of social events of the year.

After joining forces, Byron and Jo-Jo became well known for giving back to the DETROIT METRO AREA through a wide range of community and charitable activities.

MAC GREGOR served on the BOARD OF DIRECTORS for the BOY SCOUTS OF AMERICA, AMERICAN LUNG ASSOCIATION, SALVATION ARMY, BOYS 7 GIRLS CLUB OF SOUTHEASTERN MICHIGAN, REDFORD SUBURBAN LEAGUE CHARITIES, and OAKLAND COUNTY PARKS FOUNDATION.

HONORARY CHAIRMAN AND SUPPORTER of LEUKEMIA RESEARCH LIFE/CHILDREN'S HOSPITAL for more than 12 years, a speaker for the UNITED FOUNDATION SPEAKERS BUREAU, and a member of the AMERICAN HEART ASSOCIATION STROKE COMMITTEE.
****

Born in Calgary, Alberta...Honors grad of Western Canada High School, University of Calgary, Wayne State University (Broadcast Law)

BROADCASTING TRADITION:
"Broadcasting is in the blood" Byron once said. He followed in the tradition of his dad, the late Clarence "Cy" Mack, a radio personality and talk show host with CFAC in Calgary for 22 years. While still high school college Byron began his broadcasting career at CJGX/Yorktown,Saskatchewan..CKRC/Winnipeg, Manitoba..CFAC/Calgary, Alberta.
Byron's younger brother, Hudson Mack, a TV anchorman for CHEK-TV in Victoria, British Columbia talks of then following in his big brother's footsteps writing in a recent letter "I remember watching you in awe...I'll never forget my visits to Windsor..going in for the morning shift at the "BIG 8"..what

formative years for me..what heady stuff to watch you."
Jo-Jo's sister, Sharon Wright, a TV reporter with WMAQ-TV/NBC/Chicago says
"Byron made his mark not only as one of the most respected broadcasters in the industry, but will be remembered for his decency and personal kindness to so many ...be they friends or strangers"

Growing up in Canada, Byron pursued a love of football, hockey and flying small aircraft...but once he hooked up with Jo-Jo..he and his father-in-law Joe Shutty took to the links during the off season from "their" Michigan State Spartans football team. Bagpipes, tap dancing, art collecting and reading for the blind took up the remainder of his "spare time".

MAC GREGOR was also a board member of Rotary Club of Detroit, Adcraft Club of Detroit, Detroit Press Club, St. Andrew's Society, and Radio Television News Directors Association.

MAC GREGOR is survived by his wife, Jo-Jo Shutty-MacGregor, his mother, Murdena Mack of Calgary, Alberta, his sister, Leilani (Jim) Harvie of Calgary, Alberta, his brother, Hudson (Pat) Mack of Victoria, British Columbia, his niece Rachel, his nephew, Hamilton, his aunts, Madeline MacGregor and Betty MacGregor, his mother in law, Stormie Shutty, his sister-in-law, Sharon (Shutty) Wright. Pre-deceased by his brother, Darrel Mack, his uncles, Byron and Dr. John MacGregor, and his father-in-law, Joseph Shutty.

I'm still looking for radio stations, talk or otherwise, who are willing to air long format advertorials (radio infomericals) either for cash or on a P.I. (per inquiry) basis...these infomericals are suitable for talk or music stations, depending on the merchandise being sold. ZAny help would be appreciated.

Also, I'm back from doing a week of fill-in at WMMS/Cleveland. If you would like a fill in for afternoon or morning drive, talk, CHR or AOR, leave me a message. I've worked in San Fran, Atlanta, Miami, Baltimore, Cleveland, Tucson, and in New Jersey. Most recently I co-hosted a talk show on the Westwood One radio nets...if interested, contact me, Roberta Gale, send all mail to my attention at the following address... dso@clark.net

By the way, In Baltimore, hefty market fixture Tom Marr moves to midddays at conservative talk WCBM while Brian Wilson, one half of the old Brian and O'Brian team, at B104 moves into afternoon drive. I guess this is an attempt to live up to their new "hot talk" moniker, but to me it's the same boring, old guy and old callers, ultra conservative talk.
When will talk radio wake up and realize thier old listeners/callers are going to die off in a very few years?

Source record: 35595

Roy Radow <radow@netcom.com> writes:

>Audio cassettes of Shep reading some of his stories are available from
>Dorset Audio, A Division of Marboro Books Corp., 120 Fifth Avenue, New
>York, NY 10011.

I tried to get a phone number from directory assistance in New York City
for both of these places but they had no listing for them. Are they
still in business?

I've been trying to find tapes of Shep's shows for years and thought that
this would be a great find---hope the source hasn't dried up!

Dear Bob,

I checked my tapes and the information above is correct. I then
checked the Manhattan White Pages and as you say there is no listing
for either Dorset Audio or Marboro Books. Since the tapes were made
from 1988 through 1990 it may be that the company has since gone out
of business.

There may be another source that I can refer you to, but the
person I have in mind is currently on vacation for the next two weeks.
I will try to get back to you at that time.

Keep the faith.

Roy

Message-ID: <3ekpbl$7de@vixen.cso.uiuc.edu>
Source record: 35514

Can you believe its been 35 days since Ronn Owens left the air? Well stay tuned my friends because I've got some scoop. It seems KGO General Manager, Michael Luckoff, aka Mickey to his friends, has been keeping Ronn off the air because his ego couldn't handle the fact that after 20 years Ronn went out and hired hot shot talent agents - the same ones who represent Howard Stern.

Luckoff waited until the last day of Ronn's contract to even begin negotiating believing Ronn would not go off the air. When he did leave the air, he also broadcast a message which we all heard informing of us that he hadn't been able to negotiate a new contract, and that he hoped to be back on the air soon, KGO or elsewhere.

Luckoff was so pissed off at that, plus the fact that Ronn hired these agents, that he couldn't stand it. When Ronn appeared on Channel 2, Luckoff was seen rampaging through the station screaming "How can he do this to me?"

Don't be fooled friends, its KGO that's preventing a new deal. And word has just come down that a deal is imminent, but not with KGO. Within 24 hours. When Luckoff finds out, he'll freak. Word out of New York is that when ABC finds out that Luckoff let another of his big guns get away, his days in San Francisco are over. Bouloukas can't stand Luckoff, nor can anyone else inside ABC Radio.

And to make the situation even more interesting, the deal is said to be with Luckoff's arch enemy. I'm sure you'll all join me in welcoming Ronn back to the airwaves and good riddance to an ego maniacal jerk who let the only person in America to beat Rush Limbaugh go.

193. KGO/KSFO sellout!

DD> the pie. What is really sad is that most of the radio in SF is being
DD> programed by "consultants" who know nothibg about the bay area.

I have not lived in the SF Bay Area since 1982. I remember KSFO being the voice of the Giants and Frank Dill in the mornings on KNBR (NBC O&O) Great stations to listen to! What has become of those two class stations?

KGO (ABC O&O) was the home of talk radio. Back then talk show hosts were liberals...

Oh yes, and is Don Rose still alive and working anywhere? I can never hear the name of the town Sacramento without remembering him constantly calling it Sacratomato! He was on KFRC. Anyone know where he is now?

Living in the radio wasteland of Norfolk, Virginia...

194. KULL format change

Newsgroup: rec.radio.broadcasting

In an unnanounced chanmge of format KULL (770 kHz - Seattle)
dropped their previously carried "Cool Oldies" sattelite service and
began simulcasting sister KRPM (FM 106.1) country and western music. The
oldies were still on the air in the early evening of 1/1/95, but whn I
retuned at midnight they were just closing out the locally produced "Music
with Moskowitz" program and sequed right in to the usual C&W FM fare. The
ID's I have ehard on the very infrequent and sporadic re-tues are all
"KRPM" with no "KULL" heard. For my money it was a bad move. The
increased power of KULL gave it a nice signal even at night and the
playlist on the sat service seemed wider than most of that from the only
remaining oldies station in the area, KBSG AM/FM.

Basically just call them and ask for product, they're usually very happy
to get their stuff played.

> How do you get your station on the reporting list for such publications
> as R&R, etc.?, Do those publications have any requirement that stations
> must meet or exceed to become a reporter?

They may have changed how they do it, but R&R used to want to be sure
that your station was a dominant force in yoru marketplace. For example,
two top-40 stations with a 10 share each would probably be reporters, but
if one station had a 10 share and the other had a two share, chances are
they'd only pick the larger station to report. This is determined by
ratings, and a market-size scale: P1 reporters are in larger markets and
have more influence than P2 stations (medium markets) and P3 stations
(small markets).

Neil and WIOD (Miami, FL) couldn't be better. He's still going strong
with hot talk, humorous drops, and RCN/ACN bits.

Here's the current Wonderful Isle Of Dreams shedule:

Weekdays:

5:05am -> 6am : First News 610 (Tom Hopkins)
6:05am -> 10am : The Rick and Suds Show
10:05am -> 2pm : The Neil Rogers Show
2:05pm -> 6pm : The Phil Hendrie Show
6:05pm -> 8pm : SportsTalk 610 with Jeff DeForrest
8:05pm -> 11pm : Chris Baker*
11:05pm -> 3am : The Don & Mike Show**
3:05am -> 5am : The Best of Neil Rogers

Saturdays:

5:05am -> 6am : Focus on South Florida (Teri Griffen)
6:05am -> 10am : Weekend Magazine (Larry Justice)
10:05am -> 2pm : The Best of Neil Rogers (from this week)
2:05pm -> 6pm : The Best of Phil Hendrie (from this week)
6:05pm -> 8pm : SportsTalk 610: College (Kim "Beef up..." Bokamper)
8:05pm -> 12am : The Steve Patterson Show***
12:05am -> 5am : The Best of Don & Mike**

Sundays:

5:05am -> 6am : Newsweek on the Air
6:05am -> 10am : Weekend Magazine

(Miami Dolphins Football related programming)

6:05pm -> 8pm : SportTalk 610: NFL (Kim "Beef up..." Bokamper)
8:05pm -> 10pm : Dr. Demento Show**
10:05pm -> 11pm : Comedy Hour**
11:05pm -> 3am : Rebroadcast of Friday's Don & Mike
3:05am -> 5am : The Best of Neil Rogers

---
* Unfortunately, Chris Baker will be leaving on 1/9/95. His replacement
will be Arron Summers' "Passion Phones." (WIOD management at its worst.)
** National/Tape Delay

*** Patterson will be moving to an unknown Sunday time-slot come 1/9.

WIOD broadcasts 5 minute news updates every hour, thus the odd program
starting times.

Two Paxson stations in Florida have dropped the syndicated Ron & Ron show, the official reason given is sagging ratings. WJRR Orlando currently has NO plans to drop the show, due to the fact that the ratings are still healthy for the duo in Central Florida.

Ron Bennington has complained on air that the stations dropped the show because of his recent revelation of Ron Diaz' wife being diagnosed with AIDS.

Hi, folks,

My name is Roy Achter, a new subscriber, and I'm responding to the suggestion to introduce myself.

I'm the morning man at an FM "Traditional Adult" music station in Rochester, MN, KNXR. If you're thinking Mantovani, Ray Conniff, Sinatra, Bennett, Rosie Clooney, Linda Ronstadt (ballads only) and that sort of artist - you've got it. We serve adults 38 and up (if one can believe ARB). We're a 100,000 watt station that covers all of SE Minnesota, a hefty portion of W Wisconsin and N Iowa. KNXR is personality radio in the sense of companionship. We like to think we're interesting and interested, and though the boss probably loves Rush Limbaugh, I think he'd think twice before running him. Howard Stern? Get outta here!

I've been in radio since 1963 and, after a series of jobs, landed at KNXR in 1973 and been here ever since. The station's somewhat unusual for a small market in that it's set up for announcer/engineer operation, that is, announcer in one studio at mic turret, engineer in control studio. Commercials are cut in the same way. One engineer has responsibility for the commercial studio (in fact, he's my morning show engineer). He books us in with station clients and handles all the commercial recording traffic.

I am hot on using the computer for prep, for tech or any other application. I'm just learning and I'm curious, so you'll be hearing from me. I'm looking forward to reading and hearing from you.

Oh, yeah. This is my real name. And it's my air name. Who can believe it, huh?

Best regards,
Roy Achter

Scott Fybush's summary of the Binghamton market was interesting...but I have one news item to add. Veteran WNBF morning personality John Leslie (who also spent years before-hand at WFBL in Syracuse when it was a serious player as an MOR outlet) has retired from the station. He's starting up a new radio venture called New World Radio, a syndicated talk service for weekend use, and intended for international distribution. He's going to be replaced at WNBF by former WMRV-FM morning personality Russ Monroe, whose first day at 'NBF will be January 16.

Bob Smith, middays WXXI-AM 1370 Rochester NY

Scott D Fybush (fybush@world.std.com) wrote:

: All the AMs are on hilltop sites for some reason.

This is odd, but in my observation it tends to be true of old AM stations. Perhaps in days of old engineers felt that hilltop locations worked better. In SF, KOIT is on Candlestick Hill above Candlestick Park (where the Giants and 49ers play) -- there's lots of flat, sea-level space nearby and certainly was when the station was built.

I noticed this as well at two of the oldest stations in Portland -- KUPL and KKBT (once KOIN). KUPL is on a small hill surrounded by flat land. KOIN is on a very big hill, Sylvan Heights -- we call them hills here, it'd be a mountain if it were on the East Coast.

I've also noticed old AM station antennas on the tops of buildings, too. Wonder why that is...

210. EZ buys KBEQ and signs option for KFKF

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 00:28:49 UTC
From: transvox@interstate.net
Message-ID: <3enbk1$lqd@vixen.cso.uiuc.edu>
Source record: 35518

The same company may soon own Kansas City's two leading country-music FM stations.

The Kansas City Star reported that EZ Communications has agreed to buy KBEQ-AM/FM for $7.6 million from group owner Noble Broadcasting. At the same time, the Star reported, EZ signed a one-year option to purchase KFKF(FM) from Sconnix Broadcasting for $28 million.

The Washington Post reported the transaction as a purchase of station assets (i.e., 314 sale). The Post's report gave the KBEQ price as $7.65 million. (Thanks to George Achaves for relaying this report to me.)

The Star's report said Noble and Sconnix had tried to buy each other's stations, but had failed. A mutual purchase is still possible because, according to the newspaper report, Sconnix would get the right to buy KBEQ from EZ Communications if EZ did not execute its option to buy KFKF.

KFKF general manager Dan Wastler told the Star that EZ Communications will lease KBEQ to Sconnix during the year in which the option is in effect, and Sconnix will operate both stations.

Now, for what wasn't in the newspapers (a lot):

Noble had been shopping KBEQ around for at least two years. The FM "young country" format was considered by many to be a last-ditch effort by Noble to stay in the Kansas City market.

KBEQ-FM had been a market leader at one time with a high-energy contemporary-hit format, but Noble let it lapse into a watered-down "hot adult contemporary" style format in 1990, and the station's audience shares leaked away to other stations.

In 1991, Noble tried a five-hour nightly modern rock program called "Planet Q." The program was well executed, but poorly scheduled and not well promoted. Citing declining numbers, the station cut "Planet Q" back to three hours a night, and took it out of orbit entirely in August, 1992. The "Planet Q" playlist had no effect on the rest of the station's day.

Early in 1993, after KBEQ celebrated its 20th anniversary as a contemporary hit station with special "20 Years in 20 Days" playlists and programming that seemed to anticipate a 70s-oldies format, it flipped to young country. The new format revived KBEQ's sagging ratings, and prevented KFKF from dethroning WDAF(AM), "61 Country," as the market's ratings leader.

KFKF had been hurting its own performance by continuing a poorly conceived LMA (leasing agreement) with KKCJ(FM).

In February 1992, KFKF leased financially troubled KXXR(FM), and installed a satellite-fed new country format at 106.5 on the dial with the call letters KKCJ(FM). KXXR's management then decided to lease rimshot signal KCFM(FM) from Lexington, and install the KXXR contemporary hit format at 107.3. The lease later passed into the hands of Ragan Henry's U.S. Radio, and the station is now known as KISF(FM).

The KFKF move was viewed as a defensive strategy to keep any other Kansas City FM station from considering a country format. KFKF was closing fast on longtime market leader WDAF(AM), and actually was #1 in most 1992 surveys. WDAF, also a country station, fought back by acquiring the rights to broadcast Royals baseball.

Otherwise, the KFKF strategy worked only for one year. Sconnix did try to beef up KKCJ a little bit by unplugging the satellite feed and installing local DJs and a hit-radio-style morning show. However, the station never has climbed out of the local radio ratings basement.

Legally, the EZ-Sconnix agreement means the KFKF-KKCJ LMA cannot be continued once the KFKF-KBEQ LMA takes effect. The three-year KKCJ lease expires February 15.

There may be a connection with a persistent rumor of an adult-alternative album station coming to Kansas City after the purchase of a financially troubled station is executed. KKCJ may be that station. I have not been able to find out.

It's not known whether the KBEQ LMA will have any effect on KBEQ(AM). KBEQ(AM) has been a fulltime affiliate of the People's Radio Network since March 1994. In the past, when Sconnix owned KCKN(AM) (now KNHN(AM)), it simply used its AM station to simulcast the FM station. With regard to ratings performance, KBEQ(AM) has beaten KKCJ(FM) in some key dayparts and age groups.

EZ Communications also owns St. Louis FM duopoly KYKY(FM) and KSD-AM/FM. KYKY is an adult-contemporary station; KSD-FM is a classic rock station; KSD(AM) is a fulltime CNN Headline News relay. However, there have been reports that EZ Communications is considering an adult standards format for KSD's wide-ranging 5,000-watt signal at 550 on the dial.

211. Phoenix Radiowatchers 1/6/95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 00:28:50 UTC
From: mhtv3@aztec.inre.asu.edu
Message-ID: <3enbk2$lqf@vixen.cso.uiuc.edu>
Source record: 35519

Today's editions of the Mesa Tribune report:

*A New PD for the Phoenix Radio Stations group.
PRS, owned by Sundance broadcasting, has replaced PD Jim Trapp with Dave Logan(PD at WLUP, Chicago). Logan will oversee four stations....KYOT(95.5), a "smooth rhythms" format which is media-touch computer based with voice-tracked jocks from Seattle, San Francisco(in fact, Bay Area radiowatcher Blake Lawrence) and Los Angeles....except for a live local morning drive show.... KZON(101.5) a live local AAA....KOY(550 AM),the satellite-delivered "AM Only" standards format....and KISO(1230AM), a satellite delivered urban AC.

*A New Morning Man for K-HITS.
Shawn Burke of WTMX, Chicago has been hired to replace Danny Davis who was fired when Oldies KPSN-Sunny 97 became 70's KCHT-K-Hits. Burke's first day will be January 16. As we mentioned in the last Phoenix Radiowatchers report, Danny Davis(ex-KKSN,Portland; KIMN, Denver; KRIZ, Phoenix; KFMB, San Diego) has landed in the morning show at former competition KOOL-FM, which now has the traditional 50's & 60's oldies audience to itself.

*Kid Radio...For Kids, By Kids
KIDR(740),K-Hits' AM sister, is looking to customize its Radio AAHS satellite format. For the next three weekends, the station is holding open auditions in shopping malls for five new, local disc jockeys...the only requirement...that they be in the fifth through tenth grade.

And one not from the paper....
Citicasters' Classic Rock KSLX is now on the net....you can e-mail the station at KSLX@indirect.com.

>when we switched to cable FM. We are now beginning a multi-year project
>to return to FM. We have the support of the administration, but I need
>some idea of the steps involved in such a process. Complications are:

Considering there is no room for a new station on either AM or FM in DC,
you'll have to look into buying an existing station or renting time on
another station. Best bets are those on AM with brokered formats. There
may be one or two AM stations in the market that are silent which are
possibilities if their signals (day and night) cover the area you wish
to reach (presumably the city). Get a Broadcasting Yearbook and a radio
and check out the dial. The liklihood of purchasing an FM station is
very remote.

Cross-posted to: rec.radio.broadcasting,rec.video.satellite.tvro

Greetings from the Pacific NW--

Talk Radio Network and Chancellor Broadcasting Network, homes of the fastest growing overnight talk show, Coast to Coast with Art Bell, now has over 135 affiliates.
As of January 4th, the network can be heard by the home satellite dish owner at the location of WABC-TV New York. The location is on Galaxy 4, Transponder 10, subcarrier 6.2 wide audio. That is in addition to their 2 digital satellite locations.
Bell is heard from 11 p.m. PST to 5 p.m. live, with an additional hour of the show re-run from 5 - 6 p.m. It dominates the airwaves west of the Rockies, located on many of the clear channel 50k watt stations. The network has an estimated 2 to 3 million listeners a week and advertising is completely sold out. Bell broadcasts the show from his home located in a little city outside of Las Vegas, Nevada.

How can anyone who viewed the interview even ask these questions?
Gingrich's mom had a camera and mike in her face, was mock whispering
many answers, and spoke "between Connie and her" across a table. There
was no effort on her part to move closer to Chung. It's not like she was
trying to whisper in her ear. This "incident" is an incident only for
those who haven't seen the video tape.

Having seen the broadcast, I saw nothing in that segment which
was the least bit out of line. "Just between us" is a standard conver-
sational tool to establish rapport, and interviewers use it all the time.
I find myself using it as well...and my guests all are aware that we
are on the air live, with phone lines lit up with callers waiting to go on
.
Newt's mom has seen her son in public life for 20 years now,
and it's far from the first contact she's had with the media. Newt's
mad right now because once again, ill-considered comments have
come back to bite him in an anatomically tender place.

Barry Mishkind (barry.mishkind@p3.f11.n300.z1.fidonet.org) wrote:

: Do you think it was appropriate for Connie to say "just between you and me"?

Better question: do we think it appropriate to refer to Connie Chung as a reporter or as an interviewer? She's so lightweight she does a disservice to hardworking reporters everywhere to share the label.

But Gingmama did indeed know the lights and cameras were on. It's impossible *not* to know -- they're the most imposing thing in the room. She knew exactly what she was doing.

: Do you think it was appropriate for CBS to broadcast it?

Yes. It helped to shed light on the true nature of Newt Gingrich, who seems to be the antithesis of everything he "stands" for: family values, military service, support for one's wife, support for one's kids, etc. This interview just adds more information to the public forum as to the kind of man Newt Gingrich truly is.

: Should we replace the Evening News with Hard Copy?

Should you turn off your TV?

: Let's try to keep this non-political.

ID>: I agree that Mario is well-spoken and has made a wonderful guest in the
ID>: past...but I wonder how he'll do as a host!

ID>If he survives. A local ABC talkshow host, J. Paul Emerson on KSFO, has
ID>called for Mario Cuomo's assassination. It'd be just like it for some
ID>rightwing wacko to try such a stunt, what with the recent clinic bombings
ID>and such. <sigh> This has become such a violent society, fueled in large
ID>part by talkshow hosts.

David (or Roger),
I think you're giving Talk radio much more clout than it really deserves. Even in the case of Limbaugh the audience is a miniscule fraction of the country's population. As a Talk Radio Network Director I'd love to believe that we control the minds of our listeners. We don't. Even the ditto-heads haven't been as Limbaughtomized as we'd like to believe.

While the KSFO idiot might prompt some mentally unstable creature to harm Cuomo, most anything could trigger it. When we see that a small fraction of the population showed up to vote we can't claim that radio mobilized the populace to sweep the congress clean. The Republicans don't have any more of a mandate then the Democrats do. Two years from now nothing will have changed but the names on the doors.

If Limbaugh has a 1 rating that means approximately 96% of the population either doesn't listen or doesn't know who he is. While he has a huge audience by radio standards, it's a very small part of the population. Not the stuff from which revolutions are made.

Rich Wood
Director - WOR Radio Network

The Triad Market has undergone some substantial changes in the past four months. With the advent of 94.5 WXRA-FM, 100.3 WFXF-FM, and 98.7 WKSI-FM, local radio mavens have had their hands full of analysis and conjecture.

The Trends seem to shore up the belief that WXRA is a new dominant station in the market. If the national radio press doesn't pick up on the success of the Rock/Alternative format, they have their heads buried deeply in the sand (like that'd e any significant surprise).

WFXF-FM 'The Fox' (70's Oldies Format ala ABC's Arrow stations) seems to have come into the market without any research, or indeed any earthly idea why they exist. On the street their salesmen are selling cherry-picked Media Audit information while their trends have steadily gone down. Coming into a market where there has been a dominant rock station feeding the same tired classic rock tunes to listeners, and then proposing to feed them more of the same, is ludicrous, absolutely ludicrous.

The management of WKSI-FM likewise seems to have some bizarre idea that they will be able to make some impact against the dominant station in the market, WTQR-FM. WTQR is not only the biggest station in the market, it is one of the biggest and best country stations in the entire nation. Rumor on the street is that their management thought that by changing from 'Kiss' (CHR) to 'Kiss Kountry' that they would be able to benefit from both sets of listeners in the Arbs while still picking up every listener from the now-defunct 94.5FM 'Kat Kountry'. Someone over there needs a lesson in Arbitron methodology. Kat Kountry never achieved higher than a four share, and they spent beaucoup bucks on their maketing. They were a very grassroots-oriented station, and it still, ultimately, was a failure. WKSI abandoned a marginally successful CHR format to take on a station like WTQR? Give me a break!

Now the betting on the street is which of WFXF and WKSI is going to change format first. A market where there is no CHR, especially given the college crowd, is a market in which teens drift from signal to signal. By keeping their CHR formatWKSI might have kept some of those teens for themselves, even with the powerful presence of WXRA. Now any CHR coming into the market is going to have to go up against WXRA and try and steal the teens from them, not an easy thing to do given the popularity of WXRA among teens, and indeed even the coveted 18-34 and 25-54 demographics.

This will be an interesting book in the Triad. Stay tuned...

BYRON MAC GREGOR.. VOICE OF "THE AMERICANS"
.NEWSMAN ..ANCHORMAN .....DEAD
FOLLOWING A BRIEF AND SUDDEN ILLNESS.

46-year old MAC GREGOR died today, January 3, 1995, at a Detroit hospital from complications of pneumonia following a brief and sudden illness.

You knew him as the booming voice of "THE AMERICANS"....

The Canadian born MAC GREGOR recharged the country with a spirit of patriotism in the smash hit narrative recording "THE AMERICANS" which twice topped the charts in the 1970's and in the 1990's (knocking the likes of Barbra Streisand, Madonna & Whitney Houston out of the #1 position.).. Recorded with the DETROIT SYMPHONY ORCHESTRA, it sold more than 3 and 1/2 MILLION COPIES and was called "the greatest flag waving success since Kate Smith."

MAC GREGOR unselfishly donated the more than $100-thousand dollar proceeds to the American Red Cross after its first release in the 1970's and again following its second major release during Desert Storm and the Gulf War in 1991.
"THE AMERICANS" earned MacGregor international recognition and an "ACADEMY OF COUNTRY MUSIC AWARDS" nomination.

Presidents Reagan and Carter were among those heads of state who commended MacGregor for "his contributions to the nation".. ..Carter saying "THE AMERICANS extols the good things about the United States that have been overlooked by the rest of the world."

In its highest commendation, the American Red Cross stated "Byron MacGregor..our Canadian good neighbor ..inspired citizens on both sides of the border with his narrative and brought support to the Red Cross in our time of need."

The sounds of "THE AMERICANS" continue to be heard over stations across the country and in Canada particularly on the Fourth of July and Veteran's Day, etc.

Canadian, MAC GREGOR became a broadcasting legend long before "THE AMERICANS" with his unique style, "golden tones", and distinctive brand of journalism.

He became the youngest News Director of a major market station when he took the helm of a 27 person news dept. at "THE BIG 8" CKLW AM-FM radio (Detroit/Windsor)..the Canadian 50,000 watt super station reaching 28 states dayside and 48 states niteside. As NEWS DIRECTOR & MORNING ANCHOR, he and his news team created a new wave of tough..gritty..investigative journalism on the air waves coast to coast from 1967 to 1977.

For the next 13 years,
MacGregor anchored the morning and afternoon prime time newscasts for WWJ NEWSRADIO 950 AM/FM CBS/DETROIT for Detroit's 24 hour news station while at the same time anchoring the prime time evening newscast for WKBD-TV 50/DETROIT.
And most recently MacGregor was the NEWS DIRECTOR and MORNING ANCHOR for GROUP W RADIO/WLLZ-FM (WHEELS RADIO) /DETROIT and Greater Media's WCSX-FM RADIO/DETROIT.

MacGregor was the winner of numerous prestigious journalism awards nationally and locally ...The RTNDA/RADIO TELEVISION NEWS DIRECTORS ASSOCIATION twice honored his spot news reports and his CKLW station newscasts with its highest award. the ASSOCIATED PRESS awarded him its top honor for the 'BEST REGULARLY SCHEDULED NEWSCAST" in 1985 while at WWJ.

The DETROIT NEWS dubbed him 'BEST NEWSCASTER IN DETROIT' in 1989 while at WWJ Radio...saying "sometimes it's hard to put his bombastic '20/20 News' days at CKLW out of your mind and concentrate on his skills alone, but Byron stands as the Voice of Authority in the city's finest collection of on-air news voices." and the MICHIGAN PRESS AWARD cited his outstanding achievement for his documentary on the Detroit/Toronto street crime.

MOST RECENTLY...ON DECEMBER 23,1994..
the BOYS 7 GIRLS CLUBS OF SOUTHEASTERN MICHIGAN honored

MacGregor with its "BENEFACTOR'S AWARD" for his support and effort in helping to raise nearly two-million dollars over the past 15 years.

MacGregor was the first Canadian to receive the AMERICAN LEGION'S prestigious "NATIONAL AMERICANISM AWARD" for "his unique contribution to the American way of life."

And the AMERICAN RED CROSS honored him with its highest honor..the "NATIONAL HUMANITARIAN AWARD"

MacGregor was also selected by the U.S. government to share the podium with President Ronald Reagan and act as master of ceremonies as the President conducted the nation's largest naturalization ceremony in 1984 in Detroit.

MAC GREGOR had just recently become a U.S. citizen himself...one year earlier in July of 1983.

But friends say MAC GREGOR'S considered his most important "NORTH AMERICAN ALLIANCE" to be his marriage to American TV-Radio Broadcaster, Jo-Jo Shutty.
Byron interviewed Jo-Jo and hired her at CKLW as DETROIT'S AND THE NATION'S FIRST FEMALE HELICOPTER TRAFFIC REPORTER...
Soon after...his romance with the former "America's Miss Teenage Detroit" & "World's Baton Twirling Champ" filled the air waves as the "BIG 8" radio jocks leaked word of their love story. Their wedding at Marygrove's Sacred Heart Chapel became one of social events of the year.

After joining forces, Byron and Jo-Jo became well known for giving back to the DETROIT METRO AREA through a wide range of community and charitable activities.

MAC GREGOR served on the BOARD OF DIRECTORS for the BOY SCOUTS OF AMERICA, AMERICAN LUNG ASSOCIATION, SALVATION ARMY, BOYS 7 GIRLS CLUB OF SOUTHEASTERN MICHIGAN, REDFORD SUBURBAN LEAGUE CHARITIES, and OAKLAND COUNTY PARKS FOUNDATION.

HONORARY CHAIRMAN AND SUPPORTER of LEUKEMIA RESEARCH LIFE/CHILDREN'S HOSPITAL for more than 12 years, a speaker for the UNITED FOUNDATION SPEAKERS BUREAU, and a member of the AMERICAN HEART ASSOCIATION STROKE COMMITTEE.
****

Born in Calgary, Alberta...Honors grad of Western Canada High School, University of Calgary, Wayne State University (Broadcast Law)

BROADCASTING TRADITION:
"Broadcasting is in the blood" Byron once said. He followed in

the tradition of his dad, the late Clarence "Cy" Mack, a radio personality and talk show host with CFAC in Calgary for 22 years. While still high school college Byron began his broadcasting career at CJGX/Yorktown,Saskatchewan..CKRC/Winnipeg, Manitoba..CFAC/Calgary, Alberta.
Byron's younger brother, Hudson Mack, a TV anchorman for CHEK-TV in Victoria, British Columbia talks of then following in his big brother's footsteps writing in a recent letter
"I remember watching you in awe...I'll never forget my visits to Windsor..going in for the morning shift at the "BIG 8"..what formative years for me..what heady stuff to watch you."
Jo-Jo's sister, Sharon Wright, a TV reporter with WMAQ-TV/NBC/Chicago says
"Byron made his mark not only as one of the most respected broadcasters in the industry, but will be remembered for his decency and personal kindness to so many ...be they friends or strangers"

Growing up in Canada, Byron pursued a love of football, hockey and flying small aircraft...but once he hooked up with Jo-Jo..he and his father-in-law Joe Shutty took to the links during the off season from "their" Michigan State Spartans football team. Bagpipes, tap dancing, art collecting and reading for the blind took up the remainder of his "spare time".

MAC GREGOR was also a board member of Rotary Club of Detroit, Adcraft Club of Detroit, Detroit Press Club, St. Andrew's Society, and Radio Television News Directors Association.

MAC GREGOR is survived by his wife, Jo-Jo Shutty-MacGregor, his mother, Murdena Mack of Calgary, Alberta, his sister, Leilani (Jim) Harvie of Calgary, Alberta, his brother, Hudson (Pat) Mack of Victoria, British Columbia, his niece Rachel, his nephew, Hamilton, his aunts, Madeline MacGregor and Betty MacGregor, his mother in law, Stormie Shutty, his sister-in-law, Sharon (Shutty) Wright. Pre-deceased by his brother, Darrel Mack, his uncles, Byron and Dr. John MacGregor, and his father-in-law, Joseph Shutty.

>50,000 watt superstation CKLW-AM in 1967.

I can remember listening to CKLW-AM & his newscasts while growing up in
Erie, PA. "The Big 8" was like a local station...much better than any of
the small-town Erie AMs. My best friend's family used to take boat trips
on the Great Lakes in the summers, and I remember he brought back snapshots
of the CKLW (or so he said) antenna array down by the river (lake?) That
was quite impressive.

I tuned in for old times sake when back in Ohio last month for Christmas.
Somehow it's just not the same. I had heard that they were a big band
sound for a while, but now it was NewsTalk 800.

>
>"He led the way with the 20-20 news style, using phrases like 'nine bloodied
>battered bodies' in his newscasts" recalled radio personality Tom Ryan.
>

Ah yes, his alliterative style. I remember "Detroit boys in blue ...."
at least once in each newscast. Must've liked the 'b' sound :-)

Why is the name Tom Ryan so familiar ? Wasn't he also on CKLW as a DJ ?
What happened to some of the others (excuse the spelling) -- Gary Burbank,
Johnny Williams, Truckin Teddy Bear, etc. I'm sure they're still around.
>From the news side, about the only other name which comes to mind is Grant
Hudson. ??

>
>In 1974, MacGregor hired Shutty, a former Miss Teen-age Detroit and World's

I never knew that they got married later. Was this well known to the
listening audience/public ?

All in all, a sad thing to read about.

WGBF-FM is the Evansville station (actually, it is a Henderson, KY station. It broadcasts 3kw from a location south of Henderson KY, which is south of Evansville, so the signal is not the greatest in town. Given the way most residents feel about Indianapolis down here, it'll be interesting to see how this goes.

In Issue #1031, Mark Roberts wrote:

...KIHT in St. Louis appeared to have little initial impact on oldies station KLOU(FM). Still, in the past few weeks, a new PD at KLOU has changed the station's slogan to "Oldies 103," and has refocused the station's playlist, indicating some concern over the rise of KIHT....

Your comments are right on--I recall reading somewhere the station is concerned with the all 70's one, so they are focusing their image as an oldies station. They were using 'Clue 103', which gives you no idea what their format is.

237. St. Louis radio changes

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 00:29:19 UTC
From: alcassel@crl.com
Message-ID: <3enbkv$lrt@vixen.cso.uiuc.edu>
Source record: 35545

KSD-AM 550, until Friday, Jan. 6, 1995, was the Headline News audio affiliate in St. Louis. The daily schedule was a KSDK-TV news simulcast from 5:30 a.m. to 7:00 a.m., after which it simulcast the NBC-TV today show, with local KSDK-TV cut-ins until 9:00. Then, it was Headline News, with local news at about :24 and :54 until 5:00 p.m., with KSDK-TV and NBC Nightly News after that, followed by Headline News and/or talk shows the rest of the night.

However, at 8:30 a.m. on Jan. 6, 1995, right after the KSDK-TV announcers said that the next local news would be just before 9:00, KSD-AM cut away to begin a new format, "Unforgettable 550, KSD-AM." Thus, KSD-AM (5 KW 24 hr.) now competes with WEW 770 (1 KW daytime) and WRTH 1430 (5 KW full time, ex WIL-AM) for a similar segment of the marketplace. KSD-AM has a live morning announcer, but carries a satellite service for the rest of the day, with "Satellite News Network" on the hour. (WEW apparently has live announcers the entire broadcast day.)

KSD-AM also positions themselves as being "loud and clear" all day and night, an apparent reference to WEW's nighttime sign-off, and WRTH's high dial position. KSD-AM's change leaves St. Louis without an all-news station during the day, which is particularly unfortunate, since clear-channel KMOX-AM (1120, 50 KW) has cut back significantly on the length of their newscast during their Rush Limbaugh broadcast. The CBS hourly newscast has been cut back, but local news is an even more notable casualty at 11 a.m., noon, and 1 p.m. The KSD-AM local cut-ins had been the best alternative to KMOX between 11:00 a.m. and 2:00 p.m.

Also, WKBQ-AM (formerly KWK-AM) 1380 is now carrying a talk show during the afternoon rather than simulcasting WKBQ-FM. I did not catch the name of the host, but it sounded as though it may have been a syndicated program. [I apologize if this is old news, but I've heard that WKBQ-AM was changing formats. This might be part of the change.]

Finally, Bruce Bradley, who has a talk show on WIBV-AM 1260 (Bellville, Ill. 5 KW, full time), now has a weekly half-hour talk show on KETC-TV, Channel 9, the PBS affiliate in St. Louis, at 7:00 p.m. Thursday. The program is essentially a radio call-in show, broadcast from a TV studio -- sort of like the C-SPAN broadcasts of radio shows, except that there's no radio broadcast. So it's _real_ "radio with pictures."

238. Help! New MD seeks advice from experienced Music D

IW>My name is Kevin Lockhart. I've just been promoted to MD, and I've never
IW>been one before, so needless to say that I'm kinda lost! Any advice that
IW>you could pass along would be greatly, GREATLY appericated (i.e. How do
IW>you get major labels to service your station?, How do you get your station
IW>on the reporting list for such publications as R&R, etc.?, Do those
IW>publications have any requirement that stations must meet or exceed to
IW>become a reporter?, If so what are they? Which labels are easier to work
IW>with?) Any advuce that you could pass along would be very helpful, and
IW>very, VERY appericated! You can E-mail me at Wino59@aol.com. Thank you for
IW>all of your help! I'm looking forward to hearing from you!

Kevin,
If you're inexperienced I'd strongly suggest you spend your time
learning to program the station. Leave the reporting status until later.
It's rarely much more important than an ego stroke.

Will the station break new music? If not, they won't care. The
purpose of the charts is to reflect the movement of new releases. If the
station is Classic Rock, there will never be a new release.

If you're in New York or Los Angeles the promotion folks will be all
over you like a bad suit. I used to be Program Director of WPIX-FM, New
York, and had to beat them off with a stick. Pueblo, CO is a different
story. You'll probably have to buy your CD's locally. When I was an R&R
reporting station there were few stations included and we had a great
impact on record sales. Today, there are many, many more stations
included, so each one has less impact and less value to a record
company.rting status isn't very important to a station. It's value and a

The value of reporting status and a subway token will get me a ride
on a train. That's all.

David A. Kaye (dk@crl.com) wrote:
: Scott D Fybush (fybush@world.std.com) wrote:

: : All the AMs are on hilltop sites for some reason.

: This is odd, but in my observation it tends to be true of old AM stations.
: Perhaps in days of old engineers felt that hilltop locations worked
: better.

And they did when the goal of AM'ers was to exploit skywave propagation.
As an example, WTIC-AM (1080 KHz, Hartford, CT; 50kw DA-N) was put on the
air by the Travelers Insurance Company in 1925 to "spread the news about
insurance to the world." At that time the antenna was a long-wire spread
between two towers atop the company's HQ, but they soon constructed a
site at the highest point nearby. Reason: They wanted skywave.

Trivia: Being the elder Class I on 1080 KHz (shared with fellow Class I
KRLD, Dallas), WTIC does not have to go directional until sunset Dallas
time, and goes back to omnidirectional at sunrise in Connecticut, buying
it at least an extra hour of non-directional transmission. (Too bad a
friend of Scott Fybush and mine had to chase all the listeners away a few
years back --- WTIC is still dominant in Hartford, but it's on the
slippery slope.)

I'm not aware of any similar DA arrangements ... anyone know of any?

Comments:
CBS-FM is back on top, Hot 97 moves into 2nd. WABC moves into the top 3 for the first time since they played music, helped by Bob Grant's #1 ranking in PM Drive and all the furor over his "racist" comments. Big winners - WCBS-FM, WABC, & WSKQ (up .8 to crack the 4 barrier). Losers WLTW (down .5), WPLJ (down .7), and WQEW (down .8).
AM Drive sees Howard at #1 again, Harry Harrison up .5, and WSKQ up over 1.5 shares in 18-34 & 25-54.
PM Drive--WABC's Bob Grant is the big winner-up 2.4 shares, WPLJ takes a hit--off a share from the summer.

News & Notes:

WYNY's new morning team Katherine Brown and David Temple from Unistar in LA. Fall rating for AM Drive on NY's only Country station - 1.4.

Lots of good buzz about the all new KISS-FM the new format seems to be getting good reviews from the papers and listeners. The WBLS/WRKS battle for the adult urban listener will be interesting.

Quote of the week - WDHA/Dover, NJ's PD Lenny Block on the Sunday night 'Pearl Jam' live broadcast "Let's see how often Eddie Vedder says the f-word". WNEW, Z-100, WDRE, WRGX and Block's station take their chances with the broadcast.

IE>Well, Bill, all I can do is relate my experience in trying to get my
IE>syndicated show on the air. We play prog-rock, which is non-commercial.

John,
This has me a bit puzzled. If your show and its music are
non-commercial what makes you think a commercial station would show any
interest?

IE>It does not appeal to the masses, and the owners of stations want a
IE>homogenized sound that sells the most spots for the most money.

That's simply the nature of commercial radio. It's got to be mass
appeal or there's no income to be generated. No income means no
paychecks. Actually, the owners want radio that appeals to large
audiences and pays the bills. It strikes me that you're approaching the
wrong market. If I were to put your show on my network how would it pay
for itself? Let's say it cost me $250,000 to produce the show, pay the
satellite and line charges and meet the production staff payroll. How
will I even hope to break even?

IE>Satellite programming seems to do that. Stations are so tighly formatted
IE>they squeek, so shows like mine or the local garden club just don't seem
IE>to have any place. Neither does artisitic expression. Radio is about
IE>money, big money.

Network radio costs big money. Have you researched the market to
know what audience this show will appeal to? How large is it? The local
garden club might have 75 members. Does that justify a radio show when
all the members can fit in a single room? It would be cheaper to run
phone lines to their homes and distribute a show that way rather than
waste airtime on a terribly small audience. What local advertisers would
find that market valuable?

IE>Bill, don't get me wrong...I'm on your side. I think radio should be
IE>more f[A people than robots. Mr. Station Owner, I see your side too -
IE>you have bills to pay. I'm just talking reality. There should be more
IE>room for the little guy (gender not withstanding), be it the indie
IE>musician or local interest group. Radio should have something for
IE>everyone, small groups of people or large, and money for the station
IE>owner.

In an ideal world that would be wonderful. In the real world small
audiences don't translate to advertising income. The station owner isn't
to blame. Would General Motors produce multiple models if the market
were small?

IE>So there we have it. The little guy is left out and the station owners
IE>are after the big buck. Wouldn't it be nice if reality were somewhere in
IE>between?

Reality IS somewhere in between. You have to be careful when a show
is driven by a personality's ego. When a show exists just because the
personality wants to do it, it will probably fail. The assumption is that
"because it interests me, it'll interest others." You need to find what
others are interested in and deliver a product they want, not one that
pleases you.

George Randell (george.randell@sbenorfolk.org) wrote:

: Great stations to listen to! What has become of those two class
: stations?

KNBR is #3 with Rush and sportstalk. It was the last NBC station to be sold, though it remained an affiliate until late last year when they just couldn't stand the NBC Radio/Mutual simulcast news anymore. I don't who's at KNBR anymore. I don't listen, but I think Frank Dill and Mike Cleary are still there.

KSFO went oldies when Gene Autry had to sell it (to pay off inheritance taxes when his wife died -- they had co-owned it). It went to King Broadcasting from Seattle (which also owned KYA) and did pretty well as an oldies station. Then the King company dissolved and KSFO went to Ron Unkefer, owner of the Good Guys stereo stores. He held it for a few years and turned around and got a good LMA deal with it (it was a good financial speculation on his part) to the present deal with KGO. During the time of the Unkefer reign it began its downhill slide. Today I'd doubt if anyone listens to KSFO.

After RKO General, its longtime owner, had to divest itself of stations, the class-act KFRC was bought by Alliance Broadcasting of Orinda. The owner is some salesman type guy who forces his staff to wear suits to work and buttons bearing such slogans as "I AM a success!". Needless to say, all the good guys quit or got fired. Under a big bands format KFRC rose to #4 (with such well-known personalities as Jim Lange, Jazzbeaux Collins, etc), but the owner didn't like old people listening to it, so he turned it oldies and it dropped to about 25th or so in the ratings. Today it's recovered somewhat, but one can tell by listening that many of the airfolks aren't very happy there. One recent situation involved their morning guy who made racist and anti-gay remarks. Just days short of a boycott of advertisers, KFRC relented and ditched the morning guy. That's about the only thing positive anybody's been able to say about KFRC in a long time.

: KGO (ABC O&O) was the home of talk radio. Back then talk show hosts were
: liberals...

Heh...yeah, I remember when Jim Eason and Ronn Owens used to be liberals. Maybe it's all the money they made, and they lost touch with the commonfolk. Both are self-righteous today, and definitely rightists. Ronn beats Rush Limbaugh in his time period, which either means Rush is slipping, or Ronn has discovered some startlingly new way to do a show.

: Oh yes, and is Don Rose still alive and working anywhere? I can never

Last I heard, Don Rose was retired and living in either Orinda or San Ramon. I forget. He had broken his leg in a skiing accident and it never did heal correctly. For years he did his morning show from his home because the pain made it unbearable to go anywhere. Don Rose was one fo the true radio greats, a humble man he was always willing to talk with people, never showing that radio ego which has done in the best of us. I miss him greatly.

Back in mid-October, I spent about 3 days in Miami (starting with the weekend of the Dolphins-Raiders game...which first got me listening to 610 while there).

I found WIOD to be one of the most entertaining/compelling radio stations I've _ever_ heard. I am a middle-aged, white, male, Anglo, hetereosexual, conservative...person...slightly prudish, too. Nonetheless 'IOD's free-wheeling provocative approach had me hooked for the entire time I was able to get to a radio. The station does feature more than its share of profanity -- yet, it is presented in a context that makes even the profane entertaining. (FWIW...Don and Mike [as good as they are], tape delayed late night on WIOD, sounded very tame and contrived compared to the rest of the "Live Crew" on 'IOD.

Phil Hendrie -- in particular -- was especially good in PM drive...and quite a few of his staged phone bits had me going...at least for a while. It's hard to describe in writing what he does...you _have_ to hear it.

No...I don't work for Cox Broadcasting...and I have no hidden agenda (at least that I'm aware of) but WIOD was a refreshing change of pace for this former broadcaster and avid radio listener. Though of an entirely different genere, it was *almost* as fun listening to WIOD as it was to tune into Jean Shepard during his WOR heydey in the '60s.

Finally, I had always thought that radio here in the 7th largest market was quite good. After 3 days of being exposed to WIOD, the D/FW radio situation (talk radio in particular), though better than most, just doesn't seem to have the sizzle of a station like WIOD (or even WQAM, which seems to have been favorably influenced by its neighbor 50 kHz up the dial).

248. WIOD (Miami, FL) Chris Baker

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 00:29:32 UTC
From: jcassara@gate.net
Message-ID: <3enblc$lt2@vixen.cso.uiuc.edu>
Source record: 35456

Chris Baker, WIOD's evening talent, broadcasted his last show on the station tonight (1/6/95). Chris plans to continue work in the stand-up comedy circuit. Arron Summers' "Passion Phones" wil be taking up his former time slot (8pm-11pm). The show will be syndicated on WSUN in Tampa, FL and her current station in Orlando, FL.

I had the pleasure of co-hosting Chris' show tonight along with other dedicated listeners. The listening audience of Miami will definately miss this individual who gave new meaning to the phrase "radio talent."

Thanks, Chris.

S. Sobol - Marketing/Tech Support (sjsobol@wariat.org) wrote:
: I must say that in my travels between Cleveland and Emporia,
: my hands-down favorite was Triple-A KBXR in Columbia. They were
: playing "The Greatest Hits from B to X" that weekend... and the
: playlist contained a wider variety of music than any other station
: I've heard in, oh, probably at least ten years. Fantastic. Great
: mix of music, too. I don't know if it's the format or if KBXR just
: executes it particularly well, but I really enjoyed listening to
: them. I hope they don't change formats when they change ownership.

Plans are to reduce the playlist, primarily by getting rid of most of
the blues. The station plays far too much of that (considering the format
it's in). It will stay AAA if the new majority owner has anything to say
about it.

: Other stations seemed run-of-the-mill; I listened to KPRC, KYYS and Kiss
: 107.3 (KISF) in Kansas City, and AC station KMHA (Magic 108) in Topeka. No
: big surprises at any of these stations. Oh... is it just me, or are most
: of KC's radio stations licensed *outside* KC?

Er, it's KQRC and KMAJ.

There have been a few non-80-90 move-ins over the years. Plus, two stations
(KFKF and KUDL) are licensed to Kansas City, KANSAS (not Missouri).
However, legal IDs do not require a mention of the COL's state name,
so most listeners don't know that.

Non-KC COLs are KQRC (Leavenworth KS), KCFX (Harrisonville MO),
KKCJ (Liberty MO), KISF (Lexington MO), and the newly formed KCCV/KAYX
network (Olathe KS and Richmond MO, respectively). The Topeka station
(KMAJ) mentioned gets into parts of KC but it is not considered to be part
of the market.

From: JJB92@aol.com
Message-ID: <3eo45e$brr@vixen.cso.uiuc.edu>
Source record: 35460

Welcome to 1995.

It appears that the movers and shakers from the radio business have been on extended holiday leave. Limited news over the last two weeks. Ratings are due out soon, so that will spark some activity.

WMAQ has brought in Rich Johnson (CNN correspondent) and Mike Ryan from WJBK-TV to handled the weekday overnight shift. It appears that Ted Lauterbach, who was recently dumped by the station, was driving away listeners in droves. It was thought that the station was going to pick up a news service to replace Ted.

Jim Murray has resigned from WPNT middays to head up the Texas Green Team Environmental Education foundation. Lynne Murray will add middays to her responsibilities in additon to the pressure associated with being the music director.

Wayne Jefferson, former General Manager of Chicago's top rated news radio station WBBM is part of a syndicate buying WOPA-AM 1200. The station broadcasts in Spanish. It is expected to remain a Spanish language station.

Be back with the ratings as soon as they are available.

Joe

>to return to FM. We have the support of the administration, but I need
>some idea of the steps involved in such a process. Complications are:
>
...you get the idea...

My advice to you would be to forget about getting on the AM or FM bands for now, especially in the DC area. You should continue your fundraising activities so that when the next system is introduced (Satellite radio, or Digital radio) you can be one of the first into it.

The way the trade publications talk about digital radio, it could be common in the next two to three years. Having the recent grads in the FCC will help get around any grandfathering rules that might pop up.

Seems the choice is either being another minor player in the traditional DC broadcasting, or being a pioneer in a new field.

Imagine having a legal ID along the lines of "America's first digital public radio station: WGTB-DR/Washington."

Would be better PR than even the selling of your old station.

M. Hale (mh5260@cutter.ship.edu) wrote:

: I personally think that Arrow 94.7 here plays the same music over and
: over. I have heard "Get Ready" by Rare Earth too much and every big 70's
: song at least twice a week. Arrow seemes to be concentrating way too
: much on the Guitar rock of the 70's. Isn't there more to the 70's than
: just Guitar Rock.

That's the idea behind this format. KCFX in Kansas City, which just repositioned from classic rock to 70s oldies, has explicitly said as much. Supposedly this helps get female listeners.

There was a LOT more to the 70's than guitar rock, just as there's a lot more to the 90's than guitar rock. But there's no way you could tell from either the typical 70s oldies/classic rock/heritage AOR station or many so-called "modern rock" stations (as reading alt.fan.kroq will often make clear).

257. Byron MacGregor

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 07:27:47 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3eo45j$bs2@vixen.cso.uiuc.edu>
Source record: 35465

I need to say that if anyone should be called a great American, I would whole heartedly say Byron MacGregor. "The Americans" couldn't have been better said by anyone else. It pains me to think how much we Americans on the lower side of the border take for granted the freedoms that we should nurture and cherish, instead of finding fault with one another. The U.S. has always been the savior of some third world or underdeveloped country now for decades. Sure, some of the these countries turn around and denounce the very hand that feeds them. Remember Somalia ? Remember Bosnia ? We have seen hundreds of times that this country has provided humanitarian aid in any circumstance whether it be famine, drought, war and illiteracy. Yet many of these samees countries turn around and deliberately defame and totally descredit the very source that tries to save their most precious commodity....life.

I think Byron said it best when he basically said that the Americans are the most unselfish and most the most unappreciated people one the face of the earth. He also said that he would not blame this country if where it can came to the point where there this country would standup in digust and simply say "TO HELL WITH THE REST OF THE WORLD". Let someone else do it.

His voice is probably the most imitated but yet never duplicated one in the history of modern radio. He was "CKLW 20/20 News", complete with bloated dead burned bodies, bloody suicides and all of the things worth living for. :-) All kidding aside, as you have probably seen the many tributes coming in over the past couple days...he and his wife have dedicated many of their time and energies for countless charities in and around the "Motor City". Yet, I had not seen nor heard about any recognition afforded to him and his wife until today. I grew up with CKLW during its' heyday back in 1968 here in the Boston area. In addition to the great Bill Drake format complete with Johnny Mann Singers jingles.....his "pipes" were the most memorable voice I remember as a child. They broke the mold when they made him.

Barry Mishkind (barry.mishkind@p3.f11.n300.z1.fidonet.org) asks:

: Do you think it was appropriate for Connie to say "just between you and me"?

Not if she intended to air it. Saying "Just between you and me" was the same as "Off the record."

: Do you think it was appropriate for CBS to broadcast it?

Absolutely not. There are a few who stated that Mrs. Gingrich knew the lights and cameras were on. This was far from the point. The point was Connie Chung said "Just between you and me." In other words, "Off the record." Whether tapes, cameras are rolling and lights were on is irrelevant. It was what was said from the interviewer that counts.

: Should we replace the Evening News with Hard Copy?

At this time, is there a difference? Both are inferior.

: Let's try to keep this non-political.

Just quoting dk@crl.com (David A. Kaye):

: It helped to shed light on the true nature of Newt Gingrich, who
:seems to be the antithesis of everything he "stands" for: family values,
:military service, support for one's wife, support for one's kids, etc.
:This interview just adds more information to the public forum as to the
:kind of man Newt Gingrch truly is.

You misunderstood. Bush ACTUALLY said 'No nude Texans.'

The CBC has been experimenting with this and has made some of its programs available in realtime on the Internet. The VOA publishes all of its worldwide newscasts on the Internet in both sound and script form (but not live, from what I understand). Please note that the number of people able to receive Internet audio in realtime is still very low and the audio quality is very poor for realtime -- the circuits simply aren't fast enough to allow a bigger frequency range.

There is also a music company in Santa Cruz (Calif) which will publish anyone's record album on the Internet for something like 6 months for $100 (I maybe be wrong on the price and time). Apparently, there are stations and record companies checking out this site and listening. I understand these to be full fidelity stereo, but as files only, not realtime.

It is really sad to hear about those once-great stations falling on hard times. Especially KSFO, which I remember from the time I was in elementary school (early sixties, if you must know). What a lineup! The great Don Sherwood, 6-9am (did he ever show up on time?); Al Collins from 9-noon (this was pre-Purple Grotto days); Jack Carney (who came in from doing afternoons at WABC, New York - another great station), noon-3; Jim Lange ("the working girl's friend"), 3-7pm, Dave Niles (what ever happened to him?), 7-midnight; Herb Kennedy midnight -6am (or whenever Sherwood showed up), and who could forget Aaron Edwards doing the news? And their jingles, from Hugh Heller, were some of the most beautiful ever recorded. Russ Hodges Sports, Giants Baseball, 49ers football, and you truly had a station that captured the spirit and style of that era in the Bay Area. Does anybody have any airchecks of KSFO from way back then? How about the jingles? Just asking.

Greetings from Los Angeles.

Here's the latest, paraphrased from a radio article in today's (1/7/95) Daily News, L.A. Life section. The article was captioned "KLAX knocks Stern on his private parts". It gave an overall look at the latest numbers. I've trimmed out the commentary and culled out what rankings the reviewer wrote about.

Morning Show Line Up

Rank	Calls	Format	Host(s)
1.	KLAX	Spanish Banda	Juan Carlos Hidalgo and El Peladillo
2.	KFI-AM	Talk	Bill Handel
3.	KPWR	Rap & R&B	Baka Boys (Eric & Nick Vidal)
4.	KABC-AM	Talk	Ken & Barkley
5.	KIIS	Top 40	Rick Dees (tie)
5.	KLSX	Classic Rock	Howard Stern (tie)
7.	The article didn't say		
8.	KLOS	AOR-standard	Mark & Brian
9.	KROQ	AOR-alternative	Kevin & Bean

Overall

Rank	Calls	Format
1.	KLAX	Spanish Banda
2.	KPWR	Rap & R&B
3.	KFI	Talk
4.	KROQ	AOR-alternative
5.	KIIS	Top 40
6.	The article didn't say	
7.	KOST	Soft Hits
8.	KKBT	Urban
8.	KRTH	Oldies

Sorry I can't fill in more, but that's pretty much all the article had to offer.

A.J. Janschewitz (ajjjr@netcom.com) wrote:
: Trivia: Being the elder Class I on 1080 KHz (shared with fellow Class I
: KRLD, Dallas), WTIC does not have to go directional until sunset Dallas
: time, and goes back to omnidirectional at sunrise in Connecticut, buying
: it at least an extra hour of non-directional transmission.

: I'm not aware of any similar DA arrangements ... anyone know of any?

I suspect that WCKY-AM (now WSAI-AM) in Cincinnatti, Ohio, and KFBK-AM Sacramento had (and still have) a similar arangement on 1530 kHz. I used to listen to WCKY-AM when I was growing up in St. Louis in the '60's, and their signal was dramatically reduced about two hours after sunset in St. Louis, which would be about the right time for sunset in Sacramento.

St. Louis is west of Cincinnati, approximately in the direction of California. However, when I lived east or south of Cincinnati, I noticed that WCKY's signal (and later, WSAI's signal) did not get weaker late at night, and may possibly have gotten stronger, which would tend to reinforce my hypothesis about these stations being similar to WTIC and KRLD.

Phil's program really shines in that it's compiled of pure improvisation and host creativity. No carts or drops have found their way into the show, with sound effects for games and background music being the only exceptions. Scripts are scarce objects on his show, as they are at 'IOD period.

Many of his loyal listeners, including myself, know his talent is of higher market quality, but we usually don't tell him. First off, his ratings already show the big picture. Second, we don't want him to leave! :)

As I was driving to and from Connecticut and Florida, I managed to catch the most amazing, bizarre and incredible talk show I've ever known of. It's Randall Terry Live, and you can catch it weekdays on small Christian stations from noon to two p.m. eastern time.

If you can imagine Dana Carvey's "Chuch Chat" and the Rush Limbaugh program melded together, you have an idea of what I'm talking about. The Rev. Terry is currently a gues of the federal government at a prision camp in Pennsylvania. In his forced absence, a gent named Harley David Ballou is filling his shoes.

The commercials are the highlight, many recorded on low quality equipment by the jailed Randall Terry himself. Either they were recorded with the highs and lows removed so they would sound authentic, or they were actually done on a portable cassette deck from the prision camp. I'm not sure.

The commercials always begin "Hi friend, Randall here..." and launch into an endorsement of a product or service that endorses Christian values. My favoruite was for a telephone service that kicks back ten percent of its profits to Randall Terry Live. You see, unlike ATT, Sprint and MCI, they don't promote the agenda of "radical sodomists" and the purveyors of child pornography on the internet." That's a direct quote!

Listen and drop a line to let me know what you think.

If anyone has any perspective or backgrounbd on the show, please mention it. I'd love to know more about. It's entertaining, but scary as hell that people beyong characture actually exist!

Call information to get the number for Barnes & Noble... they own Dorset and Marboro. I beleive their main office IS at 120 5th Ave. I have seen the tapes at the B&N Annex on 5th Avenue over the years when I lived in NYC. I always thought I'd pick them up "next time I come in the store." Now I don't live in NYC and I am very sorry I procrastinated. Phooey. Let us know how you make out.

My $.02 worth, and worth every penny!

Here's all the major players...

570 - WSYR - News/Talk/SU Football & Basketball
620 - WHEN - News/Talk/Syracuse Crunch Hockey & Chiefs Baseball
1050 - WFBL - Music of Your Life
1200 - WKRL - Simulcast of FM, Heavy Metal/New Music
1260 - WNDR - Country
1390 - WDCW - Religious
1490 - WOLF - Urban

88.3 - WAER - Jazz/Public Radio
89.1 - WJPZ - Top 40/Hot Hits/ SU Orangewomen Sports
91.3 - WCNY - Classical/Public Radio
92.1 - WSEN - Oldies
93.1 - WNTQ - CHR
94.5 - WYYY - Hot AC
95.7 - WAQX - Classic/New rock
99.5 - WTKW - Classic Rock
100.9 - WKRL - Heavy Metal/New Music
102.9 - WMHR - Religious
104.7 - WBBS - Hot Country
105.1 - WVOA - Religious
107.9 - WHEN - Hot Country

These are the Syracuse radio stations. There are a number of other signals that get into the market from Utica, Rochester, Oswego, Cortland, etc... which I didn't list here. Feel free to email me for further information.

276. ADMINISTRIVIA: Last chance on *real name* poll

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:32 UTC
From: names@airwaves.com
Message-ID: <3epe1o$6j3@vixen.cso.uiuc.edu>
Source record: 35484

I will be tallying and deciding on the issue of whether or not to require the use of real names on posts to rec.radio.broadcasting/AIRWAVES. If you have not already made your desires clear, you should write in and do so as soon as possible.

Basically, this is a straw poll to see if there is sufficient support for a 'real name' policy here on rrb/AIRWAVES. The logic is to increase the Credibility Quotient (CQ) of the group.

If there is suffiecient support, then posters will be required to have their real names someplace in the article, whether it is in the From: header or in the body of the article. Exceptions will be made as required for those wishing only to be known by 'air names' or for those who write me *specifically* requesting that their names be withheld from publication (although they will have to send the name, I won't include it).

Please asend me a SHORT note (replying or following up to this post should work if you are reading via Usenet) expressing your preference and your reason for that preference.

Ill be getting back to the group some time next week (the week of Jan 9 - 14).

If you are not reading via Usenet, send your note to...

names@airwaves.com

Please don't mail to the newsgroup.

Bill

277. Atlanta News

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:33 UTC
From: an904@cleveland.Freenet.Edu
Message-ID: <3epe1p$6j4@vixen.cso.uiuc.edu>
Source record: 35498

Atlanta is a rather strange market, I have found in my six months here. Radio stations have strange patterns for directionals, stations from outlying areas are moved closer to town to maximize the signals, and of course the level of cutthroat competition is very high here.

I'll start to provide information on the market as I have it available to me.

First, and formost, to pat ourselves on the back, WIGO (1340 AM) began running the Ralph from Ben Hill show weekday afternoons from 3PM-6PM. Ralph has been 'underground' for the last 90 days, waiting out a non-compete clause from his former station, crosstown WGST (640 AM/105.7FM). RBH was on 'GST weeknights 10P - 2A. Before Ralph began on 'IGO, we were running Ken Hamblin's syndicated show from Denver in that slot, live. We are now running Hamblin delayed at 8P weeknights.

WGST debuted two shows yesterday (Saturday 1/7), _Saturday Morning Live_ is an irreverant look at the prior week, hosted by traffic copter reporter Keith Calland, and Major Tom. After WGST's coverage of the NFL playoffs yesterday afternoon, they began running _The Tom Leykis Show_, which brings another syndicated voice to an already crowded market.

In future reports, I'll note the flavor of the market, and give you a sense of how this growing city is adjusting to it's new international status, with the world beginning to focus its attention on Atlanta (especially in light of the Olympic Games).

279. North San Diego Radio Watchers

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:34 UTC
From: ChrisCarm@aol.com
Message-ID: <3epe1q$6j8@vixen.cso.uiuc.edu>
Source record: 35499

North San Diego County Radio Watchers: Jan. 6, 1995

Rumors:

KFSD (94.1, 100kw) and KIOZ (102.1), both San Diego county broadcasters might be in for a frequency swap. Par Broadcasting, which owns KIOZ, Oceanside, has
been wanting higher power for the "Real Rock" station. But several applications
have been contested by cross-town rival, KCBQ (105.3). The last application wanted
to move the transmitter south, and on a higher peak. But, as indicated, KCBQ balked
at the move in a letter to the FCC. So, Par Broadcasting went shopping, and found
a possible frequency swap with San Diego's only commercial classical station. An
announcement, and filings are expected shortly. One thing is for sure, that if the deal
goes through, the classical format above 91.9 will be no more in San Diego County. 102.1 could become a country, or espanol outlet. Par Broadcasting also owns
KOGO (600), KKLQ (106.5) both San Diego, and KKLQ (1320) Oceanside.

KFMB-FM scuttle is to jump from the "Star" format to country. The county is home to
two country stations (KOWF-FM Escondido) and KSON AM/FM (San Diego). In the recent moves, the Star format hasn't been a ratings success that wasarticles promised.

But perhaps the strangest move might come from Carlsbad-based KKOS (95.9, 3.8 kw). The AAA format leader in North County has wanted to make a better impression
in San Diego ratings. In a complicated move that involves the FCC and the Mexico
government, KKOS might change city of license and a frequency move. When I called program director, Ron Lane, he said that the expected move might happen before the summer.

THIS SUCKS: Nicole Pearson, Airwatch traffic reporter for KFMB AM/FM/TV under went liposuction surgery -- and gave periodic on-air reports. The three-year veteran
has been hosting seminars for a Coronado-based plastic surgeon -- who performed
the surgery.

New Oldies: KCBQ (1170) has changed its oldies from 50s to 60s oldies. The station formally played the "KOOL Gold" syndicated format. It's now broadcasting
LA-based Westwood One oldies format. FMer KCBQ is reportedly ready to change from a 70s / 80s format to a harder rock format.

Here's my list of top stories for San Diego radio 1994:

You either like him or hate him, but Tom Leykis has shook up Westwood One in his
3 p.m. to 7 p.m. weekday show. And, I'm glad to report, he has toned down his
cross-town ranting about KFI. He is on KMPC 710, Los Angeles and KSDO San Diego

KFMB's 4 to 5 p.m. "San Diego Today." It's fresh, long reports, and entertaining.
Runner-up to KOGO. They have local news live 24-hours a day on the top and bottom of the hour.

All worn out and should go: KFMBs morning team of Hudson & Baurer. They have
been a San Diego icon; but the image is wearing thin.

You shouldn't let him go: KFMB fired afternoon host Mark Larson. Lucky for KPRZ
San Marcos, they picked him up. The religious station got a kick in the pants, and
Larson's talents have shown. Oh yes, he's the station manager too.

San Diego got some needed morning laughter from Don Imus on KOGO, wrestled with politics with G. Gordon Liddy, and the best overnight talkshow with Art Bell. KOGOs entry to talk radio shook up KFMB and KSDO -- for the better.

Dave, Shelly, and Chainsaw, jumped to KIOZ, while XETRA-FM re- thought their morning line-up several times. KCLXs morning entry of Mark and Brian was dropped -- because of low-brow humor and crude comments. XHRM 92.5 "The Flash" proved they were not a flash in the pan -- and earned respective ratings.

All in all, another interesting year for the fifth estate.

280. Re: where's Dave Balm

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:36 UTC
From: jjb92@aol.com
Message-ID: <3epe1s$6jb@vixen.cso.uiuc.edu>
Source record: 35400

>>So, does anyone know where Dave Balm (sic) went and why he is no longer
>>with WBBM?

As pointed out in previous comment, Dave Baum is doing a Sunday morning talk show on sports talk 820, WSCR. Dave also does fill in work during the morninig drive when the regular hosts are on vacation.

Dave left WBBM when the station decided to concentrate solely on the "all news" format. His talk show was one of the casualities of the decision. Dave now works in the radio consulting/training business.

I don't believe Dave ever worked for WGN on a regular basis. He does turn up around election time on Chicago's WMAQ to discuss the results of the election, local or national.

Let me know if you would like any more info.

Joe:

I know TV is somewhat off the subject, but just before I left the area last July, (I am originally from Gary, and was morning drive host at WLTH there) Univision had completed some sort of deal to buy WGBO-TV (Ch. 66) and was planning to make it the Chicago affiliate instead of WCIU (ch. 26) much in the same way that WSNS (44) is the Telemundo affiliate. What happened? Did 66 go spanish? And if so, what happened to 26 and their nighttime and weekend spanish programming?

: the same as "Off the record."

I was about to reverse my opinion based on Dennis's argument. Certainly,
if there's a mortal sin that reporters can commit, it's reporting
something told off the record. The question is whether the "Just between
you and me" was the *same* as "off the record". My view of the video tape
says no. I get the sense of a *mock* conspiratorial tone to the
phrase. I suspect Chung would've gotten the same response had she
gone into a little-girl mode with an "Oh, please!"
But, this is my perception of it.

IB>: Do you think it was appropriate for Connie to say "just between you and me
IB>: Do you think it was appropriate for CBS to broadcast it?

IG>How can anyone who viewed the interview even ask these questions?
IG>Gingrich's mom had a camera and mike in her face, was mock whispering
IG>*many* answers, and spoke "between Connie and her" across a table. There
IG>was no effort on her part to move closer to Chung. It's not like she was
IG>trying to whisper in her ear. This "incident" is an incident only for
IG>those who haven't seen the video tape.

The "incident" was little more than a publicity stunt that suckered the
press and Talk Radio. We've all heard far worse characterizations of
Hillary Clinton from far more highly placed people.

CBS will get a ratings windfall for the show and all of us in the media
who covered it will have contributed. My only regret is that I didn't
think of it.

In these days of hidden cameras and news crews invading homes as police
accomplices during drug raids, I think Connie Chung is a minor offender.
The name of the game is ratings, pure and simple.

: : KRLD, Dallas), WTIC does not have to go directional until sunset Dallas
: : time, and goes back to omnidirectional at sunrise in Connecticut, buying
: : it at least an extra hour of non-directional transmission.

Until 1977, KFAX 1100 in San Francisco had to operate 2 transmitter sites,
protecting WWWE (I think) in Chicago or somewhere.

The Hayward plant (30 miles from SF) ran 50kw into a 4-tower array from
5:00am local time (7:00am in the Midwest) until sunset local time. Then,
from 10:00pm (midnight Midwest) to 2:00am KFAX ran 1kw non-directional
from their studio in the middle of San Francisco when the Midwestern
station signed off.

During the summer this meant that KFAX signed off at 8:30pm and came back
on at 10:00pm.

It likely would have stayed in place, but then the FCC in its
questionable wisdom decided to place KREX in Grand Junction, Colorado
also on 1100 with a very narrow pattern protecting both stations. And
THEY were given fulltime authority. KFAX then protested to the FCC
saying that if KREX could have it, so could KFAX, having been on the
scene since the 1930s and all. The FCC agreed, and now KFAX runs 50kw
fulltime.

This is all quite funny, since KFAX has block programming and doesn't
even show in the ratings, even at 50kw fulltime.

There was no relationship here. WEVD-FM moved down the dial and the 107.5 frequency was unused for at least a decade. Similarly, 103.5 was also dead for more than a decade when WPAT-FM moved down to 93.1, (so it could be at 93 on both the AM and FM dials). WTFM did not come on line over 103.5 until 1962.

Another frequency that was left dead due to failed attempts was 100.3 when WMGM-FM went off the air. I have never heard of WNJR-FM actually being on the air, let alone on that channel. Similarly WFHA was a surburban station in Red Bank, NJ that eventually got it's final assignment on 106.3. As far as NYC was concerned, 100.3 was dead for 4 years until WVNJ-FM went on. Even then WVNJ-FM was inaudible until they got their power up months later.

WFHA finally went off the air around 1970-71 when WHTG-FM, a few towns north in Eatontown, NJ bought them up and moved it's operation from 105.5 where it's coverage was being reduced by WDHA from further north in Dover, NJ.

I have a few bits of memorabilia from the KSFO of that period--including a black and white 8mm sound movie I made of the 1961 foot race from Stinson Beach to the Ferry Building between Lange and Sherwood. Aaron Edwards narrated it for me. We had a world premiere in Al Newman's office. I was 22 years old and it was pretty heady stuff.

When Sherwood's son, Greg came to work at KQED a few years ago I asked him if it were true that his dad got fired from KCBS for getting caught in the act with one of the secretaries in the employees' lounge.

"Yeah! That was my mom!," was his enthusiastic reply.

Yep, those were the days. We'll never see anything like it again because of the fragmentation of pop music culture.

>I'm interested in advice on doing phone interviews for radio on a low
>budget. One is, what's the best way to get a reasonable recording from my
>home phone without a lot of buzz and without spending too much money.

1. Get a phone that you can take apart...and one that has a "mute" button.
2. Take it apart and trace the wires from the earpiece to the "innards" of
the phone.
3. Attach a cord to your tape machine to the screw terminals those wires
are connected to and you'll get a fairly clean connection...as clean
as the phone lines allow.
4. You could always run that into an equalizer to play with the output
until you trim out any unwanted noise as well.

(an AT&T desk phone with mute is around $29.95 at Target)

>Secondly, for those who appreciate how important it is to be in the same
>room with someone and making eye contact for an interview, but are forced
>often to do phone interviews, how do you make up for not "being there"?

That often means you must spend a good deal of time in what I call the
"pre-interview"...talking about that person's work, home, general chit-chat
to make the person feel at ease about the interview/interviewer. Once I
hear the tone of the conversation "warming", I try to segue into the actual
interview ASAP.

Good luck!

Alan,
I am not clear on that myself. I must confess that I didn't query the station
- I didn't want to appear another angry raving listener. It did ID as "Your
'cool' oldies station". The prior "KOOL" oldies station in this market (a few
years gone - on 1590) had a somewhat different sound and playlist. Both of
them were superior to the KBSG playlist, though KBSG has the advantage in
signal quality and coverage. Anyone else have details?

I like the "homeyness" too. When in Podunk, do as the Podunkians do.

Sort of like when motion pictures killed Vaudeville? You went to the same theather, but instead of having touring impressarios, local wannabes, and dog acts on the stage, they now had instead a silver screen, a projector and an organist. You didn't see live talent, you got something canned that came in from Hollywood, or was it from Astoria or Brooklyn, NY?

Just remember what George Burns said about it; "When Vaudeville ended, young performers had no place to be bad." IMHO, I would say he might want to add this to that line today; "until cable TV came along". <vbg>

293. Talk Radio Network - Art Bell Show

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:49 UTC
From: richwood@commspec.com
Message-ID: <3epe29$6k0@vixen.cso.uiuc.edu>
Source record: 35495

IF> Talk Radio Network and Chancellor Broadcasting Network, homes of the
IF>fastest growing overnight talk show, Coast to Coast with Art Bell, now has
IF>over 135 affiliates.

IF>the show re-run from 5 - 6 p.m. It dominates the airwaves west of the
IF>Rockies, located on many of the clear channel 50k watt stations. The network
IF>has an estimated 2 to 3 million listeners a week and advertising is
IF>completely sold out.

I'm sure Art will appreciate this commercial promo. However, when you use the term "dominates" and quote ratings, you'll have to be a bit more specific. I assume the "2 to 3 million" figure is a cume figure rather than Average Quarter Hour, since major network daytime figures rarely reach those heights. A overnight show in a non-rated daypart wouldn't be able to deliver those numbers to an advertiser. If they are cume figures, they're awfully low for a network show.

Also, just because a show can be heard on a few 50kw stations doesn't qualify it for domination status. Actually, unless a show can deliver 80-85% coverage of the U.S., it doesn't qualify as a network advertising vehicle. That coverage is measured by the stations in their metros, not that they can be received in 85% of the country.

I think you'd serve Art better if you'd temper the superlatives and say that Art runs an interesting show that feeds as one of the few live network shows in that time period. If he's making money in that time period, he's a genius and deserves the credit.

294. You can be fined in the UK for just tuning in

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 19:22:50 UTC
From: JayCee@midmarsh.demon.co.uk
Message-ID: <3epe2a$6k2@vixen.cso.uiuc.edu>
Source record: 35496

I was reading a report here in the UK about a man who was fined heftily
for having a scanner receiver in the boot of his car which was tuned in
to the pirate station Laser Hot Hits though it was switched off at the
time.
He was fined 1000 UKP plus 500 UKP costs for listening and intending
to listen to an illegal radio station under a little known law
introduced in 1949.

It got me to thinking. What is the situation in other countries?

To think that the majority of my fellow students in the 1960's could
have faced a similar fate when Radio Caroline was all the rage.....

As a radio listener with no connection with any aspects of broadcasting
I can see the nuisance of pirate transmissions and the possible interference
that can be caused to legitimate airwave users but it does seem more than a
tad heavy handed to take such action on listeners who take advantage of
tuning in to whatever is available in their area.

This is actually the 2nd time WRNO-FM has been sold. Two years ago Gulf South Broadcasters sold it to a local group of businessmen.

WRNO shortwave is still owned and operated by Gulf South Broadcasters, (Joe Costello).

296. Re: Getting On The Air - WGTB

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 23:54:57 UTC
From: "Timothy Z. Sawyer" <tzsawyer@sawyer.com>
Message-ID: <3epu0h$8bu@vixen.cso.uiuc.edu>
Source record: 35404

>:Subject: Getting on the air - WGTB
>:From: shantech@aol.com (Shantech)

>:I know this message may seem a bit naive, but please forgive that.

Indeed, but all is forgiven, if you don't ask....

>:Complications are:
>:1) All NCE frequencies are already allocated in DC.

Yes you are correct - all NCE channels in the Washington/Baltimore area are in use.

Here's the way this works - For every channel in use, it eliminates 5 to 7 adjacent channels, which are at the very least, 2 above, 2 below and of course the desired operating channel (that's 5), if you add in the third adjacent channels, three above and below you get seven. NCE FM service is allotted 20 channels (channels 201-220) on a non-interference basis to themselves and on a distance (mileage) separation from the first commercial channels in use on channels 221, 222 or 223. Channel 218 must meet the required separation to commerical channel 221, channel 219 to commerical channels 221 and 222, and channel 220 must meet the mileage separation requirements to commercial channels 221,222 and 223 based upon the class of station (power/height) proposed and the class of station on the first three commerical channels. In addition, there is also a protection requirement to stations operating 53 or 54 channels removed from the desired channel (I.F. protection requirement). So with the 20 channels to begin with, we end up with four core channels within a given community (sites within the community). Additional stations can be accommodated on the fringe of a community depending on the power of the core stations, ie. we squeeze them in on a non-interference basis. Additional allocation problems can occur if there is a local TV channel 6 in operation, however in Washington we don't have that problem. What we have is the core stations operating with powers ranging from 36kw to 75kw.
Ch. 203 WAMU 88.5 MHz 50KW
Ch. 207 WPFW 89.3 MHz 50KW
Ch. 211 WDCU 90.1 MHz 36KW
Ch. 215 WETA 90.9 MHz 75KW
As can be seen, the channel progression is every 4th channel, one would think that Ch. 219 might be available, however, Channel 220 is in use in Takoma Park, MD (DC metro), so Ch. 219 is not available. Operation outside of the reserved NCE channels is possible, however use of those channels (commercial) requires that mileage separation requirements be met as if the proposed station was a commercial station. Given those requirements, most would choose to be a commercial station rather than a

non-commercial station. Additionally, a detailed showing must be made as why it would be in the public interest to assign the commercial channel for NCE use and that there are "other" channels available for assignment as commercial channels. That's _not_ going to happen here in DC or any other large market. What can you do? Not much, you can propose a share-time operation, or you can object to the license renewal of one of the core stations...(also, not likely to succeed.)

>:2) Our call letters have been taken by a relatively new country
>: station in Ft. Wayne, IN.

Deleted call letters are recycled and available for use by others.

>:3) We are only at the beginning of fundraising.

Send me money...(sorry couldn't resist.) This note is my pro bono work for the week.

>:Silver lining:
>:1) Several Gtown law grads have been recently appointed to high FCC
>: positions.
>:2) I am friends with the University Counsel.
>:3) We still have a pretty good base of listeners who listened
>: to the old station.
>:4) Many of our station alumni have moved on to good positions in
>: broadcasting including managment and ownership.
>:5) The administration is pretty supportive.
>:Your help or words of encouragement would be greatly appreciated.

Having connections in a city based upon connections is always a plus, however, it will not help in this case. It is my understanding that UDC is having or will face budgetary problems in the near future - my quick answer would be buy the station back and offer them limited use (time) of your facility.

Good luck!

> Can someone point me to the online service that uses AP for their online
> news service.

Just to clarify here:

On CompuServe, you can GO APO to just randomly sift through the last 48 hours' or so of AP wire stories. They're categorized: National, Washington, Sports, etc. It's part of Basic Services, so you won't run up the clock there.

You can also GO ENS to set up clipping folders. These will scan the AP wire 24 hours a day (and Reuters, and the Washington Post, and several other wires, if you so desire) looking for whatever keywords you want (every story with the word "radio" in it, for example). This area carries a $15/hr surcharge about normal per-hour connect rates, so you should use it with some sort of navigation program that lets you go in, grab the stories, and get out fast.

Prodigy also lets you scan the current AP wire. Just JUMP: AP Online. They keep threatening to charge for it, and then make it "free to the end of next month!" So you might want to check with Prodigy Member Services before you start going crazy in there.

All of *P*'s online nespapers also have access to the AP wires: LA Times, Newsday, Atlanta Journal-Constitution, and Tampa Bay Tribune.

Of course, if you're planning to use these AP stories on-air, you need to work out a deal with the AP first. We have, like, lawyers and stuff. <tm Beavis>

Speaking for myself, not for the AP,

301. Do Class D stations accept inteference?

Newsgroup: rec.radio.broadcasting
Date: 1995-01-08 23:55:03 UTC
From: davidb6517@aol.com
Message-ID: <3epu0n$8co@vixen.cso.uiuc.edu>
Source record: 35409

My station is a 10 Watt Class D station.
We are licensed to broadcast just outside the Phildelphia area, and a little into it...bascially, we can't go any further.

There is a translator on the same frequency as us in North Philadelphia...not exactly sure where, so I can't give a precise distance...but I would say it is probably 15 miles away (maybe more).

We supposedly are broadcasting with a 5 mile radius...(Horz. ERP of 14 W....Vert. ERP of 23...not sure on the vert.) However, the signle gets so week it is barely recognizable about 2.5 miles away.

Our antenna points into West Philadelphia, from the suburbs, and their points from North Philadelphia down....not sure exaclty where.

Now, I was contacted by the Assnt. Chief Engineer of the station with the translator (WWFM, for those who wish to look it up, they translate onto 107.9) and he asked me if we were still on the air....I explained that we only broadcast from 2 to 9 PM on weeksdays, and he asked if we were willing to sell out licens because his station was interested in broadcasting into West Philadlephia. At the time we were not getting any iterfernce that we could tell (also at the time, we were having so tramsmission problems which have since been repaired).

At last check, we were outputting 9.5 Watts with 100% modulation and still getting interfernce....sometimes we get it within the station itself!

Now, I want to know if Class D's are licensed to accept interfernce from commercial stations or not.

If so, WWFM is the lowest form of commercialism on the earth and took advantage of a bunch of high school students.

(I really hope I got the call letters correct of the other station, because their is a station, WFMJ, 107.7 I believe, who we've had trouble with before, but it is not them this time.)

From: transvox@interstate.net
Message-ID: <3epu0o$8ct@vixen.cso.uiuc.edu>
Source record: 35417

Does anyone recall the strange arrangement that a station in Iowa City,
Iowa had? The station, at 1560 kHz, was required to leave the air at
Iowa City's local sunset. However, it was authorized to return to
the air later in the evening AFTER local sunset at Bakersfield, California,
where a station at 1560 kHz either reduced power or directionalized.

I know this arrangement was in effect in 1980 -- I remember a description
of it in the NRC antenna pattern book. Evidently, that's not the case
any more, since KCJJ Iowa City is now listed with 1 kW, DA-2 in M Street.

Source record: 35410

A slight correction to a recent article concerning KFRC: The station did not go from RKO directly to Alliance Broadcasting. Bedford bought KXXX-FM (99.7) from Emmis and renamed it KFRC-FM...that's BEFORE they actually bought KFRC-AM (610) from RKO, though the deal was in the works at the time. So it was Bedford who made KFRC an AM/FM combo again...and it was also Bedford who began the obnoxious suits-and-success-buttons policy. Alliance bought the combo in the summer of 1993, and promptly dumped the "Magic 61" MOR format in favor of an oldies simulcast, citing poor sales prospects even with the high 12+ ratings the station garnered. The KFRC AM/FM combo is now a 25-54 powerhouse in the Bay Area. Once there's baseball and hockey again, a lot of KFRC-AM's time will be spent broadcasting the A's and San Jose Sharks. And yes, KFRC recently fired morning co-host J. Paul Emerson, who quickly took up the morning slot at new right-wing talker KSFO.

To anyone who's unaware, Don Sherwood was THE morning man. He was a hard-drinking, partying guy who could do a mesmerizing morning show in his sleep. He went everywhere, did everything. He did skits, stunts, had a very gregarious view of life. So successful was Don Sherwood that KSFO paid a standby DJ (Carter B. Smith) for Don's shift just in case he was too hung over or too distracted to show up for work. This went on for years. When Don Sherwood decided to retire, KSFO paid him $10,000 a year (equivalent to about $50,000 today) NOT to work at any other station in the SF market. THAT's how big Don Sherwood was.

In the USA, the only restriction I'm aware of is that a person can not listen to cellular phone calls, and this was a fairly recent law. It applies only to cellular calls. Everything else is fair game. I imagine it has something to do with the doctrine in the USA that the airwaves are a public resource used by others operating as public trustees.

: To think that the majority of my fellow students in the 1960's could

Unfortunately, the story is true...Koop died on New Year's morning
in Buffalo after more than a decade-long battle with severe chronic
leukemia...he had been off the air since just before Thanksgiving,
taking a last-ditch experimental treatment.
Didn't know him well myself (I left the Buffalo market just as he
was arriving) but mutual friends and colleagues tell me he was an
outstanding reporter and interviewer, and very much a perfectionist.
He was also a very private man, and even his closest associates
knew little or nothing of his illness until it became public knowledge
late in 1992. Few knew how close he was to death at the close of
1994. Many of his Channel 4 colleagues actually expected him to
come back for at least limited duty, and a lot of the future strategy
for the news operation there was based on his eventual return for
at least the 6:00 newscast.

Felicia Ledesma has left WJZW FM 105.9. She resigned from her 7-midnight position stating personal reasons. Felicia wasn't at Smooth Jazz 105.9 for very long, but she was a familiar voice to the fans of this format. She used to work mornings at the former WJZY "Jazzy 100" back in 1993.
I've heard Jessie Brandon steadily on the 7-midnight shift so, I'm assuming she has that position full time now. John Horan has been hired to work weekends and fill in. Both Jessie and John are former full timers from Jazzy 100.

Rocker WWDC, FM 101.1, has lost Music Director and mid-day jock Dusty Scott. Dusty, who has been with DC-101 for several years, resigned on December 30, 1994. No word yet on why he decided to leave the station. Leslie White and Bill O'Brien are alternating the on air shift until a replacement is named.

Last week, M. Hale (mh5260@cutter.ship.edu) commented here in Airwaves/RRB on WARW FM 94.7 and their Arrow format. He asked for our thoughts so, here are some of mine. Here's part of his message:

>I personally think that Arrow 94.7 here plays the same music over
>and over. I have heard "Get Ready" by Rare Earth too much ...

I agree. Songs are repeated entirely too often. Songs I hear on the way to work on Monday I hear on the way home from work Tuesday.

>Also, their jocks are too happy sounding on the air. They sound
>like they aren't themselves - they are artificially happy and they
>add too much useless chatter to the on-air presentation.

I agree with this statement too. Many jocks from the Light Rock format were kept on board. Perhaps they're being told to try to sound a bit more perky or something. It's just not working in my opinion. Too many sound phoney.

>Maybe they should check out Dame Media's "River - Rock 'n Roll
>Without the Hard Edge" format!

This is the format I usually listen to when I'm in the mood for 70's music. The format is on WKMZ FM 97.5. They're licensed to Martinsburg, West Virginia, but the strong signal (50,000 watts) comes south and east all the way to downtown D.C. The variety in the music is wonderful! As I write this they are playing WITHOUT YOUR LOVE by Toto. I can't recall hearing this played on WARW. Yet, I know they play HOLD THE LINE every few days. The jocks aren't very good but, then again, that's small market radio for

you. Besides, when I listen to WKMZ, I'm listening for the MUSIC
not the JOCKS.

>Finally, does anyone in the DC/Baltimore area have trouble getting
>Arrow?

No problems reaching it at my home (Frederick, MD.) or while on the
road in the areas north of D.C.

There you have my thoughts on some of Mike's statements and
questions. I know there are a lot of fans of this format however
WARW just hasn't shown it in the ratings yet.
Maybe management should focus less on the jocks and tweak the
music a bit. A few weeks ago the WASHINGTON POST reported that
former WASH morning co-host Jeff Baker came to WARW to chat with
the on air staff. I would have loved to have been a fly on the
wall during that meeting. Being forced to sit in a meeting and
take advice from someone who doesn't even work in radio anymore.
What a treat!

Shan...

While I'm a big supporter of student-run college radio stations (having
been a proud grad of WMUC-AM/FM in College Park, Md.), I have to chime in
with some practical, if not very encouraging, advice.

And that is...hang on the the cable FM system for now, and save up your
money to take advantage of what new technologies may be able to offer a
superior means of broadcasting your signal to your listeners. What, if
any, is the *magic* of an over-the-air FM station? If your system
provides a super-clean signal into the dorms and major campus buildings,
and serves your listening audience, why the need for a frequency?

As other have mentioned here, your one major hurdle is the lack of frequencies in the D.C. area. That's a very tough nut to crack. And why would you want the hassle of dealing with the FCC *at all*? Community ascertainment, licence renewal, logs, hassle, higher visibility with the school administration, etc., etc. etc. Who needs it? (Especially the hassle potential with the administration; while you have a friendly president today, that's not to say you'll have one forever.)

There are many promising technologies on the horizon, which offer the opportunity for you to get on the air *without* a piece of paper from the Feds; these include broadcasting over a computer network digitally (like this station in Chapel Hill, N.C. that is doing radio over the Internet). There's also the "radio on demand" services that are being discussed (EZ Communications and Microsoft are working on one such system).

My advice: forget a frequency, keep up with the current literature on alternate (and far superior) means of transmission, and aim 'GTB toward the cutting edge (musically and technologically).

Cheers,
Max

Although I work at another radio station in Lexington, KY, I've noticed that many of the things you've mentioned about The Arrow format in DC (which I've had the opportunity to listen to) also apply to the Arrow 102.5 in Lexington. A station with a similar format, in Ft. Lauderdale, WBGG... Big 106... does a much better job, with collages and clips from the 70s, and an enormous variety. Although the Lexington station is still using sweepers outside of morning drive, the station seems cluttered and repetitious.

Arrow formats around the country might want to give Big 106 a listen... The announcers seem genuinely interested in the music, AND the area-- and do not come across as pretentious announcers playing another kewl song...

I am thrilled and proud to say that B-92 is on the air thanks to a new LPB Signature III audio console. When it was shipped in they had to escort it and the other equipment by armed guard, after incoming TV equipment had been hijacked. A recent article about LPB in The Philadelphia Inquirer (August 15, 1994) went into some nice detail about B-92 and managed to get an e-mail interview with the station. LPB is proud to support B-92. Change is good, and B-92 is part of that change!

Peter,

The Bitboard number is 817 462 4095. They'll give you a two week free trial.
It's operated by Kidd Kraddick, morning personality at KISS FM, Dallas.
He also publishes an excellent monthly magazine for morning jocks called
"Morning Mouth."

Another very good online service is RadioStar, operated for about 8 or 9
years by Bob Hamilton in Carmel, California. His number is 408 626 1800.

I don't have a financial stake in either of these operations.

From: Matt.Francis@admin.utas.edu.au
Message-ID: <3evvsf$921@vixen.cso.uiuc.edu>
Source record: 35424

I'd appreciate peoples thoughts on an issue which has intrigued me for a while now ..

There are a couple of "north American" accents (for want of a better description) on Australian radio (mostly news reporters). I used to work with a reporter with what could be best described as a 'strong' Canadian accent and we were forever battling station management about whether she should be allowed on air. The newsroom staff all thought yes - management said "But, but, it just doesn't sound *right* ..." We got her to practice her "g'days" over a few beers after work and talked her out of trying to give out the latest ice hockey scores in the sportscast.

Do 'accents' matter? Do they grate with audiences? 'Spose I turned up one day looking and said "g'Day mate, got a job for me?" and was the best employee you could ever hope for ... except for an Aussie accent?

Look forward to your opinions.

Hey Shan,

You need a more up-to-date source of info. The country station in Fort Wayne that "took" the WGTB calls (which of course were totally available -- the FCC doesn't "reserve" calls or officially recognize the "callsigns" used on carrier current) went back to its old calls of WIFF-FM about a year ago. It's actually in Auburn IN, on 102.3.

Regards,

-=Scott Fybush - fybush@world.std.com=-

PS - The best suggestion I can offer is to look to *AM*. Check out the costs of leasing time on one of the market's smaller AMs, and you might even find it less expensive than you'd think to just buy one outright.

With our station going on air this September, we are in a position to pick the right equipment from the start. I've read some about computer systems capable of running spots, promos, intros, outros and the like, but are there systems capable of holding vast numbers of songs (i.e 400 CDs worth) and delivering them in a quality and reliable manner? We have studied some fine CD changers but feel that, if possible, we'd be better off going with a few LARGE hard drives or even a rewriteable CD storage system. We are hoping to cost-effectivey (P.C. for "we're a bit tight") achieve this. Comments from those who have used commercial systems or even a custom setup, would be well re-cieved at my e-mail address or, if you feel it would benefit net users, to post a reply to this group. We're going to be live for the most part, but need the ability to let the station run itself once a week and during the night. Big thanks, in advance.

I like listening to WLS 890, here at night when it can be recieved clearly here in Dallas, Texas. Though, there is a female talk show host who leaves me wondering whether she is very intelligent. She had a program saying Sex Offenders should have their names published in the paper.
Which, she never said if proven guilty of charges, etc. Whatever happened of the Innocent until Proven guilty?
I find the terms liberal and conservative misleading since the Conservatives as much as they talk of morals seem to not really care if it helps them win.
Personally, I could care less about a persons sexual life as long as they care for the public and help them to stay alive and in good physical and mental health.
BTW, I find WLS lately hard to hear since I get a Cuban and Radio Honduras both loud and clear at night often in the past three months.

322. Buffalo/Toronto Radio Watch(1/11)

Newsgroup: rec.radio.broadcasting
Date: 1995-01-13 01:54:51 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3f4mhb$9fl@vixen.cso.uiuc.edu>
Source record: 35430

After an extended holiday break,it returns....

*First,two area stations have pulled onto the on-ramp to the infobahn. WHTT(Oldies 104)and CKEY(FM 101 The Planet)now have e-mail accounts.

WHTT is at:WHTT@aol.com
CKEY is at:planetfm@freenet.niagara.com

Also,a new Usenet newsgroup dedicated to CFNY is Toronto is up,called alt.fan.cfny . Check your own system,as not all have full Usenet feeds.

*A major storm last Tuesday(1/3)dumped 8"-12" on the metro Buffalo area, and 2 of the 3 major news/talkers did a good job in covering it. WGR(News Radio 55)and WBEN(NewsTalk 930)both did extended cancellation lists-going for well over 5 minutes. Ray Marks handled the duties for WGR,while Tim Wenger & Susan Rose did likewise for 'BEN during Buffalo's Evening News;that show was extended for an extra hour to update the lists,as well as field phone calls, bumping Dr.Dean Edell for the night. Weather forecasts were also extended. However,the only difference was in traffic,as WGR was airborne and WBEN wasn't-and 'GR wasted no time attacking 'BEN,saying that they were "in the chair" in a promo.
Question:Does WGR have a death wish with airborne traffic? Did they forget that the lost traffic reporter Mike Roszman and a helicopter pilot 2 years ago under somewhat similar weather conditions? Maybe 'BEN had a good reason to stay "in the chair"-like an air ceiling. Mercy Flight,the area's air ambulance service,doesn't fly if the ceiling is below 800 or 1,000 ft., and WBEN generally follows that.
As for WWKB,why bother? It had canned AccuWeather and Metro Traffic reports amid J.R. & Suzie talking about their cats,among other things.

*WGRZ-TV's 6pm newscast now has 2 more stations on which it's simulcast: WBTA(Newsfirst 1490)and WBTF(101.7,All Hit Country 101)on Batavia. BTW,'BTF's COL is Attica. This is in addition to WXRL(1300,country).

*The Toronto Raptors,one of 2 new Canadian NBA teams which begin play in the 1995-96 season,awarded their radio rights to CFRB(1010,news/talk/Argos; The Source). Easy decision,since Allan Slaight(majordomo at Standard Broadcasting)is part of the Raptors' ownership group.

TTYL...

C.K.G.

323. Chicago Radio Watch:Fall Ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-01-13 01:54:52 UTC
From: JJB92@aol.com
Message-ID: <3f4mhc$9g1@vixen.cso.uiuc.edu>
Source record: 35431

The Fall Arbitron Ratings were released yesterday. The results in for the 12 year old plus demograhic are detailed below along with the summer results:

	Fall	Summer
WGN (talk)	6.9	6.4
WGCI-FM (urb. contemp)	6.3	7.4
WBBM-FM (top 40/dance)	4.3	4.3
WVAZ-FM (urb. adult contemp)	4.3	3.5
WUSN (country)	4.1	4.2
WLIT (light favorities)	4.1	4.2
WBBM-AM (news)	3.9	4.1
WKQX (alternative rock)	3.6	4.3
WLS-AM (talk)	3.5	3.4
WNUA (smooth jazz)	3.5	3.6
WLUP (entertaining talk)	3.3	3.2
WRCX (rock)	3.1	2.8
WJMK (oldies)	3.1	2.6
WOJO (spanish lang.)	2.7	2.8
WXRT (progress. rock)	2.7	2.7
WTMX (light rock)	2.4	2.2
WJJD (talk)	2.3	2.5
WCKG (classic rock)	2.3	2.6
WJPC (urb. contemp)	2.3	1.5
WPNT (adult. contemp)	2.2	2.6
WMAQ (news/sports)	2.2	2.0
WNIB (classical/jazz)	1.9	1.1
WSCR (sports talk)	1.8	1.4
WYSY (70's)	1.8	2.4
WIND (spanish)	1.3	0.9
WMVP (sports talk)	1.3	0.9
WAIT (big band)	1.1	1.1
WGCI-AM (oldies)	1.1	1.3
WFMT (classical)	1.1	1.4
WLS-FM (talk)	1.0	0.8
WVON-AM (talk)	0.9	0.8
WYCA (gospel)	0.8	0.9

Winners and Losers:

Mornings: Mancow Muller, in from San Francisco on WRCX increased audience share by almost one full point.

Steve Dahl and Bruce Wolf appear to be hitting stride. The duo saw an increase from 2.1 to 2.9. More importantly, they finished in 6th place in the key 25-54 demo with an impressive 4.5 share.

WVAZ jumped from 9th to a tie for 3rd place. The station scored increases in all time periods.

WGN bounced back from one of its weakest books to recapture the top spot in the city. Bob Collins continues his mastery in the morning, scoring a 10.5 share. While down from his 11.1 share in the summer, Collins remains, far and away, the most popular morning personality in Chicago. Newsradio WBBM-AM is second with a 6.3 share. The next closest personality is WGCI's Tom Joyner who pulled in a 5.1 rating.

Danny Bonaduce's switch to middays appears to be paying results. Danny improved the ratings in the time period formerly owned by Garry Meier. (3.6 to 3.0)

Afternoons continue to be the domain of WGCI's Doug Banks (6.5) and Johnathon Brandmeier (5.2).

WJJD, which went all talk during the rating period saw a nice jump in the morning drive with Ed Vrdolyak and Ty Wansely. The ratings jumped from 2.8 to 3.4. Conversely, the duo's former home WLS-AM saw a morning show decline from 4.3 to 3.7.

Losers:

Hmm... do listeners really tire of the same songs over and over and over.....

WKQX, Chicago's "new rock alternative", dropped from 3rd to 8th with a drop to 3.6 from 4.3. Ratings were down in all time periods,except the 7-midnight shift. The middays results dropped the station from 4th to 10th place during the time slot.

WYSY, supposedly the nations first all 70's station joined KQX in the slide toward a format change. The station was down from a 2.4 to a 1.8. Time spent listening plunged a full hour and is now tied for 27th in the market.

Completing the triumvirate of stations which feel you can't play a song too many times, Chicago's "Classic Rock" WCKG dropping from 2.6 to 2.3. The time spent listening result of 5:15 ties it for 33rd in the market.

WGCI, perhaps feeling the effects of WVAZ's rise, saw ratings drop from 6.3 from 7.4. On a positive note, the station remains the king of the hill in the evening with an impressive 10.9 share.

WPNT dropped from 2.6 to 2.2.

One time ratings bigfoot Robert Murphy toils in anonymity with a .8 share on "lifestyles and trends" talker WLS-FM.

Station vs station highlights:

All Sports:

With the exception of the morning show, WSCR defeated WMVP rather handily. The afternoon/early evening combination of Dan McNeil and Terry Boers and the early evening show of Mike Murphy bested MVP's lineup of Lance

McAlister/Norm Van Lier and Brian Davis/Steve Lyons-2.0 to 1.0.

Classical:

Upstart WNIB recaptured bragging rights over WFMT. NIB rebounded from a 1.1 share to a relatively impressive 1.9 while rival WFMT declined from a 1.4 to a 1.1

News:

WBBM-AM continues to maintain its lead over WMAQ. Although BBM saw a slight decline and MAQ a slight increase, BBM maintains a comfortable lead over its main news rival.

Adult contemporary:

WLIT continues to lead the way with WPNT and WTMX trailing. LIT saw a small increase while its two main competitors showed slight declines.

I have a complete listing of the ratings; let me know if you would like more info on a specific station or personality.

Joe

324. Phoenix Radiowatchers 1/11/95

More on the KFYI/Tom Leykis situation:
Julie Newberg of the Arizona Republic reports in today's editions that Leykis' syndicated show will be replaced by Ken Hamblin's syndicated talker(now on KXAM[1310] in afternoon drive).
She quotes KFYI(910) GM Fred Weber as saying Leykis' ratings and listener complaints prompted the station to drop his show.
No word from KXAM on whether it will pick up Leykis(airing it in the hole left by Hamblin would allow the Leykis show to be heard live...
KFYI had been tape-delaying and airing Leykis from 7-11pm)
...but Newberg's report says longtime
KFYI personality Maryann Watkins will debut a talk show at 7PM Monday on KXAM.
KXAM(the old KZZP-AM) has struggled for five years to build an audience playing adult standards..failing in most
books to get any number whatsoever.
Last fall under new GM Del Hull, it began a
gradual shift to talk...with former Arizona Congressman Sam Steiger in morning drive...G.Gordon Liddy middays...Ken Hamblin afternoons and Bruce Williams late nights. Vic Caesar's 7pm jazz show was the last music program left....now Watkins will replace that.

Shan...

While I'm a big supporter of student-run college radio stations (having
been a proud grad of WMUC-AM/FM in College Park, Md.), I have to chime in
with some practical, if not very encouraging, advice.

And that is...hang on the the cable FM system for now, and save up your
money to take advantage of what new technologies may be able to offer a
superior means of broadcasting your signal to your listeners. What, if
any, is the *magic* of an over-the-air FM station? If your system
provides a super-clean signal into the dorms and major campus buildings,
and serves your listening audience, why the need for a frequency?

As other have mentioned here, your one major hurdle is the lack of frequencies in the D.C. area. That's a very tough nut to crack. And why would you want the hassle of dealing with the FCC *at all*? Community ascertainment, licence renewal, logs, hassle, higher visibility with the school administration, etc., etc. etc. Who needs it? (Especially the hassle potential with the administration; while you have a friendly president today, that's not to say you'll have one forever.)

There are many promising technologies on the horizon, which offer the opportunity for you to get on the air *without* a piece of paper from the Feds; these include broadcasting over a computer network digitally (like this station in Chapel Hill, N.C. that is doing radio over the Internet). There's also the "radio on demand" services that are being discussed (EZ Communications and Microsoft are working on one such system).

My advice: forget a frequency, keep up with the current literature on alternate (and far superior) means of transmission, and aim 'GTB toward the cutting edge (musically and technologically).

Cheers,
Max

This isn't west coast, but Tulsa's commercial classical station was
bounced from the FM dial, replaced by a 70s station. The new owners
now broadcast classical music part of the day on their AM station.
The music is pre-empted part of the day for sports broadcasts.

>the distance that the signal should be heard. From your comments It
>looks like the signal is about what it's supoosed to be.

Funy, that everyone know the techicalities of my station except me.

Anyway, if you are sure that the signal should only be good for 2.8 miles,
than that's fine...

But there is still interference of some type by someone...even within the
WHHS Studios!

You may be wondering how we can tell....well, we are a Mono station...it
is impossible for us to broadcast in stereo because we only have a mono
exciter, and we don't have a transmitter...

The Stereo light on our FM receivers in the station flash...flash meaning
about a couple times real fast in interval of a few seconds...sometimes
longer intervals.

It not only falshes in the station, but on my stereo, and the stereos in
the houses of the rest of the Executive board of the station...and other
people who have asked me why it is flashing.

I spoke to my paid-chief-engineer and he said it was most likely the
translator from WWFM.

>As to Antenna Pointing that license shows Non Directional to antenna
>pointing should not be of concern.

WHHS used to broadcast on 89.3 until the FCC moved us.
We had to buy a new antenna to do so (a three bay), but we didn't buy a
new tower, which was designed for a single bay.

We had to attached a pole to the side of the tower and attach the bays to
the pole...unfortuneately, the pole blocks a large portion of our signal
in the opposite direction tha the antenna points...the bays are not
extended away from the pole.

While I am on the subject, does the FCC care which direction a
non-directional antenna points?

>Make a deal with them. Tell them they can have 107.9 if they can license

>and build 250w on 90.3 of somwhere down in the Non-Comercial end of the
>dial, to replace you existing 107.9 signal, that way you get more

>coverage and they can do what they want on 107.9

Actually, I did, and the asst chief I spoke to said he would input it into his computer to see what he could work out, and he said he would call me back...I trusted him since it was to their benifit as well ad ours....but he never called back.

Yeah, I had to stop by Pine Street and pick up the tapes on the way to
Hayward. If I had time, I stopped in to say hi to Charlie Linn at the old
KOFY (KSMO) xmtr.
>
>Everything was on cart including "One moment please". The occasional

>
Learned to do that. You started the break with something of reasonable
length and just kept doing mental calculations and choosing more carts
until it was time for the next show. There were Ampex PR10s, which had the
wonderful habit of taking off in fast-forward with the tape on the heads
just as you potted them up.

>I was also told that they made SO much money and paid their people SO well
>that the only people who ever left KFAX died or went crazy listening to

FCC REOPENS FM WINDOWS

--------------------------------

The FCC has reopened several FM window filing periods
previously suspend due to the reconsideration
of its FM comparative hearing criteria. In February
1994, the FCC suspended FM windows while it determined
the best criteria to use to select from mutually-
exclusive applicants for new stations. The FCC
recently lifted the suspension and it is accepting
applications for the following communities. For more
information on the Commission's action, or about the
new FM station allotments, you may contact Arthur
Belendiuk at 202-785-2800 or at our e-mail address -

As a heavy radio producer (I _am_ somewhat overweight. I've also been producing spots for 20+ years, network and local) I can tell you that:

These things go in cycles.

A couple of times in the past few decades, we've had periods of brilliantly - creative radio followed by periods of pretty awful stuff. We seem to be in one of the latter again.

It probably has something to do with economics, or with ad agency politics. (Radio -- even on major accounts -- is usually given to novice writers at the big agencies. Tv is considered "real" broadcast.)

My freelance-voice friends have noticed the same cycle.

Rest assured, it'll change. Meanwhile, _my_ stuff is still terrific... and there's less good competition around it.

Anyone with access to the Winter Arbs for Los Angeles Morning Drive, please post them here. The Los Angeles Times had a article reporting on the morning drive Arbs, however the author Claudia Puig has to be one of the worst reporters I've ever read. Despite the fact that her article dealt mainly with the changes in the rankings of the morning drive shows since last quater, she ineptly left out any mention of what the actual ratings were. Since Claudia didn't wan't to clutter up her article with facts, I'm looking for someone here that has the numbers. Please post here.

Way to go Bob. Ole Jay is pulling in an impressive .7 in the 25-54 demo and .8 overall. Talk radio in Chicago has had a gaping hole in it since you returned to the Sunshine state.

On behalf of a number of fans, we wish you luck in Tampa/St. Pete. How about a simulcast into Chicago? Let the ratings determine if fans want the imitation or the real deal.

Frog

Joe

It's funny how the affiliates decided to drop ron & ron a few days after they announced that Ron Diaz's wife has AIDS. I think these affiliates should be ashamed of themselves. Their feeble excuses about ratings are just that. They want a light, entertaining show and they think the mention of AIDS will hurt them in some way. Rediculous and discriminatory, and definately bad business.

339. Your 70's music disconnection

Newsgroup: rec.radio.broadcasting
Date: 1995-01-13 01:55:19 UTC
From: testnet!pr@pegasus.att.com
Message-ID: <3f4mi7$9k9@vixen.cso.uiuc.edu>
Source record: 35447

The days of "Your 70's Music Connection WBUX 1570" in Doylestown PA may be numbered. The original 70's oldies station (started in Fall '92) and most highly-regarded among 70s oldies format fanatics, due to their 1800 song library, has a few factors going against it. It's AM, directional day and night, with less than 1000 watts at night, and there's an FM in the larger city nearby (WMGK-102.9 Philadelphia) with the same (however much smaller playlist) format.

This is not the usual "AM because it's AM is doomed" comment; it's because a station employee called me yesterday telling me that the Kevin Moore, the Program Director responsible for the format, and his GM, have both been fired, and that Scott Lowe the midday host has given his two weeks notice.

He further said that such a change had been considered last fall and looks like it'll happen any time from next Monday (1/16/95) on. The likely change would be to Adult contemporary in the morning (with morning man Dan Troilo staying on) and Satellite Talk the rest of the day. At least we have tapes.

Hi All!!

Hope that everyones New Year was as extrodinary as ours was here at WBLI-FM in NY. The list of interviews here on the Wake-Up Crew is growing more and more each day. Lately our list includes Richard Simmons, Donny Most, Jamie Farr, Al Roker, Chuck Scarborough, Julie Moran, Nicholas Tuttoro, Calvert DeForest, Jon Secada, plus, we now have the TV show EXTRA as a weekly call in special. Things are going very well for us. Hope it's going the same for you.
Steve Harper, Ken Rhodes and Sybil Williams are all doing a great job.
Right now though radio is a real tough area, and everyone is doing the best that they can to keep a float. Hope that everyone is "Staying A Float". If anyone has any questions or comments please feel free to write me at WBLI1061FM@AOL.com. Talk to ya soon.

Sincerely,
Bill Fisher, Producer

341. Changes at WOR

Newsgroup: rec.radio.broadcasting
Date: 1995-01-13 01:55:21 UTC
From: talk1370@aol.com
Message-ID: <3f4mi9$9ke@vixen.cso.uiuc.edu>
Source record: 35449

Casting my myopic eyes downstate for a moment,
soon after the start of the new year, WOR (AM 710) in New
York acquired a new program director/operations manager.
He's David Bernstein, who's best known for setting WBZ in
Boston back on its road to the top with a hard news-intensive
news/talk format. Bernstein then moved crosstown to WRKO
and WHDH as duopoly OM, and had good results with a line-
up that featured Tom Leykis and Jerry Williams on 'RKO and
Howie Carr on 'HDH. (Leykis' departure and 'RKO's consolid-
ation and hard right turn after Bernstein left, have caused it
to fall on hard times. Not his fault...they should have kept to his
formula...)
Bernstein replaces Ed Walsh, whose departure was said
publicly to be by "mutual agreement" but was reportedly at the
behest of general manager Bob Bruno, the disagreement cen-
tering on Walsh's plans for replacing Gene Burns when he quit
afternoon drive. It's anyone's guess what Bernstein will do, since
he's hired hosts of all different political persuasions (and will
most likely continue to do so). But if there's any trademark in
his stations, from this listener's viewpoint it seems to be a high
energy level and strong emphasis on personality, as well as a
drive to create a unique identity for each station he programs.
So...WOR should be an interesting station to listen to from now
on...
Bob Smith, middays WXXI-AM 1370 Rochester NY

1150 WAVO Rock Hill Religious
1240 WHVN Charlotte Religious 'Eternally Correct Heaven Radio',
ABC/I news
1270 WCGC Belmont Talk, incl. Buchanan, Don-n-Mike,Tom Leykis,
NBC morning show
1310 WGSP Charlotte Religious, "Gospel 1310"
1480 WIST Charlotte Standards 'your station of the stars'
(heard 40's thru "Baby Don't get
Hooked on Me" f/1972)
1540 WOGR Charlotte Religious "word 1540" 'quality christian
radio'
1600 WBAV Charlotte "solid gold soul" satellite delivered
88.9 WNSC Rock Hill classical, SC educational radio
89.9 WDAV Davidson classical, Davidson Univ, "Classical 89.9"
90.7 WFAE Charlotte jazz, UNC-Charlotte, NPR
91.7 WSGE Dallas not heard, could've been silent for break
91.9 WRCM Wingate-Ch christian top 40; religious "92 Love"
95.1 WEDJ Charlotte top 40 "95.1 the Edge"
95.7 WXRC Hickory-Ch-G-RH album "Rock 95 7 XRC"
96.1 WWMG Shelby-Ch oldies "Magic 96.1"
96.9 WTDR Statesville-Ch country "New country 96.9"
97.9 WPEG Concord-Ch urban "Power 98"
99.7 WRFXfm Kannapolis-Ch-G-RH album rock, "99.7 the Fox"
101.9 WBAVfm Gastonia-Ch satellite Urban AC "V101.9" "the best
variety of the Hits & Oldies"
102.9 WEZC Hickory-Ch Soft AC "Lite Rock 102.9" 'Lite Rock
Favorites'
103.7 WSOC Charlotte country 'today's hot new country leader'
104.7 WSSS Charlotte 70's oldies "Star 104.7" 'playing the greatest
Hits of the 70s with no music from
artists you never heard of'
105.3 WAGI Gaffney SC full service country

105.7 WFMX Statesville-Sal-H country "country 105.7"
106.5 WRDX Salisbury "Beach" music which I would best describe
as mostly 60s-70s pop oldies by black
artists, to a large extent "Beach 106.5
107.9 WBT-FM Charlotte AC "Sunny 107.9" 'Best Hits of the 80's & 90s'

Format and station notes: Country: WTDR, WFMX both licensed to Statesville
but WTDR tower is much closer to Charlotte; WFMX tower is at Statesville such
that they show up in the Greensboro ratings as well. AOR: Listening in the
evening, I couldn't really distinguish betwen WXRC and WRFX if one was any
more modern, hard, classic, or more youth-targetted than the other. It seems
more like they're going head to head, but the Fox has the stronger morning
team, the syndicated John Boy & Billy. WEDJ is the rare mainstream top 40,
playing an equal amount of rock, dance, and modern/alternative hits
"Edge" is more of a nickname than a positioning statement. WSSS isn't a
strict 70's oldies station; they played "Lady Madonna" and talk about their
being a 70's station between most every record, even in '
WAGI is included due to their strong signal; Gaffney is just south of
Shelby; the tower at Sunshine is centrally located to Asheville, Greenville,
and Charlotte even though they seem content to serve Northern SC with no
boastful multiple city ID. Another 'super' station is 106.9 WMIT, religious
with a legal ID of Black Mountain-Asheville-Winston-Salem!
Noting the large gap between 91.9 and 95.1, there are strong signals
from several Greenville-Spartanburg stations here. Also, in suburban
Charlotte there is a lot of overlap from other markets due to the many
100 kw stations in each market, and the markets aren't that far apart...
approx 95 to Greensboro, 100 to Greenville SC (Spartanburg is closer),
110 to Asheville, 95 to Columbia.

This report was also submitted to the Market Lists column in Decalco-
Mania, a club that issues a printed bulletin ten times annually.
DecalcoMania caters to hobbyists who like to keep up on happenings
in radio nationwide, as well as those who collect promotional materials,
airchecks, jingles, etc. A free sample issue can be had just for
sending an email message to testnet!decal@pegasus.att.com. Please
indicate if you would like a list of my airchecks or jingles.

A few items before I hop on the plane to Sacramento/SFO to get very wet for a week :-)...

WBCS (Country 96.9) is offering a million dollars to any listener who catches them changing from country to another format during 1995. This is their way of saying to rival country WCLB that they won't blink first. WCLB and WBCS have been divvying up the listeners in what's probably a one-country-station town for almost 2 years now. Does this mean WCLB will blink first? We shall see...

WLLH (1400) in Lowell/Lawrence, MA has moved from its studios at 40-44 Church St., Lowell, to the Lowell Sheraton hotel up the street. They've dumped the reverb, and put in a new transmitter at the synchronous site in Lawrence. Sounds much better now. Crosstown WCAP (980) dumped talker Casey Crane from its local AM drive show, which she had co-hosted since before I worked there in 1991-92. WCAP's AM show is its only local programming; the rest of the day is low-budget satellite talk from For the People and other such nets.

One late note from my Binghamton trip: a big dart to WIII-FM Cortland NY. The triple-A outlet is doing neat programming, but they lost my respect with their top hour ID: "WIII FM Ithaca". They sneak the real "WIII FM Cortland Ithaca" legal in at :53 or thereabouts. Ithaca's WTKO AM was even worse...their automation failed to fire _any_ ID at all at the top or bottom of the hour. Ooops...

I'll be back from Sacramento and San Francisco 1/20...a full report then...

Personally, I like all kinds of accents. In the USA there's a prejudice
in favor of British and Aussie accents (which sound alike to many
Americans) and a strong dislike for American Southern accents, often
thought by people to be "uncultured" or "hick". When Jimmy Carter and
Bill Clinton each first became president the "good old boy" jokes started
flying. It's very unfortunate.

In Canada I was amazed at the variety of Canadian accents. I was in
Vancouver and heard a group of 6 men talking; 2 sounded "generic
American", 3 others had all sorts of unusual rural accents, and 2 were
from New Foundland and 1 from PEI -- and *totally* incomprehensible to me
-- though the others in the group understood them perfectly. On the CBC
I hear mainly the "generic American" and the rural (what I call "Calgary"
accent from the Mountain West). The BBC was pressured a number of years
ago to allow more than just the upper-London sort of accent on the air.
So, now we hear a much greater variety. But except for English accents,
it's unlikely we'll hear much other than "generic American" accents on
most radio stations which program in English.

In California, the Modern Rock/Alternative radio stations in Sacramento, San Francisco, and Los Angeles all have at least one OAP with an English accent ... others probably do as well ...

And you can't forget Michael Jackson (not the singer), who has been hosting a talk show on KABC 790 AM in Los Angeles forever.

I don't think accents really matter; I think that in a lot of cases it makes you stand out a little bit more and get noticed; and, as long as the accent isn't _too_ annoying, can be an asset IMHO.

I suppose the answer all depends on what you are doing. I know it is a different case, but here at HCJB I have been aggressively working for our organization to recruit people with accents other than North American. Currently we have one producer from Australia and another from England as well as our usual contingent of North Americans (US & Canada). Even the VOA had a British-accented newsreader a few years back. The Christian Science Monitor had a South African as their main anchor for a while. But, I suppose that shortwave is different from local AM & FM--which is what makes it much more exciting to work in and listen to than domestic stuff. --Ken MacHarg

You'd probably find a job, but probably not at one of the top-tier stations in the market. Some station managers or PDs like unusual voices. Personally, I care more about what the person has to say than how he or she says it, but I have to admit that I enjoy listening to people with accents.

Of course, to them, *I'M* the one with the accent.

Tonight, a piece on CNN talked about how Warner Brothers launched their new TV network because Fox has been so successful with theirs.

History repeats itself.

KFWB's call letters do not refer to the current owner--Westinghouse Broadcasting. They refer to its original owners: Fox and Warner Brothers.

The two studios jointly owned the LA station when its studios were located above the shoe store on Hollywood Boulevard and its transmitter was on the roof of the Warner Brothers theatre next door. (The towers are still there.)

But Fox wanted its own station. So it made an agreement to purchase KFON in Long Beach, which at that time was in the Jergens Trust building on Ocean Boulevard, with its transmitter on the roof.

It was owned by a company that sold radio receivers. When they wanted to demonstrate one, somebody would go up and fire up the transmitter so that there would be something to tune in. Its funny how good a receiver sounds when the transmitter is on the roof.

A part of the agreement was that KFON change its call letters to KFOX. But 20th Century Fox couldn't keep its part of the bargain. In the early 30s the bankers took 20th century over from a technically bankrupt William Fox. The radio deal went sour.

Hal Nichols wound up with KFOX (ultimately at 1280 khz), and Croll-Collier ultimately bought KFWB (which was rock in the 50's and 60s and then went news under Westinghouse).

The Nichols estate sold KFOX to Egmont Sonderling, who played country and western for years, until 50K KGBS and then KLAC (at 570) ran KFOX out of the shitkicker business.

Harold Camping bought KFOX 1280, moved the transmitter to a junkyard and put his Family Radio Network on it, changing its call letters to KFRN.

An FM station in Redondo Beach took over the KFOX call letters because of their history, but now they're Asian.

And Warner Brothers and Fox still want what the other one has, but now... 60 years later...its WB drooling over F's TV network.

I wince because it is endemic of the effectiveness of radio as an
advertising medium compared with video or specialized 'zines. Radio
will do nothing about it except deny that its happening.

The last people listening to radio will be arthritic, tired, chafing
illiterates. But at least they'll be pandered to by a variety of products
to cure their ills.

And Rush Limbaugh will be there telling them he knew it all along and
nobody would listen to him.

: for "Hooked on Phonics", "Tax Amnesty", "Ginsena", "Rejuvex" is run? This
: is especially true during TOP RATED Rush Limbaugh's shows.

Because Rush can't attract any decent sponsors -- few mainstream advertisers will touch his show. About the only mainstream company I've ever heard spending $$ on Rush was Snapple. I've looked at the trades such as "Advertising Age" and haven't seen any buying surge.

Even more to the point: since the laxing of federal trade law enforcement under the Reagan and Bush administrations, quite a few companies have begun to advertise which otherwise would have been run out of business for deceptive advertising.

For instance, there are the "patent" spots. Totally deceptive. They don't provide you with anything of use. Having your invention "submitted to industry" is totally BOGUS, and the companies can't point to a SINGLE succeessful client. People don't market patents successfully by going through a mail order company. They do it by beating down the doors of potential clients.

In earlier years these companies would only have been heard south of the border on stations like XERB.

360. FCC Injunction Hearing Against FRB/Stephen Dunifer

Newsgroup: rec.radio.broadcasting
Date: 1995-01-13 03:34:18 UTC
From: frbspd@crl.com
Message-ID: <3f4sbq$pve@vixen.cso.uiuc.edu>
Source record: 35368
Cross-posted to: rec.radio.broadcasting,rec.radio.info

Once Again, FCC Seeks to Gag Microbroadcaster

The Federal Communications Commission will try again to seek a preliminary injunction against Stephen Dunifer of Free Radio Berkeley. Postponed earlier by FCC legal wrangling, a hearing on the motion is scheduled in Federal District Court in Oakland for Friday, January 20th at 10:30 AM. In order for this motion, to be granted the government must prove imminent danger and grave harm resulting from the actions of Dunifer. Inside FCC information sources indicate a high degree of FCC concern over the spread of micro power broadcasting. Never in the commission's 60 year history has it faced such a direct challenge to its regulatory and enforcement power.

Luke Hiken, Dunifer's attorney, said, "There is a credibility gap when the FCC alleges Micro Radio creates a significant problem and grave danger while at the same time UNESCO, AMARC(World Association of Community Broadcasters), the Federation of International Journalists and numerous other organizations are seeking assistance and support to promulgate micropower broadcasting technology as a vehicle of free expression and democracy throughout the world."

Stephen Dunifer stated, "Although the FCC instigated this legal action, we welcome the challenge and opportunity it presents. When they seek to enjoin me from operating Free Radio Berkeley, they not only attempt to gag free speech, they reveal their true role as a protector of corporate profit and control, and not as a trustee of the airwaves, a public resource. Since 1991, members of the National Lawyers Guild Committee on Democratic Communications have conducted the requisite legal research to create and fine tune a legal strategy which challenges the FCC's current legal and regulatory structure. Not only are our legal arguments well crafted, we stand on an equally sound foundation of moral imperative and public support as well. As I have stated before 'The FCC can kiss my Bill of Rights.'"

Prior to the hearing, a Free Speech Solidarity Rally will be held at 9:30 AM in front of the Oakland Federal Building, 1310 Clay Street. Utah Phillips will perform IWW free speech songs. Speakers will include media critic and author Norman Solomon, Keith McHenry of Food Not Bombs Radio Network, and other local media activists

Upon request we will send out a media packet which includes a compilation tape of Free Radio Berkeley broadcasts. Legal briefs and documents are available as well.

On the net, our legal documents and briefs are on our FTP site (crl.com ftp/users/ro/frbspd/legal. See readme.leg for file description. More documents are being added. Check it out.

>
> I would not say that the Wireless telegraphy act 1949 is little known

Laws in England and the US do differ, but the desire of citizens not having a receiver that can listen to Police frequencies in a vehicle is pretty much universal among law enforcement people. They usually date back to before the Scanner was invented. The reasons do vary, but primarily it's to prevent criminals from knowing when the police are comming, (sure, if I was going to rob a bank, I wouldn't want to know I'd have to scram out early, would I?).

The laws are also designed to prevent, "ambulance chaser" lawyers and to prevent reporters from getting "scoops". If you've ever listened to a police frequency you'll hear the cops reporting what is being told to them by witnesses. In most cases these are only first impressions and are not accurate or in some cases even true. In the event of a desaster, reporting them could cause panic or at least attract onlookers who would get in the way of emergency services.

Implementation also varies. In some states the laws are statewide for monitoring all police and emergency in use in the state. In others they only apply to state agencies and local emergency channels are reserved to local municipalities' laws. In many states there are local regs that duplicate the state law, but particularize them for the city

Exemptions are usually, but not always, made for off duty officers, volunteer firemen, EMS workers, and since certain ham radio rigs can monitor or operate on police frequencies from the factory, there is a movement to extend that exemption to hams as well. Some states only consider a scanner or similar radio to be illegal if used in the commission of a crime.

> And Laser closed 8 or 9 years ago. It was a MF station broadcasting
> from a ship in the North sea. You could pick it up on almost any
> transistor radio. No Need for a scanner. The UK has no law against
> possesing a scanner. If you listen to a police station and act upon
> the information you hear, that is an offence.
>

> Where did you read this?

Pirate radio on FM in London, and other major cities of G.B., run rampant. I had heard of some sort of proposed regulation about making the listening to them illegal, but this is the first time I have seen that such a law was in fact passed. In the days of Laser 558, Caroline and their ilk, there was no such law.

As for there not being a scanner law, that may or may not be true, I do not know. But I do know this; so far TWICE, last year and the year before, the police have pulled the same scam and arrested onlookers who showed up for having a scanner tuned to a police frequency in their vehicle, including reporters. They put a call out saying that a UFO had landed and the scanner listeners were stupid enough to show up to see for themselves.

> If the scanner was switched off, how did they know what it was tuned to?

I guess the FM channel was left tuned in and that's what popped on when they turned it on.

Are there others out there who are as annoyed as I am about the incredible amount of audio compression that WCRB is using?? It used to be they only compressed during commuting ("drive time") hours, but last Saturday night I tried to listen to the live Boston Symphony concert and the pumping and breathing was incredible. I have a lot of money invested in a 7 channel (Lexicon CP-1) surround sound system and all that automatic gain riding completely destroys any hall image that the processor creates. The effects are so bad that I am beginning to wonder: does anybody listen to good music on the radio any more??? WBUR-FM has dropped all its classical music on its way to becomming the NPR talk station, and WGBH-FM only has the five hours in the morning now, plus WHRB-FM (Harvard U.) has classical in the afternoon. What's going on in this market, anyway? Is there room for a commercial classical radio station that caters to those with good audio equipment??

>(Bryan/College Station).

Chip,
Not only does Heftel own the above stations, but they are partners
with Rodriguez broadcasting in Dallas. Rodriguez also owns KLTY-FM 94.1.
KLTY is a christian contemporary station.
Interestingly enough, the managers at Z-rock told their staff
that it was not a certainty that z-rock would leave the market when 99.1
becomes Spanish. Stay tuned!

367. WSUN Tampa - Home of Lassiter!

Newsgroup: rec.radio.broadcasting

WSUN Tampa-Talk Radio Anarchy

620 am, WSUN Tampa/St. Petersburg Florida is undoubtedly one of the most unconventional Talk Radio stations in the country. The station features a very talented lineup of non-conformist hosts. WSUN is unique in the fact that it places very few restrictions on the talent. The hosts are allowed to pretty much do as they please, and are free to talk about just about anything.

Featured shows are;

Ron & Ron - 6am to 10 am
Syndicated from the WSUN studios, the Ron & Ron radio network is a comedy entertainment show with few peers. Recently made famous when Don Johnson, of Miami Vice fame, called the show while drunk and threatened to beat up the hosts. Ron Bennington quickly invited Johnson to come down to the studio so he could "bitch slap" Johnson. Very entertaining stuff. Subjects range from people performing "Body Shots" which is the act of drinking a shot glass of Tequila from the belly-button of a partially naked female, to phone interviews with celebrities and occasional oddballs.

Hooters on the Radio - 10am to 2pm
Features Julie Williams, Brenda Lee, and Fez Watley. Unrestricted talk featuring two Hooters Girls who have never done radio before, and the very talented Fez Watley of the Ron & Ron radio network. They make it up as they go along and will talk about anything at all. They are particularly talented at sexual innuendo and outright open sexual discussion. They are even known to occasionally fight with each other on the air and make up later. These are real people and talk like they are the only ones in the room. The Hooters Girls are quickly developing a loyal listenership and their ratings are on the way up. Now that some legal hassles with Hooters appear to be over with, Ex-Playmate Lynn Austin is back on the show as well. Watch out for syndication on this show...it's hot.

Robert Lassiter -2pm - 6pm
The heart of WSUN is the very experienced and talented Robert Lassiter. The magnificent Lassiter is definitely the core program of the WSUN lineup. Mister Lassiter has a wit and wisdom that is unmatched in Talk Radio, and is truly at home on WSUN's afternoon drive. Lassiter's skill as a broadcaster is unparalleled. His range of subjects is unlimited and his ability to carefully analyze every situation makes even the most complex of issues clear as a bell. Lassiter's keen insight makes him ideally suited for WSUN's unrestricted programming. Mister Lassiter is quick to point out when a callers comments are unfounded or just downright

stupid. His ability to turn otherwise calm callers into stuttering stammering idiots, their moronic ideas exposed for the crap that they are, has earned him the nickname "Mad Dog Lassiter." Hypocrisy is not tolerated and the Mad Dog always prevails. For once there is an intelligent person on the radio free to speak his mind.

The Gary Spivey Show - 6pm - 8pm
Gary Spivey, of the Ron & Ron radio family, is WSUN's resident Psychic and astral projector. It sounds hokey, and sometimes it is, but Mr. Spivey is a truly amazing man. If you believe in Psychics, or especially if you don't, this is the show to listen to. His insight into peoples lives is amazing, and his advice can sometimes be unconventional, but his show is always entertaining. Gary Spivey just may have you believing in the unbelievable.

Love Talk, with Erin Summers - 8pm - 12 midnight
WSUN's newest show is syndicated and can be heard in a number of places including Orlando and Miami. This show features frank and "stimulating" sexual discussions. The subjects range from men who cheat on their wives with their wives best friends, favorite sexual acts and positions, most bizarre sexual encounters, and anything else not suitable for the prudish. This is a perfect show to round out the WSUN lineup.

If you live in the Tampa area you should be proud of the fact that if Tampa has nothing else it does have one of the best talk radio stations in the country. This is amazing considering that Tampa is not exactly one of the largest markets in the country. This station's ratings are constantly on the rise and if you haven't yet discovered it turn to 620 AM and get an earful of real entertaining talk radio for the 90's.

368. ADMINISTRIVIA: Result, Real Names Poll

Newsgroup: rec.radio.broadcasting
Date: 1995-01-14 09:47:02 UTC
From: wdp@airwaves.com
Message-ID: <3f86im$43n@vixen.cso.uiuc.edu>
Source record: 35376

Hello All:

Well this has certainly been an interesting poll.

I received 70 replies to the request for input on the subject of requiring 'authentic' or 'real' names on AIRWAVES/rec.radio.broadcasting by the cutoff time, and several after that time.

The idea stems from conversations I have had with Barry Mishkind about his belief that requiring real names on the FIDO broadcast echo has raised the signal-to-noise ratio substantially on that forum, without any perceptible negative effect. Since we are, primarily a professionally oriented forum of adults, it seemed like a good idea to encourage, and even require a poster to sign a real name to her/his name t their post.

So I posed the question to the group to see what all of you felt. The results are kind of interesting in that what was originally a binary choice question, has turned out to shed quite a bit of light on the ideas of this group.
The Votes

If you just count the votes, you have a landslide in favor of real names that Nixon would have been proud of!. Like 59 Yes votes to 11 no votes. However those ballots dont tell the whole story. It was in the stuff written AFTER the vote that told <begin Paul Harvey Mode> "The Rest Of The Story" <exit Paul Harvey mode>.

THE YES VOTERS' ISSUES:

1) Higher brain-balone ratio as posters would be required to identify themselves and their posts.
2) Having some kind of handle on who they are corresponding with.
3) Having a real name attached to a post adds maturity and professionalism to the discourse.
4) Handles are the domain of children and game players which have little if any place on a quasi-professional forum.
5) Rumor control would be improved as those posting such would be forced to identify themselves.

========= HOWEVER ========

Despite the smaller numbers, there was also substantial and moving input from the NO voters too.

1) Denial of access based, not on content, but on a perception of what constitutes a 'real' name.

2) Some misunderstandings on matters of 'air names' being considered as valid as birth names for those posters who choose to only be known by their air names for various reasons.
3) Concern over repercussions against those who post advance or 'sensitive' information and the impact of that possibility on the quality of information the group will see.
4) Concerns over increasing restrictions on postings and where it will lead/end.

So, it is not just a cut and dried matter as the raw votes would suggest. So after looking at a variety of very good reasons why and why not, I concluded that the following would come as close to pleasing most readers who have replied.

1) Since we are all adults here, and this is a fairly professional forum, we can safely, I believe, call a halt to 'handles' as the sole name on a post. By Handle I speak of non-realistic nick-names as one might find on CB or IRC (RockMeister, RadioGod, ad-nauseum). Virtually all of the yes voters saw this as the real issue. If you have an account with a "handle' type name attached to it, dont fret. Just sign your name at the bottom.

2) 'Real name' is defined as a) Your real, legal name - or - b) Your current on-air name (or name you are known as in the business). If you do want to use your air-name, it would be appreciated if you also include the station/network too, so people know which 'Chris Cannon' we are talking to :-) <latter is NOT required, though>.

3) Situations which are unusual, or which require an anonymity will not be locked out. It should be brought to my attention in the article. Example: If posting information under your real or air name would endanger your job or standing, tell me about that and Ill be sure you are covered.

4) Any poster seeking work in the biz, or looking for T&R's from talent in the group must have a real name, postal address, and preferably (but not required) a voice phone to post here. This is an attempt to keep scams from proliferating while not restricting good, valid information.

5) Any poster who has a commercial affiliation, and starts (or contributes to) a thread involving their type of products, they MUST identify themselves and their company. Even if they are not directly promoting their wares in that particular post, and even if they are not officially speaking for their company. With the increasing level of commercialism on the net, I would like to make sure that those with a commercial axe to grind do so in the open. I will not kill a post simply because it is made by a person with a commercial affiliation, but you *must* make it clear that such is the case.

It is also good to remember that a real name will make your post more credible and will increase the chances that you will receive credible replies. Many on this group have told me that they wont even read, or reply, to posts with 'handles' as the sole means of identification.

A few voters suggested banning all AOL posts. While AOL is the biggest offender of handles (by allowing multiple screen-names per account) I cannot see banning all of AOL. Many good users use AOL and I wont join the anti-AOL crusade at this point. However I sure wish they would stop offering multiple logins on one account.

Also, I am not going to be bothered following up on or checking up on the validity of names, unless there is a problem with a poster posting libelous, or fraudulent material on this forum. The move toward real(istic) names is merely an attempt to control the silliness that some handles bring with them.

I certainly hope we can all live with these policies. I tried to take into account, the various reasons people had for their opinions, rather than just counting raw votes. Everything done here is in the interest of maintaining an intelligent, respectful, informative and fun newsgroup/list for those who work in, have worked in or take a personal interest in the great field of radio broadcasting.

Unlike many Net Moderators, I actually care about the users of this forum. While lines have to be drawn someplace, I try hard to remain responsive to the needs of the posters and readers. As I have said numerous times, we have the greatest, most knowledgeable, friendliest group of radio-heads assembled anywhere. Lots of posters have written to say that they get more information, and more timely information from this forum than from traditional trade pubs. Many old friendships have been re-united via this group, many new ones have been formed.

I often receive mail thanking me for this product. While I do a good little bit of work keeping the noise down to a minimum, and I appreciate the kind words, let it be known far and wide that I am responsible only for what you *dont* see here. What you *do* see in the pages of AIRWAVES and r.r.b is to be credited to * YOU * the people who ask the questions and post the answers. I am honored to be among such great minds.

My personal mail box is always open for anyone who wishes to write. I answer ALL mail (some might take longer than others) so feel encouraged to write. <wdp@airwaves.com>.

Sincerely

William Pfeiffer
Moderator rec.radio.broadcasting/AIRWAVES

As I understand it, the Secretary of Commerce would assign call letters at whim if you did not ask for specific ones. But F & WB did refer to the owners of the stations. (What are the chances that sequential assignment would mimic the owners of the station?)

There were lots of different reasons why people sought licenses. Some wanted them for experimentation, others for advertising. Some newspapers of the period put stations on the air and sought calls like the Chicago Tribune's WGN--for world's greatest newspaper. Sears Roebuck put on a station and sought WLS for Worlds Largest Store. These call assignments were made at the same time as many which are obviously random assignments.

Yes, I've been in the building and met the guy who runs the theatre, who let me poke around and even gave me an ET that was left in the building. It is quite eerie....the studios made into dressing rooms and wardrobe and prop rooms.

Westinghouse wouldn't spend a dime on the place. The carpeting in there is the same as when I last saw it when it still was a radio station (which must have been the early 70s at least).

They moved to the Yucca street studios and I believe took the sign with them, where it now hangs on the wall above their parking lot.

>

I suspect since New Orleans has been able to support more than one country station. WNOE has never dominated the New Orleans market with its country format and when they had two (WQXY-95.7 and WNOE-FM), they both had terrible ratings.

I don't live in New Orleans, but have lots of relatives there and have been there a couple of hundred times. I was there over the weekend. I found it interesting that WEZB-97.1 "B97" was very rock-leaning, almost rock 40. In the 90 minutes tape of them I taped, they had only one non-rock song, which is fairly unusual for them. Is this a real shift (maybe because of the addition of Stern from WRNO) for them? If they're listening, keep it up; it's the first time in over a decade, I enjoyed listening to them!

The really odd format this trip was KHOM-104.1, which was 70s and 80s oldies (a la KCBQ-FM San Diego, I suppose). WCKW-FM-92.3 seems to have shifted to current rock ("92.3 WCKW, Louisiana's Rock") from classic rock (I suppose due to WRNO switching from rock to classic rock/70s oldies).

WRNO, by the way, is Arrow-like classic rock/70s oldies as opposed to the other more pop-sounding 70s oldies some 70s oldies stations use.

>season from WSB (750 AM) to WZGC (92.9 FM). For those keeping track around

Actually, Infinity's bagged SIX NFL franchises, including the new Falcons deal:
WQYK's got the Tampa Bay Bucs, KVIL's got the Cowboys, WBCN just signed the
Pats, WYSP's got what we here around Philly call "the Iggles", WFAN's got the
Jets -- and now Z93 w
ins the Falcons. Infinity is by some margin the radio group with the largest
number of NFL franchises!

373. Radio stations & formats in Melbourne, Australia

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:34:38 UTC
From: thed@mundil.cs.mu.OZ.AU
Message-ID: <3fijqu$5j5@vixen.cso.uiuc.edu>
Source record: 35381

I thought that somebody may well be interested in some of the stations
and formats that we have here in Melbourne...

A brief bit of info on Australian radio first. In Australia, we basically
have four types of radio stations. There are the Australian Broadcasting
Corporation (ABC) stations, which is run by a government funded organisation
with an independant charter, there are standard Commercial stations,
there are Public Access stations, which are funded only by subscribers
and small sponser announcements, and then there is the Special Broadcasting
Service stations (SBS) which primarily broadcast in languages other than
English.

In the table below, note that there is a column for a station's callsign,
and one for its on air name. Unlike in the US, Australian radio stations
do not have to use their callsign *at all* if they do not wish too. However,
each does have its own callsign anyway, and this may or may not be related
to the stations name as used on-air.

AM Stations

Freq Callsign Name Type Format

621 kHz 3RN Radio National ABC News/Documentaries/Talk
693 kHz 3EE(?) Magic 693 Commercial 40's, 50's & 60's Music
774 kHz 3LO ABC News/Talk/Sport
855 kHz 3CR Public Talk
927 kHz 3UZ Commercial Sport
1026 kHz 3PB News Radio ABC Continuous News/Parliament
1116 kHz 3BM Commercial Italian Talk/Music
1179 kHz 3RPH Public Radio for the Print Handicapped
1224 kHz 3EA SBS Radio SBS Multicultural
1278 kHz 3AW Commercial News/Talk/Talkback/Sport
1377 kHz 3MP Commercial Easy Music
1422 kHz 3XY Radio Hellas Commercial Greek Talk/Music
1503 kHz 3AK Commercial Easy Music
1593 kHz 3?? ????? Commercial Italian Talk/Music

FM Stations

Freq Callsign Name Type Format

92.3 MHz 3ZZZ Public Multicultural
93.1 MHz 3SBS SBS Radio SBS Multicultural
93.9 MHz 3BAY BAY-FM Commercial Light Rock (Geelong)
95.5 MHz 3CAT K-ROCK FM Commercial Commercial Rock (Geelong)
101.1 MHz 3TTT Double T FM Commercial Adult Pop
101.9 MHz 3FOX FOX-FM Commercial Commercial Rock

102.7 MHz 3RRR Public Alternative Music/Talk
103.5 MHz 3MBS Public Classical Music
104.3 MHz 3KKZ Gold 104 Commercial 60's & 70's Hits
105.1 MHz 3MMM Triple M Commercial Commercial Rock
105.9 MHz 3ABC ABC-FM ABC Classical Music
106.7 MHz 3PBS Public Alternative Music
107.5 MHz 3JJJ Triple J ABC Alt Music/Talk/Youth Radio

I thought, just for interest's sake, that I might give a listing of the
Melbourne TV stations, as well:

2 ABC ABC
7 Channel 7 Commercial
9 Channel 9 Commercial
10 Channel 10 Commercial
28 SBS SBS
31 Melbourne Community TV Public Access

A bit of a mixed bag, in each case, so it's hard to describe what appears
on each channel. But rest assured, the best quality programs are available
on the SBS and ABC network (Ok, so that's a bit of a subjective opinion,
but it does agree with most media analysts in Australia!!!)

I hope this interests someone, and if I get enough positive feedback, I might
put together listings for other regions of Australia...

Meanwhile, checkout my WWW homepage if you're after more info...

Paul.

BITBOARD is operated by the morning show host of KISS-FM (KHKS) in Dallas. His name is Kidd Kraddick. I believe it costs something like $50 per month to affiliate with bitboard and there are at least 2 bitboard groups, if not more. I would suggest either calling KHKS-FM and asking for KIDD, or getting a radio program suppliers guide like the one R&R puts out. I'm sure he's listed in there. It's a great service! BTW I'm on a friend's account right now, my real name and address is jenseth@CERFnet.com

Happenings in the #40 market:

*WBEN(NewsTalk 930)has gone to team traffic in AM & PM drive. Dave May(who was the station's airborne traffic reporter for over a decade)handles duties from the studios,while Michelle Maloney is in Skyview 930 to watch traffic from the air. BTW(on a TV note),WIVB-TV(ch.4,CBS)may have new owners soon, according to a report in Friday's Buffalo News. Talks last week involving King World(the current owners)and the partnership of CBS and Westinghouse Broadcasting have reportedly ended in a $100 million deal to buy Channel 4. Westinghouse would own the station,but let CBS run it. CBS and Group W haven't merged,but the agreement does let the two companies go into limited partnerships for specific ventures(i.e.the new newsmagazine "Day & Date",debuting soon). WIVB shares space with WBEN and WMJQ(Q102)at 2077 Elmwood Ave. in the city's northern end.
I wouldn't expect 'BEN to change format to all-news(not disregarding that CBS and Group W are the only ones that seemingly can make an all-news format work),but an alliance with 'BEN's news staff isn't out of the question. KYW-TV in Philadelphia does the same thing.

*Speaking of Q102,they did what Mark Roberts recently noted in one of his reports:they've changes voices. Mitch Craig isn't voicing the sweepers at Q;someone else is,but I can't figure out who.

*Last Wednesday's Page Six column in the Toronto Sun noted that CFNY GM Vince D'Ammagio has received his walking papers.

*Pearl Jam did a live,unedited show last Sunday(1/8)from an unknown location in the Seattle area. Locally,CKEY(FM 101 The Planet),CHTZ (97.7 HTZ FM)and CILQ(Toronto,Q107)aired it-I don't know if:a.any Buffalo stations aired it,and b.if Eddie Vedder broke the record for the most times the f-word was aired in a 3-hour broadcast. :)(b might explain a)

*Speaking of the Planet,DJ Ian is now part of the lineup. Ian,one of Toronto's top club DJs for over a decade,hosts "The Outer Limits" Saturday nights from 9pm-1am. The show is dance-based in nature,i.e.Pop Will Eat Itself,etc.

*WUFX(103.3 the Fox)will broadcast Van Halen's latest release in the next few days.

TTYL...

C.K.G.

"Recognized by the Buffalo News as the most tasteless(taste this!..punch thrown,someone falls)...103.3 the Fox."

From: az877@yfn.ysu.edu
Message-ID: <3fijr5$5jl@vixen.cso.uiuc.edu>
Source record: 35388

Regards the poster for the Charlotte radio market:

I'm sure there are other stations that could be or want to be included in this market. A group that stands out, though, are the three, possibly four now, AM stations owned by Ford Broadcasting (Carl Ford). He started with WRNA-AM, China Grove (1140), purchased WLTC-AM, Gastonia (1370), then LMAd and eventually purchased WRKB-AM (1460), Kannapolis. When I last talked with him he had received an offer to buy one of the Monroe AM stations. All three stations were airing a homemade mix of Southern Gospel/Religious Talk programming with some simulcasting. Ford's eventual goal was to operationalize all the stations out of the China Grove facilities. He also had plans to start selling in the Charlotte market with his 3-4 station group and niche audience.

Thanks for the update on Charlotte radio.

Does anyone know what ever happened to Chuck Benson and Kurt Russell, the morning team at WIND back in the late '60's and early '70's? Also wondering about the guy who did mornings on WMAQ around the same time, who went by the radio monicker (I'm not making this up) of "Sweet Dick"? This is some real Chicago nostalgia... adult contemporary AM radio my mom had on while I was getting ready for 1st-4th grade in the morning :) Wonder if I'll ever again hear a station play "Layla" by Derek & the Dominoes followed with "Is That All There Is" by Peggy Lee...

I agree with Jay. There are a great deal of "natural" sounding stations
that get the sound they want with the Optimod. If the Optimod was truly
"known to have this ugly effect" my guess is it wouldn't have the staying
power that it does.

: (Lexicon CP-1) surround sound system and all that automatic gain riding
: completely destroys any hall image that the processor creates. The effects
: are so bad that I am beginning to wonder: does anybody listen to good music
: on the radio any more??? WBUR-FM has dropped all its classical music on its
: way to becomming the NPR talk station, and WGBH-FM only has the five hours
: in the morning now, plus WHRB-FM (Harvard U.) has classical in the afternoon.
: What's going on in this market, anyway? Is there room for a commercial
: classical radio station that caters to those with good audio equipment??

: Ron Roscoe
: rroscoe@MIT.EDU

Yes, I'm one of them, and I've sent messages to them via WCRB On-Line. I
don't know if anybody there much cares, however, since the personnell
there have to do what management tells them. At least WGBH seems to apply
restraint to their compression, although it still isn't like the good old
wide-open dynamic range days (it used to be a rule with me that if I was
tuning around and got silence, I knew it was WGBH and would thusly turn
up the volume. WHRB? Well, in between the rap and the hockey games, they
have some great classical programming (even if their announcers are
consistently awful -- it's a longstanding tradition), and their signal
should be (it sez here) greatly improved with their relocated antenna.
Forget WCRB. They're soon going to be top 40 at the rate things are going.

>interference from another station.

This may actually be the case....even though we do have proof on
interference from some other station...I have not listed to the tapes for
call letters yet.

I will check out what mentioned about the higher frequencies being
filtered out.

I know that our exciter is old, so this may very well be the case.

Thanks to everyone who replied to my initial post about 10 Watt Class D's
accepting interfernce, all the information we need has been obatined.

We are now just going to do a little filed testing, and go from there.

Only when the controls are played with. Out of the box from the factory it will do an excellent job on most forms of contemporary music. It might have to be adjusted down for classical or up for metal.

One night, about 20 years ago, two engineers at WPLJ, very unhappy with the sound of the station, pulled an all nighter when the PD was out of town. The younger production person, (so you know his ears weren't as yet blown out like most seasoned can wearers), was at home, while the techie did the twitling inside the box. When they got through with adjusting it, they then found the specs and discovered they had set it back to factory standard without looking.

Of course the improved audio didn't last long. PD, Larry Berger, now driving back from the business trip, tuned in while driving back on the NJ Turnpike. He immediately pulled over to the first phone he could find, called in and screamed down the line about how someone ruined the sound of HIS station and he wanted the Optimod set back the way he had it.

WPLJ remained that ultra compressed, Berger way, (and I remember viewing their never under +/- 75kHz deviation signal on a transmitter analizer), until just before Berger was given is walking papers.

I didn't have access to the analyzer when the limits were upped to +/- 100kHz.

387. Dynamics of a format change

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:34:52 UTC
From: aq614@cleveland.Freenet.Edu
Message-ID: <3fijrc$5k5@vixen.cso.uiuc.edu>
Source record: 35395

Pittsburgh recently lost a country music station to a format change. WQKB changed its call letteres to WZPT (The Point, 100.7) and now plays all 70s music.

Within the first three days of the change, I don't think I heard any commercials, only a breaker every half hour to tell us about the change. I didn't listen to all hours, but the point is that they had fewer commercials than they had while still country. This is not strange because advertisers want to get an idea of how many listeners are out there before buying time.

But even now, I'll listen overnight and they'll play 30 minutes of music followed by a breaker ("People love listening to the New Point, 100.7..."), and straight back into the music. No commercials. (maybe a weather forecast) This also occurs at times on the weekend.

I'm wondering how advertising is affected by a format change. What is the general time span for a station to get back to "normal"? How long does it take for a station to get from the change to a point where they have assumed the identity of the new format, in both advertising and staff (staff turnover during a format change). How long does it take for the station to see the benefits of the format change (assuming the change was a good move)?

I would also like to know about other things that are affected when a format change occurs and what goes into the decision to make the change.

Wow, that's quite a bit. :-) Thanks for any light you can shed on this aspect of radio.

: As I understand it, the Secretary of Commerce would assign call
: letters at whim if you did not ask for specific ones. But F & WB
: did refer to the owners of the stations. (What are the chances
: that sequential assignment would mimic the owners of the
: station?)

What are the chances that the call letters would mimic the city of license? Yet, this appears to be the case with KFRC in San Francisco, which sources tend to indicate was also sequentially issued. The KFWB situation was discussed at length on Fidonet a long time ago and it was pretty much concluded that KFWB was just a coincidence. KGO does not stand for "General Electric Oakland" either, but appears to be the buy-up of a license in Altadena (near Los Angeles).

: Some newspapers of the period put stations on the air and sought
: calls like the Chicago Tribune's WGN--for world's greatest
: newspaper. Sears Roebuck put on a station and sought WLS for
: Worlds Largest Store.

I don't remember about WLS, but thought WGN was sequentially assigned and the owners simply pretended it was an acronym, as was very big in those days. In San Jose, KQW was called "King's Quickening Word" for no other reason than that it was owned by a church and it was the only phrase anyone could make out of such a difficult call.

Hello all....

I'm a weekend jock and "fill-in boy" as the morning guy calls me when I produce his show at KMYZ-FM in Tulsa, OK. I also do all the fill-in stuff when the regular jox are gone.

In real life, I own a couple of businesses one of which is a graphic design firm. I've done a lot of work for our sister station, KTHK-FM, including the current logo they are using.

Most of my work has been done here locally for area businesses, but my real interest is serving the radio industry on a national level.

What I need is suggestions on how to get clients. I don't think direct mail is the way to go. (I've seen the stack of junk mail that the receptionist sorts through.) We do really good work, provide excellent customer service and have great prices.

Any advice offered on this topic would be very much appreciated. If you'd like to talk in person, I have an 800# which I will provide upon request via eMail.

If anybody needs something done now, I'll be glad to work on spec in order to build up a radio graphics portfolio.

Of course it's not the dominant media...how can it be when it only gets 15% of the total audience listening to radio? And it isn't representive of the population as a whole,either:older males generally listen more than any other demographic. Talk radio may not be the dominant media,but you'd never know it form the media's attempts to paint it as such. And the "leftward bias" canard returns! Will wonders never cease? :>

Sir,they do. And,BTW,how much of the federal budget would you think goes to the Corporation for Public Broadcasting? 5%? 10%? Wrong on both counts. Try .00023%(according to a recent James Ledbetter column in the Village Voice). I can think of quite a few places where the budget should be cut,but this isn't the place for it.

This is the same commercial they used to launch KYNG-105.3 Dallas, the original "Young Country." When I was in Seattle in August, I saw this ad used there for KYCW-96.5. I was amazed they used that aramdillo too (not to mention the Dallas skyline behind it in the background).

I had HEARD that Ludlow was going to try to go syndicated, but from what I understand, at this point, he is not set up on satellite. He is at one of the suburban stations (whose name escapes me as I mull over my Monday morning coffee) right now.

His producer contacted me back in7 late November about some satellite time, (and no, I can't elaborate on OUR satellite time yet) but I haven't talked to him since the first week of December.

Didn't Lee move to Ashville, North Carolina two or three years ago? I remember that he was continuing to do his show at KGO remotely. It was pretty interesting. He would make comments about the crickets or other things in his "studio" (which I believe was actually his home) while he was on the air, until management finally asked him to stop reminding people where he was and just get on with the show.

I didn't realize he had since moved to Seattle. Or is he doing the Seattle show from Ashville as well?

Morning host Mancow Muller on Chicago's WRCX may have pulled one of his last stunts. (As with most of these type of stunts, it's hard to confirm these things, but it sounded quite convincing) Mancow obtained the secured phone number to President Bill Clinton which is to only be used for emergency access to the Prez. The line is forwarded to the President at all times.

Mancow called the number and connected a "lucky" listener (Mike) to the President. Mike asked President Clinton how he planned to celebrate the Martin Luther King Jr. holiday. The President (or someone doing a real good imitation) asked Mike who he was and how he accessed this private line. Mike stammered and said he just dialed it. The Prez pushed him for a last name and the source of this number. It seemed like Bill was stalling waiting for a trace to be completed on the call. Bill seemed quite perturbed that the phone security had been breached. The caller (Mike) did not bail out of the call and approximately 5 minutes passed which should be ample time to trace a call on a secured line.

Mancow was concerned what could happen to him and came to the conclusion that the Secret Service probably wouldn't be too pleased with this little stunt.

We will see.

Joe

NYC Radio Waves 1/14

Look for Hot 97's Wendy Williams and Funkmaster Flex on Fox TV's 'New York Undercover' on February 9th.

David Bernstein is the new PD at Talker WOR. He's worked in Orlando, Hartford and Boston before coming to NYC. His first job fill the PM drive vacancy left by Gene Burns over two months ago.

First, Howard's 'Private Parts'; now, Robin's 'Quivers Unmasked'. Howard's sidekick has a new book out in April. It's an autobiography about her life from HarperCollins.

WYNY's new morning team is making a splash on TV they join news director Shelli Sonstein in a TV spot for the birthday game. 'YNY is looking to improve on their 1.9 AM Drive share.

Friday's weather - Partly Sunny and 60 degrees. I have to keep checking the calendar!!!

Hi there internetters & aolisteners. My name's Famous Amos, most recently Afternoon Drive personality on the late, great KOOL Gold Radio network, here in lovely Phoenix, Arizona ("a great place to raise your kids"-J. & E. Coen)

As you may be aware, our little network passed away recently (I had nothing to do with it; you weren't there; you can't prove a thing !), and I have become available.

Over the last (^^$^%/ years, I've worked at ABC/SMN StarStation; 93-Q and KNRJ in Houston; KHFI in Austin; KROY in Sacramento; KYNO and KFRE in Fresno; Q-105 in almost-L.A., and too many more.

Let's see: I do topical humor (Newt-sliming months before he was a household infestation !), voracious phone interaction , theatrical effects, healing of the infirm, Famous Amos' "Dumb Question of the Day/"Salute To Capitalism!" (etc.), and positively bitchin' intros ' n ' backsells.

My ratings track record is pretty darn good, and my ex-G.M. has given me a letter of recommendation which is absolutely embarassing. Regardless of who you are (or who you may hope to be someday), if you have anything to tell me, please feel free, c/o thefamous1@aol.com ... and thanks ! Shoes For Industry, compadre !

>>>home phone without a lot of buzz and without spending too much money.
X-Newsreader: NN version 6.5.0 #3 (NOV)

I do these all of the time, and get high quality tapes (usually) that sound great on the air. Here's what I do - I have a Voice Act which I use instead of the mouthpiece of my phone. I talk on one extension, with the Voice Act set to MIX, which lowers its level some. On another extension, I run the phone line first to a cheapy Radio Shack handset amplifier and then into the phone jack input of a handheld Marantz tape deck. The amp gets the phone signal nice and high so the autolimiter of the deck will keep both participants pretty level. Otherwise, I completely swamp out the person on the other end of the conversation.

The handset amp I have has the volume setting, which I keep on max, and a tone. The tone is a trial and error thing. Depending on how you set the eq on the tape deck, the tone may or may not sound good. You need to get a good friend on the other end of the line, and try to run through every combination of settings until one sounds great.

I don't have model numbers easily available, but if you want them, e-mail me at daves@america.net.

Good luck.

In a previous posting, Conrad Trautmann (conradtraut@delphi.com) writes:

> Anyway, I find it interesting to discuss audio, especially with people from
> different markets, because my experience shows that from market to market,
> audio is very relative. A NY City station that sounds great in NY, might be
> very over processed in Syracuse. What works as an audio chain in NYC, probably
> won't work in a medium or small market, and vice versa. Orlando, for instance,

I understand what you're trying to say here, but I question the logic it's
based on. Good sound is good sound, and bad is bad, no matter what market
you're in. In a market where the stations are all processed to
the max to sound the loudest, does this necessarily mean running your
station with clean audio and lots of headroom, but a lower perceived
average level, would suffer lower ratings? Or might it increase your TSL
because of a lower fatigue level?

The reason a lot of stations run over-compressed is because they believe
the louder station wins. But is this based on well-conducted research, or
is it a throwback to the days when a loud AM station was easier to find on
an analogue-dial tuner? With most radios now equipped with electronic
seek and preset stations, this doesn't make sense anymore. And unless
you're just passing though an unfamiliar town, chances are you're
already familiar with the stations that play the format you like,
you're not searching the band for them. So it mightbe more sensible
to keep the audio easy to listen to, so your potential listeners stay
around longer. I'd be very interested to know how much research there is
on this, how current it is and how well it was conducted.

>
> IMHO, it's not the processor that makes a good sounding radio station, it's
> who's behind the controls. Granted, a good processor helps, but the person who
> sets it is the key.

Unfortunately it's usually the engineer who sets it. In some cases this
is just fine, but *most* radio engineers I've known know a lot more about
how to fix broken equipment than they do about what constitutes good
sound. And most PD's I've known subscribe to the louder is better theory,
though I challenge any of them to produce the research to support it, and
again, most PD's I've known aren't really well-qualified to determine what
good audio is.

> What does everyone else think?

I think it makes sense too seek out an audiophile within the station, or
an external audio consultant who knows what music should sound like, to
help find a good balance between great audio and loud enough.

It's good to see that there is interest out there! This can become an interesting, exciting discussion area. I'm always amazed at the perceptions of processing in different markets. I noticed some comments on the differing observations about large markets like NYC, as well as the smaller markets. No two are alike!

An issue that I am interested in, are comments on STL usage where codec techiques are applied. This is an area where all of us involved in broadcast engineering could be dealing with a smoldering situation. All comments welcome.

Also, for those of you who feel that this discussion was started by "attacking" another manufacturer, well, it was intended to help create interest, (and it did!) AND it did not include a statue from a trade paper ad! If anyone was offended, I sincerely apologize!

In regards to the recent letters posted regarding processing equipment.

At my last station, we had the combination fiber optic linked Digital Laser/Prizm. 'twas some of the cleanest most un-processed sounding (yet compressed) audio I've ever heard come out of an on-air chain. I've heard good things about Cutting Edge's processing equipment...don't know whos got 'em, though.

The station I'm working for now, employs the "beloved" Optimod 8200. The station sounds unnaturally boomy....no midrange...and colored beyond belief. True, it's not always the equipment...the person who set it up.

However, I've noticed this with other stations...including a classical station I worked at years ago. We got an Optimod installed, and from then on, received countless audiophile-quality listener complaints.

> did it?

I never listen to WFAN, but I did listen to WNBC, in Kahn Stereo. There
were times when the Harris would decide to go out for coffee and they had
to bring up the backup Continental in glorious mono. Now they sounded good
normally, but when that told clunker went on, that's when they sounded like
they were FM! Snappy bass and crystal clear highs.

I asked a friend who worked there if there was a different processor that
fed it. He told me it was a mono composite from the same audio chain, but
from a seperate, (backup), phone line.

Those were known as the "Cruisin'" series and were available to the general public (at finer record stores everywhere). In most cases, the shows were reproductions -- created several years later -- and featured all of the music played through to conclusion (unlike a scoped aircheck).

OTOH, the actual "Programmer's Digest" were not targeted to the mass market. Released on vinyl, the LP generally contained an extended overview of usually two radio stations per issue...along with audio interviews and snippets of other radio stations.

They were produced by a gentleman named Buddy <brainlock_on_last_name> who was associated with the Shelby Singleton (the folks who brought you "The Tennessee Birdwalk" and that unforgettable followup, "Humphrey the Camel") organization in Nashville. John Young, then at WMAK in town, was a frequent narrator on the series.

Incidentally, my 60 seconds of fame came about when WRVU (Vanderbilt University's then very mainstream top 40 FM) was featured on PD circa 1971. I was doing PM drive at 'RVU and they chose to include my "Dirty Telephone Call" bit. If you _are_ able to find someone who has archives of Programmer's Digest, please destroy that particular aircheck! Thanks. :-)

[Seriously, the PD series was a great chronicle of early 70's radio. I don't have any copies of them -- but if they are not already archived in some broadcast museum, they _should_ be. I'll just toss out some random names of people that MIGHT either have some of the PD discs or perhaps know where they can be found:

John Young (still with TBS?)
Don Benson (WSTR/Atlanta)
Jim Battan (aka Coyote) (ex-WERC and WAPI/Birmingham)
Mike St. John (ex-WWKX/Nashville and KOY-FM/Phoenix)

Mr. Tobias obviously thinks that most local owners, having had it explained to them that it would be more advantageous not to lock the door and walk away, will spring forth to inject integrity into their local presentation of the satellite service. No. This is what will happen: (1) Just as the network is cookin' with the finest researched music and slogans, delivered by the finest out-of-work Dallas-area air talent money can buy, Fred Yokel's station will cut away for two hours of the Trading Post (because two network minutes and three local avails just WEREN'T enough !); (2) Robert Hall won't give a rip, anyway... hey, it's an affilliate ! Have a nice day, Jerry... and, get off the phone and get back to work !

I'm interested in any kind of sports-related promotions that were/are unusual, weird, bizarre, or just downright clever. This goes for programming too. The Ticket in Dallas has taken to mentioning competitors names on the air on a regular basis; for example, mentioning in a promo that Randy Galloway (a sports writer that has a show on a competing station) is a great writer, but "if you want great sports 'talk', keep it on The Ticket." That kind of stuff. It used to be taboo to mention a competitor on the air. The Ticket doesn't subscribe to any of that, tho.

We're also doing a huge sports/collectibles convention this weekend. Lots of football, hockey, baseball stars, current and former, will be there to sign stuff and lots of games and booths. Should be lots of fun.

I'm just interested in anything that other stations are doing to increase public awareness, pull new listeners in, keep current listeners from pushing buttons, etc.

Here in the Tampa-St. Petersburg market, Citicasters, which owns WXTB(FM) and Channel 10 television, is purchasing WGUL-FM. WGUL-FM, licensed to New Port Richey, has 6 kW ERP but was granted C3 status last year, and may be in line for a further upgrade.

WGUL(AM), which simulcasts WGUL-FM's nostalgia format, is not being sold. It will retain the call and the nostalgia format.

Citicasters reportedly will soon erect a second tall tower near the current Channel 10 tower in Holiday, Florida, and move the WXTB(FM) and WGUL-FM transmitters to that location. That would allow WXTB(FM) operation as a Class C station.

In nearby Orlando, WGTO(AM), licensed to Pine Hills, has changed its call to WWZN(AM) and has adopted a sports talk format under Paxson Enterprises management. WGTO, which was licensed to Cypress Gardens during most of its life, is a well-known station, with 50,000 watts at 540 kHz. WGTO stood for "Gulf to Ocean," describing its coverage area from the Gulf of Mexico to the Atlantic Ocean. When a co-owned TV station was started in St. Petersburg on channel 44, the call letters WTOG were adopted; WTOG is a rearrangement of WGTO. Actually, WGTO had recently been calling itself "WGT" (except at the top of the hour). Apparently, this was because some listeners were confusing WGTO 540 and WDBO 580.

So in Orlando, Paxson has all-news WWNZ (Wins 740) and all-sports WWZN (Wins 540), and in Tampa-St. Petersburg it has all-news WHNZ (Wins 570) and all-sports WNZE (Wins 820). Other Paxson AM stations elsewhere also use the "Wins" slogan.

[Article crossposted from bit.listserv.gaynet]
[Author was Brian Nunes]
[Posted on Mon, 16 Jan 1995 22:54:49 GMT]

The week of January 16th on THIS WAY OUT,
the international gay and lesbian radio magazine:

* In NewsWrap: New Year's resolutions provide
progress in The Netherlands and Spain, and
voters reject bigotry under Sunshine State palms
(new anti-discrimination measures in Spain and
The Netherlands enacted last year take effect
on January 1st; and 56% of the vote upholds the
lesbian/gay rights ordinance in West Palm
Beach, Florida)

* Interfaith network weaves a caring "Canopy" to
fight homophobia and AIDS
(religious leaders in Tallahassee, Florida have
established "The Canopy Connection", a network
to foster AIDS and HIV education among various
church and synagogue congregations in
Florida's capital city)

* Gay musical duo Romanovsky & Phillips blossom
under their first spotlight
(how Ron & Paul first performed at San Francisco's
Valencia Rose for the first time as
Romanovsky and Phillips - includes edited
version of "Guilt Trip")

THIS WAY OUT airs on over 90 public/community radio stations throughout the
U.S., Canada, and in 5 other countries, and on Radio For Peace International
(RFPI), the United Nations- established global shortwave radio station based
in Costa Rica.
For a Station Carriage List and/or more information, e-mail your request to:
tworadio@aol.com and/or check out our folder in America Online's Gay &
Lesbian Community Forum Message Board under Community Organizations: National
Organizations.
You can also receive a Station Carriage List via anonymous FTP at
ftp://ftp.netcom.com/pub/bn/bnunes/this-way-out/stations.txt

Aren't near a station that broadcasts THIS WAY OUT?

Audio cassette tapes of THIS WAY OUT programs are available by subscription for only $10 a month! There's a 3-month minimum donation of $30 to begin or renew subscriptions. Programs are sent two at a time on each side of a C60 tape every other week, and dubbed in real time Dolby B stereo to provide superior sound quality.
For more information, or to begin your subscription with an initial minimum $30 contribution to our nonprofit all-volunteer radio project, please write to THIS WAY OUT at Post Office Box 38327; Los Angeles, CA 90038-0327.
Thanks!
****
DONATIONS TO "THIS WAY OUT", THROUGH ITS NONPROFIT FISCAL ENTITY OVERNIGHT PRODUCTIONS, ARE TAX-DEDUCTIBLE TO THE EXTENT ALLOWED BY LAW ... ARE URGENTLY NEEDED, WILL BE GRATEFULLY RECEIVED, AND ACKNOWLEDGED (ON THE AIR IF YOU WISH). HELP KEEP QUEER RADIO ALIVE AND ON THE AIR BY SENDING YOUR CONTRIBUTION TO "THIS WAY OUT", POST OFFICE BOX 38327; LOS ANGELES, CA 90038 U.S.A. -- ON BEHALF OF OUR UNPAID ALL-VOLUNTEER STAFF AND ESTIMATED LISTENING AUDIENCE OF OVER 250,000 .... THANK YOU, AND HAVE A PLEASURABLE AND PRODUCTIVE NEW YEAR!

427. Radio Trade Papers

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:35:40 UTC
From: tonyyee@merle.acns.nwu.edu
Message-ID: <3fijss$5qv@vixen.cso.uiuc.edu>
Source record: 35334

To keep up with the film industry, I read Variety. For television, there's Broadcasting and Cable. But, what trade papers are out there specifically for the radio industry and how can I subscribe to one? Any replies would be appreciated.

Tony

428. Washington, D.C., Radio Watch. RATINGS.

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:35:41 UTC
From: TOMLACKO@delphi.com
Message-ID: <3fijst$5r1@vixen.cso.uiuc.edu>
Source record: 35335

Four words describe the Fall '94 ratings period, SMOOTH JAZZ ... HOT FORMAT!
At long last it looks like FM 105.9 has gone from poor ratings to good.

Program Director Steve Kosbau has done a great job of running this Viacom-
owned station. The music and on air talent sound wonderful. The few new
jocks he did hire were familiar voices from the former Jazzy 100. Obviously,
listeners like what they hear too.

Here's a quick look at some of the Smooth Jazz numbers that I've seen. I've
heard there are even more impressive numbers which I haven't seen but, I
don't want to post something without first seeing the numbers.

DEMO: Persons 12+

DAYPART RATING RANK

Middays 10a-3p 3.8 10th place. Up from a 1.8, 17th place.
Afternoon 3p-7p 3.6 9th place. Up from a 1.8, 18th place.
Nights 7p-Mid 3.9 8th place. Up from a 1.7, 19th place.

DEMO: Persons 25-54

Mornings 6a-10a 3.7 10th place. Up from a 1.9, 18th place.
Middays 10a-3p 5.4 3rd place. Up from a 2.1, 16th place.
Afternoon 3p-7p 5.0 5th place. Up from a 2.2, 17th place.
Nights 7p-Mid 6.2 4th place. Up from a 1.9, 17th place.

DEMO: Men 18+

Mornings 6a-10a 3.0 10th place. Up from a 1.9, 17th place.
Middays 10a-3p 4.1 7th place. Up from a 2.1, 17th place.
Afternoons 3p-7p 3.6 9th place. Up from a 2.3, 17th place.
Nights 7p-Mid 5.1 3rd place. Up from a 2.4, 14th place.

Altough the weekly numbers don't appear to show a large audience gain for
the Smooth Jazz station, the station more than doubled its overall share of
listeners in the 25-54 category with a 4.7 share (up from a 2.0).

All ratings shown below are accurate to the best of my knowledge. In the
event of an error, station representatives can email me at TOMLACKO@DELPHI.COM
and explain any corrections that should be made. I will gladly comply with
all legitimate requests.

I am looking for fans of WLW.

I live in Ohio and listen to WLW, especially the Gary Burbank Show. His creativity is among the best.
BTW, about a year ago, the owners of (then) 550 WKRC were trying to make it into a second WLW, calling it "550 WLW". This ceased (perhaps by FCC request) and the station became WLWA. Station ID's were "this is WLW-a Cincinnati station". Clever, eh? Kinda like WGTZ in Eaton, OH, when they IDed as: "WGTZ, 'eatin' Dayton Alive." Oh well, I digress.....

433. More change at WRC/980

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:35:48 UTC
From: talk1370@aol.com
Message-ID: <3fijt4$5rm@vixen.cso.uiuc.edu>
Source record: 35340

This one's a little out of my normal territory, but since I know one of those directly affected, here's word on a shakeup in the morning drive at WRC (legally WWRC) AM 980 in Washington.

Mike Cuthbert, who had been showing some encouraging results as morning man over the last year, is out as the station tries a change in direction in its wake-up show. Mike replaced the Brian Wilson-Bob Madigan duo at the end of 1993. 'RC is now looking for a new morning drive personality again as it prepares to fire up its new 50,000 watt transmitter for a much-improved daytime signal. The numbers were off somewhat (though not dramatically) in the fall book, and evidently they must have interpreted it as the start of a trend rather than one of those random fluctuations stations go through in various dayparts all the time.

Just heard about the ad in Inside Radio; they're now looking for a hotter and faster paced morning show, perhaps more like what they had with Wilson and Madigan (both of whom are now at other stations in Baltimore and DC respectively, and therefore unavailable even if 'RC thought of re-uniting them). Mike will remain with 'RC at least through the end of his current contract at the end of May, but he tells me he'll only be heard on weekends.

There are reports that PD Gary Burns may be looking at changing other dayparts as well. The fall 1994 12+ results gave him the first down book he's had since revamping the lineup over a year ago, and other dayparts have been weaker this book as well as mornings. This shows how a PD can be damned if he does, and damned if he doesn't. It's possible that an unhealthy downward trend was developing, even though some VERY talented people have shuffled in and out of the morning hosts' chairs at 'RC in recent years, people who you would expect to click in that market. Burns has a reputation as an astute analyst of numbers and trends (he once programmed the full service leader in my market) so you have to respect his read on the DC market. Or it's also possible this book was a fluke, that even the best analysis isn't foolproof and staying the course could have resulted in a resumption of audience growth. If that was the case, change now may not help. We won't know which is the case for some months now. There's an equal potential risk, in both acting quickly and in hesitating to see if the audience loss is real or a temporary statistical aberration. Damned if you do, damned if you don't. Mammas, don't let your babies grow up to be program directors...

It's also possible that other factors are involved in audience loss, beyond the ability of the best talent or the wisest program director to affect. WRC has not had an aggressive marketing and promotion campaign for many months now. People who are now

at the station tell me it has been holding back on heavy promotion in the market until its new high power signal was on line. This is a calculated risk, although not without a logical business reason. It can make perfect sense to hold your promotional fire until you have all your big guns ready, especially if your ammo (promotional $$$) is initially limited. But you also have to maintain the base you have already built. The downside to this decision is that the best talent lineup in the world can only do so much if you depend on random sampling and word-of-mouth to remind people you're there. The new transmitter was originally supposed to be on line for the start of the fall book in October, and the holdup in getting it ready may also have indirectly hurt the station's marketing strategy by delaying its implementation.

Here is one man's opinion as an occasional DC visitor/listener who's done a little fill-in hosting on 'RC in the past and wishes the station well. It has been, and still is, a good-sounding station that you'd expect on the basis of quality alone to draw more audience than it does. It's sad that some good people with major talent have been turfed. Hopefully, that will soon end, and the station will find its audience.

Bob Smith, middays WXXI-AM 1370 Rochester NY

Mandatory Happiness and other such dictu <chrisld@blue.seas.upenn.edu> writes:

>-What are the frequencies, outputs and directions for WDRE and WLNG...

According to Bruce Elving's FM Atlas...
WDRE 92.7 1kw ERP @ 159m directional antenna
WLNG 92.1 5.3kw ERP @ 100m

I believe WLNG-AM is on 1600 and 250w, but it may be more with a directional pattern to protect 1600 in NYC. The directional pattern on WDRE is probably due to the fact that they were an early Class A FM (originally 1kw @ 91m) and to upgrade they had to either move farther from NYC or protect second adjecents 92.3 WXRK and 93.1 WPAT.

437. ADMINISTRIVIA: Commercial posts revisited

Newsgroup: rec.radio.broadcasting
Date: 1995-01-18 08:53:20 UTC
From: poll@airwaves.com
Message-ID: <3fiku0$85e@vixen.cso.uiuc.edu>
Source record: 35344

Since the real names poll went well (got a lot of response) I wanted to ask again, the group's opinion of something (hope this is not bothering you-all).

Some time ago this group voted to disallow commercial posts. It went into the charter. Lately, though I have been receiving a number of posts from individuals and firms offering a variety of services that, frankly, seem like they might be of some interest. I have not been posting these because of the vote and the charter.

However, it is my belief that the changes in question were more in response to 'begs for funds' that were at that time, innondating this group.

What I would like to know at this time is ...

1) Does the group want to maintain a strict policy on no commercial posts (no blatant ads)...

--- OR ---

2) Would you like to start seeing some of the ads that appear legit, have real-names and company names on them, and are of potential interest to the readers of this forum?

Since the net is becoming more and more commercailized anyway, and since some of these ads sound fairly legit to me, I was wondering how you-all feel about the possibility of allowing such posts. Also, if you feel that these posts might be OK, what kind of guidelines would you suggest?

Already we offer exceptions for individuals selling things, for help/positions wanted articles and other things that skirt the edges of commerciality.

As always I will take all comments into consideration and try to formulate the 'least objectionable policy' with as much leeway as possible. If the group does opt to allow some of these posts, I will still only pass along the ones that seem legit, are well written, and include 'non-internet' contact information (in lieu of or in addition to email).

You can reply to this article (if you are reading on Usenet) and express your opinions in brief (but complete) form. Also, as usual, please dont quote this article in your reply.

If you are reading via AIRWAVES, mail your replies to ....

poll@airwaves.com

Many thanks, Ill review replies for a week or so and get back to the group.

Bill

Full Disclosure Live

Carried on the Omega Radio Network (Galaxy 3, Ch 17, 5.8 audio).

WWCR Shortwave (5,065 khz) Sundays 7-8pm (central)
KHNC (Colorado -- eff mid February).

Full Disclosure Live is forum for discussion of issues relating to surveillance, privacy, technology and government. It's hosted by Glen L. Roberts (Editor, Full Disclosure Newsletter) and Art Newvo (Paratroops into the Island on a Black Helicopter). The live program has lots of listener participation and looks for "1776" solutions to our "1984" problems.

Since it is broadcast on shortwave, there is participation from Canada and an occasional call from Trinidad, St Lucia, or a fax from Northern Ireland.

Full Disclosure Live is approaching its 100th week on the air. We are looking for stations to carry Full Disclosure Live. We can offer the program at no cost plus you get 6+ minutes of local time.

WWCR Shortwave is a commercial station based in Nashville. They broadcast with a power of 100,000 watts. The audience is worldwide with plentiful response from the USA and Canada.

The U.S. audience is an upscale crowd that is seeking out information not found in the regular daily media. Some listener comments: "I went out today and bought a shortwave radio just to listen to your program. I have to say that it was great....", "I just want you to know that I'm a pretty regular listener... Your show is interesting and educational, and I enjoy hearing it.", "Your show is fantastic. It is a very educational program of which I will now become a regular listener." Full Disclosure Live is described by Adam Lock, Program Manager at WWCR as "extremely hot."

Full Disclosure Live is produced by the Superior Broadcasting Company
PO Box 734, Antioch, Illinois 60002. Ph: (708) 838-4478 - Fx: (708) 838-0316

If you are interested in carrying Full Disclosure Live on your station, call or email. (email: fd@wwa.com).

Free Satellite Dish Parts

Sometime in the recent past a tree fell on our 5-meter dish
and broke the spars which support the feedhorn. The wrong set of
spars were ordered and have been lying around the shop. We got the
right ones made, but are stuck with the incorrect set. For the
cost of shipping, anyone can have them.

They fit:

3.66 Meter dishes made and installed in the early '80's
for NPR interconnected stations. Antennas for Communications is
the company where these 3 spars were made. They support the LNC
type feedhorn. Focal length 43.9 inches.

Please contact Ron Thompson @ (310) 985-5566 if interested.

442. FCC BROADCAST OWNERSHIP RULEMAKINGS

Newsgroup: rec.radio.broadcasting
Date: 1995-01-20 05:10:03 UTC
From: fcclaw@cais2.cais.com
Message-ID: <3fngjb$8aj@vixen.cso.uiuc.edu>
Source record: 35256

FCC RECONSIDERING OWNERSHIP ATTRIBUTION AND
MINORITY AND FEMALE OWNERSHIP POLICIES

The FCC has initiated two rulemaking proceedings wherein they will consider their present Ownership Attribution and Minority and Female Ownership Policies. This marks the first time in several years the Commission has undertaken a proceeding to determine whether changes should be made to these important policies.

Ownership Attribution
Presently, the Commission's rules limit both the overall number of broadcast stations one person or entity may own as well an entity's ownership of more than one type of station (AM, FM or TV) in a single "market." Under Section 73.3555 (note 47) a person or entity is said to possess an "interest" in a station if his or her level of ownership represents 5% or more of the outstanding voting stock of the entity. If the 5% level is met, the interest is "attributed" to the entity for the purposes of the multiple ownership restrictions. The Commission in considering increasing the attribution percentage from 5% to 10% for voting interests and from its current level of 10% to 20% for certain passive investors. This would enable parties to hold greater interests in stations without violating the multiple ownership rule. The Commission believes that increasing the limit may foster badly-needed capital investment in broadcast stations. The Commission is also considering taking this opportunity to make uniform the attribution rules it applies to broadcast, cable and new media technologies.

The Commission is also considering whether to amend its attribution rules to make nonvoting stock attributable in certain circumstances. At present, such stock is not attributable because the holder is assumed to have no control over a broadcast station if he or she cannot vote on programming or policy matters. However, the Commission is concerned that there is the potential for nonvoting stockholders to exert control or influence over policy despite their nonvoting positions. The same is true for limited partnership

interests, heretofore not attributed by the Commission but an area for which the Commission is similarly concerned that there is on-going abuse. The Commission would like to remedy this abuse by making such interests attributable and, thereby, exposing such interests to its multiple ownership restrictions.

The Commission is also considering how it should treat "limited liability companies" - a new ownership form not previously considered under the attribution rule. The Commission is considering treating such entities as limited partnerships.
All ownership interests would be attributable unless a member certifies that he or she is not materially involved in the management of the company.

The Commission is also reconsidering its "cross interest" policy, which prohibits the common ownership, operation or control of two stations in the same broadast service serving the same market. The Commission is considering whether certain aspects of its cross-interest policy concerning key employees, nonattributable equity interests and joint ventures are still necessary.

Minority and Female Ownership
As for rulemaking proceeding on minority and female ownership, the Commission is exploring ways to increase the level of female and minority ownership of broadcast stations. The Commission is seeking data on the current level of female ownership of mass media facilities and expects to use this data to determine its future policies. Its new proposals include: (a) incubator programs; (b) modification of its rules governing the attribution of ownership interests for minorities and females; and (c) expanding the Commission's minority tax certificate to females.

The proposed incubator program would mean that a group owner that agrees to assist a minority or female broadcaster in starting a new minority-controlled station would be permitted to own one additional station for every "incubated" station it develops even though such additional ownership would violate the Commission's multiple ownership rule. The Commission seeks comments on whether there should be limits to such a program.

In addition, the Commission is considering relaxing its broadcast ownership attribution rules (as outlined above) to help minorities and female-owned

businesses raise capital. The Commission is considering restructuring its rules to facilitate capital availability. One idea the Commission is considering is the concept borrowed from the Personal Communications Services area where, if a single minority or female individual or entity owns more than 50 percent of the voting stock of the entity and at least 15 percent of the equity, than all other interests in the entity are not attributable. This would encourage non-minority investors to own less than controlling interests in stations without the concern that such ownership would be attributed.

Finally, the Commission is considering extending its tax certificate policy to females. At present, a tax certificate is awarded if a station is sold to a minority-controlled entity or if an investor in a minority-controlled entity sells his or her interest, provided that person assisted in the initial financing or acquisition of the station. The tax certificate permits the person to defer capital gains for two years by treating the gain as an involuntary transfer under the IRS rules. The tax certificate has been a means by which minorities have been able to acquire broadcast properties and the Commission is considering whether to extend its program to cover sales of stations to female controlled groups.

The deadline for filing comments in both of these two rulemaking proceedings is April 17, 1995, and reply comments are due May 17, 1995.

KNIX BACK ON TOP

After a second-place showing in the Summer '94 Arbitrons, Buck Owens' Country KNIX-FM has pulled back into first for Fall...shoving competitor KMLE into second. KNIX gained 1.1 12+...KMLE lost 1.0.

News/Talk KFYI is up 1.1...no doubt some of that is Limbaugh and the fall elections...longtime format leader KTAR drops 0.8 and trails KFYI by 0.7.

CHR/Urban KKFR(Power 92) gains 1.0.

Adult Standards KOY drops 1.0 while KTWC, a hybrid AC/Standards format comes up 1.0. The two stations went head-to-head "all Christmas music" in the last two and a half weeks of the book.

AOR KUPD up 1.1...sister KDKB is off 0.9.

And the killer books just keep on coming for Classic Rock KSLX. In one year, PD John Sebastian has taken the once-moribund station from a 2.4 to a 5.1....KSLX is now second only to KNIX in 25-54.

ARBITRON 12+ FALL 1994

Ranking Station(frequency)format fall 12+ share(summer 12+ share)

I am a fan of Bruce Williams (the business/common-sense/finance) talk show host.

Unfortunately I can only find him on WHO 1040AM and 800 AM (Iowa City?).

Neither of these stations are very strong in Cedar Rapids.

Does anyone else listen to Bruce? Let's put in some requests to the local stations.

449. An Impolite Question

Newsgroup: rec.radio.broadcasting
Date: 1995-01-20 05:10:11 UTC
From: transvox@interstate.net
Message-ID: <3fngjj$8b1@vixen.cso.uiuc.edu>
Source record: 35263

This is for those of you who think National Public Radio should not receive federal funding because you say you think the government should not be subsidizing a broadcast service.

So here's the impolite question: If you're going to be consistent about it, shouldn't you also advocate the end of funding for the National Weather Service's network of radio stations?

I'm referring, of course, to the stations at 162.40, 162.475, or 162.55 mHz in most areas. This also is a broadcast service. Radios to tune these stations are readily available. You could make the case that this service could be commercially supported (as is the Weather Channel on cable television).

Yes, I know, I've advocated the end of funding of NPR, but that's simply because I think it has already become a commercial service, with the underwriting money helping to subsidize fat salaries and nice offices for NPR honchos, and little of it going to the stations where it could really do some good. If NPR had stuck to its original mission, I'd support continued funding.

I just think most of the people who want to see NPR's money cut off are NOT being honest about it and just want to impose some kind of "conservative" orthodoxy on the airwaves. Answering "no" to my impolite question lets us know who the hypocrites are in this discussion.

I ask this question because I have seen far, far too many posts that essentially say "the government shouldn't pay for NPR because it's too 'liberal'" over and over and over again. I have lost patience with that kind of crap because it shows that the people making that argument haven't come anywhere CLOSE to thinking it through. If you can't make a new, reasonable argument on this issue, please shut up and save the bandwidth for people who have something meaningful to say.

Sorry, Bill, but that's not true. Most of the Hooked On Phonics buys are spot sales buys, but some are PI. They approached us about it and we turned them down...a $200 product and they wanted to give us a whole $3.50 per sale.

My point is that when you listen to the radio, and compare one station against the next, you judge which station sounds good based on the comparisons to the other stations. I don't know too many people who will judge a station's sound on comparing it to a CD (which is generally accepted as "good sound'), for instance.

I worked for a station that competed with NY City. The PD and I had our station sounding good against the stations we thought had the superior sound in NY. When I moved to Syracuse, I duplicated the chain and the settings, and I got a call from the morning man the day after I set it up, he thought something in the chain blew out, because in his mind, it was distorted. (It didn't sound distorted to the morning man in NYC). I now have my Syracuse station sounding "good", but it would not sound competitive back in New York City.

> good audio is.

I would agree here, (even though I am an engineer). I've always felt that the success of the sound at stations that I've worked at is due to a good line of communication with the air staff, the Program Director and the Production Director. It's actually a lot of fun to set it up getting all the different people into one room to listen. And, when you hit it, and everyone is happy, there's a huge sense of accomplishment, that we sound the BEST!

I also, as a final test, will borrow the General Manager's car for the afternoon, because if it doesn't sound good in there,, you may as well forget it. Lexus, Infiniti have decent sound systems, Audi, not so hot.

> I think it makes sense too seek out an audiophile within the station, or
> an external audio consultant who knows what music should sound like, to

I find my system of gathering the staff together has worked OK. The most important thing is that the staff is happy and feels comfortable with the sound. We will end up with a good final product.

|: ->if anyone could offer advice, ideas

| My thoughts on PSAs. Keep 'em short & sweet. No longer than 20 seconds max!...
| a good rule to follow: WHO, WHAT, WHEN, WHERE, HOW MUCH & PHONE NUMBER.
| No need to go in to "why" on a PSA. If people want to know why an organization
| is doing something, THEY can contact the organization themselves.

Is Soifer writing PSAs for an educational station to use as spots, or is he mainting a 'community bulletin board'? If these are to be used as spots, treat 'em like spots:

* Identify a need.
* Build rapport with the listener.
* Show how the organization (or desired behavior change -- see anti-smoking PSAs) meets the need.
* If possible, show how it meets the need _uniquely_.
* Give whatever details are necessary.
* Don't forget the command to action.

Some of my Clios are for product spots. Some are for PSAs. It's still advertising.

456. Stern on B97

Newsgroup: rec.radio.broadcasting
Date: 1995-01-20 05:10:23 UTC
From: ar577@freenet.carleton.ca
Message-ID: <3fngjv$8bt@vixen.cso.uiuc.edu>
Source record: 35250

I read with interest that Howard Stern will be doing mornings at B97 in New Orleans. When Howard was doing drive at 66WNBC in the mid 80s he was followed, for a time, by Allan Beebe. Last time I was in New Orleans, Beebe was doing middays at B97. So, I ask the question, is Beebe still at B97 and, if so, isn't ironic that their positions are now reversed.

Or may'be it isn't.

457. Talk Radio -- Burns -- Liddy

Newsgroup: rec.radio.broadcasting
Date: 1995-01-20 05:10:25 UTC
From: FFORTEJR@drew.edu
Message-ID: <3fngk1$8c1@vixen.cso.uiuc.edu>
Source record: 35251

A couple questions re: talk radio from Drew University in NJ.

Who do people suspect will be named to fill the Gene Burns slot on WOR? I know Jay Severin had been doing it for awhile. Then the other day I heard Paul W Smith, morning man at WWDB (96.5FM--Philly--Talk--Limbaugh). He was conservative and quite entertaining as well. Is he being considered, or is Jay the clear frontrunner? Also, how's Gene (Burns) doing in getting a syndicated show, and will it be heard in NYC?

Another question: How is Infinity broadcasting doing in getting a strong NYC station for G Gordon Liddy? All the stations I heard him on are too weak to make it here in North Jersey, and my dorm has NO AM reception. Even WOR comes in with a strong hum (and its NOT the equipment). I'm suffering withdrawl from Review and Comment on the News.

Please post answers. Thanks

|: Anyone out there have any info on doing voice overs commercially?
|: thanks

It can be very lucrative if you're good. Most legit commercial work is regulated by AFTRA, and they set some pretty high rates: for example, I just paid one of my double-scale friends $1200 for half an hour reading a dealer spot*.

Of course, with money like that it tends to be _very_ competitive. You have to not only have a good voice (not particularly golden pipes), but also excellent acting technique and infinite patience. The patience will help you get through the session, and it'll also help you get through the long years of auditions before you start to break even.

AFTRA info is available from the union: 212/532-0800.

---
* Other netters: please don't innundate me with offers to do spots for less money. Yes, I like to save money. But I cast based on talent, not price: send me (or Zephyr me) a demo tape.

I find that the ARROW, here KRRW in Dallas is boring compared too their
co-owned operation Q-102 and their competition KZPS 92.5.
will at least play more songs. I find that both will stick in recordings by the
great Bluesmen and Jazz musicians that helped make the sound of Rock.
Also a lot of Folksingsers who had rock songs get overlooked in the Arrow
format. Of course I find that I still like the days when FM had block
programming
and tried to be daring.

OK, I'm guilty of not replying right off the bat to the original posting, but
I wasn't certain I was thinking of the same person. Yes, I distinctly remember
listening to "Retro-Rock" with Frank Kingston Smith,a long, long, long time
ago (was it WABC or WNBC?)and occasionally hearing that same name filling
in on WBZ, and I was vaguely suspicious that the Frank Kingston Smith who
performs as an airshow announcer must have been one-and-the-same, 'cause
how many people would use a handle like that?
Anyhow, when I noticed a very recent posting, as reply to the original,
to the effect that Frank was in Phoenix, well, it had to be the same guy!
So to the original poster, if you still haven't tracked him down, please
contact me and I will pass along address and phone #'s, rather than airing
them in public.
Regards,
Ian Cameron, programmer and upside-down flier extraordinaire!

>KFYI

IJ>What reason did KFYI give for pulling the plug on Tom's show? What a
IJ>stupid move. He's on here in Chicago and sounds great!

Jay,
It could be one of many reasons. Bad numbers, new PD, new GM, full moon, new moon, no moon.

Any political/controversial show needs ratings to generate revenue. Without them, there's nothing to hang your hat on. There's no sales hook to overcome the lack of numbers. Frankly, Tom's show is too new to be expected to have ratings. Two books simply aren't enough to get any kind of track record. Give me four or five books and I'll make a decision.

Unlike niche programming that has an advertising base out of the box, political talk isn't unique enough to an advertiser to justify a buy without numbers. It's even more difficult for a local station trying to sell a network show.

"Sounds great!" just isn't good enough.

Rich

474. AM Stereo Use Worldwide

Newsgroup: rec.radio.broadcasting
Date: 1995-01-20 23:06:53 UTC
From: tcr25@aol.com
Message-ID: <3fpfmd$i3o@vixen.cso.uiuc.edu>
Source record: 35154

I'm trying to pull together an article for the international edition of Radio World on the prevalance of AM stereo in different parts of the world--specifically outside of the U.S.. Where it's in place, who has chosen a standard, availablity of receivers, how listeners/broadcasters have accepted it, where does it appear to be going, etc. My interest is in the phenomena of AM stereo, not really debates on C-QUAM versus Kahn (as I recall that thread has already been done).

I know that Australia, Canada, the U.S., Japan, Brazil, and a few other nations have named C-QUAM the standard, and in Japan at least AM stereo is widely advertised and the advantages of stereo are actively used. I've also heard of interest in Malaysia, India, Mexico, the Netherlands, and elsewhere. Any feel from these places as to it's use, acceptance, etc.?

Any annecdotes, information, etc.--especially from outside of the U.S.--would be helpful. Thanks!

Source record: 35155

WCRB-102.5 FM is often heard in our house. My mother-in-law is a devout opera fan, as well as a classical music fan. Consequently, when the radio is on, it's on WCRB. We live one town away from the Needham, MA antenna farm, as well as the Waltham tower for WCRB -- close enough that many stations don't even need an antenna to come in decently on our radios.

That said, such abundant signals play havoc with cable TV reception. The cable systems around here all shift the local TV stations to other than their normal frequencies, lest the broadcast and in-cable signals on the same frequency interfere with each other.

The local cable company [Continental Cablevision] also provides a cable radio service. Most of the strong FM stations are shifted up or down the band by 400 KHz to prevent being interfered with by the broadcast signal leaking into the cable.

All but WCRB, that is.

Through the cable, the signal suffers from a very bad case of multipath interference. It's painful to listen to (especially through our really nice system with a pair of Klipschorns).

So, when my mother in law prepares to tape a big broadcast (like the Met Marathon or a particularly juicy opera), we DISCONNECT the cable from the receiver's antenna input and use the rather strong signal available to make the tape. Otherwise the induced multipath makes the sound unlistenable.

Considering that the town I live in (Wellesley), as well as its next-door neighbor, Weston, probably contain between them a goodly percentage of WCRB's audience, one would think the cable company would recognize this and ensure that WCRB's signal is clean and strong.

As to WCRB's sound (aside from the cable nonsense). I think they do a very good job. The Met Opera broadcasts sound like you're right there in seat A107 - right behind James Levine. Given the huge fluctuations in levels during a typical opera, I think WCRB's current settings provide a decent balance.

John Francini

And this station use to be KJOJ and operated by Swaggart Ministries. I have a
verification of reception for the station from back then, when the group
operated KWJS 94.9 and later for a while KJIM 94.9 in Arlington.
The station for a while was a strong contender in the Format-A-Month Club.

bl058@freenet.carleton.ca (Dan Stark) wrote:

>Good sound is good sound, and bad is bad, no matter what market

Good and bad sound is very subjective. Depends on the listener and
a host of other variables.

Here's some historical (hysterical?) perspective.

When I was chief at a 3 pattern, 5 tower AM Directional station the
dircector for the chain bought me a CRL. We had been running a
Dourough DAP. I played for weeks with my new toy. I am a musician,
and none of the jocks or the PD complained about my ears. Here's
what I found.

EVERYTHING affected the audio. How the transmitter was tuned, which
pattern we were on, the weather (shakey ground system), what radio I
was listening to, to the humidity versus the speaker cones, whether
the radio was in the main lobe, or a null. I used to call up all the
jocks at their houses and get them to critique me as I made
adjustments.

I found that if I adjusted the audio to sound as loud as I could get
it, without severly degrading the quality, at least on the majority
of radios, it would stay that way..... for a few hours. I eventually
found the most consistent way to sound good was to not be overly
agressive. I kept the compressor section at medium recovery time and
the used the clipper to lop off the overshoots. The alternative
(when the audio changed from day to day) was to run the compressor
fast, and just kiss the consistent peaks against the clipper.
Resulted in amazing loudness, but was it touchy! The audio was right
on the edge of the knee of fastly rising distortion. In fact, Frank,
I often wonder if you chose the name Cutting Edge with that in mind.
So, now's my chance, I'm asking, DID you?

In FM a lot of those variables don't exist, but there are still tight
bandwidth hi-Q antennas, versus broad panel antennas, incidental AM
noise, variable radios, variable EARS, etc. A few years ago ('89) I
listened very critically to WMMR versus WYSP in Philly. 'YSP sounded
better in my car, but 'MMR sounded better in my wife's car!!!!

The cleaner a station's audio chain is to begin with then the more
=controlled= distortion that can be added by processing without going
over the knee! (geeez, sounds like alt.sex.spanking!!)

> The reason a lot of stations run over-compressed is because they believe
> the louder station wins.

Maybe not by being loud. Maybe just because underprocessed stations can sound dull and lifeless. In my band, the drummer made a recording in a bar using a 4 track reel to reel, mixed to cassette, no processing anywhere. The lead guitar player brought in an old cassette boombox with a built in stereo condenser mike, at the same bar, with a built in limiter. The cassette recorder sounded vastly superior. We all raved about the audio. We play LOUD and I believe we were hitting that limiter hard in the portable recorder. But luckily not overly hard! Louder is not automatically better.

The loudness wars are reminiscent of my days as a jock when stations ran turntables and we used to wrap a piece of adhesive tape around the capstan to raise the speed. It made the competing stations sound like they were dragging, and in a very slightly lower key. The downside? The bump, bump, bump from the end of the tape was audible on the air, unless the tape was angled just right (like a tape splice cut). And when the 'other' station sped their tables up, we had to go even faster. (loudness wars AND speed wars) Plus it drove any listening musicians crazy tuning their guitars to play along with the songs!

OK, I'm saving the rest of my processing stories for later articles. Lucky you guys!!

tnx for the (golden?) ear...

Bruce at WCBS-TV (where I set up the audio processing! Listen and flame!! OK, if you don't like it then Eric Small did it. <grin>)

479. Bruce Williams - list of stations request

Newsgroup: rec.radio.broadcasting

Source record: 35276

Amen, Aaron Snyder. It's about time someone took Roscoe's point, namely that compression is distortion, no matter how "innocuous" it's made to sound. WCRB (and GBH to some extent) have made the decision to cater to the automobile and elevator market. Consequently their other programming is grotesque. Huge choruses retreat into the distance while single soft instruments bray like the last trumpet. We need to assert that dynamics are as much a dimension of music as pitch and tempo. It's only a matter of time till broadcasters start speeding up the boring, slow passages, and raising the pitch of those annoying low notes that your car speaker can't hack.

485. Open House Party

Newsgroup: rec.radio.broadcasting
Date: 1995-01-21 00:19:40 UTC
From: jmdyson@unity.ncsu.edu
Message-ID: <3fpjus$t7f@vixen.cso.uiuc.edu>
Source record: 35279

I was wondering if anyone (or knows of anyone) who is currently carrying "Open House Party" or "Sun. Night Street Jam" for Super Radio. I used to live outside Boston and listen to the show every Sunday. I also made a couple of remixes for John to play on the air. Since I moved to Raleigh, NC, the one station that carried the show has dropped it. I was just wondering if it was still on the air elsewhere around the country and if so, who is carrying it. Any replies (even just call letters and cities) would be helpful. Thanks...

Jeff

486. "Whole House" antenna?

Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

My new job is in a building which is partially underground so radio reception, especially FM, is poor. The six-foot wire soldered to the antenna terminals of my radio (which worked well in a well-reinforced downtown Philadelphia building) isn't enough.

I never thought much of those "whole house" antennas seen occasionally in magazine and TV ads until I saw Radio Shack has added one to their catalog. (This is the device which you plug into an AC outlet and then connect your TV set to the output of) Are they for real and will they solve my problem?

Am I right in figuring they use an inductor to couple into the AC wiring? TIA and...

It's real easy to overload the input of a digital processor. Since most
engineers have gotten used to driving the analog stuff real hard to get
the wanted sound they try and drive the digital stuff just as hard. I
know because I have had to rethink my processor setup stratigies since
going digital some 5 or 6 years ago.

I was just looking at processors in the Harris-Allied catalog today...

My station's funding is severely limited, but we need a new limiter...

We are a mono station, and I saw a limiter for about $450.

Is this of good enough quality for the price, and something priced like
this last a long time...our current limiter is about 25 years old.

I have the same problem with my DJs...of course, our equipment doesn't
help much. Our limiter is about 25 years old...

We have always used compression, but I figured, if I turned down the input
enough on the compressor, I would be able to get away with leaving the
compressor off to improve sound quality...but after leaving several notes
to DJs and telling them to keep their levels low, I turned compression
back on today...oh well, if they want to sound bad...

The best software comes from Media Touch in Salem, NH. I can get more info if you need it. Although they are not windows based, they use touch screens and incorporate all of the announcer information into a system that is a total control room package. They have been around forever and have many installs all over the world. If you need more information on how to contact them, I'll try to get their address.

Ok, so since I do not have the inside tracks like some of you, and because no Newspaper in town does a radio column, I can only bring ya'll some kind of update every so often.

WVKS 92.5 (KISS-FM): Stacey Latoona who did co-hosted the morning show and did news has left the station and has excpeted antoher job in another market. I'm unsure where this is. Because of Stacey's departure WVKS has signed morning The Big Dog, Denny Schaeffer to a 3 year guaranteed deal. From what Denny says he cannot be fired unless he kills a guy, or another bigger market station buys out his contract. WVKS is also looking to find a replacement for Latoona. They are looking for a woman who has had experiance doing news on radio. Right now local TV celebs are doing news.

Two radio trades I would encourage would be Radio World "Radio's Best Read Newspaper," geared towards managers, programmers, and engineers (also has a great classified section for equipment); and, BE Radio which this month started as its own publication, previously was a supplement to Broadcast Engineering, geared towards engineers and managers.

Radio Business Report is probably the most comprehensive managerial publication I get on radio issues. They have an e-mail address: radiobiz@aol.com.

I'm aware that the M Street Directory also publishes the M Street Journal which is a weekly newsletter geared towards formats and programming on radio stations.

Jim Duncan, who you've probably seen quoted in Broadcasting & Cable and other trades also has his own quarterly newsletter. Happy reading!

WINS is all news, no talk shows at all. The channel in question may be the Group W satellite feed which is used by Westinghouse stations to exchange news audio. Occasionally a station will put its off-air signal on the channel for other stations to monitor.

However, I'm not sure if any of the Group W talkers (KDKA, etc.) carry Dr. Laura or One on One.

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

Radio is often a shaky business in terms of job security, but WDVE-FM's Scott Paulsen and Jim Krenn will be doing the morning show there into the next century. The top-rated morning team recently signed a five-year contract that will take them into the year 2000.

WYEP-FM and KDKA-TV have teamed up for a venture that could provide some good exposure for local bands. WYEP's Don Doherty is programming ``The Local Music Sample,'' featuring music by locals, which airs daily during ``Eyewitness News This Morning'' on Channel 2. The segment is open to all musical styles and genres. Interested musicians should send two copies of their music sample to ``The Local Music Sample,'' WYEP, 2313 E. Carson St. Pittsburgh, Pa. 15213. CD is the preferred format, although cassette, DAT and vinyl can be used.

A recent study by Interep Radio Store found that 38 million adults in the top 25 metro areas tune in to news/talk radio stations at least once a week. The majority are men. A BIA Publications survey of the summer 1994 Arbitron figures showed that news/talk stations ranked highest in average listener shares. News/talk averaged 14.8, followed by 14.0 for country and 11.6 for contemporary hits.

WSHH-FM makes it an annual tradition to raise money for the Make-A-Wish Foundation. Yesterday the station handed over a check to Make-A-Wish for $1,006,298, surpassing last year's campaign total of $765,000.

WRRK-FM's Jim Quinn is this year's spokesperson for the annual Shamrocks Against Dystrophy campaign. The campaign targets bar patrons and displays paper shamrocks with the names of those who've contributed to the cause. Proceeds benefit the Muscular Dystrophy Association.

David Zinkhann, general manager of WPQR-FM/WCVI-AM in Connellsville, has gone into the radio business as an entrepreneur. Zinkhann, of Youngwood, Pa., purchased WZZZ-AM in Fulton, N.Y. The adult contemporary station sold for $150,000, according to media broker Ray Rosenblum.

Around the Dial:

With '70s nostalgia thriving, can a yearning for the '80s be far behind? WVTY-FM has launched an all-'80s night. ``Eighties Saturday Night'' features popular artists like Whitney Houston and Rod Stewart that are the mainstays of the station's programming, along with bands

like Duran Duran and the Eurythmics, who get less air play these days. Shawn Israel hosts the show, which airs Saturdays from 7 p.m. to midnight.

Starting Sunday, KQV-AM will carry the NCAA Basketball Game of the Week. Most are afternoon games, starting at noon.

502. Chicago Radio Watch:1-23-95

Newsgroup: rec.radio.broadcasting
Date: 1995-01-23 07:35:15 UTC
From: JJB92@aol.com
Message-ID: <3fvm7j$5rn@vixen.cso.uiuc.edu>
Source record: 35160

Garry Meier, former mainstay of the Steve and Garry show, has inked a one year contract with WGN-TV. Garry will cover the entertainment and media scene for the WGN morning news. He will begin on January 30 and his reports will appear daily.

Meanwhile, Bruce Wolf, who has supplanted Garry as Steve Dahl' s sidekick has become increasingly more vocal with his displeasure with his salary at WMVP. Bruce continues to contribute to the Fox Thing in the Morning television show. The television responsibilites are becoming more and more burdensome; Fox bosses refused to let Bruce join Steve for his annual pilgrimage to Hawaii citing the all important "sweeps".

WGN-AM, Chicago's long time radio champ finished first in the nation in ad revenue with 37.5 million dollars in sales. GN listeners are reminded of this fact each day when they are subjected to the seemingly endless blocks of commercials.

The Sportwriters on Radio, former mainstay of Sunday afternoon programming on WGN and now on WMVP have disappeared from the airwaves. Major Broadcasting has ceased production of the show.

After recording a very impressive fall book, Barry Mayo has stepped aside as GM and VP of urban contempory WVAZ. Donald Moore replaces Mayo who continues as President of Broadcast partners, which owns WVAZ among other holdings.

Chicago-Phoenix connections:

Gina Steele, formerly of KOOL in Phoenix takes over evenings at WUSN. Ray Stevens moves from the nighttime spot to morning cohost with J.D Spangler.

Dave Logan, former PD at WLUP-FM takes over as PD at KZON, KYOT, KOY and KISO is the Valley of the Sun.

Shawn Burke, former morning and midday jock at WJMK is now the morning man at KPSN in Phoenix.

Musical job slots:

Jim Frank and Pat Cassidy have switched morning and afternoon responsibilites at all news WMAQ.

Brian Casey is the new PD at WYSY-Y108. Besides PD, Casey also handles afternoons at the station. Former afternoon guy Greg Brown was relegated to weekends.

Mark Goodman, former veejay on MTV and morning guy on WKQX, will be filling in for the vacationing Jay Marvin on WLS-FM this week.

The "Do as I say, not as I do" award for hypocrisy in radio management goes to WLS chief Tom Tradup. Tradup, commenting on the success of Rush Limbaugh stated " People who go on the air afraid of offending people are not inherently entertaining." A few years back, the same Tom Tradup announced that WLS would not exercise the option on the contract of the one person in the radio world who was truly honest with the audience, regardless of who was offended-Bob Lassiter. Tradup claimed that the "Mad Dog's" style just wasn't suited for Chicago.

Joe

[Moderator's Note: Let's not forget the further hypocricy regarding Steve Dahl. Here was the team that won WLS's bread and butter, and they (STEVE and Garry Meier) were treated like dirt. They were routinely suspended and finally let go for so-called offensive speech. I really miss Steve. Bill]

North County San Diego Radio Watchers: Jan. 20, 1995

Weber out, Reagan in: KOGO announced late last week that George Weber, the bright star of night talk radio for San Diego was let go. No further details are available. In his place, the twice tried, and hopefully hold on, Michael Reagan, takes the KOGO airwaves weeknights from 6 to 9 p.m. (KOGO: 600, 5kw, DA-N)

Rumors in the Escondido Times-Advocate put Howard Stern on 91-X (XETRA-FM, 91.1, 100kw, Baja Calif. Mexico) on the station before April. With the success of Don Imus on KOGO, conservative San Diego might handle Stern. [both are Infinity based broadcasters]

KFMB (760, 5kw - D, 50kw-N) will follow the San Diego Chargers into the east coast. The Chargers, part of the California Super Bowl, are twenty-point underdogs. [and have been all season] Hudson & Bauer, plus Ted Leitner will make the trek to Miami next week.

I was sent an e-mail about KCEO (1000, 2.5kw D, 1kw DA-N). The station, licensed to Vista covers north county very well. They replay the Rush Limbaugh show in the afternoon from 12 to 3 p.m. The bright spot is the local live talk show every week night about north county. This is hometown radio at it's finest. Their sister station is KKOS (95.9 3.8 kw), which may move south -- even have an "X" in their call letters. More on the move when it's known.

No word yet on Par Broadcastings plans on buying KFSD, San Diego's 94.1 100kw frequency. Will keep posted.

For an updated San Diego Radio Log, please e-mail me. If you have sent a request, and haven't received, please e-mail me back. AOL, despite it's ease of use, doesn't have a good way to save mail. [I'll refrain from using the words, "It really sucks" in referring to their mail server. :~)

506. WOWO....The Saga Continues.

Newsgroup: rec.radio.broadcasting
Date: 1995-01-23 07:35:19 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3fvm7n$5s0@vixen.cso.uiuc.edu>
Source record: 35164

Not much happening at the present time in the ever unfolding WOWO saga. If you are not up to date...here's the latest. Inner City filed two applications, one to powerdown WOWO to 8,900 watts at night with a very critical directional pattern and the other to give WLIB nighttime service to New York and beyond with 30,000 watts. The FCC considers the WOWO application to be a minor change at the present time as only the power were to be lowered. WLIB on the other hand is a major application to change the pattern at night and drive 30,000 watts into Manhattan. Though there is no formal petition process for WOWO's application....the FCC does accept informal comments at the present time. These two applications are totally intertwined. If one appliocation does not make the grade...neither application will be accepted. I have been told by the Commission that this will be a long drawn out process and might take some time. We shall see.

Mayor Helmke of Ft. Wayne apparently is in touch with the Commission on a regular basis and allegedly has sent let the public know that he will try his best to show the Commission that Fort Wayne would suffer economically is WOWO were to be stripped of its' gears. The WOWO Listeners' Guild has filed its' informal comments to the FCC and to the interested parties. We will keep you all informed. We are hopeful that an alternative plan to give WLIB a night service to NYC and keep WOWO in the Clear for everyone else can be made possible. If you have not sent your comments, please to so at once. Please, the FCC does NOT want to hear any "comfy and cozy stories" on what made you a listener. In the words of Sgt. Joe Friday..... "just the facts maam." They want to know what the WOWO service at night could be damaged if this fiasco were to be OK'ed. Those of you in nearby Ohio, Kentucky and Michigan pay strict attention. If the WOWO pattern changed...NO MORE WOWO. PERIOD. The farm listeners in those states that depend on WOWO's farm programming in early morning will lose that service forever. WOWO's daytime coverage will stay the same.

Basically now, we wait.

Source record: 35166

I would like to respond to the man or woman who posted his opinion about the giving WLIB fulltime status at the expense of WOWO/Ft. Wayne.

First, your "hit and run" tactics of speaking you mind leave a lot to be desired. You are intitled to your opinion, no question about it. But, in the future.....why dont you give some reasons why you feel that way about this subject, rather than just saying "GET REAL....WOWO has not been a special station since it was owned by Westinghouse" ?
Secondly, why dont you give your real name, rather than some "CB like" handle. Your "sideswiping" comments are duly noted and logged.

And, I beg to differ what you have said about WOWO. It still is the only locally programmed Clear Channel that still caters to the people who dont live in a major metropolitan area....unlike the New York stations. WLIB does deserve a nighttime service but not the 30,000 watts power pig that they are trying to pass through the FCC. New York City is amply served by too many stations as it is. If WLIB were so dead set on staying on at night....they could have gotten one of the many stations that have changed hands over the course of the last ten years in the New York area. New York will get a full time service. But, contrary to what many people say... the world does not evolve around New York City. If this application were to go ahead.....people outside of New York City will be minus a clean signal on 1190 and treated to hetrodynes as many daytimers will clamor to go fulltime with some piss weak authorizations. This is not what I think the FCC had in mind for their so-called "AM Improvement". Some night go too some regional channel like say...1250 or 1290 or even here in the Northeast 1220 (a so called Clear Channel). Chances are that if this WOWO/WLIB thing were to happen....1190 will sound just as "good".End of story.

End of story.ter does not go to the

Amen, Aaron Snyder. It's about time someone took Roscoe's point, namely that compression is distortion, no matter how "innocuous" it's made to sound. WCRB (and GBH to some extent) have made the decision to cater to the automobile and elevator market. Consequently their other programming is grotesque. Huge choruses retreat into the distance while single soft instruments bray like the last trumpet. We need to assert that dynamics are as much a dimension of music as pitch and tempo. It's only a matter of time till broadcasters start speeding up the boring, slow passages, and raising the pitch of those annoying low notes that your car speaker can't hack.

: : Sir,they do. And,BTW,how much of the federal budget would you think goes
: : to the Corporation for Public Broadcasting? 5%? 10%? Wrong on both counts.
: : Try .00023%(according to a recent James Ledbetter column in the Village
: : Voice). I can think of quite a few places where the budget should be cut,but
: : this isn't the place for it.

: 5% to 10%? No one is that dumb I hope. I know it's small, but does it
: make much difference? It's money the feds needn't spend in that way.
: Plenty of cuts to go around.

This is just a smokescreen for the real reason that CPB funding is among the first thing to be considered for cuts -- ideological politics.

Uncle Newty has been using frequent flyer miles earned from government-paid junkets for his personal use and the personal use of his family. This directly benefits Uncle Newty, so, when asked about Congressional reform in this area, he says it is silly.

But when asked about public broadcasting, which evidently doesn't benefit him so directly, he says we have to zero it out -- its a matter of principle, even though it's such a small part of the budget.

If that were not a pure smokescreen for the ideological reason behind his push to zero out CPB, he wouldn't be so reluctant to pass legislation requiring members of Congress to give the frequent flyer miles earned on government-paid trips back to the government, to reduce the cost to the government -- and to taxpayers -- for future government trips.

But that would be setting a good example through consistency. But Uncle Newty has already said that he won't be forced into consistency if it makes him do something silly. And giving up the right to pick the taxpayer's pockets for his own family's traveling pleasure must seem awfully silly to him, when he can divert your attention to CPB, instead.

517. Re: Dynamics of a format change

Newsgroup: rec.radio.broadcasting
Date: 1995-01-23 07:35:30 UTC
From: XXJK55A@prodigy.com
Message-ID: <3fvm82$5so@vixen.cso.uiuc.edu>
Source record: 35175

Bob: In commercial radio, the answer is usually money. Radio is, after all, a business. If with one format, the station wasn't making money, they're going to change to another format to see if that doesn't appeal to more people, thereby generating more ad dollars.
The problem with changing formats is the unpredictability of the new format. Unless the move is supported by good research, it could be a costly mistake.
Advertisers will many times pull their "buys" from a station that has recently changed formats. They placed the buy with the former format's ability to deliver a certain audience. Now that ability is in question or at least untested.
There's no prescribed time before anything settles down. When a station changes formats, it really should give ample time for the audience to accept it. Some formats are more "reactive" than others. Meaning they're going to gain higher ratings faster. I'd say a station should commit at least a year to a format to see if it works. Many advertisers (savvy ones) will wait a long period of time before buying a station. They want to see consistency in a radio station before they start spending big bucks.
There are all kinds of things to consider when contemplating a change in format. Station staffing, marketing, hardware, music sources, competitors within the same demos, ability to sell the format, etc. The station is almost starting from scratch when the format is changed. It's a big decision because one of the most important things a radio station can be is consistent. A change of format is the antithesis to consistency.
But basically, it all boils down to money. If a station's not making it with one format, and that format is the wrong one to be doing, then change. Of course, there is the possibility that the station has the right format but is not executing it correctly. But that's a whole new subject.
Hope that helps.

Michael Shishido

Bob-

There are two things coming into play in this situation--1)When some stations change format radically, like the station you mentioned, they go commercial free to highlight the new music format, then gradually add programming elements, like air personalities, commercials and other things; and 2) January is a slow time of the year sales-wise. The lack of commercials may be because of the lack of commercials sold. In overnights--most stations run bonus spots or run-of-schedule spots they couldn't fit in during the day.

A format change is usually an effort by a station to either change the listener demographics to attract more listeners, fill a format hole in the market and attract more listeners, or get out of a losing proposition, format-wise, and attract more listeners. Most format changes are based on one, two or all three precepts. In your case, #2 & #3 come into play. The risk factor is whether or not the listeners will be attracted by the new format. A format change, like life, is a gamble. Many stations have changed formats, only to switch back or to another format within a year.

Hope this helps--

519. Talk Radio -- Burns -- Liddy

Newsgroup: rec.radio.broadcasting
Date: 1995-01-23 07:35:31 UTC
From: richwood@commspec.com
Message-ID: <3fvm83$5sq@vixen.cso.uiuc.edu>
Source record: 35177

IF>Who do people suspect will be named to fill the Gene Burns slot on WOR? I
IF>know Jay Severin had been doing it for awhile. Then the other day I heard
IF>Paul W Smith, morning man at WWDB (96.5FM--Philly--Talk--Limbaugh). He was
IF>conservative and quite entertaining as well. Is he being considered, or is
IF>Jay the clear frontrunner? Also, how's Gene (Burns) doing in getting a
IF>syndicated show, and will it be heard in NYC?

Frank,
Both Jay Severin and Paul W. Smith are being considered for the old
Gene Burns slot. A decision is due any day as we negotiate with the
prospects. Paul W. Smith has been a regular sub on WOR and the WOR Radio
Network for several years.

Gene Burns doing well after his surgery and, I'm told, will be doing
some fill-in at KGO, San Francisco. Still no syndicated show. It would
be very unlikely that any syndicated Burns show would air in New York.
WOR isn't a prospect and Gene isn't in the WABC style.

IF>Another question: How is Infinity broadcasting doing in getting a strong NYC
IF>station for G Gordon Liddy? All the stations I heard him on are too weak to
IF>make it here in North Jersey, and my dorm has NO AM reception. Even WOR come
IF>in with a strong hum (and its NOT the equipment). I'm suffering withdrawl
IF>from Review and Comment on the News.

Again, the prospect for any syndicated show in New York is very
slim. G. Gordon Liddy is too much like most of what's on locally here
and offers nothing unique. He'd be just another conservative hollering
to be more conservative than the dozen other conservatives on NY radio.
If G. Gordon Liddy didn't have all the infamy behind him, he'd never
have been considered for Talk radio. Certainly not NY.

IA>Gene Burns has signed with the Majors Talk Network, syndicator
IA>of Farber, Colmes. I don't know about Liddy in NYC but do you
IA>try listening to Bob Grant? He is awesome!

Alan,
As usual, your information is incorrect. Gene Burns has NOT signed
with Major Networks. That rumor is months old. It was incorrect then.
It's incorrect now.

Your fetish for Bob Grant is amusing, but it clouds your
information-gathering process. You'd do yourself a great service by
investigating the rumors before you spread them further.

Rich Wood
Director - WOR Radio Network

I disagree with the author that NWS is a 'broadcast service'.
Transmissions take place on non-broadcast frequencies. True, receivers
are available to tune them, but rarely is the 'weather band' available on
FM-AM radios for home or car. If NWS was found everywhere at 1620 kHz,
for example, I would not make the above statement.

527. Project McLuhan

"Even mud gives the illusion of depth"
--MARSHALL McLUHAN

The Marshall McLuhan Center for Global Communications in association with The Center For Media Science (both non-profit) are releasing a veritable mountain of infor- mation in 1995, updating McLuhan theory and using McLuhan insights to analyze the world we live in, and "project" trends over the coming months and years.

THE MEDIUM IS STILL VERY MUCH THE MESSAGE!

These two associations have incredible resources to share -- all the McLuhan archives, as well as individuals who wrote and lectured with Marshall. The process of "updating" McLuhan theory to 1995 has been years in the making! The result will be a detailed analysis of the interplay between Technology and Culture. This information affects everyone on the planet, and will be shared.

PROJECT McLUHAN will also release information gleaned from so-called "alternative media," non-traditional media which nonetheless gather and distribute information which may be of interest.

TOPICS (KEYWORDS) INCLUDE TECHNOLOGY, COMPUTERS, CULTURE, SIGHT & SOUND, ADVERTISING, MARKETING, COMMUNICATION, HUMOUR, LIFESTYLES, HEALTH, RUMOUR, ENIGMAS AND MUCH MORE.

There is no charge to be on the e-list.

To join the list send a short email to mclr@inforamp.net

*WPBZ used to be country station WOKC, licensed to Okeechobee. At the start of the Fall book it went to 50,000 watts (was 3000 watts) and changed city of license to Indiantown, FL, about 30 miles closer to West Palm Beach. It's owned by the same company that owns WKGR.

WRLX-WRMF-WJNO are all co-owned. WBZT and WIRK are also co-owned.

529. Air Piracy in SF

Newsgroup: rec.radio.broadcasting
Date: 1995-01-23 07:35:42 UTC
From: dk@crl.com
Message-ID: <3fvm8e$5te@vixen.cso.uiuc.edu>
Source record: 35187

Tonight I heard 2 different pirate radio stations in San Francisco. These have been broadcasting for some months, but I did some tuning to see if there had been any new interest due to the recent circuit court ruling against the FCC's attempts to shut down Berkeley pirate Steve Dunifer.

I'm mentioning them here not because of the piracy itself, but to indicate what's going on in local radio.

Both of the following stations have had regular weekly broadcasts for months, but this is the first time I've heard either of these stations. I heard both in the 9pm-11:45pm hours on Saturday night.

103.3 was some station in SF's Mission District. For the most part they played the rap songs conventional radio stations do not play (lots of 4-letter words, talk about police, etc). Good signal, excellent audio for the most part, though it sounded as if they were driving around in a van -- the signal changed for inexplicable reasons. I'm told that there are times they take phone calls from listeners. Also, they were promoting a concert. Air piracy goes commercial?

93.7 "San Francisco Liberation Radio" was the fascinating one. It has been on the air for about a year, promoted mainly via flyers posted on bulletin boards in coffeehouses and laundromats.

SFLR did two stories important to local people: one was about the Food Not Bombs group and the SF mayor's office repeated deployment of 40 officers to arrest 5 or 6 people giving out free food in Civic Center. Definitely, this is a local issue not covered in much depth by other broadcast media here. The other segment was remarks by media-analyst Noam Chomsky, who spoke here recently, about the NAFTA agreement and its effects on the USA and San Francisco. Interspersed with these stories were musical collages pertaining to the subjects.

Fascinating note: I don't know if it was a local production or not, but SFLR had a comedy bit about Santa Claus firing the elves just after Christmas and opening up in Mexico. The bubbly-voiced reporter interviewed elves who talked about all the work they did for Santa and the cut in pay they took, only to be thrown out on the street. This was a *very* well-produced bit. Does anybody know its origin? Or is did SFLR do it?

Anyhow, tonight's radio listening definitely kept me tuned in (for a change) -- gosh, the things you do with a radio when you get bored with the local talkhosts.

What's the story on KUKQ-AM (1060) in Tempe?? I live in the San Diego area and in the Winter I used to pick up the station at night. It had a mainstream alternative format (REM, Depeche Mode, U2, Bangles, etc). About a year or so ago, I picked them up and they seemed to be simulcasting the AOR format on KUPD-FM. Lately, a talk station has been interferring with the signal so I hadn't heard it in about a year, and then earlier this month when I was in Las Vegas for the CES show, I tried them and picked it up. It seems to be a very underground alternative rock format now (I may have only been able to recognize 1-2 songs in a 30 minute period) and still seems to be known as KUKQ (think they called it Q). Can anyone let me know what the haps are onn this great AM station? I thought they had fallen by the wayside when The Edge came to town but obviously not!

Jeff

: input range. Are you sure it isn't a DA or something else in the path
: that's maladjusted?

It's real easy to overload the input of a digital processor. Since most
engineers have gotten used to driving the analog stuff real hard to get
the wanted sound they try and drive the digital stuff just as hard. I
know because I have had to rethink my processor setup stratigies since
going digital some 5 or 6 years ago.

As the designer of the Cutting Edge processor, and in response to observations about the range of the input amp, it should be pointed out that the input stage is calibrated to accept audio levels up to +23.5 dBm. So the earlier observation, I believe from Jay Rose, about clipping elsewhere is probably the case.

Also, the sound of digital components when they run out of headroom is most unpleasant when compared to analog headroom distortion.

David,

There are many options for processing, and naturally, for various amounts of money. Before offering an answer, I think the question is, what do wish to accomplish? Do you wish to use a limiter to control against over-modulation, or also have the use of some processing to create a specific sound? I would give thought to those issues, and then a plan of action can be attempted.

This thread has brought back memories of one of my first jobs in Madison, WI 23 years ago.

I was doing a late-night classical show on WMFM, a ma & pa pioneer FM operation that had signed on in the late 40's. It's now WZEE. At the time I was there most of the equipment was pretty old--the owner/engineer had Parksinson's disease and he wasn't too active anymore.

He was using Gates "Level Devils" for his compression. They were so bad that they boosted crosstalk from his own SCA, which was running Seeburg's background music service.

One evening, some friends from another station stopped by during my show, and we figured out how to "patch out" the Gates units and go from the board straight into the limiters.

For two years, when I did my show, unknown to anyone at the station, I would patch out the compression for my classical show and then restore it when my show was over.

Eight years later, when I was hired as first PD for a new public station in the Omaha market (KIWR, Council Bluffs), my chief engineer was amazed when I told him I wanted as much dynamic range as possible, not to be the "loudest" on the dial. He was used to dealing with rock PD's. As a result we had the best quality sound in the market.

Does anyone else remember using "Level Devils?"

I used to syndicate Tom Leykis for Westwood One, and was the one responsible for bringing Tom back to Phoenix. Since I left WW1 I am unable to say how the progress is on getting Tom back on in Phoenix. You might make some calls to KTAR and KXAM or any other station you would like to see him on in. I know he was on in Tucson, but there was no signal crossover with Phoenix.

Call Westwood One at (703) 413-8550 to find out more about the clearance process, and in the meantime enlist your friends in the effort to convince other stations there to add Tom to thier line-up.

To: Radio GM's, SM's & programmers

"Travel In the 90's" is a daily 90-second feature on all aspects of business and leisure travel. The feature is available on a market-exclusive cash or barter basis.

The program mixes recorded on-scene reports (plenty of nat sound) with up to date travel information for business and leisure travelers. Topics covered include domestic and worldwide travel hot spots, resorts/hotels, airlines and the latest in travel trends and interesting destinations.

This feature is designed to inform, attract and keep an upscale, adult audience of listeners who travel either because they want to or have to.

This is a well produced, high quality feature you can offer some of your best, upscale clients.

For a no obligation demo and more information: E-Mail responses here or call or fax TOLL FREE 1-800-645-2841. Voice or FAX--use the "800" number, either way the call is free. Willing to negociate almost any kind of deal that works for both of us. Interested in adding stations, very flexible when it comes to working out an agreement.

Thanks for your interest...

Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen

544. Kansas City Radio Watch (Jan. 21, 1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-01-24 05:18:19 UTC
From: transvox@interstate.net
Message-ID: <3g22ir$s66@vixen.cso.uiuc.edu>
Source record: 35202

Rimshot signal KISF(FM) continued its transition to a hit-driven modern rock format with the addition this week of program director Chuck Geiger. The former St. Louis radio personality is also holding down the afternoon drive slot.

KISF has also replaced its Saturday night dance mix show with a five-hour program dubbed "Planet Kiss," featuring a deeper playlist and remixes of some of the tunes on "Kiss FM's" regular playlist. The station's Friday night dance mix show appears to have been cancelled altogether (no great loss; the remote from various clubs was always out-of-phase).

The station's playlist continues to be heavily repetitive and difficult to classify. Most modern rock stations would not put Tom Petty in heavy rotation, nor would they consider the Stone Roses a new group. This one does.

In a Jan. 20 article on the Jan. 7 format change, the Kansas City Star quoted KISF GM Steve Dinkel as saying the station had failed to attract an urban crossover audience from KPRS(FM). Instead, he said, "Kiss FM" would now try to get a crossover audience from grunge-and-hard-rocker KQRC(FM). Dinkel also told the newspaper, "We're probably still playing about 60% of what we used to."

In other media coverage of the KISF format moves, New Times columnist Melissa Blazek wrote, "The major difference in the 'new' format is the exclusion of R&B based dance music," though she failed to note the inclusion of late-80s/early-90s synthpop that generally has been excluded from Kansas City radio. Blazek added, "KISF, whatever it calls itself, is a Top 40 radio station--Top 40 from a slightly different neighborhood, but still Top 40."

KYYS runs but does not promote RDS

An article about the future of radio this week in the Kansas City Star was accompanied by a sidebar about KYYS(FM)'s Radio Data Systems (RDS) subcarrier.

The Star article reported that KYYS has run the subcarrier for more than a year. However, I can recall no promotion of RDS by KY-102. The article did help me indentify a low-modulation data tone that I have heard whenever the station isn't using its 67 kHz subcarrier for IFB from remotes for co-owned WDAF(AM).

According to the story, the station transmits "KYYS: Kansas City's Rock and Roll" as its RDS message. But is there anybody out there

reading the message?

The newspaper article quoted KYYS engineer Mark Leaver, "Nobody has ever called saying they've got one. I know I don't have one." Not surprising! You can't even buy an AM stereo Walkman in Kansas City, much less something like this.

Bad music moves to Sunday

KCUR(FM)'s quirky "The Bad Music Hour" gets a weekly slot beginning tomorrow (Jan. 22).

The program, which originally began as an emergency fill-in for a talk show on the NPR station, features tunes sung by celebrities who probably shouldn't have sung them.

Hosts Sean Smith and Michelle Boule' appear especially partial to William Shatner's musical efforts; however, the range of material on the show is vast. An example: one recent find was a Paul Robeson album in which the noted opera singer and political activist sang "The Chinese Workers Anthem"...in Chinese.

551. FCC Fees

Newsgroup: rec.radio.broadcasting
Date: 1995-01-24 05:18:27 UTC
From: JDL@alaska.net
Message-ID: <3g22j3$s6s@vixen.cso.uiuc.edu>
Source record: 35209

On Feb 13th the FCC will close comment on its proposed FY 1995 regulatory fees as proposed in a new NPRM issued, I believe, Jan. 18th.

In 1995, most fees will increase.

I believe the fees are not fair for various reasons.

The FCC is required to craft fees that relate to the benefit to the regulatee and to the cost of the "service" rendered. The FCC does have some documentation aobut their cost, but has not adjusted the fee to broadcast stations to account for the public service expected of broadcasters.

This service is not expected of other FCC licensees. Thus, I believe a case can be made to chalange the fee structure.

If you are interested, you must get your comments ready! If you own, or expect to own a station, especially in a rural area, you should get those comments in.

If the FCC can increase the fees, they can increase regulation every year and hire new people, and thereby increase the fees again each year as the cycle continues.

As for KYES, it couldn't and didn't pay 1994 fees. Instead, it filed several documents, including a Petiton for Waiver, Deferral and Confidentiality.

Look, your "breeder" .sig comment was offensive enough, but this is outrageous. What, in your mind, constitutes "decent" sponsors? CompuServe advertises on Rush Limbaugh, The Club (car theft device) advertises on Rush Limbaugh, Ruth's Chris Steak House buys Rush on a spot basis in all the markets in which they have restaurants, you mentioned Snapple, and so on down the line.

On my show, if you have a product that is legal, your spots meet accepted broadcast production standards, your script raises no legal questions, we can come to a meeting of the minds that you would benefit from advertising on our show (in that we are a computer/high tech show and a Gold Bond wouldn't necessarily do well) and you've got the money, then you are a "decent" sponsor.

It's obvious to all of us, David, that you have a lot of anger against us straight conservatives, even though some of us are a lot more open to different lifestyles than you think. Having been a club DJ for years and knowing full well that I was one of the few straight guys in the room does a lot to open one's eyes to the hypocrisy.

Sorry for the vent, but some of your postings and political .sigs got to be a bit much, especially since the original intent of the poster was to find out whether anybody's sick and tired of hearing spots from companies who happen to advertise with great frequency. I thank the stars that there are advertisers out there who believe in radio as a medium and want to buy as much of it as they do...it keeps me in business!

557. KISF continues changes; KZTO sold

Newsgroup: rec.radio.broadcasting
Date: 1995-01-24 05:18:33 UTC
From: transvox@interstate.net
Message-ID: <3g22j9$s7c@vixen.cso.uiuc.edu>
Source record: 35215

Written January 24, 1995

I think I've finally found a way to describe the KISF(FM) format, featuring a repetitive playlist mostly of modern rock tunes and a presentation style that owes more to contemporary-hit radio than your typical modern rocker.

I'm calling it MHR (Modern Hit Radio). At least for now.

Meanwhile, the rimshot station, based in Independence but with a transmitter more than 40 miles from the heart of Kansas City, continues to change personnel.

Morning team "Boomer and the Dave" suddenly disappeared Monday morning, replaced by former evening jock Mark Daniels. Daniels did not explain "Boomer's" disappearance, nor did he try any comedy bits on the air (a welcome relief).

"Boomer" himself is an odd case. He started more than one year ago under the station's old contemporary-hit/urban format as a screaming evening jock appealing (in a manner of speaking) to teens. This fall, he was parachuted into the morning slot, and his voice suddenly seemed to drop a couple of octaves.

The station's other dayparts also have seen changes. Program director Chuck Geiger, who started at "Kiss FM" just last week in afternoon drive, moved to middays.

While this is going on, there are indications of yet another rimshot signal trying for the Kansas City market, this time from the west.

KZTO(FM), licensed to Ottawa, with offices in Lawrence and transmitter nearby, has been sold, according to a line item in this week's M Street Journal. The buyer is listed as "GMR, MO, Inc."

Funny thing is, Lawrence and Ottawa both are in Kansas. To me, this is an indication the buyer is considering a rimshot operation in Missouri.

KZTO went silent one year ago this month after failing as a soft-rock station attempting to rimshot Topeka. Toward the end of its life, it resorted to weekend coverage of the Motor Racing Network via sub-voice-grade phone lines.

The station's signal did not penetrate midtown Kansas City well at all. KLZR(FM), with a transmitter site that's farther away from KC, does a better job of getting in. The KZTO transmitter site is about 50 miles away from central Kansas City, Missouri.

Problem is, KZTO's 95.7 mHz frequency suffers severe interference from cross-modulation products generated by multiple close-in 100,000-watt transmitters in midtown and east-central Kansas City, Missouri. KLZR's 105.9 mHz frequency appears relatively free of this type of interference.

KZTO would have trouble moving closer in to Kansas City without a power decrease because of two factors: Full class-C KWWR(FM) in Mexico, Missouri, and possible IF interference with KKCJ(FM) at 106.5 mHz.

Speaking of KKCJ(FM), the lease on the station is due to expire February 15; however, the station still appears to be operating normally at this time.

Date: 1995-01-24 05:18:38 UTC
From: mstrand@delphi.com
Message-ID: <3g22je$s7o@vixen.cso.uiuc.edu>
Source record: 35220

Hi Ted,

Radio Shack has an inline 75 ohm FM filter for about $2.50.
However, this is a broad band filter not tuned to a specific
frequency. I suppose you could make a 1/4 wave tuned stub out
of RG-59 cable but that is a hassle.

Good luck!
Mike

Message-ID: <3g22jh$s81@vixen.cso.uiuc.edu>
Source record: 35222

Ill repost this because Bill lost it... (Just joking, we all appreciate your hard work!)

I am interested in the life of the Program Director. No, not the meal plans and such, but how you got into your current posistion. What I am looking to do is put together a summary of the majors various PD's around the country attained in college, how they got into radio, and more importantly trying to outline the steps one would take to get into the higher level radio jobs such as the PD. I think it would be interesting to see what range there is when it gets right down to it. If you want to contribute (please?) could you also include your city and roughly the market size you hail from.

Thanks in advance, and I look forward to seeing your responses.

565. Re: Talk Radio -- Burns -- Liddy

Newsgroup: rec.radio.broadcasting
Date: 1995-01-24 05:18:42 UTC
From: soundbytes@aol.com
Message-ID: <3g22ji$s85@vixen.cso.uiuc.edu>
Source record: 35223

Burns' return to national radio will be welcome and it's coming
pretty soon. Agree or disagree with him (and I've found myself
doing some of each) he is intelligent and treats his audience
like he respects THEIR intelligence as well. Major Talk Network
has signed him, and will put him on as an additional element to
their schedule ASAP. The KGO thing is probably part of Burns'
hunt for a new home base away from New York.
As to WOR, Jay Severin is not likely to be a permanent part of
their schedule...former PD Ed Walsh had wanted him as Burns'
replacement, and that's the single biggest reason he's the FORMER
PD. David Bernstein, the new PD, is a man who's well known as a
good spotter and developer of air talent, and he's clearly looking else-
where. Maybe the guy from Philly (who I haven't heard) is the one,
maybe someone else is...word is he'll take his time to make the
right choice (maybe all winter if he needs it) rather than make a
fast hire just to fill the slot.
Now to Liddy...G. Gordon Jailbird's act may be wearing out.
He was dumped from WABC because he drew lots of complaints
but no ratings. Nobody else in NYC so far has been willing to
gamble that he'll do any better for them. And the evidence across
the country is, they were right to pass. He's been cancelled or
downgraded in a number of markets from Buffalo and Rochester
to the West Coast for the same reason, and now he's showing
serious erosion in the fall Arbitrons in the one market where he
used to rule, namely Washington DC. Liddy's not a bad actor on
film and TV; maybe he ought to go back to it fulltime.
Bob Smith, middays WXXI/1370 Rochester NY

566. Studs Terkel on WFMT?

I would like to hear from other political talk show hosts on AM news talk stations who are between 25 and 30 years old. I would like to know how you broke into the business, what your show's format is and time slot, how long you've been on the air, what side of the political spectrum you're on and so forth. How have you gained the respect of station staff and listeners? What are your ratings?
I'm a moderately conservative talk host in a medium sized market on the air for one year. Thanks.

***** Peter Laufer, former Program Director at talker WWRC AM 980, has filed a $4.8 million suit against WWRC's owners, Greater Media. The suit states the Laufer was fired as news and program director on March 31, 1994, because he refused a request by the station's sales manager to fire an African American announcer, who the sales manager said sounded "black" on the air.

Laufer claims that his civil rights were violated, that he was wrongfully discharged, that his contract was breached and that GM Robert Longwell defamed him when he told the WASHINGTON POST that he was fired because of his "poor performance."

Laufer recently finished a book that describes his last year at the talk station. "INSIDE TALK RADIO: AMERICA'S VOICE OR JUST HOT AIR?" will be in book stores in the spring.

***** Mike Cuthbert is out as morning man at AM 980 WWRC after only a year at the helm. Mike will be heard on the air on the weekends only until his contract runs out in May. Cuthbert is winding down his second stint at WWRC. Back in the mid-80s Cuthbert worked mornings at AM 980 when the station was onwed by NBC and was officially known as WRC. Thanks to Bob Smith (midday host at WXXI-AM 1370 Rochester NY) who scooped all the local newspaper reporters on the Mike Cuthbert situation when he posted the news last week in Airwaves.

***** Paul Wilensky, former WMZQ AM & FM General Manager, died on January 2 from complications related to the AIDS virus. Mr. Wilensky was GM of the country combo from 1986-1990. He left the Viacom-owned station to go to San Francisco and run their station there. Paul Wilensky was 37 years old.

***** Liberty Broadcasting has purchased a huge diner on wheels to use at promotional events in and around town. The 20 ft. long $80,000 toy known as the "Radio Diner" will be used by WXTR, X-tra Oldies 104, and by sister station WHFS which has an Alternative music format on FM 99.1.

Knowing traffic in this area Liberty could actually make money with this thing. Just stock it with sodas and snacks and drive it around the beltway. When they find a traffic jam, which won't take long, just open up for business right there on the interstate!

572. Greenville-Spartanburg ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-01-26 20:02:29 UTC
From: testnet!paul%pegasus.att.com@deja-vu.aiss.uiuc.edu
Message-ID: <3g8v4l$qpu@vixen.cso.uiuc.edu>
Source record: 35230

Fall 94 ratings for ultra conservative Greenville-Spartanburg
South Carolina market (overall #59)
Geography lesson: The market is in the northwest part of the state.
Greenville (58,000) and Spartanburg (43,000) are 30 miles apart
along I-85. The other city most often identified in multiple
city legal IDs is Anderson(26,000), which is another 30 miles SW of
Greenville, almost to the Georgia border. Hendersonville is 32 miles
N of Greenville; Forest City is 27 miles North of Spartanburg
Asheville is 62 miles NNW of Greenville, and is a market of its
own, although the 100,000 watt signals from G-Sp get up there well
Gray Court is 25 miles SE of Greenville

1. WSSL-100.5 Gray Court, country "Whistle 100" 18.5 18.0
(includes simulcast on AM 1440)

2. WJMZ-107.3 Anderson, urban "107.3 Jams" 9.0 8.3
tie
2. WROQ-101.1 Anderson, album "Rock 101" 9.6 8.3

4. WMYI-102.5 Hendersonville NC, AC "My102" 8.6 8.0

5. WESC-FM-92.5 Greenville, country 10.0 7.6

6. WSPA-FM-98.9 Spartanburg, Soft AC "Lite 98.9" 6.5 6.6

7. WBBO-FM-93.3 Forest City, NC, top40/modern 3.5 4.6
the ratings went up but the idiots took it country on 1/1 anyway
tie
7. WFBC-FM-93.7 Greenville, oldies "Oldies 93.7" 4.6 4.5

9. WFBC-1330 Greenville, News-talk 2.3 4.4

10. WLYZ-103.3 Greer/WLWZ-103.9 Easley urban 2.6 3.7
their ratings went up so they took it modern rock

11. WMUU-94.5 Greenville Classical 2.4 2.9
also beautiful music

12. WSPA-950 Spartanburg News-talk 1.3 1.6

Less than 1.6: WKSF-99.9 Asheville, "kiss country" but they at least
are true to their city of license, the studios are in Asheville,
unlike WBBO whose studios are in Greenville, 50 miles away from
its city of license. WBBO's a case of "we're got a great signal so let's
forget about Forest City or even NC and try to be a Greenville station."
While one acquaintance familiar with the market said 'that's the bible belt
and they don't like alternative rock down there.' Well, they like it good
enough for 7th place and are up 2.0 points since a year ago but I

can only guess that tied for 7th isn't good enough. WBBO-FM has been satellite "The Breeze" and 4 different flavors of hits since 1990. How much respect does "format of the year" get you in a market? I wonder if Terry Willingham is still reading this newsgroup; he worked at WBBO and might have some insight (or rebuttal!)

Also less than 1.6 with a strong signal in the market: WAGI-105.3 Gaffney, which is 15 miles NE of Spartanburg with a full service country format and 100,000 watts at 1190 feet.

Paul Richards

573. Hartford CT ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-01-26 20:02:32 UTC
From: testnet!paul%pegasus.att.com@deja-vu.aiss.uiuc.edu
Message-ID: <3g8v4o$qq3@vixen.cso.uiuc.edu>
Source record: 35231

Ratings for the nation's 42nd largest radio market, Hartford CT
Summer Fall

1. WTIC-1080 Full service News-talk 12.2 12.2

2. WWYZ-92.5 country 5.7 8.2

3. WRCH-100.5 soft AC 8.1 8.1

4. WTIC-FM-96.5 Hot AC 6.7 7.3

5. WKSS-95.7 Hits 7.4 6.3

6. WDRC-FM-102.9 Oldies 5.9 5.6

7. WZMX-93.7 70's oldies 3.9 5.5

8. WHCN-105.9 album 4.5 4.9

9. WCCC-1290/106.9 album 4.5 4.4

10. WDRC-1360 standards 4.4 3.3

11. WAQY-102.1 Springfield MA AOR 2.7 2.9

12. WYSR-104.1 was AC now modern 2.9 2.8

Despite 2 AOR plus now modern rock at 104, WAQY Springfield
still makes a good showing in the Hartford book while other
Springfield stations such as WHYN-FM-93.1, WMAS-94.7 do not.
WKCI-101.3 New Haven and even WFAN-660 NYC sometimes show up
above 1.0 in the Hartford book. Country WPKX-97.9 Enfield does
extremely well in the Springfield book (being just over the
border)
Points of reference:
Springfield MA is about 30 miles N of Hartford
New Haven is about 45 miles S of Hartford.

Sacramento, California Radio Watch

A One, Two, Three Punch Guess who's First Second and Third, Chancellor Communications KFBK 1530, KGBY (Y92) and KHYL (Cool 101) all scored Big as the Fall Ratings were released.

As reported by the Sacramento Bee:

Station Format Fall Summer
KFBK 1530 News Talk 13.9 11.6
KGBY Y92 AC 7.3 5.3
KHYL Cool 101 Oldies 5.8 4.4
KSFM 102.5 CHR/Urban 5.8 7.4
KNCI 105.1 New Country 5.7 7.1
KXOA Arrow108 70's Rock 4.5 4.6
KYMX 96.1 Soft AC 4.4 5.1
KSEG Eagle 96.9 Classic Rock 4.3 5.0
KWOD 106.5 Modern Rock 3.8 4.5
KCTC 1320 Standards 3.5 3.2
KRXQ 93Rock Rock 3.4 5.5
KRAK 98.5 Hot Country 3.2 3.7
KSTE 650 Talk 2.8 1.7
KSSJ 101.9 Smooth Jazz 2.2 2.3
KHTK 1140 Talk- Sports 2.0 0.9
KGO 810 Talk 2.0 1.6
KQPT 100.5 The Point - Rock 1.6 2.9
KQBR 104.3 The Breeze- Jazz 1.2 1.1
KZSA 92.1 La "Z" Spanish 1.0 1.0
KNBR 680 Talk-Sports 1.0 1.0

Celebrations were in order at KST with Tom Leykis their all talk line up and KHTK-The Sacramento Kings, Don and Mike, Imus and picking up the best of All Sports KSAC after going Spanish. Kleenex is needed at the Point (Bands you never heard of, Songs you don't know Rock Format) Its perfect for a non commercial station or college but not a 100,000 watt flame thrower in the middle of the dial in a under radio market.

Other News, Twenty year veteran Joey Mitchell of Country KRAK has jumped ship to take over the Morning show at Oldies COOL 101. another 20 year veteran Dusty Morgan of KXOA AM-FM (1470 and the old K108) was sent out to pasture after owners Brown Communications are letting 1470 do oldies out of a box. Although KSQR 1240 has signed on with the Spanish format, it also signs off everyday a 6pm and has not materialized as the Big Super Q Spanish station it was touted to be.

articles@airwaves.com

North San Deigo Radio Watchers: Jan. 25, 1995

>From the reader's post:
Tri-cities Broadcasting has filed an application with the FCC to move KKOS-FM from 95.9 to 95.7. The proposed move would make the station a class B1, and could have up to 25kw of power and antenna up to 328 meters above terrian. This move, first reported here, was filed at the first of the month. KKOS [95.9, 3.8kw] is licensed to Carlsbad, California. In southern California, there are three (3) stations at 95.9, KEZY Anahiem, and a station in Barstow, California, all within 100-miles of each other.

>from the listening post:
Super Bowl bound: Part of the nearly 3,000 press in the super bowl hype include 200 from San Diego county. Radio wise, XETRA, KFMB, and KSDO sent out teams to establish a beachhead in enemy territory. All sports XETRA-AM team includes John Ireland. The Chargers radio network will broadcast the game in San Diego. KFMB's Hudson & Baurer will have their morning show all week from the Miami area. Ted Leitner, who does double duty on radio with pictures KFMB-TV 8, also adds color commentary. KSDO's talk king, Roger Hedgecock didn't make the trip. After the AFC championship pep rally at Jack Murphy Stadium, he doesn't want to make public appearances. Why? When he came on stage in front of 78,000 cheering fans, they suddenly started to "boo" the ex-mayor and convicted felon. [Which doesn't explain why he is the number one talk show host in the afternoon.] Instead, KSDO sent in a small team of reporters, the lightest contingent of any SD based broadcasting station.

I'll keep this brief: O.J. Simpson coverage is gavel to gavel for now on: KFI [640 50kw] Los Angeles; bullets on KOGO [600 5kw] San Diego, KNX [1070 50kw] Los Angeles, KFMB, XETRA, and about every station except: KKOS has promised nothing but the best damn music the next several months. [Sorry for the swear word, but this close to insanity in LA, plus the super hype has left even the Faith & Values channel worth a look at night!]

KOGO [600, 5kw D, DA-N] line up includes the following Weekdays:

5 - 9 a.m. Imus in the Morning [syndicated]
9 - 12 G. Gordon Liddy [syndicated]
12 - 3 Dave Dawson
3 - 6 Peter Weissbach
6 - 9 Michael Reagan [syndicated]
9 - 11 Roger Fredenburg [syndicated]
11 - 5 Art Bell [syndicated]

Weekends include John Hightower on Saturday and Sunday.
Art Bell's Dreamland - live - Sunday night.

For a radio log of San Deigo stations, enclose $25 in a self addressed envelope -- opps, I mean, please e-mail me and I'll gladly send you one. If you have requested and haven't received, please resubmit. [I lost my e-mail box holdingds last week.]

578. Station Automation:approach and sources

Newsgroup: rec.radio.broadcasting
Date: 1995-01-26 20:02:43 UTC
From: Bill.Anderson@launchpad.unc.edu
Message-ID: <3g8v53$qrc@vixen.cso.uiuc.edu>
Source record: 35236

I am advisor to a small campus station (WWHS-FM) that would like to upgrade its operations to provide more professional sounds and transitions. It appears to me that the general topic of station automation covers some of this. We currently have an older board with some pots going bad (we're switching channels to get around that but will soon run out.) and can plan for some equipment upgrading in the near future.

My question to this educated body is: Were you a small station with limited funds (few K$ to spend/year) what route to station automation would you take? Are there particular broadcadt boards that are made to be computer controlled? Is there a "standard" interface like MIDI/ serial/ SCSI or whatever that we should look for? We are looking to make this move over thenext few years (as you can tell from our $) and will likely pruchase boadr in year 1, computer in year 2, support peripherals in year 3, etc.

Any help with general principles or sources will be greatfully read. There are 43 dedicated DJ volunteers who will appreciate the information and guidance.

Thanks

Bill Anderson

These are the worst things ever installed in a radio. Just give the old
Stereo/Mono switch, thank you very much. They are alway switching back
and fourth and it can be really annoying to listen to.

Yes, Here in the San Francisco area there are many stretches of road
that are reception testers. Most car radios have some form of blend,
some are keyed off signal level, some off other factors. The question
is how much filtering and blending the radio does. I have
a couple of car radios, one is a Denon, it blends excessively. I
suspect it's looking at noise in the sub-band. One station here in town
uses quite a bit of composite clipping, and when the Denon is tuned to
this station blending action is evident even when the car is
stationary. It sounds bad, like a defective cassette with dropout..
With my other radio, a Radio Shack, the radio plays fine on this
station. On the Radio Shack the blending is much more tasteful, waiting
until there is a real deficiency in reception before blending and
filtering.

The problem with after market car radios is that you don't know how it's
going to work until you install it in your car, then you can't take it
back. I've had good luck with Radio Shack top of the line units, these
are bottom buck units $150.00 in the car stereo world, I've never had
one stolen, and that's a plus.

583. Buffalo/Toronto Radio Watch(1/27)

Newsgroup: rec.radio.broadcasting
Date: 1995-01-29 00:32:37 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <3genn5$p7s@vixen.cso.uiuc.edu>
Source record: 35241

Happenings in the #40 market:

*Buffalo's AM stations are covering the O.J.Simpson trial(such as it was this week,with all the delays):thusly:
-WWWS-AM(1400,3WS-Your Money 1400)will cover the trila in its entirety.
-WGR(NewsRadio 55) will air updates,as will WBEN(NewsTalk 930). 'BEN has sent Brian Meyer(its executive news editor and top beat reporter)to L.A. to cover the trial.
-I've also heard parts of the openings statemenst on WWKB(The Big 1520).

*This is outside of the market,but here's the Rochester Arbitrons for the fall '94 book(with change up or down and the summer rating):

1. WHAM/1180 News/talk;Bills/Limbaugh(NewsRadio 1180) 13.5(up 3.8/9.7)
2. WBEE/92.5 Country 11.7(down 1.0/12.7)
3. WCMF/96.5 Album rock(96 WCMF) 10.3(down .5/10.8)
4. WRMM/101.3 Soft adult contemporary(Warm 101.3) 8.4(up .7/7.7)
5. WPXY/97.9 Contemporary hits(98 PXY) 8.2(down 1.2/9.4)
6. WKLX/98.9 Oldies(Oldies 98-9) 6.0(down 1.3/7.3)
7. WVOR/100.5 Adult contemporary(Variety 100.5) 5.6(up 1.0/4.6)
8. WDKX/103.9 Urban contemporary 4.6(down .3/4.9)
9. WMAX/106.7 Adult album alternative 3.2(up .5/2.7)
10. WBBF/950 Adult standards 2.8(down .5/3.3)
11. WRQI-FM Classic rock;H.Stern(Rock-It 95) ! 1.9(down .6/2.5)
12. WJZR/105.9 Jazz/rock/instrumentals 1.4(up .1/1.3)
13. WEZO/93.3 Easy listening 1.3(up .5/.8)
14. WHTK/1280 Talk;Imus/Don & Mike(Hot Talk 1280) .7(no change)

!-located at 95.1 & 95.5

Not listed:WCMF/990(sports-Amerks;SportsRadio 990)

Two other notes:
-SportsRadio 990 has added the Rochester Knighthawks(newest team in the Major Indoor Lacrosse League)broadcast rights. When a Knighthawk game conflicts with the Amerks(as it did last Friday(1/20);I was at the game with a group and can vouch for this),the game will be heard on WCMF-FM. BTW,no station locally has picked up the broadcast rights for a full season of the Buffalo Bandits (also of the MILL),though WGR has aired some games.
-Tom Leykis may-or may not-be on WHTK. Confirmation,please!

*Well.if you haven't already heard,Alan Pergament will no longer cover radio for the Buffalo News as of Feb.1 . Anthony Violanti will step in to that role. Mission accomplished...partly. To quote the late Channel 4 anchor Bob Koop, "I'm going to be back...being as much of a cantankerous ass as I've ever been." And,Tony...I _will_ be watching you. It's not over yet.

```

Comments:

This book could be very well be titled "As The Planet Turns",for CKEY did
very well in its 1st book as a modern rocker. Longtimers may recall that in
Airwaves #778. I predicted that CKEY would take away listeners from CFNY-but
not _that_ many. It did very well with 18-34 year-olds,getting a 4.6-beating
out WHTT,WBUF,as well as WGR and WBEN. All that is amazing-even more so when
one notes that as recent as last spring,it scored a zero. The Planet does best
from 7pm-midnight,getting a 2.8 12+ and 6.0 18-34.
-In AM drive,WBEN's Good Morning Show with Bill Lacy & Kevin Keenan was
first,followed by WYRK(Breakfast Club),WJYE(Chille/Demler),WGR(Tom Bauerle)
and WHTT(Danny Neaverth).
-'YRK was not only tops in 12+,but also with 25-54ers at 12.3,followed by
WHTT(10.1),WJYE(8.2),97 Rock(8 even),WGR(7.1),WBEN(7 even),WBLK(6.4),Q102 and
the Fox(5.5 each)and Kiss(4.4). Also,'YRK finished 2nd in the 18-34 demo.
-Middays,'YRK was tops. WGR(with Rich Michaels)was 5th with a 7. WBEN(with

Gary McNamara,Newsday,and Rush's 1st hour)was 3rd with an 8. Michaels beats McNamara 10-noon,but after that,he loses audience to Newsday on 'BEN,and-again-gets his head handed to him by Rush(proving that if given a choice between Limbaugh or a pale copy,they'll take the real thing). 'GR did post significant gains in 12+ and 25-54 in the slot-but that can be credited to the elections in most part. The watch on Michaels is not over by any means...
-Chuck Dickerson(the "Coach")is #2 in PM drive-behind WYRK-with a 7.8 overall-a nearly 100% improvement from the fall '93 book,when Tom & Karen were in PM drive. 'BEN's evening news block dropped to a 6.4-it was 9.5 last fall and 8.2 in the summer book. 'BEN gets helped in the 7pm-midnight block, scoring a 9.0,up from 7.7 in summer and 5.3 last fall. It's the only time 'GR suffers from no Bills coverage-Art Wander gets a 7.5,up from 4.7 in the summer,but way down from last fall,when he got a 12.3 .
-A recent story in USA Today summarized Howard Stern's ratings problems. They could have also looked at WWKB,where he gets a 2.8 for 12th place in AM drive,drops out of the top 10 in 25-54 and lost more than half of the 18-34 audience from last fall. J.R and Suzie get worse ratings than Don & Mike did. Also,night talker Tom Leykis only pulled a .5(good for 19th place)-BUT,from private communication with one of my contacts,Tom's the only bright spot at 'KB.(BTW,Kiss leads the night daypart,'BEN is 2nd and 'GR is 5th.)
-I didn't forget the non-comms. WNED/94.5(classical)got a 3.0,which would put them in 12th place ahead of B93 if included in regular Arbs. WBFO/88.7(jazz/news;NPR)got a 2.0-which would place 'BFO in a tie for 14th with the Planet.

Enjoy,all!

I'm looking for suggestions on Digital Workstations....nothing elaborate, like the DM-80, just something basic and Windows based! I've tried the SAW (SoftWare Audio Workshop) and it performs well although on the demo many things are not accessable.

Anyone using or know of anything that is Windows based and works well and is relatively inexpensive!

Disagreed. There are great variations between brands, and the ones that do it right are exactly what FM needs to be listenable in a moving vehicle. Pioneer blemds extremely well. In fact, when my Pioneer's auto-blend circuit conked out for a short time, I couldn't stand to listen to FM in the car. Other radios are terrible. Jeep, for instance, flips from Stereo to Mono instantly, rather than gradually, a very annoying effect. Especially considering the factory radio flips into mono even when the signal is still very strong. GM factory radios also kick into mono way too early. I've also heard brutal results out of a Kenwood aftermarket unit.

Toyota (Fujitsu Ten) is excellent, and their AM stereo section is the best I've heard. Eclipse (also made by Fujitsu) also gives good performance, as does Alpine and Pioneer. The best advice is to go for a drive in a demo vehicle before buying the radio.

[comparisons of verious brands of car radio blend circuits deleted]

Well designed blend circuits are fine for the general listening public, I suppose. But I am almost always dissapointed with any circuit that decides for me what I will listen to. I dislike auto-record level, AFC, auto-center-tune, data reduction system (sony mini-disk), automatic color on televisions and I also find blend circuits (even nice ones) annoying.

As noted by Dan Stark, GM factory radios are particlualrily bad. Yet they are in thousands of cars and are rather expensive. Also blend circuits are seldom mentioned in specifications and I have never seen them switchable. The implications are that the factory engineer knows what is best for every listening situation and for every listener.

I much prefer a stereo-mono switch. I often prefer a little stereo noise (with separation) than a blended signal. But I want the ability

to switch to mono if I like. Allmost all modern aftermarket car stereos (below $300) have no switchable mono-stereo and rely totally on blend to deal with the mode of the radio.

It is just another step in taking control out of the hands of the end-user, and placing that control in the 'hands' of the devices software. Once you could fiddle with an automobile's carb, distributor and other things to get a stalled car moving. Now all of that is out of the control of the user. If your car breaks, you have to hook up a terminal (only at the dealer) to determine which $150 sensor has broken.

The blend circuit is designed to be a "band-aid" for multipath. What happens is that when multipath occurs, the blend circuit puts the high frequencies in mono. This helps minumize the multipath distortion by cancelling out stereo high frequency noise.

The situation that you describe where the blend circuit is activated in a strong signal level, can be caused by either multipath, or some radios use a blend detection circuit that operates on the integrity of the 19kHz pilot tone. In some instances the pilot tone can become "poluted" by artifacts of a station's audio processing. This can fool the blend detector into thinking that the radio is in a low signal level, and thus activate the blend circuit. This can be very annoying.

I hope this helps you with an answer.

They all have them! They "blend" when the radio detects the signal
getting weak.

I'm posting this because I don't quite have a map handy, and I want to find out if anybody knows what I'm talking about...

This past August, I was in Roxboro, NC and I was listening to a CHR called G105.1/WDCG(??)...if I heard the legal ID correctly, doesn't 'DCG' stand for "Durham/Church Hill/Greensboro"? So, where is it in these ratings? Anyway, I have a feeling I'm wrong about the 'Greensboro' part...Can anybody clear this up for me? Thanks, in advance!

Darius

> So here's the impolite question: If you're going to be consistent about
> it, shouldn't you also advocate the end of funding for the National Weather
> Service's network of radio stations?

In making this comparison, IMHO you're distilling most of the salient points out of the debate...NWS and NPR/PBS are two completely different animals. The nature of their intended purposes are so vividly contrasting that the analogy really ends at the medium.

Let's distill the argument further: should we de-fund WWV/WWVH/WWVB? If we're going to privatize the Weather Service, why not privatize the NIST?

I could probably muster a good argument for privatizing the Weather Service, because, as you say, private organizations are already doing it. However, I think the best one could hope for is for a single provider to bid on running the NWS in each region for a period of years, rather than a bunch of Weather Service providers working in competition. With a competitive market for weather, whose Emergency Broadcast System would be authoritative? For this function, I think the NWS would fall under the fringes of the periphery of the national defense, which I certainly would not be in favor of privatizing.

The issue becomes even more important if we extend privatization to the NIST. Whose pound or ounce or mile or second would be authoritative? This is where (I think) Conservatives and Libertarians diverge. I think the Libertarian would probably argue FOR the privatization of the NWS and the NIST, where I (as a Conservative) would argue that there are SOME things that the government must do to preserve order.

Both of these cases vastly differ with the NPR/PBS case -- At best, NPR/PBS are merely improving the quality of some people's lives (not mine), but it certainly can't be argued that they are instruments of the government for the security of the nation nor for the effective administration of laws, even in the small way that NWS and NIST are.

I know I'm way off on a tangent now, but it was a great question, especially for a rather dull Friday afternoon...

> If NPR had stuck to its original mission, I'd support
> continued funding.

I don't know if I would or not -- the Constitution does permit the government to promote the arts and that sort of thing -- I don't know if I agree with that phrase in the Constitution, either. If NPR/PBS had not

abused their privilege, I think it's one of those things I wouldn't particularly care for, but I probably wouldn't complain about it, either (forebearance != hypocrisy). I think if the news arm of NPR/PBS were doing their job coth that phrase in the Constitution, either. If NPR/PBS had not abused their privilege, I think it's one of those things I wouldn't particularly care for, but I probably wouldn't complain about it, either (forebearance != hypocrisy). I think if the news arm of NPR/PBS were doing their job correctly, they would resemble C-SPAN a lot more.

On that note, does anybody care to explain the phenomenon of C-SPAN? I.e., does _anyone_ think they're biased? I think the service they provide is infinitely more valuable than NPR/PBS, yet they were privately funded from the start (weren't they?). This is one of the things that free markets will do...

> I just think most of the people who want to see NPR's money cut off are NOT
> being honest about it and just want to impose some kind of
> "conservative" orthodoxy on the airwaves.

You can think what you want, but I've NEVER heard anyone argue that the government should be funding a CONSERVATIVE media... That would be the only way to ensure conservative orthodoxy -- the free market, however, works both ways. How easily we forget that Rush Limbaugh and his ilk have only been around (nationally) for about seven years, and that there is _still_ no major news reporting service that is regarded by conservatives as even _unbiased_, let alone _conservative_. Conservatives (IMHO) are not asking for _all_ broadcast media to be conservatively orthodox; just give us _something_ to listen to. Right now there _is_, and the market is responding. If NPR/PBS advocates would use market forces instead of tyranny to get what they want, I think everyone would have something to hear, and there would be a lot less complaining.

When I worked at KRAB-FM in Seattle in the early-to-mid-'70's, we ran Jean's tapes on some kind of rental basis. KRAB has since been sold, moved, and reorganized as KSER-FM, Everett/Lynnwood, WA, still under the aegis of the Jack Straw Foundation (offices in Seattle). Maybe somebody hung on to those old tapes.

Yep, Brian's got the specs right. Lee replaced 40-year radio vet Jim French at KIRO. The 9-noon slot goes up against Rush on KVI, and undoubtedly French's laid back style was taking the gas pipe in the ratings. Rodgers came in with a harder line, but it's obvious to me that KIRO pulls his strings depending on the books. Frinstance, he became more aggressive, and almost rabid, for several weeks after the fall book came out. Generally, he seems a lot more rigid in his starboard-leaning positions than he used to be on KGO. (Yesterday my father called him a "real putz." And it takes a lot to get my father that riled.)

602. good transatlantic MW propagation

Newsgroup: rec.radio.broadcasting
Date: 1995-01-29 00:32:56 UTC
From: Liam Fitzpatrick <LFTZPTRK@tcd.ie>
Message-ID: <3genno$p9b@vixen.cso.uiuc.edu>
Source record: 35110

MW transatlantic propagations have been pretty good during the last weeks.
The following frequencies could be heard here in central Europe

930 CFBC St John NB
930 CYYQ St John's NF (ID: Q '93)

1050 not ID'ed, but probably WEVD NYC
1050 " " " " CHUM Toronto

1380 not ID'ed, but probably CFDA Victoriaville PQ (language was French)
1390 is free from European stations but I haven't heard anything here
1500 WTOP Washington DC

1510 not ID'ed, but probably WSSH Boston
language was Spanish with Latin American music, however this weekend
I heard them in English. I'm not sure whether it's the same station

I used a 1x1m frame antenna connected to a R390A with 4 kHz bandwidth.

930 KHz is the most reliable frequency since BRTN in Brussels closes down
before midnight local time. So MW DX is possible even before midnight.

Unfortunately CFBC and CJYQ 'fighting' with each other for this frequency.
So reception may be a bit difficult. On the other hand it's interesting
to observe how the propagation path changes, because sometimes I hear
on or the other station exclusively. And they are not that far apart
when seen from Europe.

1050 is probaly the last chance for a while, since the UK plans to start
a new station here.

Compared to late 70's MW-DX was much better then during conditions like
we have now as much more frequencies were unoccupied by European stations
then.

I wonder what can be heard in the Scandinavian countries and UK & Ireland?
Must be fantastic there right now?

That, "otherwise, no regulations", will make it not work. Not only will it not sit right with the FCC, it will open it up to abuse by those creative law benders. Sure, more leeway as far a content is needed, but lets not give them a Lessaie Faire

My idea is qute similar to yours, but instead of the inherrent interference that the close proximity of AM signals will cause, I would prefer using an FM signal in the UHF band. That way there is no possability of propagation skipping the signal into far away places and causing the QRM, and it ensures the "local" nature of the service. Although the range may be extended during certain weather conditions, turning over a TV channel to the band would give enough frequencies so the assignments could be spread out.

Power limitations would be imposed by the station's location to the area it wanted to serve and the height it could put it's antenna. A station in the middle of town would use less power than one on one end of the town. You might see 10 watts non directional for one in the center city off a 200 ft. office building, but maybe 250 watts directional from one at the city line with only 20 ft. off the roof of the house. If the one at the end of town was on a hill, he might get reduced to 50 or 100 watts, and the one in the center of the community might get increased to 100 watts if it had to keep it's antenna close to the ground.

Having lived through the pirate wars in NYC, the power restrictions insure a more equal contour between "competing" stations and prevent any station with more money from taking a domineering position. I would put frequency assignments on 2nd adjacents simply because the power is being kept low. I

would also try to clump stations assigned to one area to the same area of the dial. This helps listeners find the other statons in their areas and again it prevents interference when the temperature inversion comes in since you can spread the subbands more effectively.

I'm talking local "origination", not local "content". If those jocks are in studios in the Boston area, do they can make references to local people, places and things, accidentily slip into BaSTaN acents on certain words and make personal appearances? If so then you have what I meant. Sure most of the music was recorded in Los Angeles, and New York, and London, but should the jock be in Dallas speaking in what would be a cold, bland, lowest common denominator, pure vanilla style? Or should he have something that the listeners would identify with?

My idea of local origination is for eliminating, at least part of the time, the station whose only local programming is a computer inserted ID, commercial or prerecorded traffic or weather report, if they do that much. Most of them happen to be religious slave stations, operated by remote control, who do absolutely nothing but the ID and program announcements. Most of these stations take up spots in the NCE band, away from the schools and nonprofit organizations that could do something for the community.

> The classical FM where I work has only two shows per week that are entirely
> local in content: New England Concert Hall (one hour of recorded performances

> Boston Symphony Orchestra.

So you're at WGBH, I assume. Fine, it plugs into NPR right? But does it carry all of NPR's inventory? It doesn't, and that's fine with me. But if all it did was carry NPR and PRI, then you'd get the idea of what I was talking about.

> I do agree, though, that use of the public airwaves for religious propaganda
> should not be encouraged as it is not in the public interest. Certainly the
> local communities that make up our nation would be served far better by

> low powered community broadcasters than they are by sowers of religious
> discord.

Amen Brother! You have seen the light, say Halleuah! Oops, sorry.
I was out at a UHF-TV station recently, sharing the tower was an automated affiliate of Family Radio, on the NCE band. The only thing they had there was the transmitter, and probably a computer with the ID's on it, but the official station address was the TV station address.

Family radio had no offices there, the station was all but empty, it was an affiliate of the Home Shopping Club itself, but at least the station had a manager, a CE, studio engineer and part time camera people. Silver-King, the owners since HSC was sold to TCI, had decided to rebuild and use the facility for commercial and video production, even though the TV transmittter is operated by remote and fed from satellite. The owners do have 5 minute local insert programs on the station produced there as well.

OK, Silver-King is just as guilty as Family Radio for wasteing air space for national drivel, but they have studios that any local person or business can rent to record cable programs, commercials, or industrial video. That, with the "In Your Interest" inserts, means that the station is involved with the community. Probably more than any other local station since they don't have to reserve the studios for their own schedule.

Right now the TV station is running as a satellite out of their sister station in Newark, NJ. Within a year, they will have their own operations staff there, increase local production and run the insert tape themselves. The remote control of the transmitter, by now, has been moved from Newark to Florida, but that only means that they can turn off the lights at night and stay home on Sunday. Not like the Family Radio operation, where they come in every other week, and where manager's office is in East Orange, NJ.

If I want to see the public file for channel 67, I can show up there during business hours and the manager will let me see it. If I want the one for WFRS, I have to go, not to New Jersey, but to the public library, 2 towns over, about 10 miles away, and hope the libarian on duty knows what I'm talking about.

"Sue the B-------" will be the topic of the February monthly meeting of the Northern California Radio-Television News Directors' Association. The premise is that times have changed. It used to be that only irate news subjects sued News Departments, for such things as libel, slander, defamation, false light &c. Now, news people sue each other, for age, sex and race discrimination; harrassment, wrongful termination...

Appearing for the plaintiff will be Mark Rudy of Rudy and Zieff and for the defense, Margaret Edwards of Landels, Ripley and Diamond, both San Francisco attorneys.

The meeting is, as always, open to non-members of NorCal RTNDA and will be at the San Francisco Tennis Club on Wednesday, February 8. Social moments 11:30, lunch at noon, adjournment at 1:30PM. $20. Five dollars' discount if you call (415) 259-7538.

Reminder that the NorCal Convention will be March 10-12 in Monterey. Information from the same number.

610. CPB funding to local stations

Newsgroup: rec.radio.broadcasting
Date: 1995-01-29 00:33:06 UTC
From: transvox@interstate.net
Message-ID: <3geno2$pb4@vixen.cso.uiuc.edu>
Source record: 35118

People do read r.r.b, it's good to know, and one of them is Vic Bremer of Minnesota Public Radio. He dropped me an e-mail informing me that 93% of Corporation for Public Broadcasting (CPB) money goes to local stations. I am presuming he is referring here to public radio (PBS really wasn't part of this particular discussion, as I recall.)

Here is a portion of the reply that I sent to Vic:

Thanks for writing.

It's obvious we don't disagree that CPB money ought to be going to local stations. I did not realize it was 93%. I stand corrected.

I still have trouble with much of what NPR *does* but I don't want to get into a liberal/conservative argument because I think those kinds of arguments are pointless and repetitive.

But I think NPR has lost touch with many of those who listen to it. I have so far refrained from using a couple of my pet names for it, "National Boswash Radio" and "National Public Radio for Bosnia." I am no isolationist but, to be blunt, the lead story on Morning Ed at 7 am every day does NOT need to be the latest from Bosnia or Washington (these days, there doesn't seem to be much difference). Middle America doesn't get covered on NPR unless something disastrous or "cute" happens out here.

You are correct in noting that licensing rules (essentially all of Subpart C of 47 CFR 73 would have to be thrown out) would have to be changed to enable truly commercial operation by many NPR stations. I have noted this myself on alt.radio.networks.npr in the past.

And there are more than a few noncommercial stations with little or no NPR affiliation, such as "community" broadcasters, and others that outright abuse the rules, such as "nonprofit" gospel broadcasters.

However, there is, in my opinion, far, far too much underwriting to suggest that public broadcasting is truly noncommercial. I still think it's lost its way. At the very least, when stripped of the ideological baggage the current debate over NPR/CPB/PBS carries, it is, in my opinion, the 2-by-4 that's getting the mule's attention, as we would say in Missouri.

Now wait just a sec here, dk...You're in SF and yer talkin' about
listening to rock on 910? Far back as I can recall (and I've been an AM
DXer since 1959), 910 in Oakland has been country or something else, but
not a big rock machine. On the other hand, we here in Seattle did have
910-KQDE/KUDY/KUTY et al, which was a top 40 station from 1958-1960. They
were sold a few times, changed their calls to KIXI and their format to
slush, then "nostalgia." They also jumped to 880, which allowed them to
go to 50 kw full time, instead of 1 kw/250w-da/n. Totally ruined my 880
openings to Panama,Costa Rica, Colombia and host of other Latins, not to
mention I could never hear BBC-882 again. (And let's not talk about the
co-channel thrash, please...it hurts too much.)

AS for 900 being a clear channel...
Well, yeah, the USA doesn't get to use it except for daytimers,
but it's big in Canada and Mexico. So if those 450's are being used close
to either border --or in those two countries-- it could create some
problems. Frinstance, we have a 900 in Victoria, B.C., an easy shot from
Seattle and a virtual local at the Washington/B.C. border.
Weeeeeeeeeeeeeeee. The next closest is KNUI in Hawaii...not a problem.
Unless, of course, all those Japanese-Hawaiian folks bring in a bunch of
450 IF radios, then K-Nui becomes K-Nu-weeeeeeeeeeeeeee. :)

900 in Mexico has a big gun on it, I think 150 KW in Mexico City. I doubt
a 450 IF would be much problem for them, except in fringe areas maybe.
(Or, maybe I'm wrong and the thing would howl like a wounded banshee.)

Electrons are so much fun.

612. What's the scoop on the "T-Man"

Newsgroup: rec.radio.broadcasting
Date: 1995-01-29 00:33:10 UTC
From: jepilger@mailbox.syr.edu
Message-ID: <3geno6$pbo@vixen.cso.uiuc.edu>
Source record: 35120

Just what is the info on the sudden disappearance of the "T-Man" from the syndicated early morning sports talk show circuit? I've heard only bits and snatches on mornings when I rise early and suddenly he was "on vacation".

>From the response of the current host there seems to be no better way to tick them off than to mention his name. He wasn't the highest quality entertainment but he sure was unusual. You never seem to hear the real reasons behind many of these changes.

Any info appreciated,
John

613. Victory for Micorbroadcasting - Defeat for FCC

Newsgroup: rec.radio.broadcasting
Date: 1995-01-29 00:33:11 UTC
From: frbspd@crl.com
Message-ID: <3geno7$pbv@vixen.cso.uiuc.edu>
Source record: 35121

Victory for Micro Power Broadcasting - Historical Defeat for the FCC

On Friday, January 20 Federal judge Claudia Wilken refused to grant the Federal Communications Commission a preliminary injunction to stop the micro power broadcasts of Stephen Dunifer and Free Radio Berkeley. Stating serious constitutional concerns as her reason, Judge Wilken denied the request, ordered the FCC to exhaust administrative remedies and to rule on Dunifer's appeal of their $20,000 fine before seeking any further court action. This ruling sets a historical precedent: it is the first time the FCC has been denied an injunction to stop the broadcasts of an unlicensed radio station. The Commission will have to address the issue of the constitutionality of their regulations when ruling on Dunifer's appeal. Any further court proceedings are delayed until the FCC acts on the appeal which has languished in Washington for more than a year. In the meantime the government's attempt to enjoin broadcasting by non- licensed micro radio has been put on hold.

Luke Hiken, attorney for Stephen Dunifer, stated, "This is the second time a Federal court has recognized the constitutional implications of micro radio technology. We hope the FCC will recognize the importance of facilitating the use of this technology for the benefit of the American people instead of denying its existence and obstructing its use."

Speaking on behalf of the National Lawyers Guild Committee on Democratic Communications, Peter Franck commented, "The CDC hopes that the court's refusal to enjoin micro radio is the beginning of a recognition by the country that any hope for democracy depends on free access to the airwaves. Micro power broadcasting has the potential for creating a 'green movement' of low-cost, easy-to-use media. It is as totalitarian to require expensive, hard-to-get licenses for micro radio as it would be to say you can only speak from a soap box if it is made of gold."

Stephen Dunifer said, "Judge Claudia Wilken's decision affirms the validity of our legal position. Further, this victory is a credit to four years of work by the National Lawyers Guild Committee on Democratic Communications and my attorney, Luke Hiken, on behalf of the micro power broadcasting movement. Unlike FCC attorney, David Silberman, I do not see irreparable harm resulting from micro power broadcasting. Instead, I see an immeasurable benefit for all citizens if the micro power broadcast movement prevails. For too long, media access and the tools of communication have been concentrated in the hands of corporate and essentially anti- democratic interests. If any harm results, it will be to those monopoly interests."

For further information contact: Free Radio Berkeley - (510) 644-3779, (510) 464-3041 or Luke Hiken, attorney at law - (415) 705-6460.

sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
|Q22. What is the best radio / antenna to get distant OTR stations?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, FTP sites and WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check the OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville,

N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See the WWW page or FTP site for a list of some of them.

Jim Widner left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775
Fitswilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books
acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to be listed in this database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables
and sound processing units that can dramatically
improve old recordings. Their sound processing unit
runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all
their material at the following site:
ftp.atd.ucar.edu. Log on with the usual anonymous
then, your routine password. head on over to
/pub/dat-heads/ You will find a wealth of info up
there. All the digests to the current day, and mike
faqs, as well as market postings on equipment. Highly
recommendable for anyone to get their feet wet in this
media. Happy taping

Q12. Are there any OTR clubs near me?
|A12. Check the two club listings in the WWW page, and
| leave a note in the OTR Newsletter asking about local clubs for
| your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they

have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mistypopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at my WWW/FTP site.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
A16. Yes, there are two WWW sites, as well as two anonymous FTP addresses and a Gopher. The two WWW sites are independent, and contain different information, but each can be accessed from the other. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting.

(1) My site:

World Wide Web URL:
ftp://ftp.crl.com/users/ro/lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com

directory: users/ro/lgenco

(2) AIRWAVES E-Publishing's Site:

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

| For subscribers without normal FTP access, there is a
| FTP-by-mail server that will automagically send you a copy of the
| latest OTR FAQ. To receive a FAQ, send email in -exactly-
| this format (the case of the file name IS important):
| To: lgenco@crl.com
| Subject: Request otr.faq
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: otr-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: otr-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week,
and are accessible through the WWW pages mentioned above, or from
the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of
the four tracks to record monophonically. Cassettes are generally
fine for portability / ease of use / exchange, but they suffer
from several problems when used as a long-term storage medium. The
Hi-Fi VHS tape is gaining in popularity because of its six-hour
storage capability and relatively robust mechanical construction.

Some subscribers have mentioned TalkingBook tape recorders as a
possible archival method. These recorders operate at 15/16 ips
(half the speed of a standard cassette recorder), and can operate
in 4-track mode, thus giving up to 6 hours of play time on a
standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: I tried Fred's method. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels. Much less tedious than manually holding a cotton swab soaked in tape head lubricant against the tape!]

| Richard Fish <lodeston@bluemarble.net> also left this helpful
| info about an alternative method:

| HYRDROLYZATION is the culprit. The tape material -- the
| backing, or the binder compound used to stick the
| magnetic particles to the plastic backing -- has absorbed
| water from the air. The water molecules actually make
| the tape expand a bit, so it doesn't fit the machined
| tape-guides properly anymore; and they can interfere with
| the lubrication impregnated into the tape; and it is
| theorized they can even interfere with the polished
| smoothness of the tape surface.

| WHY SOME TAPES AND NOT OTHERS? It depends on the
| formulation of the plastic backing and binder. In the
| mid-70's, both 3M (Scotch) and Ampex, the two major tape
| manufacturers, started experimenting with their formulas.
| They thought they were introducing major improvements,
| but instead created a tape much more prone to
| hydrolization than anything had ever been. The problem
| did not show up for years, and the formulas did not get
| corrected until sometime in the mid-80's. Theoretically
| any tape could get hydrolyzed over a long period of time,
| especially if stored in a high-humidity situation, but in
| practice most squeaky tapes were made (roughly speaking)
| between 1975 and 1985.

| WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
| entreprenurially successful producer of radio drama in
| the US today) gave me his formula and I've done it many
| times now and it works:

| Bake the tapes in a convection oven for 8 hours at 130
| degrees Fahrenheit. It is entirely possible to bake a
| tape twice if the first time doesn't do the trick. You
| get about a three-week "window", sez Tom, before the tape
| starts to re-absorb water. So the best deal is to bake
| the tape and immediately make a copy. But if you forget
| to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about restoring antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
| newsgroup, created by Bill Robie. His FAQ may also be found at my
| WWW site.

|Q22. What is the best radio / antenna to get distant OTR stations?
|A22. Several readers have been acclaiming the GE SuperRadio III as an
| excellent choice for picking up distant stations that carry OTR
| programming. Although the tuning dial has notoriously poor
| calibration, the sensitivity and selectivity seem superior to
| other radios. A SuperRadio FAQ is available at my WWW site.

| -Some- readers have had good success with the Select-A-Tenna
| antenna advertised in several magazines. The S-A-T seems to be
| rather directional, and may eliminate off-axis interference. Ham

| Radio magazines sometimes carry information about small loop
| antennas for AM DX-ing.

| Dan Hughes <dhughes@prairienet.org> left this note:

| Several years ago one of the electronic magazines ran
| plans with dimensions and number of turns, etc to build
| one of these antennas. I have built several and I'm no
| mechanic. If you (or anyone else reading this) would
| like a copy of the article and plans, drop me a stamped,
| self-addressed envelope: Dan Hughes, P.O. Box 933,
| Urbana IL 61801.

617. ADMINISTRIVIA: Result: Commercial Posts to rrb

Newsgroup: rec.radio.broadcasting
Date: 1995-01-30 04:12:36 UTC
From: wdp@airwaves.com
Message-ID: <3ghovk$btg@vixen.cso.uiuc.edu>
Source record: 35125

Yet another straw poll completed. Once again, I want to thank everyonew who wrote in expressing an opinion on the idea of modifying the current AIRWAVES/rrb prohibition on commercially-oriented posts.

Eseentially, the group seems to be OK with the idea of relaxing the strict prohibition on any post which is promoting a commercial product.

Here is the results as I distill them......

Posts which are basically informative and descriptive, carry a minimum of hype, are directly of interest to broadcasters or those involved in some way with broadcasting, will be allowed, provided...

1) They are not repeated excessively. Once every couple months seems workable, unless discussion warrants more mention.
2) They are fully attributed, including the poster's full name, position with company, the full Postal address of the company and a voice phone number (Fax also if available).
3) As stated above, the articles should be more informative than sales oriented, and should encourage conversation, not just publicize copy.
4) Are from people who otherwise are part of this forum. We are happy to pass along information if you are a user of the forum. People who just want to dump ad copy here are going to be treated less considerately than those who show an interest in being part of the ensuing discussion.

Still prohibited by charter are...

1) Spams of any kind (multiple posts to entire hierarchies)
2) Unsigned and Unattributed posts.
3) Hype.
4) Posts that sound to me to be scams or scam bait.
5) Begs for funds.
6) Posts that excessively bash competition as part of the argument.
7) Posts that are not directly related to broadcast radio or offspring industries.

Some Poo-Pooed the idea altogether, but the vast majority agree that we shoudl not stop good information simply because it may be from someone who has an interest in the information.

I apprecate the vast numbers of people who expressed their vote-of-confidence in me as the arbiter of such matters. I have tried to be deserving of that trust and I am most pleased at the number of people who have expressed it.

Thank You

Please feel free to contact me further if you have questions

Written January 28, 1995

Even though the fall Kansas City Arbitrons show an increase in rock listening and a decrease for country stations, country still rules the roost with a 24.8% share of the market's 12+ audience.

Still, it's a below-average performance for country stations (11-book average 25.8%) and above average for the market's three rockers (Fall 1994, 17.7; 11-book average 15.9).

While AM powerhouse WDAF retained first place with a 9.2 share, urban contemporary KPRS wins second place with an 8.0 share. That's the best performance for the locally owned station since its record 9.0 share in the Spring 1993 book.

Here are the numbers:

		-------1994--------				-------1993--------				----1992------		
Fmt	Stn	Fall	Sum	Sprg	Wntr	Fall	Summ	Sprg	Wntr	Fall	Summ	Sprg	Avg

K	WHB AM	1.2	0.5	0.4*	1.5	1.7	1.8	1.4	1.5	2.0	1.3		

Format Categories: B (Black), C (Classical), G (Religious), H (Hit Rock), K (Country), N (Nostalgia), O (Oldies), R (AOR or Classic Rock), S (Soft Rock), T (News and/or Talk). A (Alternative, Modern) not listed -- none in KC.

* indicates a format change just before or during this ratings period.

Regarding the top 10 stations:

WDAF(AM) (610, 5 kW-U): Still number one, an amazing performance for an AM music station in this day and age. "61 Country" will start feeling some pressure, however, once the duopoly between country competitors KFKF(FM) and KBEQ(FM) is official.

KPRS(FM) (103.3): "Hot 103 Jamz" with this book. It is also the most consistent ratings performer among Kansas City stations.

KFKF(FM) (94.1): The duopoly is coming just in time for the station that beat WDAF with a double-digit share two years ago. Moreover, KFKF is no longer number one among listeners 25-54.

KCFX(FM) (101.1): Here's the new number-one champ among listeners 25-54. The Christmas Eve format change from classic rock to 70s rock (admittedly a transition more than an abrupt change) should help the station keep the female listeners that were attracted to the station by its coverage of Chiefs football games.

KQRC(FM) (98.9): A healthy dose of modern-rock crossovers along with tunes Beavis and Butt-head would love and a few 70s warhorses such as Led Zeppelin launch this station into first place with listeners 18-34.

KMBZ(AM) (980, 5 kW, DA-N): Bonneville has rejuvenated this station. The market's most solid morning news block, middays with Limbaugh, and afternoon sports talk with Don Fortune (who even makes sports interesting for people otherwise bored with the topic--like me) help KMBZ turn in its best performance over the last 11 books.

KBEQ(FM) (104.3): "Young Country 104" is showing some signs of age. This is its tenth full book in the country format and it's slipping a little bit. This station will soon be in a duopoly with KFKF.

KLTH(FM) (99.7): "Lite 99.7" will always have an audience as long as dentists have offices. This book is flat compared to summer and past performances.

KYYS(FM) (102.1): The warhorse turns in a surprise, picking itself up from flat spring and summer books, and up from last fall. It may even benefit from the KCFX change to a restricted 70s playlist. "KY-102" now shows some signs of life on the air with somewhat broadened playlist, bucking the market trend toward narrow playlists with heavy repetition.

KCMO-FM (94.9): "Oldies 95" is slipping a little bit and should expect even more pressure from the KCFX shift. An hour of "The Seventies at Seven" may not be enough for some listeners.

Regarding other stations:

KKCJ(FM) (106.5): The young country station turns in its best
performance in two years. Problem is, it's in a duopoly with KFKF that
expires next month. So far there's no indication of a change, but something
will have to happen: KFKF is getting hitched with KBEQ.

KISF(FM) (107.3): No wonder the station
flipped to what I call "MHR" (Modern Hit Radio) earlier this month. It was
the station's weakest performance in eight books.

KBEQ(AM) (1030, 1 kW-D, 500 W-N, DA-2): The People's Radio Network
beat out a locally programmed talk station, KNHN, in the talk field.
It could be that listeners were looking for an alternative to the steady
extremist-hard-right drumbeat on KNHN (or the fluff on KCMO(AM)).

One other note:

The Pitch Weekly's "Best of Kansas City" issue, as judged by
reader votes, came up with KMBZ as the best AM station and KLZR(FM) as
the best FM station. Pertinent quote about the Lawrence, Kansas
station:

>> It says a lot when the best KC radio station is sequestered in
>> Lawrence. Despite a signal that just barely reaches here,
>> listeners of modern college-oriented rock have been seeking out
>> this quality station in droves.

Then how come it never shows up in the ARBs?

According to the Pitch's readers' poll, the best radio talk show
was "Heart to Heart" on community-access KKFI(FM). The psychic who hosts
the show, Sapphira, told the alternative newspaper, "I knew it was going to
happen!"

KNIX(102.5) has announced it will keep John Michaels, Bobby Lewis and Carolyn Coffey in its morning drive show. AM Drive has been in turmoil since W. Steven Martin was moved to middays after 17 years as wake-up host. His replacements, Hawk Harrison and Marty Hunter, lasted only six months. KNIX asked Martin to move back to AM Drive...he declined. Michaels and Lewis were moved in from afternoons to cover while the search was made for talent. The station says listener response convinced them to stay with Michaels and Lewis. KNIX reclaimed its #1 12+ and 25-54 rankings in the fall book after falling to #2 in the summer.

I don't ever recall seeing or hearing the call sign KFWB in any Warner Bros. cartoon, but I do remember seeing the letters "WFWB" on a radio mike in a 1930s B&W baseball cartton made by Warner Bros. Does anyone know if Warner ever really owned a radio station called WFWB?

623. Duopoly run amuck in Dallas/Ft.Worth

Over the past few months, Heftel broadcasting in cooperation with Rodriguez broadcasting has been buying or LMA-ing stations like crazy here.
They have done so many deals recently that it is hard to keep track of who owns what.
Get this:

Rodriguez has owned KESS-AM and KLTY-FM for many years. KESS is spanish. KLTY is a christian contemporary station and is his only non-spanish language station. Rodriguez then did an LMA on KMRT-AM 1480 with a tejano format. Then Heftel came on the scene and did some sort of deal with Rodriguez where they own non-voting stock or something and Rodriguez became president of Heftel Texas. Heftel Texas then bought KAND-FM 107.9 in Corsicana and KDNT-AM 1440 in Denton...I think. They then changed KAND/KDNT to KICI-AM-FM and called it "kick-Tejano Hits." In early December, Rodriguez bought KDZR-FM 99.1 (z-rock). Then a few weeks later transferred that sale to Heftel. Last week it was announced that Heftel was buying big band formatted KCYT-FM 106.7. Tonight on the news I saw an article that said that Heftel was going to simulcast the "Kick-Tejano Hits" format on 99.1,106.7, and 107.9. In addition to all of this, Heftel or Rodriguez has a CP for a class C2 FM in Gainesville, TX....about 50 miles north of Dallas...they have applied to modify that to a higher power and antenna and to lower the power of their class C 107.9 in Corsicana.

Confusing? you bet. Has anyone ever heard of a single format being simulcast on three different FM's in a market? I have heard of several 2 FM formats like this in Atlanta etc..but not three. I should note that 107.9 is in Corsicana ..about 45 miles south of the D-FW area...99.1 is in Denton..about 30 miles north of D-FW...and 106.7 is in Granbury..about 40 miles southwest of D-FW. 99.1 covers D-FW pretty well...but falls off pretty good in the areas where 107.9 and 106.7 start to come in loud and clear.

Comments?

: Ratings for the nation's 42nd largest radio market, Hartford CT

... should be taken with a whole lick of salt.

Having just pored over the book, it must be pointed out that since the book began, the stir-frying of this over-radioed market has continued on a grand scale. WZMX dropped its "Mix" (standard formula) format for the wall-to-wall '70's that precedes the introduction of the "Arrow" format. WYSR (FM) continued its change to an ill-defined, short-playlist "new music" station, in duopoly with AOR WHCN, which is also going through "adjustments."

Reasonably stable through the book: WTIC AM/FM, WDRC-FM, WWYZ (FM), WRCH (FM).

All the other players were playing. Buying in this market is a seat-of-the-pants proposition at this point, and may well be for the next couple of books as this town, now full of duopolies, continues to find itself.

Our radio-station uses ISDN links from location to our broadcast studio.

I'm a reporter.

My return-signal is the normal radio signal (transistor or car-stereo)

Now my problem is: There's a 0.75 sec. delay between the location (me) and the broadcaststudio (where our news anchorman is situated.)

So: crosstalk is sligtly frustrated.

Somebody please help me to get rid of this delay.

we need a ISDN (or simular) connection.
But we want to get rid of this delay. Without losing the broadcast quality

From: transvox@interstate.net
Message-ID: <3ghp08$bul@vixen.cso.uiuc.edu>
Source record: 35141

Written January 28, 1995

While KMOX continues its tradition of market leadership, heritage album rocker KSHE snapped up second place in the St. Louis fall ratings.

Country WIL-FM, which had been number two in the summer book, fell to fourth place this time out. Country competitor WKKX(FM) also fell, indicating that the trend away from country, evident in the cross-state Kansas City market in the fall book also held true in St. Louis.

The numbers, please:

Station Fall 1994 Summer 1994 Fall 1993 Notes
KMOX 14.9 14.9 13.0 CBS clear-channel
KSHE 7.9 7.9 7.8 new morning show
KMJM 7.7 7.8 6.9 longtime urban contemporary leader
WIL 7.2 9.1 11.0 ouch!
KEZK 6.5 6.5 6.8 "lite" AC
KYKY 4.9 5.2 5.1 heavy AC
KIHT 4.5 5.6 2.3 70s oldies slipping a bit
WKBQ-FM 3.7 3.4 4.5 downgraded power in 1994
KLOU 3.4 3.2 3.5 reemphasizing oldies image
KFUO-FM 3.1 1.9 2.4 great classical station,
but EEO license renewal problems!
KPNT 2.9 2.5 2.3 modern rock rimshot
WKKX 2.9 3.6 3.0 swapping with WKBQ's frequency
didn't help after all
KSD-FM 2.8 3.6 4.7 classic rock, great personalities,
stagnant playlist
WRTH 2.6 3.2 2.7 now facing KSD(AM) competition
for adult standards audience
WEW 2.2 1.0 1.4 what?? This is a daytimer!
KNJZ 2.1 1.4 0.7 light jazz, Alton rimshot
KXOK 2.0 2.1 2.1 FM, has signal problems
WVRV 1.9 1.3 1.4 AOR format adjustments, poor signal
WIBV 1.6 1.3 1.7 only alternative to KMOX, alas
KATZ 1.4 1.5 2.2

634. RE: WOWO, The Saga Continues.....

Newsgroup: rec.radio.broadcasting
Date: 1995-01-30 04:55:51 UTC
From: pgeorge@sallie.wellesley.edu
Message-ID: <3ghrgn$i2u@vixen.cso.uiuc.edu>
Source record: 35142

One more time and one time only.....
Radio Station WOWO in Fort Wayne, Indiana is licensed to Fort Wayne.....
granted. However Mr. Honsburger of Pittsburgh, PA., who happens to work
at CLEAR CHANNEL KDKA says that WOWO is licensed to only serve Fort Wayne..
period. Nothing could be farther than the truth. WOWO is a REGIONAL station
that serves three states 24 hours a day with its' groundwave signal. At night
that signal reaches 28 states and 5 Canadian Provinces with a solid skywave]signal. It has
been doing so now for over 45 years out of its' 70 year existance.
Mr. Honsburger has the notion that the coverage area ends at the City line.
Well, if this travesty of a powerdown were to happen...that is all that WOWO
will cover. And, believe it or not if the 9800 watt signal were to commence,
half of Fort Wayne will be out of the City Grade of WOWO as their transmitter
is located 20 miles southwest of Fort Wayne. Somuch for serving the public
interest, convenience and necessity. WOWO's main coverage area includes
Indiana, Southwestern Michigan and Northwest Ohio. To many in those areas,
WOWO is THE ONLY station that provides efficient EBS coverage to those three
areas that I have mentioned. If you have a chance to look at the WOWO Public
File, you will find a letter of gratitude from the School Board of Defiance
Ohio...thanking WOWO for providing school closings and from the local power
utility who thanked WOWO for getting the word out to their customers. This
was not in Fort Wayne, but in Central Ohio....some 100 miles away. These same
people will not be able to access WOWO's signal in the evening hours as WLIB
will grace their radio dials along with several other stations vying for
dominance on the channel. Is this SERVING THE PUBLIC INTEREST....I THINK NOT !!
And by the way Mr. Honsburger, WLIB has had ample time to get a fulltime
assignment with at least 10 fulltime stations, including WNEW/1130, WNBC/660
and many more stations up for sale. Not to mention the applications to change
frequency and city of license to Yonkers, NY. All of the examples mentioned
above were within the past 10 years. If they were so deadset to have a full-
time assignment...why did they wait til now. Keep in mind, Inner City is
in the list of the 20 most profitable group owners in the country....which
simply says that they "want for no money". Buying a WNBC or a WNEW would
be like a drop in the bucket.

Granted, this is a money making business. But there is something in the
Communications Act that broadcasting has an OBLIGATION to serve the
"PUBLIC INTEREST, CONVENIENCE AND NECESSITY....AT ALL TIMES". Money is
still considered secondary. You would never know it to look at it, now.
Keep that in mind, the next time you put such tripe on a BBS. Fort Wayne
is only one of the many communities that depend on WOWO's service. AGAIN,
I believe that WLIB should get night service to New York and surrounding
communities. Killing WOWO is NOT the answer. This potential powerdown
will have lasting consequences for those who enjoy WOWO and other Clear
Channel stations. Once one goes, they all go. Once it it done, there is

no turning back. Talk to me in a few years and you will know that YOU were wrong.

The WOWO Listeners' Guild which to thank all who have contacted us, whether it be via internet, letter or phone. And for those of you who have not sent in your comments...please do so now to the Commission. We have done our part, now it is up to you and the FCC. We hope that the FCC will make the RIGHT decision for all parties concerned. God willing, that goal canl be achieved.

I believe it was E.J. Montini who wrote in an Arizona Republic column, "Rush Limbaugh eating up talk radio." And, he (Montini) is right.

Talk radio is pathetic. Same predictable conservative arguments, same predictable conservative topics. The only difference betweeen Limbaugh and local talk show hosts is geographical distances. Tom Leykis is the only halfway-decent talk radio host around today, and it's a shame the beer baron cancelled the show. Phoenix's loss.

rrb@clm.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) writes:

>It is just another step in taking control out of the hands of the
>end-user, and placing that control in the 'hands' of the devices
>software. Once you could fiddle with an automobile's carb,
>distributor and other things to get a stalled car moving. Now all of
>that is out of the control of the user. If your car breaks, you have
>to hook up a terminal (only at the dealer) to determine which $150
>sensor has broken.

This is a disturbing trend and has profound implications. Ours is the last generation that will be able to build a working radio in their basements. Once DAB supplants AM/FM as the standard method of broadcasting, no one but Ph.D.-level engineers will be able to understand how the radios in their daily lives work.

Yes, our children will be able to _assemble_ a radio by plugging some chips together and hooking up a battery, but this is not at all the same as building a radio from vacuum tubes, transistors, capacitors, resistors, and other components whose operating principles are easily understood.

Soon, the technology of everyday life will become so advanced that most people, having no idea how it works, will come to see it as a kind of magic, and they will stand open mouthed and gape in wonder at its wizardry.

637. One For The Book!

For the past couple of years I have been doing Saturday talk shows on a couple of our Santa Barbara, CA stations and was asked to develop a daily show when Morton Downey, Jr. dropped out Sept. 1 last. I went on the air that day and the Arbitron book opened a couple of weeks later. My deal was a kind of, "Let's try this... You're new to daily broadcasting, etc. We'll talk after the book." It closed in December and the numbers ran as follows "Morning Magazine (local) 0.5, Pat Buchanan, 2.0, Alan Colmes 2.2, my show 2.2, Tom Leykis 1.1." Wowzos! Given the way the Arbitron is done: With my starting new in September my actual, end of December number could be a 4.4 given a "0" start! I thought the GM would be hot to expand my show and I went to the table to negotiate a better deal. Get ready for his response:

"I think the audience thinks Tom Leykis is on KTMS! (the other station)" In other words everybody marks the books correctly until 3:00 PM and then their brains go dead! And, during this same week I find that several potential advertisers have come in the door, met with our top ad saleslady, expressed a desire to spend perhaps $300 per month on my show, but were told, "Oh, that's not the way it works. You have to buy a $1,500 per month package to get on Adrian's show!." As an example, one guy has a five employee painting service. Is radio the only business where the customer is always wrong? Tell me, please tell me.

Adrian Vance, producer and host of "Santa Barbara Voices" formerly with KQSB Santa Barbara, California, quitting in disgust to return to the reality of writing and business.

: People do read r.r.b, it's good to know, and one of them is Vic Bremer of
: Minnesota Public Radio. He dropped me an e-mail informing me that 93% of
: Corporation for Public Broadcasting (CPB) money goes to local stations.

Yes, this is true, but as usual it's not the *whole* story. This CPB money comes with strings attached: it must be used on programming, not on staff salaries, buying a new stereo exciter, or other things not directly related to the programming budget. So, for most stations, this CPB money comes in and it goes right out the door in NPR (and to a lesser extent PRI) programming. If NPR's fees go up, so does CPB; if they go down, so does CPB. If anything, CPB's demise would force local public stations to get their programming somewhere else. I'm certain that the BBC and CBC are anxious to take up that programming void, which is likely why the BBC has a fulltime media relations contact for American stations carrying their programming.

G105 is a Durham station. They reach into the Greensboro ADI (as do stations from Roanoke, Charlotte, et al), but are not a 'player' here. They may show up under the line, but they are not a force. It might stand for Durham/Chapel Hill/Greensboro, but it might also stand for 'Don't Consume Garbage'.

<<...Boston's answer to Rush Limbaugh...>>

Not hardly. David Brudnoy couldn't shine Rush's shoes, because
David will actually talk to people who disagree with him.
David was around, and, his life expectancy notwithstanding,
will be around long after Rush's luster has worn off.

Also, David's politics can best be described as libertarian,
which places him in a different category altogether from Rush.

I agree with your assessment of FCC intent and use of fees. One way to assure that the fees will not be used to increase FCC staffing levels is for the Congress to set or lower the current FCC personnel ceiling. They probably will cut the FCC budget in any event. My experience as Director of Congressional & Public Affairs at FCC and since would clearly indicate that these objections would be listened to if enough people were to contact their Congressmen and Senators and the Chairman of the House and Senate Telecommunications Subcommittees. They have already heard horror stories from industry, but only from large corporations. It would have a great deal of positive impact to hear from smaller companies, particularly radio stations.

From: jlsoko@io.org
Message-ID: <3ghrh3$i44@vixen.cso.uiuc.edu>
Source record: 35053

I hope someone can help me with a technical problem I have pulling in distant signals with my G.E. Superadio II.

I live in a house in the Toronto area. Across the street from me (which is in a northerly direction) is a large open area with no possible forms of interference. With no antenna in use, I am able to pick up many of the distant AM signals of the large 50,000 broadcasters (WFAN, WABC, WBBM, etc...) very clearly and with no fade out in the signal. On clear cool evenings, I can pick up weaker signals from some of the smaller stations, but I usually get the same ones and they are not farther away than Western Pennsylvania (i.e. McKeesport or Pittsburgh).

I read a lot in this group about people using there G.E. Superadio II's to pick up very distant stations by using an antenna. I know location and proximity to open spaces plays a key role and I feel my location meets all the criteria. What I would like to find out if there is a very inexpensive indoor antenna ($50 or less) that can be purchased at a Radio Shack or other electronic store, that would greatly improve my chances of picking up AM on my Superadio from more distant locals (other U.S. or Canadian stations or even some European ones!)?

I have been AM DX'ing for about 6 years with my Superadio and in that time nobody has been able to recommend a good indoor antenna to use. A friend of mine once picked up Utah on a standard AM radio from the Toronto area without an antenna, so I am quite sure my Superadio can work wonders once I get the right equipment

All suggestions are welcome. I greatly appreciate any information I can get!

Thanks

Jody Sokoloff

Henry Gladstone, who spent 35 years as a radio news anchor at WOR in New York, died last week of heart failure. He was 83.

Gladstone joined WOR in 1942 and worked there until his retirement in 1977. He anchored several of the station's 15-minute news-on-the-hour broadcasts and covered the United Nations. He also served as a narrator for the "March of Time" newsreels during the second world war.

Gladstone graduated from the University of Toronto and pursued a career in acting before turning to radio. In the 1930's he appeared in several Off Broadway productions. He later worked in Boston radio and then as a staff announcer at WHN in New York before joining WOR.

He died last Sunday in San Diego, where he moved after retirement. He is survived by a daughter and three sons.

647. Greensboro / Winston-Salem Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1995-01-30 04:56:07 UTC
From: triadradio@aol.com
Message-ID: <3ghrh7$i4k@vixen.cso.uiuc.edu>
Source record: 35055

Greensboro / Winston-Salem / High Point Radio Watch:

----> The biggest news in this market is the explosive growth of WXRA-FM (The Rock Alternative), taking a somewhat palsied country signal to market dominance in less than four months. WXRA now posts a 12+ rating of 7.1, #2 in the market behind sister station WTQR-FM (12+ 14.2). Breakouts of audience composition show this station is strongest 18-44, with a positively colossal dominance of Adults 25-34. 18-34 share was 15.1, the largest share of this audience by far. WTQR comes in at #2 with a 10.8. Media Audit shows average age of approx. 30, with average household income approaching $47k. This station is for real.

----> WTQR slips slightly, though it seems this is normal fluctuation. I have not seen cume duplication numbers for them and new competitor WKSI, though there seems to be enough different between these two stations that the duplication should not be too high. WTQR continues to be the dominant station in this market, owning all demos except 18-34 (WXRA's domain, now). The morning team of Big Paul & Aunt Eloise still dominates AM Drive, scoring a 16.3 share 12+ and cuming 172,000, more than doubling the share and cume of #2 WMAG-FM (Lite AC).

----> WMAG scores impressive gains, putting the kabosh on WKZL-FM (Hot AC) and advancing to #4 12+ with a 6.7 share. WMAG continues to skew older and female, a position long-owned by WTQR. This ratings gain has been attributed to a large promotional budget (for a change) and the discontinuation of WKZL's popular Birthday Contest. WMAG is trying to re-establish a saleable position after a steady downward slide from previous glory. What will be most interesting to see is the attitude they take toward continuing promotion.

----> WKRR-FM (Classic Rock) took a significant hit in this book, barely making the Top 5 12+. The presence of WXRA, creating another rock signal in a market which for a long while had none, has done damage to them in all demos. The 18-34 dominance of WXRA hurts WKRR in both 18-34 & 25-54. Their 9.9 share 18-34 pales in comparison. In fact WXRA leads them by a full point n 25-54 (their former selling demo).

----> WKZL-FM (Hot AC) takes a dip with the discontinuation of their popular Birthday Contest. WMAG's strong promotional push also seems to have something to do with this. Some thought the Hot AC would pick up the leavings of CHR WKSI-FM's going to country, but if this is the case it does not seem to have made any significant difference either way. They still lost points, clocking in at #6 12+ with a 5.2 share.

----> WFXF-FM (Classic Rock) is hapless. After the initial musings about putting a new classic rock station in a market with an already-strong

classic rock station, there seems to be little interest in 'The Fox' either from listeners or advertisers. This station did not place in the Top 10 12+, and just made it into the Top 10 25-54 with a 3.5 share, a loss from their former AC format. Those who monitor this station report some hours with no inventory. One must wonder: if they actually HAD advertising, would their ratings go down? It's an interesting idea, this public service station, but they are going to need to at least pay for all of the Bob Seeger & Bread CDs they had to buy for the format change. One is left to wonder how this station is going to recover.

----> WKSI-FM's switch to country from CHR surprised no-one, least of all market giant WTQR. While their ratings have gone up, it's difficult to attribute this to the new format, given that they switched a month or so into the Fall survey. Their #10 performance 12+ leaves something to be desired, though. A 4.5 share against WTQR's 14.2 isn't going to make hay.

----> WJMH-FM (Contemporary Urban) performed better this time around, clocking in at #3 12+ with an impressive 6.9 share. Competitor WQMG-FM (also urban) came in with a #7 4.9 12+, hardly making WJMH quake with fear. WJMH grew well, possibly benefitting from the format change at WKSI (their audience is now 26% white).

----> WSJS-AM (news/talk) scored well with a #8 12+ share of 4.9. The news here is their #4 5.6 share 35-64. WSJS continues to own older, more affluent listeners. With an average listener hosuehold income over $50k, they are well-positioned to keep their grip on the Triad's affluent listeners.

All in all it's been an interesting book in this market. More to follow.

: listening to rock on 910? Far back as I can recall (and I've been an AM
: DXer since 1959), 910 in Oakland has been country or something else....

At the time I listened to rock on 910, the station was KEWB, owned by Crowell Collier Broadcasting (who made their mark in publishing magazines and encyclopedias). ("If it's a hit, you'll it first exclusiveleeeeee, on K-E-W-B you'll hear hit first.") KEWB, and sisters KFWB in Los Angeles and KDWB (in Minneapolis was it?) were pretty hot there for a few years, certainly in my rock-formative years. It was also the radio home of *the* Michael Jackson, who did the first daily talk show in this market, from midnight to 6:00am 5 nights a week. This was early to mid 1960s.

The heterodyne whine was most pronounced. Just a moment ago I tuned to their successor, KNEW, and did not hear a whine. Perhaps the IF is not 455 on this radio either.

> points out of the debate...

Horseshit. I'm trying to cut through the Rush Limblubber that permeates what little meaningful nonideological debate there has been on this subject. All the ideological discussion has been overdone, with enough hidden agendas to run a thousand city planning and zoning commission meetings.

> Let's distill the argument further: should we de-fund WWV/WWVH/WWVB? If
> we're going to privatize the Weather Service, why not privatize the NIST?

Re-read what I wrote. I did NOT ask whether the National Weather Service should be privatized. I DID ask whether there was a comparison with the National Weather Service's NETWORK of radio stations. There is a difference. The hypothetical question is whether the NETWORK of radio stations should be privatized.

Prefabricated conclusions annoy me.

All true, no doubt, but try picking up KGO in Denver or Albuquerque. You probably picked it up in Hawaii because there aren't any other 810s in that are of the world. But KGO has a distinctly north/south pattern -- which is fine, since most of the population along the western states and provinces is concentrated along the rim states, BC Canada, and BC Mexico.

Your opinion please!
I'm a media consultant writing a piece for managers of News/Talk radio stations. If you'll take just a moment to email me your responses to four quick questions below, I will incorporate your feedback into my recommendations to Talk radio's powers-that-be.
Note: Consider your responses anonymous. I'm looking for trends, and won't attribute your comments to you by screen name or in any other way. You needn't even mention which stations you listen to...although you may if you choose to.
THANKS in advance! And when you e-mail your responses back to me, please indicate if you'd like to receive a copy of the finished piece, which I'll be glad to email back to you.
(Email back to cookeh@aol.com.)

Question 1. OTHER THAN the Rush Limbaugh show, what do you like best about the radio station Rush is on?

Question 2. What do you like LEAST about the station Rush is on?

Question 3. Is Rush on the station you listen to most?

And finally...

Question 4. Regarding ANOTHER radio station you also listen to: What do like best about that OTHER station?

THANKS again!

Please reply directly via email

>From: bigsteve@dorsai.org (Steve_Coletti) writes:

>I'm talking local "origination", not local "content".

But from the listener's point of view it is the content that matters, not the location of the studios. I've worked at stations with local announcers that sounded entirely as generic and bland as satellite signals. Sometimes they didn't even pronounce local names right. They played Los Angeles-produced music, talked with generic accents and had little to say of any relevance to the locals. They might as well have been broadcasting from the moon.

Have you ever wondered why popular music is the same in Boston as in St. Louis or San Francisco? Radio tends to reflect what listeners want; apparently thay want Madonna or the Beatles or Garth Brooks as much in New York as in New Mexico or New Hampshire. While listening to a music call-in show on the BBC World Service a couple of years ago I was amazed to hear callers from Nigeria and Cameroon asking for Michael Jackson songs.

The really strange thing about this is that the technology of musical recording and editing is getting cheaper with each passing month. Why don't we see a blossoming of local bands and regional hit records? When that happens, will we not see local radio re-emerge as well?

>So you're at WGBH, I assume. Fine, it plugs into NPR right?

I work for WCRB ("Classical Radio Boston"), not WGBH. I always find it strange that people think of WGBH when they think of classical music and Boston radio because some 75% of WGBH's programming is non-classical. WCRB is the only all-classical station that can be heard in the city of Boston. In terms of classical content, WGBH doesn't even deserve second place, as WHRB (95.3) plays eight hours of classical a day to WGBH's six.

>OK, Silver-King is just as guilty as Family Radio for wasteing air space
>for national drivel

But TV broadcasters have an excuse: television programming is incredibly expensive to produce compared to radio. Most TV stations produce locally only one or two newscasts a day and a few commercials; everything else comes off the network. I doubt any local station has the money to do something like _Star Trek_ or even _The Simpsons_.

Family Radio has no such excuse. They produce a cheap product that could be made as easily in Little Rock as in Oakland; indeed there must be hundreds of religious radio programs coming from the most improbable places. What mystifies me is this: there's no audience demand for this product in most places. It's not good for business. It has no scientific, literary or

artistic value. The only reason it's on is that somebody with a lot of money thinks it is good for his soul. Surely, in a country where the airwaves are a valuable public resource that could be used to bring people together and build healthy communities, we can find better trustees of our radio spectrum than the likes of Family Radio, no?

Also in reply to all of this voice over stuff...you need to know several things going in. This is a tough line of work. You can spend months not working, then get a few projects in a row aht pay very little, then have more months of not working.

I have been fortunate enough to work fairly steadily in non-union spots. In Chicago, there is a fair amount of both union and non-union work. Depending on your city location, it is easy enough to get plugged into the pipeline. If you can find an agent who will represent your work on a commission basis, you'll have a good start. That way you'll know where to audition, and when.

Additionally, you must be good. Talent is the key, as Jay said in the previous message, not price. In Chicago, about a dozen people who are really good, get about 90 percent of the business...the rest of us fight it out for the remaining 10 percent. Since I make fairly good money on my share of the 10 percent, I can only imagine what these other guys are getting.

But take the time to hone your skills...read different styles of material if you can...and learn how to take and re-take the same copy. Good luck.

Happenings in the #40 market:

First,on the Canadian side:

*CHOW(1470,Welland;satellite country)has been sold from Wellport Broadcasting Limited to Coultis Broadcasting(headed by Doug Setterington), who own CHSC(1220,St.Catharines;format???)for $550,000. CHOW hasn't been profitable for the past three years preceding the application with the CRTC. The problem is,neither is CHSC.

*Telemedia,owners of CJCL(sports;The Fan 1430)and CKYC(country;Country 59), will move the sports format on 1430 down to 590 to become The Fan 590 as of Monday(2/6). Also,John Derringer(ex-CHOM,Montreal)will become the new AM driver, replacing Bob McCown. What will happen to the "Badger" isn't known,nor what 1430's new format will be. The CRTC denied CJCL's sale to Cremizio(who wanted to take it ethnic)and has given Telemedia 1 year to find a suitable buyer. The move down to 590 wil definitely improve the chances of getting The Fan down in WNY(these days,I can barely pick it up). Country 59 is still country when I heard it yesterday,but it is running promos noting the change.

*CFNY(102.1,modern rock)has apparently chosen a new GM-but isn't saying who just yet. Current staff and format will apparently not change.

*CJEZ(Z97.3,classic hits)AM driver Tom Rivers still has a sense of humor. Writing in Broadcast & Technology magazine a few weeks ago about rumors at 'JEZ,he said that he's heard that the station would be switching formats,ranging from "dance/rap to AC/folk to rock/sports talk"-noting that they all say they're straight from the top. He adds,"To be totally honest I don't have a clue as (to) my future here",nor that of its staffers. But,he's still holding what he terms:"THE TOM RIVERS GARAGE SALE!",offering himself (described as "acquired a lot of miles,but is still quite the performer")and a morning show consultant("priced according to size and your promixity to great fishing").

Now,back across the border...

*WBNY(91.3,alternative/various)has repositioned itself as "Buffalo's Original Alternative." Also of note:next Monday(2/6)they will run a Perception vs. Reality special on the O.J.Simpson case,based on a poll of students taken that day.(And,that will be my _last_ comment on anything named O.J. that one doesn't drink.)

TTYL...

C.K.G.

(On diets and reluctance to gain weight):

Cmdr.Susan Ivanova:Figures. All my life I've fought against imperialism. Now, suddenly,I _am_ the expanding Russian frontier.

Dr.Stephen Franklin:But with very nice borders.

Here are the 12+ figures in the Fall 1994 survey in the Albany/
Schenectady/Troy, NY market.

1. WGNA (107.7/1460) Country(Simulcast) 12.2
2. WFLY (92.3) Top 40 8.9
3. WYJB (95.5) Light Rock/AC 8.2
4. WGY (810) News/Talk 8.1
5. WPYX (106.7) AOR 7.3
WRVE (99.5) Classic Rock 7.3
7. WKLI (100.9) AC 5.1
8. WABY (1400) Middle of the road 3.9
9. WQBK-FM/WQBJ (103.9/103.5) Classic Rock 3.6
10. WZRQ (102.3) AOR 2.5
11. WQBK-AM (1300) News/Talk/Sports 2.3
12. WTRY-FM (98.3) Oldies/'70s(Satellite) 1.8*
13. WTRY-AM (980) Oldies 1.5
14. WXLE (104.5) Progressive Rock 1.4
15. WEMX (94.5) AC(Satellite) 1.3
WEQX (102.7) Album Rock 1.3
17. WJKE (101.3) AC 1.0
WWCP (96.7) Modern(WDRE) 1.0
19. WBUG (101.1) Country 0.9
WROW (590) News (AP Network) 0.9
21. WCDA (96.3) Country 0.8
22. WHRL (103.1) Lite Jazz 0.7
23. WPTR (1540) Talk/Sports 0.5
24. WJIV (101.9) Christian 0.3

*- WTRY-FM simulcasted with AM until 11/16; then changed to '70s on the
STAR format

More numbers and analysis to follow in a couple days...

Monday's editions of the Arizona Republic report that KESZ(99.9) Noon-4PM Personality Carla Foxx is moving to KZRX(100.3)as Program Director effective Monday, February 13. Foxx has been at the AC station for several years. KZRX is currently a Z-Rock station...but writer Julie Newburg cites the rumor mill as saying that Foxx is being brought in to launch a "young talk" format...with Howard Stern in mornings.

665. RadioWatcher On The Road: Sacramento/San Francisco

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:14:20 UTC
From: fybush@world.std.com
Message-ID: <3gmn9c$h4o@vixen.cso.uiuc.edu>
Source record: 35073

My most recent traveling took me through Sacramento and San Francisco, and since much of the trip was non-radio-related (a wedding in Sacramento), the radio parts will be relatively brief, I hope:

The trip started in Sacramento, a few days after the drastic flooding that affected many areas north and east of the capital. The floods took something of a toll on local radio. A TV news report showed one of the three towers of KRCX-1110 in Roseville, which had to be demolished because it buckled in the storms. KRCX is apparently operating from the other two sticks, and KRXQ-93.7 remains on the air from the top of one of those two. KXOA-FM 107.9, which is on a stick in Elverta, about 10 miles north of Sacramento near the heavily-flooded Rio Linda area, was forced to use a backup transmitter for a while. When it came back on at full power on January 15th, the station's electronic billboards proudly proclaimed the fact. And two AM stations, KSQR-1240 and KXOA-1470, have their transmitters in the flood plain of the American River just north of downtown. The sticks are built on sticks...and kept going through the worst of it.

The only studio visit I made in Sacramento was to KFBK-1530 and sister FM KGBY-92.5, in a very nice facility near the Arden Fair Mall. KGBY's transmitter is also in the Elverta area, a short distance from KXOA-FM. I also made it down to the Walnut Grove area, about 20 miles south of Sacramento. That's where transmitters for all of Sacramento's TV stations are located....all on 2000-plus foot guyed towers. KCRA-3 has its own stick at the north end of the farm, adjacent to the tower of KTXL-40. KXTV-10 and KOVR-13 share another 2000-footer (the tallest candelabra tower in the US, I'm told) a mile or so to the south. And the older, 1500-foot candelabra that used to hold 3, 10, and 13 has become something of a local landmark -- it's featured on the back of the local fire department's T-shirts! Walnut Creek was also far enough south to allow me to get airchecks of Stockton's KWG, KJOY, and KJAX, Lodi's KWIN, Patterson's KOSO, Oakdale's KDJK, and Modesto's KATD and KHOP. The latter two have mammoth FM signals...I heard them up north as far as Auburn, and west all the way to the San Francisco Bay.

A trip up into Gold Country offered a chance to see more FM sticks, in the Sierra foothills along US-50 in Folsom. KRAK-98.5 is just north of 50, while KQPT-100.5, KWOD-106.5, and KNCI-105.1 are just south.

Of course there was plenty of airchecking, including unscoped sides or half-sides of the major stations and some of the minors. KQPT "The Point" stood out for a well-executed AAA format. Of note was a lot of duplication of formats. KQBR-104.3 "The Breeze" (licensed to Davis) is fighting with KSSJ-101.9 (licensed to Shingle Springs) for the smooth jazz audience. KRAK-98.5 and co-owned KNCI-105.1 were nearly indistinguishable, with both using some variant of "Hot New Country" (actually, KRAK is "Hot New KRAK" and KNCI is "New Country 105.1.") KNCI seemed a bit more personality-driven than KRAK. Each station has its own audiotex info line and its own listener club...go figure. KSEG-96.9 "The Eagle" (classic rock) competes with KXOA-FM 107.9 "Arrow" (Arrow) for that audience. KYMX-96.1 "Mix" and KGBY-92.5 "Y92" slug it out for the adult-contemporary crowd. And KFBK, KSTE-650 (licensed Rancho Cordova), and KHTK-1140 "Hot Talk" divide the news-talk pie, although KFBK seems to get most of the listenership.

After Sacramento, it was on to San Francisco. The only station visit here was to KPIX, which was TV only the last time I was there, but which now includes the former KKHI-AM/FM, now KPIX-AM/FM. The radio side is very well equipped...all-digital (albeit with a few bugs to work out still). The format is simulcast long-form all-news during the day, jazz-flavored AC nights and weekends. It's still being invented as they go, more than 6 months after sign-on.

The airchecks were rolling there as well...partly to grab stations that were new since my Nov. '93 trip (KYCY, KOME's new format, the wonderful AM stereo KKSJ San Jose, the new KKHI San Rafael, KZSF), partly to get more unscoped from the other FMs.

And of course then it was time -- all too soon -- to fly back East to Boston.

I'll post a complete list of airchecks separately. I'm happy to trade for a sampling of what's on the air in your market -- email me and we'll work something out!

My complete, updated aircheck list is not yet in electronic form (someday soon...:-), but it can be yours for an SASE. Email me for details.

From: mikedow@gate.net
Message-ID: <3gmn9g$h5g@vixen.cso.uiuc.edu>
Source record: 35075

: Having just pored over the book, it must be pointed out that since the
: book began, the stir-frying of this over-radioed market has continued on
: a grand scale. WZMX dropped its "Mix" (standard formula) format for the
: wall-to-wall '70's that precedes the introduction of the "Arrow" format.
: WYSR (FM) continued its change to an ill-defined, short-playlist "new
: music" station, in duopoly with AOR WHCN, which is also going through
: "adjustments."

But you have to admit that radio in the land'o'steady habits has
improved in the last few months. I return to Connecticut for a week
every Christmas. I remember leaving Bradley airport and hearing the
Pointer Sisters three times before I reached the Hartford city limits!
WYSR isn't a format I'd listen to, but they are the most
refreshing thing on the dial. Finally, somebody is listening and
providing what the market wants. Nobody else is playing alternative
music in Connecticut. One station finally woke up.
Here in South Florida, an out-of-market low power upgraded and
ran Z-Rock. They're instantly number one in teens and 18-24. Look for
the WYSR to be in the top three 18-24 BY THEIR NEXT BOOK!
I'm ashamed to admit that I listen to the "seventies station" out
of Miami. I guess I'm just subconsciously pining away for the Jimmy
Carter years. The old WZMX was boring top say the least. The current
station is fun. Their billboards are horrible. Their logo and font is
very 60s-70s transitional. As a 33 year old, I don't relate as much to
advertising evocative of the Hillside Singers and the Partridge Family.

Looking forward to your response with good cheer...

a recent poster on "airwaves" requested information on the short wave frequencies the BBC (british broadcasting corporation) might be heard in the philadelphia area.

here are the frequencies i have for the BBC world service, in english, according to the february 95' issue of "popular communications" (and i can verify most of these frequencies heard in the U.S., higher frequencies in the daytime, lower frequencies at night.

5.975 Mhz (5975 khz)
6.005
6.175
7.325
9.590
9.915
11.750
12.905
15.260

there are higher frequencies in english, but because of the season, and the propogation due to our sunspot cycle position, signals above 15 MHZ are difficult to receive, even with a sensitive radio and an outside antenna.

i should also note that many public radio stations broadcast BBC overnight, via my employer, "minnesota public radio". the feeds are live, and you get 'newsdesk', 'words of faith', and 'waveguide' (and football and cricket).

BBC is (arguably) the most credible news source in the world.

incidently, its partially government funded.

672. Re: CPB funding to local stations

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:14:32 UTC
From: rdobrick@omnifest.uwm.edu
Message-ID: <3gmn9o$h6l@vixen.cso.uiuc.edu>
Source record: 35080

In a 1/30 posting, dk@crl.com says, in part:

<<This CPB money comes with strings attached: it must be used on programming, not on staff salaries, buying a new stereo exciter, or other things not directly related to the programming budget. So, for most stations, this CPB money comes in and it goes right out the door in NPR (and to a lesser extent PRI) programming. >>

This is partially true. CPB-qualified radio stations receive two grants:

(1) Community Service Grant (CSG): This is the larger of the grants and carries the fewest restrictions. At our station, we use it to pay the hourly wages of our part time (jazz) disc jockeys, news director and technicians.

(2) National Programming, Production and Acquisitions Grant (NPPAG, pronounced N-PAG): This grant is considerably smaller, and its use is restricted to:

(a) paying the costs of acquiring national programming and promotion of same;
(b) providing funds for the production of any program--local or otherwise--produced by or targeted toward racial minorities.

I think it's safe to say that until recently many of us in Public Radio have not done a great job of explaning all of this to the general public; the truth of the matter is that sometimes we have a hard time figuring it out ourselves! :)

673. CPB funding... A different perspective.

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:14:33 UTC
From: WNUANews@aol.com
Message-ID: <3gmn9p$h6m@vixen.cso.uiuc.edu>
Source record: 35081

Defenders of public funding for broadcasting (and the arts) tend to miss the same point so many opponents of the first-amendment separation of church-and-state seem to miss: Keeping broadcasting (or religion or the arts) free of government support is one of the best protections practitioners have from the "chilling effect" of government intervention.

NPR and CPB and PBS do some great things, but the very *existence* of their government subsidy has an inhibiting effect on the projects they undertake. ("Gee, this is a great idea...but will Congress cut us off if we do it?") You can be sure every project now under consideration at a public-broadcasting outlet--particularly anything even remotely critical of Newt Gingrich and the new Republican majority-- will be subject to just such a test.

However traumatic the transition might be, the public interest would be better served in the long run by a privately supported, government-free public -broadcasting network.

A gradual phase-out of government funding for public broadcasters makes a lot of sense--particularly if it's accompanied by tax relief that frees citizens to make (even modestly) larger donations directly to the stations of their choice.

>David will actually talk to people who disagree with him.
>David was around, and, his life expectancy notwithstanding,
>will be around long after Rush's luster has worn off.

Are you kidding? As far as I can tell, Rush puts those who
disagree at the front of the line (if they don't call, or
hang up, what can he do?)... Sometimes he gets some real mad
liberals, who don't seem to understand what they're saying
(Zookeeper Dave was a good example).

Not my favorite callers, I guess I like to hear my views and/or
people who share them. (I don't fear other views, it just is
not what I want to hear.)

>Also, David's politics can best be described as libertarian,
>which places him in a different category altogether from Rush.

More power to him then. Is being compared to Rush THAT bad?

I am looking for all kinds of older audio and professional recording equipment for my studio.The following is a short list of some of the items I am looking for. Please let me know if you have anything for sale or trade.
I am a serious collector/ engineer paying good prices for equipment I need.

Microphones by:
Neumann, Schoeps, Telefunken, RCA, AKG, Altec, Western Electric

Limiters, mixers, preamps etc by:
Universal Audio,Fairchild, Langevin, Teletronix, UREI, API etc.

Mixing consoles, tape decks etc. In fact any kind of professional recording/ broadcast gear.

Please reply via e mail or call me at 818-244-1909 or fax at 818-500-0742

676. Henry Gladstone dies

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:14:38 UTC
From: mverhovs@jaguar.ac.edu
Message-ID: <3gmn9u$h7j@vixen.cso.uiuc.edu>
Source record: 35084

It was with a twinge of sadness that I read of the passing of Henry Gladstone.

What Charlie Kaye at CBS News Radio didn't include in his story on Mr. Gladstone, was that Henry was also a radio station owner for a time.

In the 70s, Gladstone owned WCRO Radio 1230 AM in Johnstown, PA. I worked there during his ownership and had the chance to meet him when he visited.

My biggest regret is not taking advantage of Gladstone's years of experience in news. (At that time, I still wanted to be a disc jockey.)

I remember the days at WCRO with fondness, and often wonder where my co-workers are today. Jimmy Joe DeAngelo, Ken Williams, Dave Mance and Mike Farrow. (Last I heard of Mike, he was in Wilmington, NC>)

Thanks for the post, Charlie. Yet another chapter of my career is closed!

Jeff:

Hey, this is Michael Steele, I'm the MD at WEDJ in Charlotte. I've only
been here for 2 months but Brian Bridgman and I recentley cancelled OHP.
The show has really gone down hill in past years. Yes they still have about
40 of 50 affiliates around the country but there mostly in small markets.
I've also heard that some record labels have "paid" to get their records
on OHP for exposure. Nothing wrong with that...it's just not cool with me
as a programmer.
Johnny G still sounds pretty good as a talent, but the show blows!!
If you need more info call me at (704)399-6195 or E-mail michaelsteel@delphi.
com Good Luck!!

678. Re: AM Radio IF Frequency 450 Khz NOT 455 ???

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:14:42 UTC
From: Steve Whitt <steve.whitt@zoo.bt.co.uk>
Message-ID: <3gmna2$h84@vixen.cso.uiuc.edu>
Source record: 35086

In article <3ghrh9$i4p@vixen.cso.uiuc.edu> David A. Kaye, dk@crl.com writes:
>Subject: Re: AM Radio IF Frequency 450 Khz NOT 455 ???

The reason many newer radios have switched to an IF of 450kHz is to do with the AM band plan adopted since 1979 and the increasing use of digital frequency synthesizers in radios.

In 1979 BCB stations were assigned to either 9 or 10kHz spaced channels (Europe and Asia on 9, Americas on 10.) In all cases the frequency is an exact integer multiple of 9 or 10 kHz. (e.g 558kHz is the 62nd multiple of 9), which was not true in Europe or Asia pre-1979.

Receiver manufacturers need to design receivers that operate worldwide to get manufacturing economy of scale and so they need designs that work cost effecitively with 9 or 10kHz spacing. Since 1979 there has been a rapid movement towards frequency synthsis even in cheaper receivers.

The problem with the 455kHz IF is that it is not harmonically related to 9 or 10kHz so the possibility of receiver whistles arise and the oscillator frequency generation (local oscillators) are slightly more complex in design and operation. With a 450kHz IF (now a direct multiple of BOTH 9 and 10kHz) it is possible to ensure that all oscillators in a receiver and any synchronous demodulators are controlled off one simple crystal reference. This reduces the component count, simplifies factory set-up and reduces the chance of whistles.

Now if 450kHz is so good why isn't every radio using it rather than 455kHz? Well there is a large established supply of good and very cheap 455kHz IF ceramic filters (that define the receiver's selectivity) which manufacturers will continue to use. In time filters will become more widely available for 450kHz. Grundig, for example, are users of 450kHz IFs.

Hope this helps

The man you are talking about is not Jerry but Joey. He had been working in South Florida at WSHE and later WIOD and I last heard him on WBZT in West Palm Beach. He was working as a talk show host and hasn't been too sucessful at it. I too remember him from WKBW Buffalo since I used to live there, only about 2 miles away from the transmitter! We all used to talk about what Joey said the night before while eating lunch at school. He still sounds the same and it was great to be able to listen to him while it lasted.

His Name was JOEY Reynolds...I grew up in Ithaca, NY and listened to him in the early 60's on 'KB. Remember the "Royal Order of the Night People"? ....His fan club, kinda, ...complete with purple candles...

Joey Reynolds' show had custom jingles recorded by the Four Seasons: "JOOOOEEEEE, JOEY REYNOLDS SHOW....ON KB RAAAADIO..." His theme song each night was "Wild Weekend"....(a sax instrumental, but the recording artist's name escapes my memory right now).

I remember tuning in at either 6pm or 7pm to hear the 'changeover' from the Danny Nevereth show to Reynolds. Together they recorded a single called "Rats in My Room" - remember?

Last time I heard Joey it was about 10 years ago....he did the afternoon drive slot (3-7?) at what was WNBC (660 AM, now WFAN) in New York, for a short period of time.

Anybody know where he is now? I'd also be interested!

Bob Vann - Albany, NY

WDRE has changed their on-air staff. Gone are AM Drive d.j.Donna Donna & Malibu Sue from middays. Night jock Gary Cee goes to Production.
The new lineup consists of Mike DeFosses, formally of WHCN in Hartford, in mornings with Jodi Vale, who used to overnights at DRE.
Jodi Shawbeck from San Diego moves to middays, and Cousin Ed into nights. He's from Norfork, VA.

The other big change is newsman Joe Bragg being let go by Kiss-FM. Bragg was told his contact wouldn't be renewed when it expires January 31. Bragg has retained lawyer Vernon Mason (disbarred last week) and will file charges with the EEOC. Bragg feels the recent sale of Kiss-FM to Emmis is the reason for his dismissal. Bragg, along with Bob Slade and Ann Tripp, formed the award winning news team for the station for a number of years. He formerly worked at WHN and WLIB.

Casey Kasem is coming back to NYC! Casey's Hot 20 debuts this Sunday on Mix 105/WMXV. He'll also guest on Jim Kerr & the Morning crew Friday morning and host a listener breakfast.

WABC is the No OJ station in NYC. PD John Mainelli says people are sick of the trial and his station won't air any of it, unless OJ himself takes the stand.

Howard Stern has his wish--A rest area named in his honor in New Jersey by Governor Christie Whitman. Alot of other radio folk are a bit ticked off about it.

Till next time--

Trip Rogers

Robert J. Rose III, dead at age 39.
Bob Rose, a 15 year Miami radio and voiceover vet was found dead in his Ft.Lauderdale apt. on 1-26-95. Cause of death unknown, autopsy investigation pending.
Bob grew up in Long Island, NY area. Attended Univ. of Miami. Worked at WMJX-FM (96X) Miami as prod. director in late 70's/early 80's. He then went on to work at notable ad agencies in Miami area including: The Ad Team, Zimmerman & Partners, Image Factory, and finally co-owned Carrera, Rose & Partners of Deerfield Beach, FL.
Bob is survived by father Robert, mother Ann Marie, and sister Bettina Erardi.
Interment 1/31 at Inter-Locust Valley Cemetery, Locust Valley, NY.
Donations in Bob's memory to: Boys & Girls Clubs of Broward Co. (tel:305-537-1010).

Personal note: Bob was a lively, warm person full of talent, who could make friends in a nanosecond. His appearance, charisma, and love will be missed by all who knew him.
-Human Numan/Z100 (worked with Bob at WMJX)

And that's what happens when a station "imports" a staff rather than using people who had worked in the market previously. Those "faux pars" irritate some listeners to no end. The jock may be good, but the tune out blows his ratings after a while if he doesn't learn the localisms.

> They played
> Los Angeles-produced music, talked with generic accents and had little

For average Joe listener, that's fine. But the discerning listener is tuned in to the competition. The .4 or .5 they make up in the ARB's could mean a lot of money lost in the long run depending on the market size..

> Have you ever wondered why popular music is the same in Boston as in

> to hear callers from Nigeria and Cameroon asking for Michael Jackson songs.

If you switch it around a bit, Michael Jackson records may be played as often there as Miriam Makeba's records are played here. If you want to hear African music, you have to find a specialty program here. My whole point is NOT to do the same crap you can get off a bird on the local level, it is to do something different. Give the opportunity for minority music tastes to be exposed on the air. In most markets you wont be able to find a program of African music, or traditional acustic folk, or oldies recorded before 1964, etc. That is one of the contents I would expect to be done with local origination. It wouldn't make much sense to do African music in Alabama, but Bluegrass will go over well. Anything will find a following in New York or Los Angeles. Basically, I would hope that local origination would be an incentive to local content interest, and I mean talk and news as well as music.

> The really strange thing about this is that the technology of musical
> recording and editing is getting cheaper with each passing month. Why don't
> we see a blossoming of local bands and regional hit records? When that
> happens, will we not see local radio re-emerge as well?

The local bands are all over the place already. With synthesisers, multi program keyboards, sound boards, MIDI, drum boxes, computers, etc., everyone and anyone can make music, and they do. It is because of it that amateurs sound like professionals, and since there is so much of it, there is turn off. The radio people, especially PD's and SM's that don't want to take a chance, realize that they don't have the ability to pick out the subtile qualitites that makes a performer a professional so they'll wait until they get a recording contract before playing them.

I guess I will have to reply to this by saying what I am involved with. You can draw a parallel to any other kind of local musical interest from it, wheather it be Beach Music in NC or VA, Zydeco in New Orleans or Garage Band stuff from MN. The situation is the same.

I have been associated with a few local, professional, bands, vocal groups and oldies acts. They have to follow certain formulas for the type of gig. A wedding is not played like a small club date or an oldies show concert. They have been recording, but no one wants to play their records. The Doo-Wop acts I know do get their records on the Doo-Wop specialty shows, even the one on the major FM outlet, WCBS-FM, but they never get into the rotation, and no other station picks up on them. At least here in NY, (and Boston, Philly and Pittsburg), we do have those local specialty programs in the NCE band and at certain hours on commercial radio where they can get exposure, but outside the major markets there is no place. Similary in the Carolinas, there is Beach Music, but you don't hear those local acts up here even though there is a small following.

The only other place they are getting exposure, and therefore interest by more club owners and concert promoters, is on Cable TV. Radio is not going to "show" the act and the promoters who have just gone by the sound are few. I know of three commercial cable programs, but none overlap because the producers can't afford to distribute them to more then one or two systems. One even cuts out the commercials and puts in PSA's so they can get the only available time on an access channel on other systems. If there was more radio exposure, then those promoters that need to "see" the act might just have to get off their duffs and actually go to one of the few gigs they have, the demand or curiosity would be too much for them to resist.

> comes off the network. I doubt any local station has the money to do
> something like _Star Trek_ or even _The Simpsons_.

Of course they don't, but like those cable shows, there can be programs
that expose local acts or cover local stories that are either too serious
or complex to hold the audience if done during the local newscast. I'm not
saying do a half hour cover the opening of Sam Chan's new hand laundry and
dry cleaners, but maybe a weekly half hour of household hints. Sam Chan
can be a guest and tell viewers how to get grape juice stains out of a
white shirt without zapping the drip dry resins. Of course he can make it
look so hard to do that the conclusion is to send it to one of his 500
stores. But that's TV, not radio. Radio could do something similar with
subjects that don't need pictures.

> Family Radio has no such excuse. They produce a cheap product that could
> be made as easily in Little Rock as in Oakland; indeed there must be hundreds
> of religious radio programs coming from the most improbable places.

Get out the shortwave and tune in WWCR if you want to really find out how
many. Just take down the addresses at the end of each show.

> What
> mystifies me is this: there's no audience demand for this product in most
> places. It's not good for business.

There is a demand for the religous product, you just won't find it up north
in major markets. You have to go to the "bible belt".

> It has no scientific, literary or
> artistic value.

A few of the programs are produced well, although I will agree with you
about the overwhelming majority.

> The only reason it's on is that somebody with a lot of
> money thinks it is good for his soul.

Most of the contributors to these ministries, and the ones that buy time on
the commercial holy rollers, are poor and lower middle class. The only
ones with the bucks are the station and network owners.

> Surely, in a country where the
> airwaves are a valuable public resource that could be used to bring people
> together and build healthy communities, we can find better trustees of
> our radio spectrum than the likes of Family Radio, no?

I agree with you, but I do want to say that I am not for the abolition of
Family Radio, or any other religious broadcaster. I only think that they,
and some other hogs, should get out of the NCE band and make it available
to local groups as it was originally intended.

Jody, you can buy a Select-A-Tenna or some such that inductively couples to your radio (sits next to it but is not connected to the antenna terminal) for about $65. Or, if you (or a friend) can handle a soldering iron and can come up with a variable cap from an old AM radio, you can build your own for just a couple of bucks. The plans for this antenna were printed in Popular Electronics magazine several years ago, and I'd be happy to send you a copy of them if you send me a stamped self-addressed envelope. ---Dan Hughes, P.O. Box 933, Urbana IL 61801.

You might just try attaching a few hundred feet of wire to the terminals
on the back. If you're looking for something with directionality,
however, the only antenna which =might= fit your criteria is the
Select-A-Tenna from Intensitronics (Hales Corners' WI). This is also sold
as "The Omnipotent" (shades of DAK, eh?) by Herrington, and in several
varieties by C.Crane (the radio accessories dealer).

The Select-A-Tenna is a tuned loop antenna which couples inductively to
the inernal ferrite loop of a portable radio. It can tremendously improve
the pulling power of a little transistor radio. However, in my experience
the degree of improvement varies inversely with the size of the existing
antenna in your radio. Radios having large internal rods, like the SR
II/III, benefit little from the additional loop.

The Superadio II is a great unit. I used mine on a DX-pedition to the
Washington State coast in October, 1993, and here's a sample of what I heard:

kHz

1620 Pebble Beach, CA
1602 Sakhalin-Kurilsk, Russia
1008 Russia
1287 Sapporo, Japan
1251 Vladivostok
1017 China
820 Fairbanks, AK
1575 VOA Thailand
1612 Korea

Russia-783 was armchair copy at 10:00 a.m. PST, well after sunrise.

The antennas: long wires all over hell, the longest was probably a good
quarter mile long, looped NNW. Others were due N and due W. All were
draped over oceanfront vegetation and were unterminated. So yeah, you
need a real antenna.

Both the IRCA and NRC publish antenna booklets and guides for AM DXing.
My favorite unit was a tuned triangular loop called a "wedge," designed by an
IRCA member in the late '70's. You'll need some wire and a 365mmf variable
capacitor to build one, but it works great and is easily aimed for
reception/nulling. I've even nulled out 50-gallon locals with it on my
SP-600.

Radio Shack probably does sell something, either pre-built or in various
parts. Offhand, I can think of a ferrite loop stick that can possibly be
attached. But again, IRCA can tell you about the Radio West Shotgun Loop
and similar devices, all of which will substantially improve your DXing
capabilities.

I don't have the IRCA address handy, but if you'll send me an e-mail
reminder I'll dig it up for you.

And P.S. Have you seen the new Superadio III? Cheap, slick, and probably
gutless, too. Looks like a toy tape player. Hang onto that S-II!

Yes, there is. Unfortuaneaely Radio Shack doesn't stock it. It's called "Slect-A-Tenna" It's a round disc, about 10" in diameter and 2 1/2 inches thick. There is a tuning dial on the front. It works through indictive coupleing with your radio, it uses no power and needs no connection, although there is a small phone jack to connect it to your radio if desired.. You place the "Select-A-Tenna" close to your Super Radio and tune it for maximum signal. It works quite well.

It's produced by:

Intensitronics
P.O. Box 562
Hales Corners, Wi. 530130

I have seen them for sale in Edmund scientific. Sorry, I don't have a phone number for them.

>
>Comments?
>

I believe that Dallas/Ft. Worth needs a 100,000 watt Spanish
format on FM. In the lastest census figure, the city of Dallas
had something like a 26% Hispanic population. With a city of over
1 million people, and a metro area (including Ft. Worth) of over
4.5 million people, I would say that this market is overdue for
a strong force in the Spanish speaking radio market. Today,
the only Spanish speaking FM signal that I can receive in the
Dallas northern suburbs is KRVA at 106.9 in McKinney (30 miles N
of Dallas). The signal drops off once you enter the city of Dallas
from the north. KLTY 94.1 (Christian Contemporary) used to be
Spanish about 7 years ago. Its signal is good all over North Texas.
It looks like Rodriguez is attempting to gain control of all of these
weak signals in the outlying areas to either shut them down to allow for
a CP for a stronger signal on a nearby frequency or to have rimshot access
to the D/FW population centers.

Best Regards,
Dan Patrick email : dcp@asic.sc.ti.com

: KLOU 3.4 3.2 3.5 reemphasizing oldies image
: KFUO-FM 3.1 1.9 2.4 great classical station,
: but EEO license renewal problems!

It's interesting that the station playing the greatest hits of the last 400 years (as KFSD-FM in San Diego once advertised over a decade ago) is giving the station playing the greatest hits of the '60's a run for their money.

: KPNT 2.9 2.5 2.3 modern rock rimshot

And classical music beats modern rock -- or, as my wife has said of the programming on this station, the Beatles on Prozac.

: WEW 2.2 1.0 1.4 what?? This is a daytimer!

Yes, but it is substantial competition for both KSD-AM and WRTH-AM, because it has live, local announcers all day, every day (as far as I can tell), and a decent 1,000 watt daytime signal on 770. I would regard its programming as somewhat better than its competitors, as well, although the DJ's sound a bit young to be playing it.

Also, there may be loyalty factor at work here. Although I understand WEW may have briefly switched to another format a few years ago, they have otherwise been very consistent. It's pretty much the same now as it was in the '60's, at least, and has never strayed very far for very long. That's a lot more than can be said for WRTH-AM (previously WIL-AM) and KSD-AM (previously KUSA-AM, and before that, KSD-AM again).

Whatever the reason, I think they're smart to keep this a daytimer. The radio audience drops at night anyway, and would probably do so dramatically for a weak AM station. WEW keeps their loyal audience happy with shows that sound locally-produced all day (except for network news) when they are relatively interference-free, so their audience perceives that the station cares about them. And my guess is that the station doesn't have to spend much money to keep their 1,000 watt single-tower transmitter maintained, or to pay for programming services, engineers, and/or announcers to keep the transmitter warm when nobody's listening, anyway.

: WIBV 1.6 1.3 1.7 only alternative to KMOX, alas

Not entirely true these days. WKBQ-AM 1380 (formerly KWK-AM) now broadcasts a number of talk shows, "Because friends don't let friends listen to FM." WKBQ-AM carries Tom Leykis, Jim Hightower, and the conservative fellow from Denver whose name escapes me at the moment (can

someone fill me in?).

In other news, WIBV talk show host Bruce Bradley was thrown off his brand new 30 minute call-in show on KETC-TV (9) for remarks he made about black teenagers -- the same kind of remarks that make Neil Boortz so popular on WSB-AM in Atlanta. KETC-TV has said that they would continue the show (called "Common Sense?" -- with a question mark) with another host next week. WIBV apparently has no plans to drop Mr. Bradley from his 4-hour talk show, 3 hours of which air opposite Rush Limbaugh on KMOX.

702. Sale of WCSN finalized

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:15:44 UTC
From: cee@wshb.csms.com
Message-ID: <3gmnc0$hfr@vixen.cso.uiuc.edu>
Source record: 34910

Hello, everyone.

Well, the sale of SW station WCSN has been finalized. Attached is
a press release on the sale.

*** PRESS RELEASE ***

DATE: January 31, 1995

SALE OF WCSN TO PROPHECY COUNTDOWN COMPLETED TODAY

It was announced today by Don Bowersock, President of Herald
Broadcasting, that the sale of shortwave station WCSN was completed on
January 31, 1995. The station was sold to World Voice of Historic
Adventism (WVHA), an affiliate of Prophecy Countdown, Inc., for
$5 million.

The purchase price was paid entirely in cash; no mortgage was
taken back by Herald Broadcasting or the Church. The initial down
payment by the buyer was $40,000 until the signing of the Purchase and
Sale Agreement in January, 1994, when according to the agreement, the
deposit was increased to $400,000. In June of 1994 the down payment
increased to $1,750,000.

"When the Scott's Corners station began operation in 1987,
it was our best option for reaching Europe and Africa," Bowersock
said. "More recently, with the successful operation of the Cypress
Creek, South Carolina station, WSHB, and the addition of a new antenna
there, it has become clear that we will be able to reach Europe and
Africa more efficiently using the South Carolina Sation."

"Selling our Maine station in no way dims our appreciation for
everyone who contributed to the work there," Boswersock continued.
"The dedication of those who initially conceived of the idea and
shepherded it through to completion, as well as the talented staff who
has kept it going over these past eight years, all have our sincere
thanks. Everyone who was associated with WCSN can take pride in the
work he or she did."

"It is important to reiterate that the sale of the station does
not change our plans for shortwave broadcasting. Providing shortwave
programming is an important service to a world hungry for the information
and spiritual views provided by MONITOR RADIO and our religious
broadcasting," said Bowersock.

As you may remember, Herald Broadcasting announced the consolidation of its broadcast activities in August 1993. Herald Broadcasting operates two other shortwave stations, WSHB, Cypress Creek, South Carolina; and KHBI, Saipan, CNMI. Herald Broadcasting is the shortwave broadcasting service of Monitor Radio International and The First Church of Christ, Scientist, in Boston, Massachusetts. In addition to broadcasting to North America, South America, Central America, Canada, Europe, and Africa from WSHB, we also broadcast to Asia, the Asian subcontinent, Australia, New Zealand, Oceania, Europe and Africa from KHBI on Saipan in the Mariana Islands.

Consulting engineers George Jacobs and Associates, of Silver Spring, Maryland, served as broker for the sale.

For more information, contact Don Bowersock at (617)-450-3200,

or you may E-mail to radio@csps.com

=30=

I would like to add my own sincere thanks and appreciation to all at WCSN for their hard work and dedication also. They have been a great group of people to work with, and I will miss them all.

If anyone is interested, Stes has a new e-mail address. It is

robert.stessel@chksix.com

I am sure he would enjoy hearing from you.
ED

703. WOWO People: GET OVER IT!

Newsgroup: rec.radio.broadcasting
Date: 1995-02-01 01:15:46 UTC
From: honzman@aol.com
Message-ID: <3gmnc2$hg0@vixen.cso.uiuc.edu>
Source record: 34911

To all of those who have been whining about the proposed WOWO power-down. To all of those outside of WOWO's primary coverage area. You still have no grasp on what broadcasting is all about. Yes, it IS about serving the public interest but it is about $$$!!!

Here's a story to help illustrate. As many of you know, I work for the first broadcasting station in the world. The ultimate clear channel station. This last summer we erected a new tower, replacing the one that was that was erected in 1930. The new tower allows our engineers to adjust the ground wave and sky wave. Here's what has been done: The signal has been adjusted to cut down on long distance listening in order to stregnthen he LOCAL signal. Sure --- we can still be heard in 38 states, Canada and Mexico...but not like before. We have already receved letters from distant listeners, complaining that they can't receive us. But we have also received positive reports from people closer to home that get us better than before. THIS IS WHAT WE PREFER!

Yes, it's a hoot to know that my show is booming throughout the world --- but our LOCAL audience is what is important.

Now, if the adjusted WOWO signal doesn't give city grade coverage throughout Fort Wayne and the surrounding areas...some other adjustments should be made. But whining because you can't pick up WOWO 500 miles away is foolish. There are plenty of stations serving THEIR LOCAL markets. that's the way it's suposed to be. Stations are NOT licensed to serve the public interest of people many states away.

When the FCC required stations to acertain needs of their communities....the acertainments came from the LOCAL community...not those hundreds of miles away.

That's just MY opinion....I could be wrong.

Fred Honsberger

> However Mr. Honsburger of Pittsburgh, PA., who happens to work
> at CLEAR CHANNEL KDKA says that WOWO is licensed to only serve
> Fort Wayne.. period.

Umm, in terms of WOWO's license, that *is* the truth. I certainly understand the differences you have with Inner City and wanting to retain a heritage station (and signal), but Fred is right.

KDKA hasn't chosen to take the same tack with their signal, and that's OK, too. WOWO chose to take a regional approach. I'll miss them, as I missed WGAR when I left Cleveland.

706. North San Diego Radio Watchers

Newsgroup: rec.radio.broadcasting
Date: 1995-02-02 05:36:45 UTC
From: ChrisCarm@aol.com
Message-ID: <3gpr1d$oj9@vixen.cso.uiuc.edu>
Source record: 34914

Here's the latest from North San Diego County: Jan. 31, 1995

Classical station KFSD [94.1, 100kwERP] and Par Broadcasting have broken off talks about the sale of the station. Par, wanting to move rocker KIOZ [102.1, Oceanside] to a higher power place said that talks could resume in the summer. The Escondido Times-Advocate said that Rock 102's previous filings with the FCC to move the tower south from San Marco, Calif., has been met with opposistion from cross-town rivals [most notable KCBQ FM 105.3 SD].

But for now, the 94.1 frequency from Ensanda, B.C. Mexico to Los Angeles will remain classical.

Yawn: With the 29th drubbing of the Super Bore, San Diego-based broadcasters pointed out some facts: KFMB's post-game show, live from Miami, said that 26-other teams wanted to be there. Ted Leitner, the radio with pictures star, and radio sports commentator pulled no punches in predicting a San Francisco win.
Nobel's XETRA-AM [690, 50kw DA] had the southland honors of broadcasting the show, while LA's KNX [1070, 50kw-U] put out CBS' coverage. KFMB, a CBS outlet, couldn't broadcast the game. [KFMB, 760 5kw-D, 50kwDA-N]

KFMB co-sponsored a welcome parade for the San Diego Chargers on Monday afternoon. Nearly 175,000 fans of the club showed up, while the radio did a remote for those who had to work.

>Trip report: I had to go to the plains of Kansas two weeks back, and noticed that KFI [640 50kw -U] did not come in as clear as I remember in my home town of Dodge City. Sunday, Jan. 15, I tried to listen to Mr. KFI's show from 8 - 11 p.m. CST, but found the reception spotty at best. I did hear some country music, probably from Norman, Oklahoma's WWLS.

A brief stop in Colorado Springs: KRCC [91.5] still has the best AAA music around. KOA Denver [850, 50kw-U] gave coverage to sister station KTLK [760.] On the road back, I did like KTNN, from the Navaho Nation in Arizona country format -- and some of the program was in native tounge. [KTNN, 660, 50kw-DA]

Chris Carmichael The paper office will arrive with the
Carlsbad, California paperless toilet.

707. WOWO - I'm Truly Fascinated

Newsgroup: rec.radio.broadcasting
Date: 1995-02-02 05:36:46 UTC
From: markelliot@aol.com
Message-ID: <3gpr1e$ojd@vixen.cso.uiuc.edu>
Source record: 34915

As one who spent time as a child listening to WOWO and time as an older child competing against it, I'm truly fascinated (sp) with this debate. And I hope it continues. Here's my two cents worth...

1) Yes, this is a business about making money. No one comes to your door from the government with cash to bail you out if you don't do well. You must make money to survive. However, why does the concept of a regional station not make sense? To many communities in Northwestern Ohio and Northeastern Indiana, WOWO is their ONLY access to "big time" radio. Farmers in need of reliable consistant information have no where else to turn. It's ludicrious to compare KDKA to WOWO. It's not the same.

2) What's wrong with tradition? I've been in radio 25 years. I watch trends, but I also study the past and those who have succeeded in our business. Radio seems caught in the "If its not new its no good" syndrome.
Every two bit snot nose kid who gets a programming job automaticlly assumes anything that happened before yesterday doesn't matter. Wake up, study and treasure the past. It'll help you succeed (HINT: Watch some old Steve Allen and Ernie Kovacs tapes.. then watch Letterman... He's looking back a lot.)

even after all this, I regret it's too little too late. Good luck to those opposing this change (due to professional reasons, I can't officially join in.) I fear it's already over.

From: rrb@clm.aiss.uiuc.edu
Message-ID: <3gpr1f$ojh@vixen.cso.uiuc.edu>
Source record: 34916

Here is a strange set of circumstances.

On Sunday, Jan 29th, from my location in far SW Missouri, on my Sony car stereo (a very good DX car radio) Some strange stuff....

>From about an hour before sunset to well after sunset (actually until near midnight) no signals could be heard from the usually dominant WMAQ (670 Chicago) WGN (720 Chicago) WBBM (780 Chicago) WLS (890 Chicago) KFAB (1110 Omaha).

In place of all of these signals was STRONG Spanish radio (different signals) which were quite dominant. When they faded, there still was NO TRACE what-so-ever of the above mentioned signals (dead air). I am not talking about Spanish *covering* these signals, but that there was nothing in the mix resembling the Chicago and Omaha signals.

It seemed to me that all Chicago clears had gone Spanish for a night, or had gone off-the-air.

The next night, everything was normal.

Another strange thing, is since Monday, I have been receiving excellent daytime (no fade groundwave) from WMAQ, WGN, WBBM as well as some Nostalgia (big band) music on 1000 khz. All day long. WGN was so strong it came in in full stereo on my SRF A-100!! I am talking about times like 10-AM through 3 or 4 PM.

I am almost 600 miles from Chicago. It as like day and night was reversed.

Any ideas DX hounds?

Liam,

Very interesting that 1510, a very small station with a rather puny signal, especially after nightfall here, was listenable, while no mention was made of the big clear-channel powerhouse of Boston, WBZ AM1030 [50,000 watts, receivable at night in 38 states].

Then again, I think I heard once that WBZ's radiation pattern probably features a strong null to the east. (The station's tower is practically on the ocean in Hull, Massachusetts, and there is nothing east of it but water (and people like you three to four thousand miles away).

1510's towers are, by contrast, in Waltham, which is a western suburb of Boston. If their primary audience is in Boston proper, the signal probably is aimed strongly to the east (and therefore towards you).

: government subsidy has an inhibiting effect on the projects they undertake.
: ("Gee, this is a great idea...but will Congress cut us off if we do it?")

Funny, this hasn't stopped NPR from tackling some issues which are *very*
embarrassing to the government. Publicly-funded broadcasting also hasn't
had a chilling effect in some other countries -- would you say the BBC is
unduly influenced by its dependence on public support? The CBC?

: public-broadcasting outlet--particularly anything even remotely critical of
: Newt Gingrich and the new Republican majority-- will be subject to just such
: a test.

The de-funding of NPR will only serve to strengthen Pacifica, BBC, and
CBC as they will then have open markets for their programming. In some
ways I actually welcome it, especially with the possibility of a truly
leftist voice finally being heard in more than just a few major cities.
I think it's important to the existence of our republic to have a free
exchange of ideas from *all* points of the spectrum.

dk@crl.com

And yes, *this* is true, but it's not the whole story. Only part of a CPB
station grant is designated for the purchase of national programming and
that doesn't necessarily mean NPR or PRI or BBC programming. A very
substantial portion of the local station's CPB grant can be rather freely
spent on staff salaries and, yes, even on that new stereo exciter, CDs for
the record library and, in fact, just about anything that the station can
reasonable show is related to improving it community service.

715. Info wanted for stations on the net

Newsgroup: rec.radio.broadcasting
Date: 1995-02-02 05:37:01 UTC
From: theodric@ATHENA.MIT.EDU
Message-ID: <3gpr1t$oki@vixen.cso.uiuc.edu>
Source record: 34923
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm

Hey radio people...

I maintain a list of radio stations which have WWW/Gopher/FTP
sites. Feel free to check it out and make links to it, or to
copy data from it. I have links to about 175 stations
currently. The URL is:

http://www.mit.edu:8001/activities/wmbr/otherstations.html

Unfortunately, I have been unable to find info on some of the
stations that I have links to. Many stations which have Web
pages neglect to include their frequencies, cities of licence,
or in extreme cases, their call letters.

In some cases, I have actually called up radio stations on the
phone and asked them the relevant questions. This hasn't
always been as helpful as you might think. For example, the receptionist at
"91X" in San Diego tells me that their call letters are "XTRA".
She denied that there were any "K"s in their station's call sign.
Yes, I should have asked to talk to the Chief Engineer.

Anyway, if any of you net people can fill in any of the blanks for the
following stations, I would be much obliged:

KBVR - ..... - Corvallis, OR (Oregon State Univ)
KCSU - ..... - Fort Collins, CO. (Colorado State University)
WHYY - 91.? FM - Philadelphia, PA.
WMLI - 96.? FM - Madison, WI.
WTJU - ..... - Charlottesville, VA. (University of Virginia)
WZEE -104.? FM - Madison, WI.
WZIP - ..... - Akron, OH. (University of Akron)
CFUV -102.? FM - Victoria, BC. (University of Victoria)
WERG - 90.? FM - Erie, PA. (Gannon University)

and of course the following stations I don't even have call letters for:

K-NEWS - 970 AM - Las Vegas(?), NV.
XTRA (?) or "91X" - 91.1 FM - San Diego, CA
X96 Somewhere in Utah

Thank you in advance.

-Ted Young
Chief Engineer, WMBR 88.1 FM at MIT

Winners of a contest on Winnipeg AOR station CJKR-FM got a little less than they bargained for last Sunday.

All week long, morning man Scruff Connors had promoted an all-expenses-paid trip to Miami to watch the Super Bowl, that generated more than 1200 entries. But when the 30 winners showed up at the Air Manitoba terminal for their departure, they found a bus waiting for them in a hangar, which whisked them to Miami...Manitoba, to see the game on a restaurant TV.

The joke has received national media coverage, but outraged the unlucky winners, some of whom purchased travel insurance and bought U.S. currency for the trip. Media reports today say Scruff has been suspended.

Or, you might try calling KEZ-99; they're an FM light AC, but they just brought in a new p.d., and if anyone's interested, rumor has it he has experience in "full-service" (that's, "no music") radio. Perhaps he's going to expand their horizons. Or not.
Anyway, be sure to remind whomever you hit up: (a) Leykis put 'FYI on the map when he was local; (b) nights never had decent ratings here, until Leykis improved the nighttime numbers .They went UP significantly in the last Arbitron recently before they dumped him! Don't let KFYI tell you differently ! They dumped him because they're making a mark as a frothing-at-the-mouth, rabid, right-wing, hate-mongering lynch mob-o-libel, and they have had requests to can Tom from "the blue-hairs" (actual quote from staff member ! Also reveals "blue-hairs" are claiming he uses too much sexual content. Guess these nazi bastards know what management buttons to push).
And, if someone can figure it out (I can't...aol is confusing, but I swear I will wrestle this damn thing to the ground, and win eventualy!!!), please copy this and e-mail it to tomleykis. And tell him he has more radio talent in what he sneezes than Rush has in his entire body (enjoy THAT visual concept for awhile !)

Honzman (honzman@aol.com) wrote:

: Here's a story to help illustrate. As many of you know, I work for the
: first broadcasting station in the world.

Hey, nice try, sneaking it in as you did, but KCBS in San Francisco is the first broadcasting station in the world, opened in April 1909 by Dr. Charles Herrold in San Jose as "San Jose Calling". This predates KDKA by 11 years. KDKA was arguably the first *licensed* broadcast station.

: But we have also received positive reports from people closer to home that
: get us better than before. THIS IS WHAT WE PREFER!

Then why not get rid of the 50,000 watt signal and replace it with something designed to serve a local community? Away from the congested Northeast, populations are spread out. There are many areas of the Midwest and West where people receive few broadcast signals of any consqeuence, and tend to rely on those high-power stations.

As an example, KGO in San Francisco was the #1 station in Eureka, California (250 miles north of SF) at night. This prompted an advertiser there to book time on KGO. It also prompted an entrepreneur to open a new FM station in Eureka just to rebroadcast KGO! Anyone who has heard radio on the North Coast, and in coastal Oregon especially, can appreciate a powerhouse station like KGO. Maybe it's time for KDKA to power down and open the spectrum for other stations?

honzman@aol.com (Honzman) wrote:

:To all of those who have been whining about the proposed WOWO power-down.

:To all of those outside of WOWO's primary coverage area. You still have
:no grasp on what broadcasting is all about. Yes, it IS about serving the
:public interest but it is about $$$!!!

True, it is also about money, but at waht cost? To denagrate a signal
of a station like WOWO, just to extend WLIB for night time broadcasting,
when other avenues could have been done years ago without such
denegration?

:Here's a story to help illustrate. As many of you know, I work for the
:first broadcasting station in the world. The ultimate clear channel
:station. This last summer we erected a new tower, replacing the one that
:was that was erected in 1930. The new tower allows our engineers to
:adjust the ground wave and sky wave.

First, you work for the first liscensed radio station. But we have
other discussiond on that before.
Second, what was done at KDKA is something totally different that the
WOWO cenario: The company that owns KDKA isn't just buying the station to
trash it, boost their other station, and then sell off WOWO. Your station
is still at the same power, and still covers about the same area as it
used to. So, your analogy is lacking credibility. It also sounds a bit
like eliteisim on your part.

:But whining because you can't pick up WOWO 500 miles away
:is foolish. There are plenty of stations serving THEIR LOCAL markets.
:that's the way it's suposed to be. Stations are NOT licensed to serve
the
:public interest of people many states away.

If that's the case, then why were there Clear Channel stations in the
first place? It was because there were areas that were not served by
local station, and now with sattelite radio, duopolies, and the nonsense
that is going on now in radio, the situation has come full circle. Local
stations aren't serving the public interest.

:That's just MY opinion....I could be wrong.

Wouldn't be the first time! :-)

Dennis

Here's a quarter....Go rent a clue.

723. Howard Stern Radio Listing - Short Form [monthly post]

Newsgroup: rec.radio.broadcasting

>From Long Island, it's the Howard Stern Radio List - short form!

Here's what we've got for this month...

New stations in the past 30 days: -None-

Changes to current stations:

New Orleans - crosstown B-97 (WEZB-FM 97.1) bought out WRNO, creating
a duopoly. WRNO's format switched to the ever-growing 'Arrow' format,
and Howard was moved to B-97.

The long form of this list, which includes phone numbers for all markets
plus the fax number, is posted to alt.fan.howard-stern.

If you do not have access to the alt heirarchy, e-mail a message to me,
drchuck@netusa.net, and I will e-mail a copy to you.

This list is also available at the Howard Stern FTP site (I don't put it
there myself). This FTP site is accessible through the Airwaves WWW Page
via the following URL:

http://radio.aiss.uiuc.edu/~rrb/

The path is:
OTHER COMMUNICATIONS RESOURCES -> Personality Page -> Howard Stern

Alternatively, you may take the direct route:

http://krishna.cs.umd.edu/stern/
ftp://krishna.cs.umd.edu/pub/stern/

While you're at it, check it out my web page too :)
http://www.netusa.net/~drchuck/

Please mail me any info for the list that needs to be added and/or changed,
it will be appreciated. Catch you next month!
--Chuck

** This list will self-destruct November 1995.

KISF reaches to Lawrence for new morning show

KLZR(FM) morning show host Jay Charles has called his program "The Morning Fiasco," but he's been anything but that.

Early last year, the Lawrence (Kansas) modern-rocker with a fringe signal in Kansas City pulled Charles out of the evening slot into morning drive. Now, Kansas City modern-hit station KISF(FM) has selected Charles as a member of its new morning team.

KISF program director Chuck Geiger says the new morning show will begin March 1, and will continue to emphasize music. Geiger notes that most other morning teams in the Kansas City place their primary emphasis on comedy bits and stunts; he's hoping the music emphasis will continue to differentiate KISF from other Kansas City stations.

KISF's format continues to evolve, with somewhat less repetition, although Geiger says current hits will continue to be placed in a heavy rotation. The 80s oldies that "Kiss FM" has essentially restored to the market will also continue.

Other Kansas City items

Young country KKCJ(FM) continues to operate as usual, even though its lease with KFKF(FM) expires in two weeks. KFKF will be entering a duopoly with competitor KBEQ(FM). The station is reported up for sale, with speculation centering on two chains that presently have only one FM operation each: Citicasters (KYYS) or Heritage (KCFX).

Gospel daytimer KEXS(AM) in Excelsior Springs has plugged into Morningstar's new country gospel satellite service. KEXS has survived on a combination of advertising and listener contributions for the past three years.

Bohannon celebrates KFRU's 70th anniversary

As part of its 70th anniversary celebration in January, KFRU in Columbia hosted Mutual's "Jim Bohannon Show" on Jan. 26. Bohannon, a native of Lebanon, Missouri, began his career in radio in the Springfield area at KICK(AM) and KWTO(AM).

KFRU alumni have also been featured on the station's daytime talk shows during its 70th anniversary month. Among the guests: CBS News correspondent Eric Engberg, who was KFRU's news director from 1963 to 1968.

KFRU began in Bristow, Oklahoma 70 years ago, and moved to Columbia in October of 1925. For a detailed history of KFRU, tune to http://www.interstate.net/~transvox/kfruhist.html on your Web browser.

A related note: KFRU and co-owned KPLA(FM) have filed their FCC application to buy adult-alternative KBXR(FM) from former KOPN(FM) executives Pat Watkins and Dave Taylor. KBXR is currently in an LMA with KFRU and KPLA.

725. Portland, OR RadioWatch

Newsgroup: rec.radio.broadcasting
Date: 1995-02-04 01:40:56 UTC
From: kevin@europa.com
Message-ID: <3gulv8$bfp@vixen.cso.uiuc.edu>
Source record: 34932

As there is not RadioWatcher for the Portland, OR market, I hereby volunteer, and offer this first update. I'll offer the Fall Arbitron 12+ Numbers in a subsequent post. Feedback or questions are welcome.

I thought I'd start out will a little overview, station by station.

KKCW-FM / KXYQ-FM / KXYQ-AM
This is a duopoly owned by Trumper Communications, currently up for sale. KKCW has been the long-time leader in the highly sought-after Women demos with an Adult Contemporary format. It's the home of Craig Walker, who has had the number one morning show in the market for most of 20 years (including a long-term slot on now defunct KGW-AM). KXYQ was purchased by Trumper in the last year, and also targets women, with a slightly hotter AC format. KXYQ is leased out. It has a very poor signal, and is currently home to The Voice, local talk without any significant promotion.

KUPL-A/F / KKJZ-FM
This is the other duopoly in the market, owned by Baycom Parters. KUPL is a simulcast of New Country, which has had declining ratings over the last year, losing share to Country competitor KWJJ. Once the number one 25-54 station in the market, it has skewed to a younger demo, with a new morning show (Billy and the Bean, Billy Hayes and Brad Behan), and has aggressive plans to recapture the number one slot. KKJZ is "Smooth Jazz," it's growth has been remarkable. Since going on the air a year ago, it has become the number one NAC station in the country, ranked about fifth in this market in most demos. Programmed by Chris Miller, who is looking very smart.

KWJJ A/F
The other country station, once and current power. It had another heydey in the 60's and 70's, and has been resurrected in recent years under PD Robin Mitchell. Simulcast, carries Portland Winterhawks hockey on AM. A Park Communications station with sale pending.

KGON-FM / KFXX-AM
KGON is classic rock, resurgent after putting Mark and Brian on in the morning. Very strong AM numbers, especially with young men. The AM is all sports, in a market with little interest in sports. It carries "Fabulous Sports Babe," and former NBA star Mychal Thompson, among others, but very little play-by-play. Spike in recent book on strength if Ducks in Rose Bowl, (IMHO). Owned by Apogee, which has ties to Disney family.

KUFO-FM / KBBT-AM
Very respectable rock combo. FM is straight ahead rock, more music AM drive show to counter Mark and Brian. AM is "alternative" with no local

talent. AM numbers are strong enough to suggest that there is a market for this format on the FM band. Owned by Henry Broadcasting.

KXL A/F
AM is news talk, home of Rush Limbaugh, Tom Leykus, and the only significant local talk show, hosted by Bill Gallagher. Strong station, broad demo support. High cume. Home of Oregon Ducks. FM is new to "Seventies" format, playing anything and everything that was a top 20 hit in that decade. First book in new format looks good. AM drive on FM is John Williams, well known in market from days at KGW and KKSN.

KKSN A/F
FM is "Classic Oldies" almost exclusively 60's music. AM is "Sunny 910," featuring the likes of Nat King Cole, Frank Sinatra and the like. FM has done very well in recent books, AM has been very strong in 50+ demos for years. Owned by Heritage.

KEX-AM / KKRZ-FM
AM is home of the Portland Trailblazers. Information based format featuring very little music, of "non-offensive" nature to target 35-54 demo. Strength is high cume, drawn by entertaining AM show, hosted by Bob Miller; best traffic reporting in market; good news dept; Paul Harvey; sports, including Blazers. FM is Hot AC, over 50% teen, making recent efforts to attact more mature audience. Owned by Citicasters.

KINK-FM / KOTK-AM
The FM is a well-respected, difficult to define station. "True to the music," once AOR, now more of an AOR/NAC hybrid. Very well programmed. Has been simulcast for years, though KOTK-AM is about to dawn, with Imus in the Morning, and other well-known syndicated talk through the day. AM is a sleeping giant, with a great signal, great dial position (620), formally top-rated KGW. Owned by Embarcadero Media.

AFTRA has its place in preserving what a lot of people in this business have...but it's been a while since it broke any new ground in terms of wages, benefits and working conditions.
In our region, it actually became prominent in the 50s because station MANAGEMENT wanted a raise...so they recognized the union and gave out generous initial contracts to air staff so they could tell their owners they were making less money than their help, and deserved a raise! (This is what actually happened at WBEN in Buffalo in 1958 according to people who were there at the time...it gave AFTRA a foothold in Western NY, and other stations emulated the example for the same reason.)
It may have an effect on the wage and benefit scales at NON-union operations. I've worked at AFTRA shops and at non-union ones, and I can tell you the non-union shops have had to become more competitive wage-wise to keep their staffs.
Bob Smith, middays WXXI-AM 1370 Rochester NY

> thing?
>

Roles for blacks in radio were pitifully few. Eddie "Rochester" Anderson was one of the few stars in the medium. Lillian Randolph, featured on "The Great Gildersleeve" as Birdie, was another. But the only radio show to star a black performer was "Beulah" with Hattie McDaniel, who had appeared in "Gone with the Wind."

The show was what we now call a "spinoff." The character originated on "Fibber McGee and Molly" and was originally played by a white actress (and, I believe, also by at least one white actor) before McDaniel took over the role. When the show moved to television, it featured Ethel Waters in the lead, who was later succeeded by Randolph. (It was the first TV show with a black star, too.) I believe that Butterfly McQueen, who also appeared in "GWTW", played Beulah's friend, Oriole. Not coincidentally, all of the characters, Rochester, Birdie, Beulah, and Oriole, were servants.

Don't dismiss "Amos and Andy" lightly so far as historical
significance goes.
It was the only radio show with a predominantly black staff of
writers, many
of whom were performers themselves, who sometimes appeared on
the show --
although Gosden and Correll were, of course, white. It probably
provided more
work for blacks than all of the other radio shows combined.

=Lew Irwin

********** End of Forwarded Message **********

I really shouldn't tell this, it wasn't very nice, but it was
one of those nights with weather bulletins, a live sports
broadcast, malfunctioning equipment--you know how it is. The
phone rang for the 100th time, and there was a guy--"Can you
answer a question for me. Were the guys who played Amos and Andy
black or white?" I told him that on radio the two guys who
played them were white. "Great, I thought so, would you tell
that to this girl here, she doesn't believe me." So she came on
the phone, and I told her that the guys who played Amos and Andy
on TV were black. "Great, I thought so, thanks". I suppose they
are still arguing!!! Oh well, maybe confession is good for the
soul! --Ken MacHarg

Message-ID: <3gulvp$bhe@vixen.cso.uiuc.edu>
Source record: 34939

The affiliate who runs the top of the hour is probably the main affiliate and has first right of refusal. Osgood can go to someone else if they want it and the station with first right declines. In a major market, though, anything goes to get clearances.
In NYC, for example, CBS News and features run on WCBS-AM, while all the sports run on WFAN, or WEVD (in the event of conflicts.).

: a talker, then C & W.

Crowell-Collier, the same company which published Collier's magazine in the 1940s and Collier's encyclopedia (not Groliers). Yes, 2150 Franklin Street. I work nearby and it's sad walking past the quake-damaged building remembering the time I went up there when I was a tot.

KEWB belonged to the Oakland Tribune for decades as KLX, was sold in 1966 to Metromedia and became KNEW. This was when MM was trying to make a big splash in Bay Area broadcasting; they also bought KSAN-TV channel 32 (one of the oldest UHF TV stations on the West Coast), and KSFR radio (now KSAN).

But KEWB/KNEW was just not the same after the end of rock and roll. I don't believe it ever reached prominence after the glory days of Chris Borden, Michael Jackson, Buck Herring, Jim Wayne, Casey Kasem (yeah, that's the guy), et al. Today it's automated.

IJ>>Also, David's politics can best be described as libertarian,
IJ>>which places him in a different category altogether from Rush.

IJ>More power to him then. Is being compared to Rush THAT bad?

It's an apples and oranges comparison. I think we have to define conservatism as espoused by "new" conservatives. "Classic" conservaitves, as I call them, would be horrified at Gingrich, Limbaugh, Buchanan and the like. "Classic" conservatism would oppose any governmental intrusion into issues of morality, EEO, quotas, etc. They'd say that was the job of the Churches and other entities charged with molding good people.

By latching on to "family values" they're adding terrible baggage to what should be a goal of keeping the infrastructure working so individuals can succeed or fail on their own merits.

In the 90's Libertarians are the real conservatives. They want the government out of everything, regardless of the ideological/moralistic agruments for "slight" intrusions by the government.

Current Talk radio is loaded with "new" conservatives. "You should be moral, like me" seems to be the operative slogan. Being "moral, like me" seems to demand one be white, male, anti-abortion and Republican. All others are tarred and feathered as "liberals."

Rich

739. WXTR-WZYQ "duopocast" <g>

Newsgroup: rec.radio.broadcasting
Date: 1995-02-04 01:41:34 UTC
From: Max Cacas - NPR News Operations - 202-414-2218 <MCACAS@npr.org>
Message-ID: <3gum0e$bjr@vixen.cso.uiuc.edu>
Source record: 34946

Last weekend, I had the opportunity to check out the new WXTR/WZYQ duopoly-simulcast ("duopocast"). For those who missed it, Liberty Broadcasting is operating under an LMA, and is working on an agreement to purchase, WZYQ-FM (103.9) in Fredrick, Md. This gives the former "Xtra-104" (now "The New 104, Xtra Oldies") a leg up in northern Montgomery County which its 104.1 signal from Charles County, Md. just wasn't quite reaching (and which had been the center of some of competitor WBIG/"OLDIES 100.3" promos.)

They must be delivering Xtra's audio from their Marlow Heights studios (in Prince Georges County, right by the Beltway) on a satellite uplink, or perhaps a Zephyr/ISDN feed...incredibly crisp and clean. (If anyone has any insights into how they're doing it, I'd love to hear the details.) The ID at the top of the hour (:55) stopset is long...something like "The New 104 is WXTR Waldorf/Washington, and at 103.9, WZYQ Braddock Heights/Fredrick". What was interesting was punching back and forth between the two frequencies, and hearing two distinctly different sets of commercials on each station! 103.9 had on a bunch of exclusively Fredrick spots, while 104.1 had Xtra's usual run of D.C./national commercials.

I'm curious to see if Liberty will continue to market both frequencies separately (i.e. 103.9 as "Fredrick/Montgomery County" and 104.1 as "D.C."), virtually dobling the available commercial inventory, or whether they will eventually integrate inventory and sell both as "one" station with a huge geographical reach. Is what I heard in Fredrick the exception, or the rule in LMA simulcasts?

Cheers,
Max

On Friday, 10 January, 1995 the four most powerful (in terms of wattage) stations in Charleston will go off the air at Midnight eastern. They should only be off for a few hours, but for those of you in the mid-atlantic, and especially in the Ohio Valley, this could be your chance. Last time, I was able to hear Windsor, Ontario in southern West Virginia. These are the stations and frequencies:

WCHS(AM) - 580 kHz
WCAW(AM) - 680 kHz
WVAF(FM) - 99.9 MHz
WKWS(FM) - 96.1 MHz

If you need any other information, EMail me.

G105 (WDCG) is based in Durham and is part of the Raleigh/Durham/Chapel Hill market. I am unsure, but the call letters probally has something to do with the previous owners, the Durham Sun. It probally stands for 'Durham Communication Group' or something like that. They were sold last year to Prism radio, and are a duopoly with WZZU (93.9), licensed to Burlington, NC.

> WDCG is in Durham, in the Raleigh-Durham market. Actually, DCG
> is just a carryover from their earlier format. USed to be, Durham's Country
> Giant. :-)

And it was named in the early '70's by Rob Friedman, who went on
eventually to become PD at Channel 5 in NY, the last I heard of him. At
that time it was the FM side of WDNC, a 36kw horizontal thing on the east
tower. Hardly a giant.

And hardly country. They never did go with the format. It went straight
from easly listening to Top 40 as I recall.

My first job in NC radio was running the transmitter for both stations,
while doing weekend jocking, sales and other menial tasks.

Now the station radiates from the antenna farm far to the Triad side of
Chapel Hill.

Ah, how I miss the old North State.

Doc Searls
Ex-WDNC, DCG, DBS, QDR, etc.
Oh, and a Guilford College alumnus too. Helped start WQFS there.
Now doing other things in CA.

Almost nobody else. WKCI in Hamden-New Haven, "KC101," does
alternative rock on Sunday nights (and perhaps other nights as
well -- Sunday nights is when I've noticed it). The show
is called "Planet Zed," and it's pretty good indeed.

I lived in CT back in the mid to late '80's to attend Central CT State University and was CE, PD and GM at the school's radio station, WFCS (then 97.9, now 107.7).

When I arrived in CT I was appauled by the "boring sterility" of the Hartford market. I sought concensus in the staff and changed WFCS's format to total "New Music" in 1985. The change in format was greeted by instant success by the listeners in the New Britain -Hartford region; the phones would ring off the hook! The station sponsored parties at the Copper Penny Lounge on Broad St. in New Britain which were always filled to capacity.

I am very suprised that no station jumped on the Modern Rock (New Music) format sooner with the apparent success of WFCS. The only response I got from the other station operators was the fact we processed our audio too much for a college station (we were one of the only college stations in the area at that time that used an Orban 8100) and they had to boost their's in turn. Not bad for a Class D running 36 watts ERP!

I wonder if there is anyone who used to listen to WFCS back in the 80's?

Anyway, it's fun to remember days gone by as I sit here at work in New Jersey!

Carmine I.

Pure Bull. If WWV, WWVH, and the Weather Service stations were using
government funding to provide time and weather with a political bias,
this would be a valid question. I haven't yet seen how a "tick, tock" or
a weather forecast can have a built-in bias. And, unlike NPR stations,
WWV does not use coerced tax funds to unfairly compete (in the
marketplace of ideas and in ratings) with commercial stations.

: > Let's distill the argument further: should we de-fund WWV/WWVH/WWVB? If
: > we're going to privatize the Weather Service, why not privatize the NIST?

: Re-read what I wrote. I did NOT ask whether the National Weather Service
: should be privatized. I DID ask whether there was a comparison with the
: National Weather Service's NETWORK of radio stations. There is a
: difference. The hypothetical question is whether the NETWORK of radio
: stations should be privatized.

There is no comparison. A case could be made for selling off these
stations, too, but that is not the issue here. The issue is governmental
funding of an outlet for extremist viewpoints that offend a large
component of the electorate.

My experience is with Switched-56, but I believe ISDN (64 kb instead of 56kb) is similar in that you should have a full duplex connection: broadcast quality audio in both directions on the same circuit. Presuming you do, your main studio should be able to send you a mix-minus signal for your return cue or IFB (interruptible fold back); that is, you should receive everything that's going thru the on-air console MINUS your own signal. That avoids the annoying echo-back. If you can't get the return cue via the ISDN line a simple alternate solution would be to get your mix-minus signal on a regular phone circuit ... probably a little less expensive than the ISDN line and you don't need broadcast quality coming back to you (under most circumstances) .. you just want to hear your cues and what others are saying to or about you ;>

All the best.

Ron Versteeg (ron@euronet.nl) wrote:

: Our radio-station uses ISDN links from location to our broadcast studio.

How fortunate for you. ISDN links are extremely high quality but
are beyond the budget of many stations in the US.

: My return-signal is the normal radio signal (transistor or car-stereo)

: Now my problem is: There's a 0.75 sec. delay between the location
: (me) and the broadcaststudio (where our news anchorman is situated.)

Everything is moving at the speed of light and can go no faster. As long
as the return path is radio, you will have this problem. There is a
way that I can think of to reduce this problem for you in the field.

ISDN setups can include a return line from the station. This will
be a cost consideration for the station. If the ISDN path is set to be
one way only, you can use a telephone line instead.

At the station end, use a phone coupler interface and feed it with audio
from the audition or utility buss. Here in the US, my experience is that
these are fed from the audition buss. The selector switches should be
set to feed you everything EXCEPT your own voice. This is called a
mix-minus.

At the reporter end, you would have another phone coupler and a headphone
amp. If the ISDN has the return path, it is simply fed audio from the
station and no phone couplers are needed. The return audio is fed to the
headphone amp, and you can then hear.

On your end, you simply can have confidence that the board operator will
pot you up at the appropriate cue and that your voice sounds good, or you
can give yourself a "local feed" of just your own voice blended with the
mix minus of the station feed. Most headphone amps accomodate two inputs
and can me summed to mono to facilitate this. At any rate, you will be
on a trust walk that the board op will be potting you up appropriately.
This will eliminate the echo effect of your voice coming back out of time
with your report. It also eliminates the possibility of the delay
rolling back to the station through your microphone making you sound like
your broadcasting from Saturn.

I hope this helps.

About a year ago, I had noticed that Dick Summer
was doing a network talk show on one of the second tier AMs in West Palm
Beach, WBZT.

The dial was set there the following morning when I heard what
sounded like something that had to be Joey Reynolds. I figured it
was a syndicated show across very small radio stations. Then I noticed
that Joey was talking live with the traffic person.

The guy who ten years ago was making 100 large filling in for
morning shows across the country was now working at a station that wasn't
even in the top ten in West Palm Beach.

I listened for a few mornings, but since I was anever a fan, I
found it more a curiosity than anything else.

Recently, I noticed a huge billboard of I-95 south introducing
"The I-Man," Don Imus on the WBZT morning show. I don't know where Joey
Reynolds is, but he's not doing mornings in West Palm Beach. BTW, WBZT
recently reached the top ten for the first time in over a decade. They
are now number ten 12+ in West Palm. Years ago, as WIRK-AM, they were
the top rated top 40 station. Those call letters now live with their
top rated country FM.

I have written a computer program (called MusicList) that creates daily, hour-by-hour music playlists using programming details (separations, rotation clocks, etc.) that are entered separately into the program. The program was designed to be used by small or medium sized stations. It is similar in many ways to the PowerPlay program marketed by TMCentury, but MusicList is less elaborate. MusicList's price is also much more affordable by tight-budgeted, smaller stations.

If you would like more details about MusicList and how it can help with some of your station's music programming chores, please E-mail me directly.

(Also, please let me know if rec.radio.broadcasting is an appropriate place for me to post this message and if it is not, please direct me to a better newsgroup.)

Thank you for your interest and help.

That is one of the sins of plugging into a satellite music service. It
usually doesn't work for long. The listeners soon figure it our after they
hear the announcer go out of his way to not mention the call or station
logo, except in prerecorded bumpers. And when there is a real important
local story, no mention by the D.J., if not a dead giveaway, will make even
the most dense listener think the station doesn't give a damm.

Unless the majority of the audience doesn't care where the air personality
is, it usually backfires on the station.

We might be asking for much. In smaller areas, unless all the stations
have gone to satellite, there often is some level of local content, but it
is usually in the form of news,, community events, obituaries, etc.

Most of the formats you mentioned abouve, generally get minimal, if any coverage,
because, out side of the biug cities, or where cultural backgrounds play a role,
there is minimal interest. So don't go looking for Zydeco music in Kalispell, MT,
you probably won't find it . . .

I'd rather see local churches on NCE, than any of the "network" type stuff

However, if the station was part of a larger institution, that might be
a different matter. Moody Bible Institute in Chicago runs WMBI, with

some network programs. Is that really any worse than Santa Monica College's KCRW running mostly NPR throughout the day . . .

I think it's unethical. But insignificant compared to the even more unethical advertising. These exaggerations are designed to relieve people of their money. Listen to what the spots actually say, while pretending you are an alien, who just learned the language, and hasn't been jaded by years and years of TV and radio advertising.

An embarrassing "True Radio Confession" follows..... but I was young then, OK?

When I was a jock on a local station we made up little cards to help us read the weather......

In Jobstown it's ___ degrees. In Bordentown, ___; Delran ___, and in downtown Mount Holly it's ___.

And we made up the temps... adding a degree or two if the town was to the South, and subtracting if to the North. And we had a bunch of cards with a bunch of towns in rotation. Except for me, I 'adlibbed'..... using the most arcane names I could recall.

In Ong's Hat it's ____.....)

Once, I got confused and gave three different temperatures for downtown Mount Holly. I heard the words coming out of my mouth, but it wasn't me speaking, honest!

And this deception lead to bigger deceptions.

You see, this was when a Station Inspection of transmitter site was required five times a week, even if the station was remote control. And if it was a Directional Antenna it had to be within the first two hours of operation of each pattern. I was the mid-day man, going to the transmitter 6 to 8 AM and then the studio for my airshift. 'Cept it was a daytimer, and when the winter came I did the 1 PM to 5:30 PM airshift. When I complained about the five hours of slack time between 8 AM and 1 PM the station owner 'suggested' I go to the transmitter only every Friday morning and fake the logs.

"And you'll still pay me for two hours every morning?"

He didn't like that part! "Hummmmuuunm, well,....er....yes!"

I confess, dear reader. I was a radio prostitute.

The saga concludes:

To this day, down in the FCC office in Washington, D.C., there exists a letter in my file, written by the station's attorney, signed by me, stating I erred in judgement, and promise I will never, ever falsify log readings again. The station got eighteen violations that inspection, of which that was the only one I participated in. Things like no audio proof, no RF proof, unlicensed aux. transmitter, an unlicensed operator, illegally modified equipment. But, hey, at least we always signed off at sunset when we were supposed to!!!!

About ten years later the station lost it's license altogether for lack of candor before the FCC and the IRS on a purported illegal exchange of stock and money. I had nothing to do with this, honest!

So you see, Darin, what a tangled web we weave when first we start to deceive!

Clean up those liners!!!!! <grin>

Bruce at, er, some small local TV station.
(where I ALWAYS keep the logs up to date)

The Gainesville station is KECS. Based on what has been filed, KECS would remain a C2 and KICI-FM-107.9 Corsicana would be reduced to a C2 from a C1 (why not kill off one and upgrade the other?).

> >Confusing? you bet. Has anyone ever heard of a single format being simulcast
> >on three different FM's in a market? I have heard of several 2 FM formats like
> >this in Atlanta etc..but not three. I should note that 107.9 is in Corsicana
> >...about 45 miles south of the D-FW area...99.1 is in Denton..about 30 miles
> >north of D-FW...and 106.7 is in Granbury..about 40 miles southwest of D-FW.

KDZR-99.1 is licensed to Denton, but its tower is in Wise County around Bridgeport and Decatur, so they are really 35 miles NNW of Fort Worth and much farther away from Dallas, hence the need for KICI-FM in Corsicana to the south of Dallas.

Incidentally, Heftel's LMA of KDZR began today. KDZR is now simulcasting KICI-FM and KICI-1440 Denton's "Hot Tejano Hits, Kick FM" format.

> a strong force in the Spanish speaking radio market. Today,
> the only Spanish speaking FM signal that I can receive in the
> Dallas northern suburbs is KRVA at 106.9 in McKinney (30 miles N
> of Dallas). The signal drops off once you enter the city of Dallas

Note that KRVA-1600 and KRVA-FM-106.9 are trying to LMA the now silent KTCY-104.9 Denison. KTCY is to upgrade to a C2, change tower locations to southwest Grayson County (near Collinsville), and change city of license to Pilot Point.

And speaking of other Dallas move-in's, don't forget KKDA-104.5/730's owners are buying KSTV-FM-105.7 Stephenville. KSTV-FM has a pending application to change city of license to Decatur and build a 2050' tower outside Fort Worth to cover all of Dallas/Fort Worth. The upgrade will force country KICM-105.7 Healdton-Ardmore OK to have to relocated to 93.7.

767. Re: Spot Production Info

The best way to keep em' listening is to start your breaks off with your best production, this would be agency spots such as Coke or Bud. Pretty much anything that is a full sing or a donut. Then go down the line until you get to the worst, like dry reads and just spots that are boring. Always jingle out and always keep your voices mixed. Example: Don't run Joe Jocks spots together, split them up. When a listener hears the same person talking it can make 2 minutes seem like 10 and they will probably tune out before you get back to the music. Always jingle out or run a promo out.

Hope this helps people out with setting up a good stopset.

>watts, receivable at night in 38 states].
>

Signals from Boston stations are a very mixed bag when it comes to
European reception. WSSH 1510 is by far the most regular. This winter it
has been audible virtually every night at my UK location.Once the
dominant Belgian station on 1512kHz goes to bed for the night WSSH is
clear channel into Europe.

The next most regular but only heard some nights is WEEI 850.

After that come WRKO 680, WBZ 1030
then WBNW 590, WEZE 1260
and then the ones heard once in a blue moon WROL 950, WILD 1090, WHUE
1150.

776. Temporary Tampa triplecast

Newsgroup: rec.radio.broadcasting
Date: 1995-02-04 01:43:35 UTC
From: jeff560@aol.com
Message-ID: <3gum47$c27@vixen.cso.uiuc.edu>
Source record: 34983

In the Tampa-St. Petersburg market, the nostalgia format which has been simulcast on WGUL(AM) 860 Dunedin and WGUL-FM 105.5 New Port Richey is now also being heard over WBSB(FM) 96.1 Dade City, effective February 1. Both FM's are currently Class A's.

The company which owns WGUL plans to purchase the 96.1 FM station so that it will continue to have an FM in the market once it sells the 105.5 station to Citicasters, which owns WXTB(FM) 97.9 and Channel 10 TV in this market. The 105.5 station is expected to be upgraded soon, because a co-channel station in Sarasota will move to 104.3, among other changes.

WGUL simulcasts on AM and FM because the two signals tend to cover different parts of the metro, which is made up of four counties. The combined AM/FM share in the Fall 1994 survey was 7.2, the highest ever. That puts it in third place, right behind WQYK-FM and WXTB(FM), even though the FM is Class A and the AM is 2000 watts. Of course the station doesn't do nearly as well, however, in other demos that are often quoted.

I believe these are the other full- or part-time simulcasting stations in Tampa-St. Petersburg: WMTX(AM) Pinellas Park and WMTX-FM 95.7 Clearwater (Mix 96); WLVU(AM) Dunedin and WLVU-FM Holiday, standards; WXYB(AM) Indian Rocks Beach and WPSO(AM) New Port Richey, which broadcast mostly in Greek to different parts of the market; and WJIS(FM) Bradenton and WLPJ(FM) New Port Richey, religion. Incidentally, WLPJ(FM) is a non-commercial station named after WPLJ(FM), a somewhat more famous station in New York which was the favorite station of the person who started WLPJ.

There could have been what I believe is called "auroral absorption."
This has nothing to do with the Chicago suburb (bad pun), but instead
involves the aurora borealis.

If it is especially active (i.e., a lot of the northern lights due
to solar activity), it will prevent the usual
skywave paths from setting up. In Missouri, some years are much worse than
others. This year hasn't been too bad. Some years, this condition would
hold for two weeks at a time. What you are describing is absolutely
typical of this condition. Chicago stations (and others to the north)
just don't come in.

> Another strange thing, is since Monday, I have been receiving
> excellent daytime (no fade groundwave) from WMAQ, WGN, WBBM as well as
> some Nostalgia (big band) music on 1000 khz. All day long. WGN was

>
Could the big-band station possibly have been KOTD in Plattsmouth, Nebraska
(near Omaha)? It's a 250-watt daytimer at 1000, adult-standards format.
I can pick it up in the car on K-10 between Lawrence and KC. (If you hear
polkas on Sunday, it's KOTD.)

As for the other phenomena: you've just gotten rid of 16" or so of snow.
Up to your northeast, it was more like 19" around Columbia. (My mom didn't
seem to mind: she has good neighbors, plenty of food, and home shopping on
the cable -- so she just waited it all out!). You're on the border of an
area of 15 mmho/m ground conductivity (essentially, the northwestern 1/2 of
Missouri). Furthermore, there's another island of 15 mmho/m starting at
St. Louis and reaching to Chicago. Most of the rest of Missouri is 8
mmho/m, except for a *30* millmho/meter area in the northwesternmost corner
of the state.

Combine that kind of good-to-excellent ground conductivity with a continuous source of moisture from melting snow, and you're bound to get enhanced groundwave reception. It's been a relatively mild week, at least in Kansas City, but I think it's been colder where the snow really hit, so the cold weather may also be enhancing groundwave reception.

I haven't noticed anything exceptional in Kansas City, but we only had 1" of snow in the center of the city and it all was gone in 12 hours.

That's my try at an explanation.

I can't explain everything you experienced....but I may have an answer
fror some of the Spanish broadcasts. WMAQ is a sister station to mine
(Group W) --- engineers believe the spanish language broadcasts originate
from Cuba which has a habit of broadcasting on clear channel frequencies.
It's not unusual for Cuba to broadcast with a million watts or more. I
get the same signals here in Pittsburgh overnight. No real pattern...some
nights MAQ comes in clear ...other nights it's all Spanish all the time.
We had a similar problem with a religious station in the British West
Indies...again broadcasting at a millon watts...interfering with KDKA on
1020....even in Western PA. In this case...there was a treaty violation.
Not so with Cuba...we have no broadcasting treaties with them.

(Lord, I wish my A100 was working- Hasn't worked since the '92 triple
earthquakes here in Eureka, CA...)

I've had similar experiences with my A100 when it was working... :) I
remember one winter day picking up KRAK from 11:30am-3pm, some 300 miles
away from me, with the signal indicator on full... I didn't have my
Select-A-Tenna back then, nor did I have it when I was listening to KNBR
on Xmas morning, 1988 to 11am, with the indicator at full strength, and
the station was playing its music in Kahn stereo back then... In early
1992, before the quakes hit here, with my Select-A-Tenna, I got
full-strength on a country station in south-central Alberta, Canada at
4pm, also from here in Eureka, and that was over 1000 miles!

Even though it still hasn't been repaired since the quakes (I really
can't afford to get it repaired), I still have the radio, and I sorely
miss the pleasure of AM stereo DXing... :)

: I am almost 600 miles from Chicago. It as like day and night was reversed.

I'm 300 miles north of San Francisco...

: Any ideas DX hounds?

By the way your post describes it, it sounds like a solar flare occured,
and the daytime layers of the ionosphere are still quite charged, giving
you teriffic daytime DX.. :)

rrb@clm.aiss.uiuc.edu writes:
>Any ideas DX hounds?

Yep

There was a medium size geomagnetic storm in progress. The effect of this is for the normally "reflective" ionosphere (off which night-time MW signals bounce) to become absorptive. This doesn't happen everywhere at once, but as the magnetic storm progresses the region of absorption moves outwards and southwards in a donut ring shape centered on the earth's magnetic poles.

The consequence is that signals north of your location get absorbed instead of being bounced back down to your receiver as they normally would. Hence total silence leaving frequencies clear for reception from the south. In this example the donut ring would have been positioned north of you leaving clear the route south. The bigger the storm the further south the absoption zone moves. If it moves far enough south so that it covers your location then it'll hinder reception in all directions. If the magnetic storm is strong enough not only does it affect radio signals but it can result in a visible aurora or the Northern lights.

This is just a quick thumbnail sketch of what is in fact a complex (and not 100% completely understood) phenomena. Hope it helps

This seems to happen around this time of the year. I've suspected it to be
a high altitude temperature or some similar phenomenom. I theorize that it
is due to the jet stream being pushed downward by masses of cold air. This
layer will lock out most medium wave DX reception.

> In place of all of these signals was STRONG Spanish radio (different
> signals) which were quite dominant. When they faded, there still was

This area can be quite large. Usually I find that small stations under the
"dome", normally obliterated by DX or too weak to come in, will have their
skywave trapped by the effect and be audible beyond their normal range.

Although I've never heard what you described, there is a possability that
this dome had an open end or hole in it that happend to let in, and
therefore trap DX that is normally blocked out. I'd venture a guess that
you were getting Cuba, they like operating on the same channels as major
stations in the Northern US.

This is a cold weather thing. Since I live inside a major market I never
expierenced it, but I've been told about it before.

Somewhat interesting, because before last night (Feb. 1), I had never heard of KFAB. I was on my way to church c. 5:45 P.M. CST last night. I was wanting to listen to the Cavs' pregame on 1100 WWWE, so I went to 1120 KMOX (I only have 2 AM buttons on my '83 Corlla standard radio with only average DX performance) and passed by 1110. I guess the local station was off by then, but I expected it to be WBT. I listened and kept hearing about a riverboat in Council Bluffs and the mayor of Omaha. It came in fairly well. I heard the KFAB tag by the reporters. Is this a station I should count on getting here in North Alabama? At least I get to add Nebraska to my received list (I can add it to Channel 2 in North Platte). DX is fun, but my wife doesn't understand.

From: WCHSNews@aol.com
Message-ID: <3gum4v$c5e@vixen.cso.uiuc.edu>
Source record: 34990

Since I posted the article about 'CHS being #1, I've gotten a lot of messages from people who have fond memories of the station. So, I thought I'd share this anecdote with everyone:

WCHS has been a loyal CBS affiliate since they started. In fact, we went on the air just days before the network did. As part of that spirit, some general manager many years ago decided to show our loyalty in a grand way--they constructed a giant (like 20-foot) CBS "eye" logo in the parking lot. It's made of marble, or granite, or something appropriate for a monument. So the crew at the time (this was many years before I joined) had a photograph taken with everyone standing around the eye waving. The photo was sent to CBS in New York.
They were not amused.
In fact, they were so infuriated we were parking on their logo, they ordered us to pave it over. And to this day, if you stand in the parking lot you'll notice a 20-foot circle that is a little higher than the rest of the surface, and separated by a 1/2 inch crack.
There is (to our knowledge) only one surviving photograph of this monument. It's really neat.

Anyone know how to carefully remove asphalt?

Message-ID: <3gum55$c6i@vixen.cso.uiuc.edu>
Source record: 34992

For all you history buffs... we are compiling a complete history of WOOD Radio from its creation to present day, and have a timeline on our web site so far. As more details become available, look for the site to have a special history section with some pictures (not big ones, so dont worry) and misc. info about the stations. WOOD-AM is 70 years old, and WOOD-FM remains the third largest FM facility in the states. Check it out when you get a chance!
<A HREF="http://www.grfn.org/~radio/index.html">

Here is a timeline:

1924 - Beginning in October as WEKB, a 20-watt station on frequency, 1240 khz, WEKB was the first broadcast station in Grand Rapids. It was the creation of two local businessmen, Leo Jay Robinson and Don Gildersleeve, and operated with the financial support of the Furniture Manufacturers Association of Grand Rapids and Walter B. Stiles, co-owner of the city's leading lumber company, Stiles Associated Yards. On December 21, the call letters of WEKB were changed to WOOD and the power was increased to 500 watts.

1925 - On March 13, Grand Rapids' second commercial radio station came into being (WBDC). The station call letters stood for "Worldwide Baxter Dry Cleaning," a laundry firm under the same ownership.

1928 - As a result of a major frequency reallocation plan affecting most United States broadcast stations, at 3:00am on Saturday, November 11, WASH was ordered by the FCC to share time with Grand Rapids' WOOD. The two stations merged equipment and staff to become known as "WOOD-WASH ... This is Grand Rapids." WASH aired from 8:00am to 12noon, and was replaced by WOOD from 12noon until 12 midnight.

1936 - WOOD (now 500 watts) affiliates with Red and Blue networks of NBC.

1941 - WOOD was authorized to change its frequency to the present 1300 khz, and increased its power to 5,000 watts. The WASH call letters were dropped completely.

1949 - WOOD Radio and WLAV-TV purchased, telecasting on Channel 7.

1957 - Time-Life purchases WOOD-AM/FM/TV, a single operation until WOOD Broadcasting bought the radio stations in 1972.

1962 - WOOD-FM signed on the air at 12:00noon February 26 during broadcasting's first triplecast on WOOD-FM Stereo, WOOD-AM, and WOOD-TV. WOOD-FM, with 265,000 watts of power, is still the third most powerful FM facility in the United States.

1967 - WOOD-FM 105.7 becomes the first U.S. station to attain #1 listenership ratings among all stations... FM and AM in its market.

1982 - Michigan's first AM station to convert program service to full stereo.

1991 - WOOD Radio Limited Partnership purchases WOOD-AM/FM.

1992 - On January 1, WOOD-FM becomes EZ-105.7 FM with a format change from instrumental easy-listening to soft adult contemporary.

:Hey, nice try, sneaking it in as you did, but KCBS in San Francisco is
the
:first broadcasting station in the world, opened in April 1909 by Dr.
:Charles Herrold in San Jose as "San Jose Calling". This predates KDKA by
:11 years. KDKA was arguably the first *licensed* broadcast station.

The fact is "radio" was being used by many in the time period. The
Pittsburgh Antique Radio Society says it was kind of like the CB craze.
People would transmit to each other. KDKA IS the first licensed broadcast
station in the world ...it is teh FIRST station to begin REGULARLY
SCHEDLED BROADCASTS. Our License is #0001. Sorry ;o).

In a previous article, honzman@aol.com (Honzman) says:
>There are plenty of stations serving THEIR LOCAL markets.
>that's the way it's suposed to be. Stations are NOT licensed to serve the
>public interest of people many states away.
>That's just MY opinion....I could be wrong.
>Fred Honsberger

Let's take a look at what we are "protecting" by eliminating clear channel radio. Local programming, as Fred suggests? Not around here. Most small stations do no local programming at night, when the clear channels begin to appear. Instead they carry satellite programming that has no special interest for the local audience. I enjoy some of the satellite programming, but must it really duplicate itself at a dozen different spots on my AM dial?
On the other hand, I can tune in the clear channels and hear a ball game from Dallas or Detroit, classic old-time radio from Chicago, non-network talk from Atlanta and Pittsburgh, regional news from Denver and Boston.... When the temperature is below zero here, I can dial up New Orleans and hear weather reports to dream about. And we've all heard stories of the guy in Montana who drives his pickup truck a hundred miles to a mountaintop where he can pick up WHO and listen to late-night replays of the Iowa football games.
I hate to see this rich diversity of programming replaced with "local" radio that, although broadcast by a nearby transmitter, actually originates in a studio in New York, by a jock who can't tell you the local temperature or even the local time (27 minutes past the HOUR). The average American moves every five years. Many of my colleagues are from other parts of the country, and their only link with home is a late-night clear channel radio broadcast. ---Dan

Is this a translator, or a "rea" station. If it's a translator, I didn't know it was legal to have FM translators relaying AM stations . . .

(P.S. Know more about this?)

Honzman (honzman@aol.com) wrote:

[About KDKA.]

I think there is a difference between the change you made at KDKA and the changes that are being proposed at WOWO. Here is how I see it:

1. KDKA *still* has its Clear Channel status. You are still 50 kW and yes you may have adjusted your signal so that it is more concentrated on the Pittsburg area, you still have the ability (and you are heard) to be heard all over. The chnages being proposed for WOWO would destroy its ability, whether it uses it or not, to be able to be a Clear Channel.

2. Geography figures in here too. Pittsburgh is a major metropolitan area with large suburbs. The area is densly popluated, but I feel that areas around PA are all seperate enough that they need their own local radio stations to adequately sever their local populations with local info. such as weather, school closings, etc. However, in the mid-west where it can be miles from town to town and a local station at 5 kW may not serve all the population in a spread out area needs a station like WOW with its 50 kW signal to cover the far out areas. A station such as WOW has the unique ability to cover many areas with its strong signal which night not otherwise be served by a local station because of distance. WOWO might not be liscenced to serve a far out rural town, but it really does serve them because that town may not have the resources to support a full-service station such as WOWO.

3. Precedent. I hate to reinterate everyone elses point, but if the FCC can destroy one clear, what about the others? And could this possibly spread to the FM band where the FCC could begin to downgrade 50 kW and higher stations to allow more low powered "local" stations onto the FM band? Could we end up with AM and FM bands that are so crowded that there is a station on every frequency and the band is so jammed that nothing comes in clear? It may be far fetched, but, one decision leads to another and in a day when it seems that new stations spring up all the time, I feel this is possible.

I am not saying that there were not good comments made about KDKA, but something bigger is operating here. What? Many things. Comments anyone?

: If that's the case, then why were there Clear Channel stations in the
:first place? It was because there were areas that were not served by
:local station, and now with sattelite radio, duopolies, and the nonsense
:that is going on now in radio, the situation has come full circle. Local
:stations aren't serving the public interest.

BINGO! The key work here is "why WERE there..." Clear channels no longer exist. Once there was a time when KDKA was the only station on 1020. Take at look at the M Street directory now. The frequencies are being given to stations in smaller markets to serve THOSE markets.

My KDKA example IS valid. It shows that the LOCAL coverage area IS what is important. 38 states is nice --- but it doesn't earn us any more $$$ and that IS the point of it all, like it or not.

Concerning a power-down of KDKA...I suspect that if Group W's WINS were on 1020 instead of 1010...and a KDKA power down would improve the WINS signal --- Group W would do it. N.Y. is a bigger...more lucrative market that Pittsburgh. Remember (sad but true) is the $$$$ that counts...NOTHING ELSE!

Pretty amazing, Mark. When I left Ft. Wayne in 92' WOWO was AC and did less news and information than the automated 5kw AM I worked for (WQHK). I really feel that the need for Clear Channel powerhouses is over. Most every market now has at least three stations, and I think that the big boys powering down may afford small local stations to start picking up listeners, adding staff, and then serving thier community better than the Clear Channels ever could. I have to admit though, I was kinda fun listening to Komets hockey here in Atlanta. BTW, what station do you work at up there?

WSSH 1510 (Boston) is a 50,000 watt station. It is not usually spoken of in the same breath with WBZ and WHDH^H^H^H^H WEEI because WSSH (in my opinion) doesn't cover the market as well. To begin with, the ground conductivity in rocky eastern Massachusetts is next to nothing, so stations high on the dial tend to have poor coverage.

Originally WSSH was WMEX, once a rock and roll powerhouse with its transmitter in a salt marsh near the mouth of the Neponset River in Quincy, Massachusetts (south of Boston). In those days they had to go to 5 kW at night. In a later incarnation WMEX (later WITS) was a talk station that carried the Red Sox, who were not happy with the nighttime coverage. The Waltham transmitter site was chosen to allow the station to stay at 50 kW all day and all night. Unfortunately the main lobe of the radiation pattern extends to the northeast, straight out to sea, missing most of the city.

The four towers of the WSSH array are physically short; so is the ground system which, furthermore, has been paved over for a parking lot. There are buildings in close proximity to the towers as well.

91X is XETRA-FM, licensed to Baja California, Mexico. The X is
correct because technically it is not a U.S. station.

Major news in the #40 market.

Today's(week of Feb.6)Business First reports that Rich Communications is planning to sell off ALL its radio stations. The deal,which according to radio scuttlebutt has been in the works since last fall,could go down as soon as this spring. Here's what the talks center around:

*Rich Communications would sell the "intellictual property"(an oxymoron if I ever heard one)to Keymarket,owners of-among others-WBEN(930,news/talk) and WWKB (1520,hot talk). That would include Buffalo Sabres(NHL)and Buffalo Bisons (American Association,Triple A baseball)broadcast rights,and all on- and off-air personnel as well. Plus,WWKB would switch calls to WGR.
*WGRF(97 Rock,classic rock)and WUFX(103.3 the Fox,album rock)would be dealt off to Charles Banta,former GM and exec.V-P for the station. Banta,now working for Greater Media's radio division in East Brunswick,N.J.,couldn't be reached to comment.
*WGR(550)and WWWS(1400,business/talk;3WS)would be sold by Rich Communications to an out-of-town company with a history of religious broadcasting(maybe Salem? It's a guess on my part,not Business First's). 'GR, and possibly WWWS,would switch calls.

Once completed,it's expected that the calls and programming changes at WGR and WWKB would follow shortly. This doesn't need FCC approval because it involves programming,not who owns the station. The sale is still contingent on FCC approval,which could take 90 days-and raises the chance,slight as it may be,that the Sabres could switch flagship stations in midseason.

I'll get into more later...

all Arbitron Ratings 12+ for Chittenden and Grand Isle Counties as listed in the Burlington Free Press on Friday February 3, 1995.

Station (format) Share

WOKO-FM(Country) 17.6
WIZN-FM (AOR) 15.6
WXXX-FM (CHR) 13.6
WEZF-FM (Hot AC) 8.0
WEXP-FM (AAA/AOR) 4.8
WNCS-FM (AAA) 4.0
WCPV-FM (IMUS/CR) 2.4

The Free Press listed WNCS as the number 5 station in the market but they appeared to discount WEXP (Plattsburgh) and WCPV (Essex, NY), both New York Stations. I don't have access to any other numbers at this time. It would especially be interesting to see results for AM as well as FM stations and also the entire market which would include a few New York as well as more Vermont counties.

Also, according to the "FREEP," the number one morning show 12+ is WIZN's "Corm and the Coach" featuring WIZN PD Steve Cormier, University of Vermont Basketball Coach Tom Brennan, the Rocker Bill Corbiel, and a cast of many, many more.

This is the first ratings perod for both WEXP (Experience 105.1) and WCPV (Champ 101.3) both of whom signed on at the end of the summer. WCPV features Imus in the morning and a pretty traditional classic rock format the rest of the day. The "Champ" also features the top 40 (WDOT-AM 1400) personality from the 70's Ken Barlow pulling the afternoon shift. Wexp is a AAA / AOR Hybrid (actually, sort of hard to describe) and has had a rocky start to say the least. Original A.M. Drive Dana Jewell left after the first few weeks and landed at 620 AM, WVMT. He was replaced by PD Joel Bolton who joined morning co-host Jan Jacobs. In December of 94 Mid day-er (and once G.M.) Russ Kinsley was forced out of his shift (and apparently, his job as well) quite suddenly and has only been heard from on weekend airshifts. The Midday shift has been filled by a variety of people since then. There has also been lots of juggling of air shifts and changes in the station's sales department too as 'EXP tries to make things work.

Speaking of WVMT, the mighty 620...they have started using the phrase "OLDIES 620" full time and are runing some nice remixes of old PAMS jingles. WVMT is still very heavy into news, local sports, and is all talk at night. Afternoon drive personality
Greg Mumley recently swapped places with (former WEXP) Dana Jewell joining

Ernie Farrar in the Morning. Dana is now on in the afternoon with Franny Bastien. WVMT is also had quite a promotional kick with the return (yet again) of the "Chicken Man" radio series which will run twice each morning.

That's all for now. Here's hoping we actually DO get some snow this winter.

Regards, Joe

News since the last update...

Evergreen Broadcasting, owner of WLUP (Kevin Matthews, Johnathon Brandmeier), WMVP (Steve Dahl), and WRCX (Mancow Miller) is close to merging with Broadcast Partners (owners of WVAZ (urban contemporary), WEJM-FM and WEJM-AM (hip hop/rap). The combined entity would be the fifth largest broadcasting company in the nation. If the merger does happen, the new company would control approximately 14% of the Chicago listening market.

Also at WLUP, overnight hosts and ex-Chicago Bears Tom Thayer and Keith Van Horne have been dumped by the station. The overnight slot will now be filled by "best of" tapes of station personnel. It is unclear if Keith Van Horne's suit against Evergreen and Mancow Muller of WRCX played a role in the dismissal. Van Horne has not dropped his suit against Muller regarding statements made by Mancow regarding a traffic altercation between Van Horne and a female motorist.

Wayne Messmer, perhaps best known for his rendition of the National Anthem at the Chicago Black Hawks games, is close to landing a job at WPNT as newscaster on Steve Cochrane's morning show. Wayne replaces Eric Stallone who left the station late last year. (In an interesting sidenote, Messmer, who is the the Vice President of the IHL's Chicago Wolves hockey team was dumped by the Chicago Black Hawks as the performer of the National Anthem. The Hawks felt his work with the Wolves presented a conflict of interest. Gotta love the reasoning of the NHL powers.)

Torey Malatia is now the station director of WBEZ, NPR in Chicago.

Ron Rivera, another ex Bear turned broadcaster, has left WSCR for rival WGN. Rivera will cohost the Sunday "Sports Central" show with another ex-Bear, Glen Kozlowski.

While popular on the radio, Rush Limbaugh's television show is not going over well in Chicago. Rush draws a 1.4 rating versus 3.4 on a national basis. Perhaps his radio listeners would rather not see their hero.

"Chicago" Eddie Schwartz (WLUP, formerly of WGN and WIND) returned to intensive care at a local hospital suffering from an respitory ailment. Eddie has been off the air for over a year.

Bob Crawford, long time City Hall reporter at WBBM-AM is one of 8 inductees into the Chicago Broadcasting Hall of Fame.

>Does anyone have any information on the Memphis radio market? Latest arbitron numbers, hot talk around town, what's the city like to live in? I'm mainly interested in the AC format, but any information would be greatly appreciated. Also, is Memphis an

> AFTRA town...is there any voice-over work established there.
>Thanks. Please post here.
>

Here's a quick rundown of the Memphis radio scene. Smaller stations may be left out, as may some noncoms, etc. If you have any questions, e-mail me and I'll be happy to help. I include frequencies and calls that I reliably remember; for AM, that won't be many. Unless noted otherwise (or AM), all stations are 100kw, except FM100, which is 290,000 watts of grandfathered power :).

AC

--

The king of the hill here is 104.5 WRVR-FM "The River", the flagship of Keymarket's three stations here (one is the satellite-fed urban gold 680 WJCE-AM "Juice"; the other, WOGY-FM "Froggy 94" will be discussed in the Country section, below). They own the 25-54 demo, although Rush is fighting them to the death in Middays. The only other "AC" station in the market is our very own 99.7 WMC-FM "FM100", a Hot AC owned, with Newstalk 790 WMC-AM and WMC TV5, by Ellis Communications. FM100's been suffering from an identity crisis for quite a few books now, but we may be turning a corner, stay tuned...

Classic Rock

Your Classic Rock menu is a lot like fast food; a lot of places to turn, but not much variety. The only game in town used to be 102.7 WEGR "Rock 103/The Eagle", owned by Radio Equity Partners. The format was AOR/Classic Rock in a quantum state. The entry into the market of 92.9 Arrow 93, a 3kw light bulb with a transmitter located to the east, and the format change of WYKL "Kool 98" to an "Arrow-clone" Star 98, has forced Rock 103 to tighten up their format; they're a pretty standard Classic Rocker now. They're the big kahuna of REP's trombo; the other two are WRXQ-FM 95.7 "96X" and WREC-AM 600, now just going News/Talk.

The Arrow stations are a story unto themselves. Arrow 93 is owned by the Belz family, who made their money in a successful outlet chain. There is a _lot_ of money behind it, with a brand-new turnkey studio and digital production. The main lack now is talent and radio savvy. Incidentally, they bought the rights to the format name and liners from CBS, so they get to use the liners of the Original Arrow 93 without modification :).

Star is owned by Barnstable, who have a very successful two-station operation. WGKX-FM "Kix 106" at 105.9 is the country staple, and after much trial and tribulation, the station on 98.1 is beginning to show promise. Star has had several incarnations, from CHR to oldies (mostly oldies), but a horrible transmitter site has crippled their 100kw signal. After taking over "Oldies 98", Barnstable tried to run it with their successful "Kool" oldies format, but the market was just burned out on oldies. However, a few months before Arrow signed on, with CBS rights and all, Barnstable beat them to the punch with "Target 98 -- All Rock'n'Roll Oldies". A threatened lawsuit from Target Department Stores gave them even more publicity; they actually changed their name to '98.1 -- The Station With No Name", handed out No-Name tees everywhere, and ran a contest to come up with a new name. After the contest (and, I'm sure, focus-group) results were in, they decided on Star. With 100,000 watts of power and the radio experience of their managers, they seem to be the dominant of the two stations, although Belz can, I'm sure, broadcast as long as he likes whether he's making money or not. The final blow: Star is moving their transmitter smack into the middle of town (it had been in Arkansas).

Alternative

Yeah, right. Cynicism about the "Alternative" moniker notwithstanding, there are two FM's and an AM programming Alternative in this town. The aforementioned WRXQ-FM 95.7 "96X" is one of them. Most of the promotion and production is a straightforward rip-off of 99X Atlanta (unless they ripped it off from somewhere else). It's 100,000 watts, and, like Star, it's competitor is not hard-core radio. However, it wouldn't take much to knock them off the top of the hill, as it stands now.

Across the dial at 107.1, it's KFTH-FM, a former Christian station bought out by one Dr. George Flynn. As the man who invented ultrasound, he pretty much burns money in the fireplace when it gets cold. He owns three stations in Memphis, and one in Little Rock. The other two here are AM's, WHBQ-AM 560 and 1430 AM, whose calls escape me. He LMA-ed 'HBQ a few years ago with Barnstable; much to his chagrin, they put a fairly successful SportsTalk format on it. The feuding between them was legendary; at times, Flynn sold time on the signal and switched STL's without bothering to tell Barnstable! Barnstable had no control of the transmitter site which, apparently, was being run so illegally that the engineers who would work for Flynn had him sign papers acknowledging full responsibility for the state of the transmitter and the site; most engineers simply refused to work for him. Currently, he's simulcasting on 1430, 107.1 FM and the station in Little Rock -- WDRE off satellite. I tuned in to the AM the other day, and switched back and forth between the two signals; I had trouble deciding which was worse.

The ironic thing is that Flynn may still have a chance. As bad as the signal is, as bad as the local production is, the satellite programming is far and away better than that of 96X (I have not heard Flynn's local morning show). Unless 96 reacts with better programming, they may find him eroding their market share....

Country

A much simpler market here. Your typical Country standby, in this case, 105.9 WGKX "Kix 106), being harried by an upstart New Country, Keymarket's WOGY-FM "Froggy 94". After a bit of a shakeup (the book before Froggy signed on, Kix had a 16 share), Froggy seems to have taken all it can from Barnstable's flagship here. Both stations seem to be making money, and if there's one format I would bet on to survive around here, it's country.

Urban

..but not before placing a heavy bet on Urban. In a city with an African-American population of about 50%, the market is a lot less fractured, and the perennial #1 and #2 in 12+ are shared between WHRK-FM 97.1, KJMS "101 Jams" and WDIA-AM, playing Urban Gold, with some very successful Talk. K-97 and WDIA are owned by the same group, but, regrettably, I don't know much about these stations. If interest warrants, I will post more as I find out about it. One last thing....

Talk

..is owned in the city by two stations; NewsTalk 790 WMC is the hard-right format capturing 25-54 and up like there's no tomorrow. We have nicknamed it "White Male Conservative", and it pretty much is. To get any kind of non-white or liberal, turn to WDIA-AM, which, as mentioned before, combines urban and some talk to capture a large chunk of the talk-radio listeners not commuting in from Germantown. WMC has local programming in the morning, Rush and Ken Hamblin through the day, SportsTalk with Dana Kirk for an hour at 6:00, Ray Roberts (sort of a fast-talking Bob Grant) from 7-10, Gil Gross on refeed 10-1, then Art Bell 'til morning. And, yes, I do work there :).

There you have a broad overview of commercial radio in Memphis. For more info, e-mail me at upgroce@msuvx1.memphis.edu and I will field as many questions as I can. It's a very interesting radio market here, with lots of stories.

But hey, aren't they all? :)

800. Phoenix Radiowatchers 2/4/95

Newsgroup: rec.radio.broadcasting
Date: 1995-02-06 03:45:52 UTC
From: mhtv3@aztec.inre.asu.edu
Message-ID: <3h461g$g7b@vixen.cso.uiuc.edu>
Source record: 35007

Just finished listening to a legendary jock doing a (so-far) one-shot weekend gig....Chuck Buell(KIMN, WLS, KFRC) pulled a three-hour shift at K-HITS(96.9). Station P.D. Joel Grey, a Denver vet, is a big fan of Buell, who moved to Phoenix to follow his wife's career. It's been 21 years since I last heard Buell live (at KFRC). He's mellower, but still a first-rate air talent.

K-HITS continues to search for an afternoon drive talent. Market legend Steve Goddard was shown the door when the format changed two months ago. He was replaced by weekend jock Phil Abbott, who was gone in less than a month over issues of taste and content. APD/Midday talent Alan Cook is filling PM drive, with evening jock Greg Burns in midday until a permanent drive jock is signed.

Of the K-HITS casualties, only Goddard and morning newsreader Pat Powers are still on the beach...far longer than anyone expected for people of their experience, reputation and talent. As reported here previously, Danny Davis has landed mornings at competitor KOOL-FM, and overnight jock and Davis Producer Tony McGraw has parlayed a lifesaver weekend gig at KOOL into his old job of overnights(beginning Monday 2/6)and show producer for Danny and current sidekick Beth Fox. Swing jock Jeff Knight is also working, but out of the market.

KESZ(99.9)has decided not to replace longtime air talent Carla Foxx. Foxx, who was once music director for the AC station, and has been in the noon-4PM slot the last few years, is the new PD at KZRX(100.3). KESZ is filling the gap by lengthening the Beth & Bill morning show, which will now run til 10AM...strectching former PD Mike Del Rosso's 9-Noon show to 10AM-3PM...and shifting Perry Damone's afternoon shift from 4-8 to 3-7. KESZ is also dumping Dr. Laura Schlesinger's syndicated talker, which had run 8-10pm the past few months. Nancy Sherwood will play music from 7-12Midnight. That despite speculation that new PD Dave Winsor's full-service experience would lead KESZ in a more talk-intensive direction.

Rumors continue to abound that Carla Foxx will take KZRX talk. No official confirmation, but one scenario has the station taking Howard Stern live from 4 AM-8AM, then turning the tape around and replaying until noon. Don and Mike's afternoon show would then be starting live on the East coast, and could run until 4PM Arizona time, when Leykis goes live on Westwood One. With all that, there's not been much speculation about what runs from 8PM-4AM. I usually avoid editorializing, but just once....if somebody wants to make a load of money, look into syndicating KFI Los Angeles night talker Stephanie Miller, who deserves far more than the 2 hours KFI gives her every weeknight. If that show existed on a syndicated basis, that would be my pick for nights.

Jay Marvin's recent assessment of AFTRA:

> They are very slow to respond and when it comes to health
> insurance forget about it! All they do is take your $$$ and give you
> very little for it.

I've been pleased with AFTRA's health insurance service here in Chicago.

I usually receive reimbursement before my charge-card statement for medical services comes due. Plus, AFTRA's just expanded benefits--including regular physicals, well-baby care and things like mammograms--benefits I've never had anywhere else in radio.

I don't know why Jay's not getting the same service.

From: gilhaar@aol.com
Message-ID: <3h461i$g7i@vixen.cso.uiuc.edu>
Source record: 35009

AFTRA has and has always had many flaws, especially for people in smaller markets. Once, years ago, I was instrumental in decertifying AFTRA in favor of IBEW when in spite of major efforts on the part of the members it did not provide representation.

But I was a member from 1961 till 1994, when I was retired from radio. (You don't retire from radio; you are retired from radio.)

I have railed against it for its many imperfections for years, but even when it is imperfect, AFTRA is worth it for the representation it can provide and for the benefits.

Representation, as any good business agent should remind any union member, is all it can provide. "The Union" can't do anything and can't force management to do anything. A contract has two signatures on it. The Union is just that: a union of people who bargain collectively. If you're not willing to strike for it (whatever "it" is, more money, shorter shifts, breaks, just cause clauses or whatever) you're not going to get it. You, not the business agent, determine the terms of the contract.

Benefits are another matter. AFTRA's health plan is a good one and has just been improved a little. Your employer may have a better one, but it is not portable. When you change jobs, you lose it and go to whatever the new station has. If you go to another AFTRA station, AFTRA's plan goes with you. Anybody who's not concerned about that in this business has rocks in her or his head. The pension is also good, and also portable.

It may surprise some AFTRA people who have known me over the years to see this opinion, if they do, but it does not represent a new view of mine. I spent close to 40 years in radio news fighting cliches, but I can think of no other way to say it. To those who complain about their unions, "Remember, Union begins with..." No, it's no good. I can't bring myself to write it. But it remains true.

Nice to know you landed on your feet up there. I once applied to K-103, but nothing came of it. It's sad that AFTRA has wimped away. Most of the stations which were union in SF 10 years ago aren't union any longer, and the precipitous free-fall of wages clearly reflects that. It's gotten so that KRON now uses robot cameras for their news breaks. I was once told by a personnel person at KABL when I phoned inquiring about a job a few years ago, "Believe me, you wouldn't want to work here. You'd do better at a grocery store than you would here." <sigh> [To those who aren't aware, KABL was once a top MacLendon station, the originator of the "beautiful music" format, and a top ratings getter.]

I have listened to a few of these shows lately. I can see why it may be objectionable that these characters were created and played by white men in a time when opportunities for blacks were even sparser than they are today.

But I don't see what anyone could object to in the way the characters were written and depicted. It's true many of them spoke in dialect, but so have lots of white characters--Lum and Abner, Ma and Pa Kettle, The Beverly Hillbillies--but the characters on Amos and Andy have intelligence, character, warmth and humanity. The reflect much more positively on the human race than do many of the characters played by black (or white or asian) actors on TV now.

805. Listings of radio stations for sale?

Anyone interested in thought-provoking political commentary with a beat?

Not your usual commentator, certainly not your usual musician, and not your usual radio talk show guest, but definitely a guest your show should consider. This is Washington, DC-based political commentator/recording artist Dave Sharp.

Politics and music have always gone hand-in-hand, from Woody Guthrie and Bob Dylan of yesterday and U2 and Sinead O'Connor today. But while Dave Sharp may share their medium, he certainly doesn't share their message. Dave Sharp takes his songs from today's headlines and the political issues of yesterday, today, and tomorrow. Addressing topics that include Whitewater, Waco, and the mystery of Vincent Foster's death, even the continuing questions that linger around the assassination of President John F. Kennedy, Dave Sharp is a non-partisan political commentator who is not afraid to ask the tough questions and even name names. Some call him conservative, others swear he's a liberal, even a radical, but those labels simply don't apply to this man with a mind, and an agenda, of his own.

My company, Paisley Publicity Consultants, is working with Mr. Sharp to bring greater attention to his work and his ideas. We would like to arrange for him to be a guest on talk radio shows.

If you are affiliated with a talk radio show, or you anyone associated with a talk radio prorgram who might be interested in Dave Sharp, please send me a mailing address and I will get you more information and his CD "Step Outside the Darkness."

Thanks for your time and consideration. Please feel free to contact me, Vicky Hendley, via e-mail at paisleypub@aol.com.

: > count.
: Don't dismiss "Amos and Andy" lightly so far as historical
: significance goes.
: It was the only radio show with a predominantly black staff of
: writers, many

Jack Benny and cast and crew were traveling. When a hotel refused to book Eddie "Rochester" Anderson into a room, Benny was shocked, just couldn't believe it, and checked out his entire crew. So, even with stars there was major racism even in hotel bookings. It was left to people like Sammie Davis Jr and Lena Horne to break the color barrier in Las Vegas, and this wasn't until probably the mid 1950s.

I don't recall that the radio "Amos 'n' Andy" had any black writers or staff, but the TV show most certainly did. As the program evolved into TV the black writers and cast objected vehemently to lots of stereotyping, and changed significant parts of the script and characters. This was not due to any benevolence on the parts of Gosden or Correll, who appeared to be in it mainly for the money.

I was very little when "Amos 'n' Andy" played on TV. It had probably been cancelled by the time I actually first saw it. I remember that I often dreamed of being as good an actor/comedian as Tim Moore (who played the Kingfish). I was mesmerized by his rubber facial expressions and his great sense of comedic timing.

I'd suggest this would be determined by how much money the donor wants to take of his/her taxes. If they're *very* anxious you should get a lot of info. But what kind of info do you want? I should think a title check, a walk-through, and a search of the FCC public file and of past FCC actions in regard to the station should handle most of it. Shouldn't really take much on the broker's part to let you walk through the place and see what dis/repair the place is in.

818. Z104 WZEE Condom Controversy

Newsgroup: rec.radio.broadcasting
Date: 1995-02-06 03:46:21 UTC
From: caldwe33@futures.wharton.upenn.edu
Message-ID: <3h462d$ga5@vixen.cso.uiuc.edu>
Source record: 35025

During this past week, something interesting happened at Z104 in Madison.

They started running an ad for shiek condoms...this ad however was a bit more provocative than usual. It featured sounds of people having sex (not toooo graphic I would imagine). The spot ran at night I believe.

Soon after the spot started, one of the local health-care providers pulled all advertising from Z104 / WTSO (sister News station).

This became big news after David Graupner (GM of stations) went on the air with a 3 minute commentary blasting the local health care provider (after all...doesn't it seem ironic that a health care provider is objecting to the condom ad?)

The health company then responded they had pulled the advertising because of other already in the works plans that didn't include the Midcontinent Media stations. Sure...don't buy the #1 station in town...and decided this just when the ad's started running?

Well...turned into quite a positive...coverage started on Madison TV stations and was quickly picked up by networks and some newspapers.

Z104 is on the air running promos featuring listeners commenting on the condom controversy (they set up a special number).

Talk about making something great of a bad situation.

Sean Caldwell
(voice guy for Z104 and 9,537 other stations).

>Keeping broadcasting (or religion or the arts) free of government support
>is one of the best protections practitioners have from the "chilling
>effect" of government intervention.

You forgot to mention, however, the "chilling effect" of corporate intervention - well demonstrated in PBS/CPB's refusal to broadcast pieces that might be embarrassing to their big $ sponsors - specifically I'm thinking about the GE documentary, as well as others like The Fire This Time, The Panama Deception, Defending Our Lives...

To misquote Machiavelli: these defects are not more natural to government than they are to private entities. In fact, the opposite is more likely to be true, as it is much more difficult for the government than it is for corporate donors to threaten to withdraw support over "unacceptable" programming.

I would assume that they would continue to separately market both
frequencies with a "wide range" option to air commercials on both
frequencies.

WJFK, Manassas, (Washington D.C.) FM 106.7 & WJFK, Baltimore 1300 AM still
carry the same commercials on both frequencies as far as I know. I can't
receive the FM, but most of the commercials are Washington area
commercials. However, I not positive that they aren't starting to do
that too. I did hear a commercial for a Baltimore TV station. It would
make sense if they would do that.

Well I guess since I was the Music Director/Night Guy until six months ago at WZYQ and am still in tight with people there I can answer these questions.

I guess the LMA had been planned for months before it actually happened and the staff was not told until 3 hours before it happened. The old Z-104 airstaff are now temporary contract employees and are running the board and playing local commercials. Apparently advertisers were not told about the change either so I think what is basically happening is they are finishing out local advertising contracts. They are still doing remotes at a Dance Club in town too which must be hell for the jocks to do!!! :) I imagine they will have a full simulcast when they are done. That would explain why the former Z employees were told they were only to be used temporarily.

As far as the connection it's a digital phone line. I saw the equipment briefly a couple of weeks ago but I am not sure who the maker is. The sound quality is pretty good.

Hope I cleared up any questions!!
(By the way, if any netters here of any jobs, I can be reached at (301)8150-1982. I'm looking for an MD/PD job or mornings at a medium to large market.

Jeff,

I use a PC based 'windows' program made by Digidesign in CA called "Session 8". It runs about $4000 for the software and the "box". Not sure what your budget will allow, but this certainly can compete with the big boys. Call: 415-688-0600 for more info.

It is my understanding that Imus will be carried on WSTR FM in Atlanta,
GA sometime in the near future. This hasn't been publicly announced
yet, but I have lots of contacts in the Atlanta radio/TV market.

In article Ron Versteeg (ron@euronet.nl) wrote:
|:
|: Our radio-station uses ISDN links from location to our broadcast studio.
...
|: My return-signal is the normal radio signal (transistor or car-stereo)
|:
|: Now my problem is: There's a 0.75 sec. delay between the location
|: (me) and the broadcaststudio (where our news anchorman is situated.)

Some of the better-sounding encoding schemes (like MPEG Layer 3, which gives you 15k stereo on a single BRI line) need that extra time to process the audio. Even with today's best dsp chip, this rarely gets below .5 second.

OTOH, some of the okay-sounding schemes (like G.722, also known as 'Switched 56' 7.5k audio) are virtually instantaneous in a modern dsp-equipped codec.

A lot of today's codec's are switchable between algorithms. In fact, they can even support different algorithms in different directions: when I'm recording distant announcers with a Telos Zephyr, I usually send the talkback signal G.722 even though the incoming voice is Layer 3. There's no perceptable delay on the talkback, and I'm doing the whole thing on a single, low-cost line.

You can do a similar hack. Monitor _your_ audio locally and send it to the station via a high-quality algorithm. Have them send you mix-minus via G.722 on the same line. There'll still be a delay, so don't try to tell fast-paced jokes with the station jock... but at least you won't be aware of too much delay in your headphones.

WORK EXPERIENCE
Apr '90 - 'Nov 94 / OWNER OF A DESIGN STUDIO
Studio South/Atlanta. Conceptualize, design, illustrate, layout, write, & oversee printing of: brochures, software packaging/documentation, corporate reports, logos, newsletters, and promotional pieces. Consult with clients to produce consistent corporate image over the entire range of their marketing communications materials. Draw on wide-ranging experience in graphic design, multi-image, and radio production to translate client's communications needs into a coherent, cogent message targeted at the client's market. Respond quickly to client's changing requirements to assure timeliness of delivery. Work within budget constraints. Fit solutions to client's needs.

Oct '91 - May '92 / MARKETING DIRECTOR/STOCKHOLDER OF SOFTWARE MFR.
Blue Rose Software/Atlanta. Created marketing strategy and positioning for PC software package. Conceptualized, designed, illustrated, did layout, & vended out printing of software packaging and documentation, corporate identity package, and nationally run print ads.

Feb '88 - Apr '90 / INDEPENDENT CONTRACTOR
Contel Corp./Atlanta. Provided business communications support to Customer & Network Support Systems department and others in Information Services. Produced and published full-color monthly reports, project documentation, and presentation materials. Worked regularly and closely with upper level management, including VP of Finance/Telco and VP/Information Services, and Assistant VP/Information Services.

Aug '87 - Dec '87 / PRODUCTION MANAGER
KISS-FM/San Antonio. Responsible for all commercial material that ran on the air. Wrote and produced all commercials for in-house accounts and voiced more than 50% of all spots produced by the radio station. Worked with the Sales Department and directly with advertisers to conceptualize both spot commercials and campaigns. Won an ADDY Award for writing, producing, and voicing an anti-smoking campaign for teenagers.

Oct '81 - Aug '87 / SELF-EMPLOYED
Dallas. Self-employed as an audio producer for corporate multi-image/xlm/video presentations and as a voice talent and writer. Worked on several award-winning shows for major corporate clients. Successfully managed my own freelance business and developed skills in other areas as well: photography, production art, computer graphics, and other communication arts.

Aug '79 - Oct '81 / PRODUCTION MANAGER
KMGC-FM/Dallas. Owned by Shamrock Broadcasting, parent company of TM Programming, below. Responsible for all commercial material that ran on the air. Assigned announcers to voice various commercials, all of which I produced. Worked with the Sales Department to conceptualize spot commercials and campaigns. Acted as liaison between Programming and Sales. Reached a total of 10,000 commercials either written, produced, or voiced since 1971.

Aug '78 - Aug '79 / FORMAT PRODUCER
TM Programming/Dallas. Also owned by Shamrock. Produced very successful Soft Rock format for radio syndication and various demos for the format. Mastered songs to tape, edited and arranged in different orders and combinations to produce master tapes for duplication.

Mar '76 - Aug '78 / PRODUCTION MANAGER/AIR PERSONALITY
KTFM-FM/San Antonio. Evening air personality. Achieved second-best ratings in market by the time I left. Produced all station promotional announcements and oversaw assignment of commercial production for station clients.

Aug '74 - Mar '76 / VARIOUS
Various small-, medium-, and large-market radio stations, including:

WQXI-FM/Atlanta, Georgia - Asst. Production Manager
KSET-FM/El Paso, Texas - Announcer
KELP/El Paso, Texas - Production Manager

Other
May '91 / WORKSHOP SPEAKER/"DESIGN ON THE DESKTOP"
WPPS/Atlanta. Wrote and conducted a 3-hour workshop for employees of Word Processing Personnel Service, a temporary personnel agency. Workshop aimed at novice to intermediate level desktop publishers.

I didn't say it was a translator. It's a for-real station. I think it's
on 103.3. The station's call is KGOE.

I have not heard it since it has gone on, but a friend there tells me they
do not carry the ABC news at the top of the hour (KINS in Eureka has that
affiliation), so they opt out of the KGO feed for that and for some local
commercials.

>(P.S. Know more about this?)

It's a full FM station, that simulcasts an AM - KGO. My M-Street shows
it being owned by Southwestern Broadcasting Corporation, and the GM is
Judy Clark.

I was wondering ... does KGOE (KGO-Eureka) have any local programming at
all? How much?

: Is this a translator, or a "rea" station. If it's a translator, I didn't
: know it was legal to have FM translators relaying AM stations . . .

: (P.S. Know more about this?)

I do, as I live in Eureka.... :)

It's a real station, not a translator, as the call letters are KGOE, at
105.5 MHz. The *real* reason, incidentally, for why KGO brought in KGOE
was due to the triple earthquakes of April, 1992, because at that time,
the most *reliable* source of news *came* from KGO when we needed it most
up here. It's also why KGO (AM) had such a huge following up here at
night... (And it's closer to 300 miles, BTW.)

Last year, in response to KGO's continued success in the Eureka area,
KGOE was introduced up here, along with a *local* dialin number, before
changing to the new 808-0810 callin number used in all the bay
area/northcoast counties... (I have no idea just how these 808 numbers
work, but it seems like a "local" toll-free call in the various area
codes.... Anyone know more about this?)

Logically, KGOE does not broadcast in stereo, and no, it doesn't sound
like it's being relayed right off the air, but through a microwave relay.
As far as I can tell, this one station currently dominates the local
radio market.

....Quozl!

Here's an item which may be of interest to News Directors

The U.S. Department of Education offers free packages of current education news and features to radio stations. The agency has a toll-free to U.S. callers telephone feed service providing newscasters self-contained stories or soundbites on education issues. The newsfeed, which is updated daily, is available around the clock at (800) 424-0214.

The Education Department also has both scripts and prerecorded PSAs available about student loan help and Individual Education Accounts. To request a tape of those PSAs or for more information on the newsfeed service, call Gregg Wiggins at (202) 401-3858, send an E-mail to Gregg_Wiggins@ED.Gov or write him at U.S. Department of Education, Office of Public Affairs, 600 Independence Ave SW Room 2200, Washington, DC 20202.

Other federal agencies offer similar newsfeeds. The Department of Transportation's is at (800) 526-1144. The Agriculture Department offers short and long form radio programming as well.

More personnel changes around the Big Apple to talk about---

Jay Severin gets the PM Drive slot vacated by Gene Burns at WOR. He's been the primary fill-in since Burns left last fall. Congrats, Jay!

Also, WOR dumped long time Giants Play-by-Play man Jim Gordon and colorman Karl Nelson from their broadcast team on Friday. Bob Papa will do p-b-p with Dick Lynch retaining his color man status. WOR has lost a ton of money on the Jints since taking over the broadcasts two years ago. However, Nelson's dumping comes as a bit of a surprise, since he has been getting good reviews as a color man since he left the game (and the Giants) with cancer in the late 80's. Gordon had been P-bP announcer for 18 years. Papa has been pre & post game host for the broadcasts for the last several years.

In other sports news, the Mets and WFAN have resigned radio man Bob Murphy to another two year deal. Murphy has been with the team since it's beginning in 1962.

Former Connecticut Governor (and Imus in the Morning foil) Lowell Weickert gets his own radio show later this year. The syndicated daily three hour show doesn't have a NYC outlet. WABC is still looking for a 10-11am host since Dennis Prager has given up his daily slot there. The station may be holding the slot for Mario Cuomo if the former governor decides to go into radio full-time. BTW--loved the Doritos spot with Ann Richards.

An interesting article in the NY Daily News regarding Casey Kasem and his three countdown shows last Monday (1/30). Mix 105's deal gives them a market exclusive on Casey, which means Casey's Hot 20 is the only Casey countdown show which can air here. A couple of listeners lamented the loss of 'Casey's Top 40' since it was dumped from Z-100 last year. Scott Shannon was quoted as saying that there's no NYC station's format which fits the mainstream CHR/Top 40 model which that show fits in. Casey's A/C 'Casey's Countdown' airs on a couple of suburban A/C stations around the area.

A couple of TV spots which have been airing--Barry White does the spokesman duties for the "new 98.7 Kiss-FM'. The image spot uses White to promote the new 'Smooth R & B and Classic Soul' image the station has adopted.
WNEW-FM has a great spot--A neighbor knocks on the door of another and tells them to tell their kids to turn the music down. The couple answering the door says "We don't have kids". The music for the spot is Modern rock, pushing 'NEW-FM as the station for Classic Rock and the New Rock hits.

Till next time--

: with an Adult Contemporary format. It's the home of Craig Walker, who
: has had the number one morning show in the market for most of 20 years

By all accounts I hear Craig Walker is one of the nicest people in
radio there. I'm sure *lots* of people reading r.r.b have seen and heard
Craig Walker -- he does software training tapes for such programs as
WordPerfect!

: hotter AC format. KXYQ is leased out. It has a very poor signal, and is
: currently home to The Voice, local talk without any significant promotion.

To my way of thinking, THIS is where the action is, and Portland always
has at least one of those stations at any given time. Some talkhosts are
totally off the wall, others are some of the best in radio. I once heard
a talkhost who would give out recipes and read poetry when she didn't get
any calls! (Not on KXYQ however.)

: KXL A/F
: AM is news talk, home of Rush Limbaugh, Tom Leykis, and the only
: significant local talk show, hosted by Bill Gallagher.

Bill Gallagher is definitely a winner, doing intelligent talk. It's
clear that he loves his job and loves Portland (though I do wish he'd
come back to SF and take over Ronn Owens' old slot).

That's pretty common, especially in small markets where the air talent
is limited or downright nonexistant. And, the average listener doesn't
really care, as long as they hear the music they want to hear.

It is a bit of an ego-deflater to many jocks in the industry that the
vast majority of listeners could really care less about them -- they
tune to whatever station plays the music they like.

The exceptions are talk-radio (obviously) and some morning shows in
markets where there are dual stations with similar formats.

If the local station doesn't try to hide the fact that the programming is not local, and the promos say that it IS a network, if the music is what the listener wants to hear, there shouldn't be a problem.

WDRE Garden City, NY is a flagship of what it calls the "Underground Network" or "UN" for short. Modern rock, with some modern rock oldies thrown in. In promos for this, they said "Many alternative stations think that, you, the listeners can't hack a large playlist. We know better.". I've listened to it, sounds good. Good satellite radio, also good non-satellite radio.

It just a part of a new TV campaign for the station -- they are stressing their mix of old rock and new modern hits. They've been using 'NEW-102.7 as an ID for a number of years, especially since WNEW-AM went bye-bye.

They claim to have added "the 90's rock you need" to their playlist.

In an informal sampling, they're still a far cry from the
alternative-oriented stations I moved onto 2-3 years ago.

Most of the "90's rock" I hear on WNEW consists of 90's recordings by
aging 70's artists.

Missed the TV ad. Listened to WNEW-FM for about 20hrs this past week. No real change, just marketing. Music is still a mix of classic rock and "the new music you need." The station seems to have a bit less talk and more momentum. Pat St. John in the morning talks alot without focus. Friday he was originating from some sunny island somewhere. I did not understand why or how it related to the station position or to me the listener. Carol Miller now doing 10a-3p. Best sounding middays in years. Scott Muni, the grandfather of NYC FM rock and Roll Radio, now 3p-7p. Less talk, more music, but still too many traffic reports.

>1. KDKA *still* has its Clear Channel status.

There is no such thing anymore. Clear channel means you're the only one on the frequency. NOT ANY MORE. Check M street or Broadcasting and see how many stations are now on 1020.

>And could this possibly
>spread to the FM band where the FCC could begin to downgrade 50 kW and
>higher stations to allow more low powered "local" stations onto the FM
>band?

There are no FM clear channels. FM doesn't travel as far as AM that's why the max. power for FM is 100 kw not 50. FM travels in line of sight...straight line. Apples and Oranges.

DO distant stations really serve small towns? NO. They are just fun to listen to (they really are)!

This is all about a company trying to maximize its radio station in the nation's largest market...where revenues are MANY times greater than Fort Wayne.

Now you've gone a bit too far. Your license is NOT #1. Perhaps if you'd
do the research you'd know. (Hint: it's not in the first 100).

And as to your claim of the first station to have regularly
scheduled broadcasts ,... rather wrong again.

Having been able to acquire the first "limited commercial" permit
does not negate all the other parts of history and actions of the
pioneers, Herrold included. Conrad was a visionary ... no question.
But you are rather like the Russians old view of history if you think
KDKA did "everything" first.

And worse yet, I fear ... the KDKA of today is not exactly a national
treasure either.... however, I will leave more local and
objective people to comment on KDKA as being more appropriate.

^^^^^
I've done a lot of research on my own on radio history, and at best this claim needs some sort of qualification. A few years ago I photocopied KDKA's original licence at the National Records Center at Suitland, Maryland. It was issued on October 27, 1920 as Class 2 - Limited Commercial Licence #174. In keeping with the practice at this time, later licences issued for KDKA under the Department of Commerce were also issued as #174. Note that there was no separate broadcasting licence under the Department of Commerce--broadcasting was merely one of the service categories within the Limited Commercial classification--and there would not be until the formation of the Federal Radio Commission in 1927. Under the FRC new licences were issued, with a new separate Broadcasting series. Its possible that under the new series KDKA was given #1, but I'm not sure. In any event, its misleading to imply that KDKA's original licence had a #1 anywhere on it.

Sorry, but there is plenty of proof the "San Jose Calling" aka KQW (and now KCBS) was also the first broadcast station to have a regular schedule, as well.

Dr. Herrold's wife was the first DJ, and their trade-outs with the Sherman Clay company in downtown San Jose gave them the first records to play and the first advertising.

Charles Herrold was the son of a farmer in the Santa Clara Valley (now known in puter lingo as "Silicon Valley"). It was Charles Herrold who COINED THE TERM "broadcasting" -- he named it after the farming technique of "broadcasting" or scattering seeds in all directions which his father had always done. His father, in fact, invented several farming tools. Charles Herrold got into radio with the expressed purpose in "broadcasting".

He also defined the radio transmissions of Marconi and others who operated nearby (Marconi had a ship-to-shore station just north of San Francisco) as "narrowcasting" because these were intended to be received only by a few people, such as radio operators at sea. It was fully Herrold's intention to broadcast from the start.

Even Lee DeForest, the self-proclaimed "father of radio" gave credit to Charles Herrold as the originator of broadcasting at KQW in San Jose.

Simply not true. Herrold's San Jose programs were regular, regularly
publicized and supported at least partly by trade-outs at least by 1912
and perhaps as early as 1909.

Source record: 34879

An interesting week here in Beantown, at least on AM 890. This is the 3-month old WBMA Dedham (25kw day, 10kw night), owned by SRN Boston, the same people who owned the now-defunct WBIV 1060 Natick-Boston. WBMA operates from WBIV's former transmitter site in Ashland MA, uses WBIV's former transmitters (now retuned to 890), has been leasing all its time out to "Radio Emanuele," the Spanish-language religious broadcaster that used to lease out WBIV. And, SRN prefers to identify 890 as "WBIV" still (the legal IDs announce "WBMA Dedham, WBIV Natick.")

Strange enough, right? Not yet. Now comes word that 890 will change format by Feb. 15, to the satellite "Prime Sports Network," under new ownership. SRN management is claiming that "890's calls will change from WBIV to WBMA" when that happens. Uh-huh, right. The current manager of "WBIV," when asked by the Boston Herald about where the new owners are from, replied, "Hell." All of 890's staff is being laid off, apparently so a different group of board-ops can be brought in.

So why sports on 890? Well, it's just 40 khz above 850, the 50kw site of all-sports WEEI since August. Never mind that 850 is local from the end of Imus until nighttime, and the new 890 "might do an hour of local talk in the morning."

Weird enough? Not by half. There's ALSO a rumor floating around town that the Prime Sports format will also be fleeting... to be replaced by Korean-language programming by May. Never mind that Koreans aren't even in the top 10 in terms of minority population in this area...

And what of 1060, the frequency WBIV/WBMA vacated when the station moved to 890 last fall? Well, it's allegedly for sale...but just the license. The 1060 transmitters are, as noted above, already retuned to 890. And whoever buys 1060 will not be allowed to diplex it off the Ashland site. The area where a new 1060 transmitter would have to go is some of the most expensive real estate in the state...so the odds of finding a new site are pretty small. About the only solution would be to diplex off WKOX-1200 in nearby Framingham. I've heard a rumor that one group might buy 1060 and use it as a daytimer (the old facilities were 25000/ 2500), running off the one WKOX stick that's not used in daylight. I'd say the chances of 1060 resurfacing are pretty slim. The whole thing is very odd...

Meanwhile in the Granite State:

A trip up the New Hampshire seacoast Friday produced one bit of news: The "Rock Garden" moniker made famous in the '70s by WCGY-93.7 Lawrence-Boston has resurfaced, trademarked no less, at the brand-new WRGW-98.7 Somersworth NH. The station is co-owned with WTSN-1270 Dover, which is renovating its studios on Middle Road to add space for the FM. I didn't find the transmitter, but the STL at the WTSN studios was pointing west...so it must be out that way.

Unfortunately, WRGW did not resurrect the freeform rock format that marked the original Rock Garden. The new Rock Garden is soft AC...yawn. It is live and local, but then so was format competitor WZEA-102.1 Hampton NH, which had been satellite last I checked. And the Seacoast is well-served by soft AC signals from WLYT Haverhill MA, WSSH Lowell MA, WMJX Boston, and WZID Manchester NH, just to name a few.

Only one other item of note: Precision Media has completed its duopoly...and moved Rochester NH-licensed WWEM 96.7 (modern rock "The Mix") and WZNN 930 (CNN news-talk) into the Exeter studios of AOR WERZ 107.1 and adult standards WMYF 1540. And WXBB 105.3, which was country when it was duopolied with the Rochester stations, has found a new duopoly partner. It's now ARROW, and operating from the same studios as 50kw country blowtorch WOKQ-97.5.

And back in Boston, Baltazar has taken JR's old morning gig at CHurban WJMN-94.5 "Jam'n". Baltazar (his real name) used to do nights at a NYC station...I think WRKS? On the talk front, WBZ's David Brudnoy has resumed the 5 hour a night schedule (7-midnight) he was working before an AIDS-related bout of illness landed him in a coma last fall. Bruds is still doing the show from home. Steve LeVeille had been filling in for Bruds and is now seeking new work. Anyone need a top-notch talk host?

Hi Tom,

I'm curious about your Portland AFTRA experience. I'm an AFTRA member in Balt/DC and worked on staff at WBAL/WIYY (union shop) for half of my radio career.

You said a good severence package and salary scale, were the only things your local's negotiators got you. What did you ask them to get for you that they couldn't get?

By "open shop", do you mean that non-aftrans were on the air? What were the positions and situations ?

Regards,

Ty Ford

: : Can anyone please tell me at what frequency I can receive BBC World
: : Service in the Philadelphia area?

: You could contact your local NPR/PRI affiliate, WHYY, which might carry
: some of their programming. Aside from that, listen for BBC in the
: evening or late night on 9640. This is the Antigua relay.

If you are willing to consider listening to BBC on shortwave, then
here are some times and frequencies:

[all times are eastern time]

You will find BBC's hour long News hour at 8am, 4pm, and Midnight.
In summer, the entire BBC schedule to America shifts one hour
later [since BBC operates on the invariant UTC time frame]

6am: 5965 until 9am

9am: 9515 and 15220 until 10am, when 15220 goes off, 9515 stays on,
but is joined by 15260; this all stays on until noon:fifteen
when BBC ends their service to North America

however, you can listen to BBC's Africa serivce in English from
noon-fifteen on 15400 up to 4pm, when you can switch to 5975 which
stays on until 1am. At this time, 5975 goes off, and is replaced
by 9640 which stays on until 3:15am, when BBC ends its NorthAmerica
service. At 6am, they start again on 5965 [see above].

In case you want to know,
5965, 9515, and 15260 come from a Canadian transmitter in Sackville NB
15220 and 5975 come from the BBC relay in the Caribbean,
and 15400 comes from the BBC relay on Ascension Island.

In case you are not interested in these shortwave channels, I apologize
for using up all this bandwidth.

Regards,
John

IA>sorry I did not catch this tread earlier. If you are trying to find out
IA>if there are any other commercial stations broadcasting classical music,
IA>the only one I know of is here in Dallas. WRR-FM 101.1. They are owned by
IA>the City of Dallas. They had a 2.6 in the Fall '94 book.

How about:
WCRB, Boston WQXR, New York KFSD, San Diego KING-FM, Seattle
WFMT, Chicago WCLV, Cleveland KKGO, Los Angeles
KDFC, San Francisco

Almost every major city has a commercial classical music station.

Ethan Clauset wrote of my original contribution calling for a phase-out of government funding for CPB...

> You forgot to mention, however, the "chilling effect" of corporate
> intervention - well demonstrated in PBS/CPB's refusal to broadcast pieces
> that might be embarrassing to their big $ sponsors - specifically I'm
> thinking about the GE documentary, as well as others like The Fire This
> Time, The Panama Deception, Defending Our Lives...

No argument on that point. But a more diverse funding base--even advertising(!)--with the emphasis on smaller individual donations--would help public broadcasters thumb their noses with impunity at one funding source or another and not risk all (or most).

> ...it is much more difficult for the government than it is
> for corporate donors to threaten to withdraw support over "unacceptable"
> programming.

True, also. But if the source of funding is to have a chilling effect of *any* sort...given the pervasive nature and power of government, wouldn't you rather have journalists be less afraid of offending *it* than of offending private industry?

: Mr. Kaye, are you sure that Pacifica doesn't receive any federal funding?

To answer publicly what you also asked me privately, Pacifica does receive some federal money, but it has only been a fairly recent thing. It's always been Pacific's position in the past to be "listener supported", rather than grant-supported. Thus, if CPB funding is pulled, Pacifica doesn't have as far to fall as the stations/networks which have depended on it all along. I definitely see Pacifica coming out of this cut-back stronger than ever. Someone involved with Pacifica today would be better able to provide specifics.

chip (c.d.) kelley (chipk@bnr.ca) wrote:

: The Gainesville station is KECS. Based on what has been filed, KECS would
: remain a C2 and KICI-FM-107.9 Corsicana would be reduced to a C2 from a C1
: (why not kill off one and upgrade the other?).
Interesting! What frequency and power is KECS due to broadcast on? Is
it 107.9?? What will happen to 99.1? Will they both be "HOT TEJANO HITS??"

: KDZR-99.1 is licensed to Denton, but its tower is in Wise County around
: Bridgeport and Decatur, so they are really 35 miles NNW of Fort Worth and
: much farther away from Dallas, hence the need for KICI-FM in Corsicana to
: the south of Dallas.

What power and tower height does 99.1 broadcast at? NO wonder the
eastern part of the Metroplex has a hard time receiving 99.1's
signal...

: Note that KRVA-1600 and KRVA-FM-106.9 are trying to LMA the now silent
: KTCY-104.9 Denison. KTCY is to upgrade to a C2, change tower locations
: to southwest Grayson County (near Collinsville), and change city of
: license to Pilot Point.

: And speaking of other Dallas move-in's, don't forget KKDA-104.5/730's
: owners are buying KSTV-FM-105.7 Stephenville. KSTV-FM has a pending
: application to change city of license to Decatur and build a 2050'
: tower outside Fort Worth to cover all of Dallas/Fort Worth. The upgrade
: will force country KICM-105.7 Healdton-Ardmore OK to have to relocated
: to 93.7.

What is the current power of this station? When they move to a location
west of Ft. Worth, will they remain Country (I believe that the station
is currently country). All D/FW needs is another Country station.
In a market with 4 Full power country stations (94.9 KSNN, 96.3 KSCS,
99.5 KPLX, and 105.3 KYNG) and several rimshots (95.3 KHYI, Howe, 107.1
KLTR, Terrel, etc....), I find it hard to believe that another Country
signal would be successful. How about another CHR format to compete
with Kiss-FM (KHKS 106.1 - #3 in last arbitron ratings)

First of all, this whole thing with Z-104 kinda makes me mad. Why does a broadcaster have to buy out another just to increase their coverage. As the mayor of Frederick said (paraphrased), we are losing part of our identity - one of our few local stations is gone. Oh well, life goes on... Money rules as some others have said on this newsgroup before.

Onwards, I think that the reason you are hearing two sets of commercials is possibly that the old Z-104 still has commercial obligations from before the simulcast started that they are fullfilling. Just a guess. However, I think that it really could benefit WXTR to bill the 103.9 frequency as a Frederick/Northern Maryland thing. The 103.9 signal goes west towards Hagerstown, North into extreme southern PA and east towards Westminster and not to mention south to Montogomer County. I think by installing a little automation to fire "local" commercials focused on the 103.9 coverage area, WXTR could cash in on this relatively untapped area. And who in Hagerstown wants to hear a commercial for something in PG county? This is one case where I say, localize the frequency!

A question... Was 820 AM part of the sale? I beleive that this is the AM half of 103.9. Will the country format continue or was it not part of the sale?

Sincerely,
M. Hale
(from one of my many Internet on-ramps!)

Cecil Heftel is one of the most exciting, audience driven owners I've ever know in contemporary radio broadcasting.

He was the owner of Y-100 in Miami during their history making days...I was lucky to work as an air talent there then.

Never before or since have a seen an owner like him. Cecil Heftel is totally product and audience driven. Other owners come to town and sit hidden in a room talking with the management and the sales staff. Cecil comes to his station and wants to get to know the air people, the programmers. He knows that if the product is good...the sales will come.

You're very lucky to have Heftel in your market...almost as lucky as the audience.

I've got some bad news about Planet Zed. Tonight's show is going to be it's last (unless something comes down from the governer). They no longer feel that the show fits the station. They're going back towards AC.

It's too bad, I used worked at KC101 for years (up until a year ago) and know Chris and Rob very well. They are a quality program and I'd think their kind of personality radio works well.

They did have a down book after a great first book. I'd have to blame that on their being live from Tuxedo Junction in Danbury for most of the book. The club was about 45 minutes away and many of their bits wouldn't work from the club.

They can currently be reached at planetzed@aol.com.

There ARE several radio stations on the planet that pre-date KDKA. KDKA is ONE of the early ones but not quite the first. KQW (now KCBS) you have already heard about. WHA the same. Both pre-date KDKA by a number of years. The actual FIRST commercial license (may I have the envelope please, thank you....) goes to CFCF/Montreal, PQ. Canada (now CIQC) with an airdate of 1919. you may check your sources. CFCF was started by the Canadian Marconi Company and still is alive (and I hope well) as todays CIQC with its baseball programming repeatedon CFCX/6005.

See ya!

Strikes me we have a problem of definition of terms when it comes to saying who was first...

Fred Honsberger (who is understandably partisan about the station that gives him daily airtime and a weekly paycheck) is right when he says KDKA is the first station to be licensed specifically as a broadcasting station. It has amateur roots dating back into the pre-World War I days as well...but its claim is based on its status as first to be licensed specifically to broadcast, and no one disputes that.

The folks at KCBS are right when they say their station (as KQW) was first to run a regular weekly schedule broadcasting to the public back in 1909; but it wasn't commercially licensed until 1921, after KDKA was already running an 18 hour daily schedule for some months.

There's a third claimant...WWJ in Detroit, the CBS O&O in the Motor City (amazing how CBS keeps popping up in this discussion) was the first to run a daily schedule starting in the summer of 1920, when the Detroit News owned it, and continuing without interruption to this day; but it was operating under an amateur license until well into 1921.

I'm sure I'm leaving someone out. If your station is one that has a legitimate claim to be first by some other definition let's find out. (I can't make that claim myself...we're the NEWEST full time AM outlet in our market, signing on the air in 1984.)

Bob Smith, middays WXXI-AM 1370 Rochester NY

: I was wondering ... does KGOE (KGO-Eureka) have any local programming at
: all? How much?

Yes. There are local news segments twice in the morning, and at least
once a night, and a weekly talk show on Saturday, I think.

What I'd like to see is KGO's Leo Cholino (weatherguy) add Eureka-area
weather forcasts along with the Bay Area forcasts, and have someone up
here report on traffic.... :)

It's a separate, licensed, full-power station with the call letters
KGOE(FM). It's on 105.5, with 3kw.

As I understand it, they buy the programming from KGO's owners,
CapCities/ABC, and sell their own ad time.

They may also pre-empt some San Francisco programming for local Eureka
news; I'm not sure.

They must also do their own IDs, since you'll never hear KGOE mentioned
on KGO, even at the top of the hour.

The only legal FM translators of AM stations in the states are up in
Alaska, but then "it's different up there."

: : know it was legal to have FM translators relaying AM stations . . .

: I didn't say it was a translator. It's a for-real station. I think it's
: on 103.3. The station's call is KGOE.

105.5 mono.

: I have not heard it since it has gone on, but a friend there tells me they
: do not carry the ABC news at the top of the hour (KINS in Eureka has that
: affiliation), so they opt out of the KGO feed for that and for some local
: commercials.

That was only in the beginning. KINS no longer carries ABC news;
KATA-AM/KFMI-FM no longer carries Paul Harvey.... These are carried via
KGOE now. KINS also no longer carries the ball games that KGOE carries.

Here, BTW, is what can be heard locally (not counting religious relays):

AM:
790 KWSW Eureka
920(?) KURY Brookings, OR
980 KINS Eureka
1090 KJAK(?) Fortuna
1260(?) KPOD Crescent City, CA
1310 KCRE(?) Crescent City, CA
1340 KATA Arcata
1480 KNTA(?) Eureka

FM:
88.5 KMUD Garberville (relay)
90.5 KHSU Humboldt State University, Arcata
91.5(?) KZPN Bayside (halfway between Eureka & Arcata)
92.3 KRED-FM Eureka
93.1 KXGO Eureka
95.3 KIDE Hoopa (relay-HORRIBLE)
96.3 KFMI Arcata
99.3 KJAK(?) Eureka
101.1/101.5 KEKA Eureka
104.3(?) KBEY Garberville (relay- Station down for unspecified reason)
105.5 KGOE Eureka (relay of KGO AM-810, SF)

This was all written down by memory, and shows the flaws of said
memory... I'll have better info by the end of this week.

....Quozl!

: Yessir...It's a real station...KGOE-FM...I believe it may be licensed to Ferndale or one
of the other "suburbs" of Eureka.

Nope. Downtown Eureka. 5th & G streets. I walk past the studio every friday.

Ferndale (and fortuna & Arcata) are not suburbs of Eureka- They're
neighboring cities.

To give you an idea of how small this market is, the 1990 census for
Eureka was 27,000; the metro Eureka area (anything within 20 miles of
Eureka) is only about 80,000. Compared to the SF Bay Area, this is small.

: It's rebroadcasting KGO (with KGO's blessings, of course) 24 hours, 7 days. I heard the
owner gets to replace some of KGO's
: spots with his own locally sold accounts.

Only from 6am onwards...

>WNEW-FM has a great spot--A neighbor knocks on the door of another and tells
>them to tell their kids to turn the music down. The couple answering the door
>says "We don't have kids". The music for the spot is Modern rock, pushing
>'NEW-FM as the station for Classic Rock and the New Rock hits.

On the Kiss-FM spots, I have also seen Luther Vandross doin ads. Man, does
he look terrific!! Have the first trends come out? I'm curious to see how
they would do against CBS-FM and WBLS. According to Joel Salkowitz, in
Accu-Ratings, Kiss-FM is #1 25-54. That must have Joe McCoy quaking in his
boots a bit.
But we'll see what happens, won't we?? On the 'NEW front, cool ads, cool ads.
Might do a lot to boost 'NEW-FM's #s in 25-54 demos (or even a bit younger);
wipes away the stereotype that the only people listening to 'NEW-FM are in the
18-35 demo. But then again, these days, radio stations are stepping all over
each other's demos, nothing seems to mean anything anymore. Speaking of demos,
how areyou guys at 105 doin on that one??

I was happy to learn that Jay Severin had gotten the PM drive slot until I started listening to the show. The new show is totally different from what Jay had been doing when he was "trying out." Jay had been talking about all the major issues of the day. On the new show he talks about things like: Ben & Jerry's ice cream, gossip columnists, the Farmer's Almanac, dreams, and (believe it or not) penis enlargement surgery.

I'm going back to Barry Farber and Bob Grant for my daily fix of political talk.

Fourteen years ago (long before I had anything to do with WCRB) I worked for a Boston station where the jocks did that. Also, they couldn't afford to pay a newsman to be there all day, so they told their morning news guy to _pretape_ hourly newscasts for 9am, 10am, 11am, 12pm and 1pm before he left the station at 9am. These newscasts were carted with a pause in the middle for a spot. It sounded like the newsman was there but he wasn't. One day one of the news carts got miscued. I was driving north on Route 128, listening to the radio, and I heard:

----> "... more great music, but first this word from Mike Murray." (pause, cart ----> starts) "It's about one o'clock in Boston, I'm Mike Murray" (segue to ----> music)

Shortly after that incident, they stopped taping newscasts, but they continued to do bogus temp checks until they dumped their AC format and went AOR six months later.

This was the same station that moved its studios downtown in the middle of the night one Saturday on the cheap. They operated for six months with no transmitter remote control (I can't remember why, but it was some absurdly stupid reason). After I became chief engineer (they'd hooked it up by then), I got a frantic call from my old college station across town-- it seems an FCC inspector had shown up there and they'd no idea what to do. I told them to calm down and show the guy what he wanted to see, then I went to our general manager and told him we needed to prepare for a possible FCC visit, since they'd just hit the college station.

So the next day the AM remote control went on the fritz; I told the GM and asked permission to send one of our operators to babysit the transmitter. Normally he would have said no, not wanting to spend the money, but under the circumstances he thought it was a good idea.

I spent the next hour or so working on the AM remote control, and old Moseley PBR-15 that had seen better days. I called the guy at the transmitter, asked him what he thought we should do about those six months of missing logs (the GM wanted to get some secretaries together and fake them!). Then the guy said, hold on a minute, there's someone at the door. It was an FCC inspector (honest to God, here we were talking about

forging six months worth of transmitter logs and the FCC shows up!), and he wanted me to come out and meet him at the transmitter-- it seems his records were out of date and he didn't know where the studios had moved to. So I told the GM, there's an FCC guy at the transmitter and I'm going out to meet him there, and he says ok, go do it. And five minutes after I left the GM takes off for parts unknown. When I get back to the station with the inspector there's no management-level people in the building except for the PD who finds the situation quite humorous.

The FCC guy sat down at my desk and looked at logs, licenses, applications, and a bunch of other stuff. He got a little ticked off because we hadn't cut the grass at the AM site (GM wouldn't spend the money) and it was damned near impossible to get to the towers to read the base currents, but he found no evidence of actual rule violations and we didn't get fined.

Neither did the college station, incidentally.

Everybody-
At our high school, seniors are required to get an internship at
an company or organization outside our school. Members of our school
amateur radio club have expressed an interest in working at a shortwave
broadcast station. These students have advanced class amateur radio
licenses and are knowledgable of basic radio and electronics principles.
They are willing to learn, and most importantly, work for free. If
anybody out there knows people who work for a shortwave broadcast station
anywhere in the world, please respond to my e-mail (mattd@branson.org).
Internships in any aspect of the shortwave broadcast industry would be a
fantastic opportunity for these students.

I know the conventional wisdom is to start the stop set off with "The Best" and longest produced spots and travel to the ugly short ones, but I am not convinced that "conventional wisdom" works any more.

I am beginning to believe that the answer is not that simple. Sure WE like the big, well done produced spots, and hearing them first pleases US, but I don't buy that the listener will suffer through the short uglies. These days they have too many choices.

I think the whole concept of commercial presentation is in need of a MAJOR overhaul, starting with the copy and use of language. The overwhelming use of amount of ADSPEAK in most of the spots today sends an instant message to the listener to 1. Passively tune out by not paying attention because it's another BS message. 2. Actively tune out by changing stations, putting in a tape or CD, making a phone call etc.

It's taken radio advertising 50 years to inbreed itself to the degree we now find it. It's got to start at the station level. The station that starts writing better copy (and follows through with performance and production) will keep more listeners from active or passive tuneout. TSL will increase, ratings will increase, spot rate will increase, value of the property will increase. HOWEVER...It starts with keeping them across the spot breaks, and that means making sure you say the right things. Stations in the US stand to gain millions of dollars in revenue, and...oh yeah...radio will become a lot more listened to.

Regards,

Ty Ford

I'd like to point out Randy Galloway, a sports columnist for
the Dallas Morning News who has a regular evening sports talk
show on WBAP 820-AM in Dallas-Fort Worth, Tx.
As a radio vet myself, I at first found his delivery a little
rough, but now enjoy it thoroughly as it reflects his genuine
personality. Galloway's Sports at Six ranks easily as one of
the best two Sports Talk shows I've ever heard, alongside the
highly entertaining Jim Rome formerly (?) on XTRA San Diego,
Ca, but then he's not a sports writer.

The resistance of any substance is dependent on its temperature. Since
conductance is the inverse of resistance, the dependency also holds.

Moreover, background noise is much lower in the winter. No thunderstorms!

> The groundwave reception here in the Pacific NW is nothing compared to
> what I used to enjoy in St. Louis, K.C. and Omaha!

Most of Washington state is at 4 mmho/meter except for the western peninsula
starting just west of Puget Sound, which comes in with an estimated
ground conductivity of 2 mmho/meter. However, most of New England fares
even worse.

I think we had some of that long skip at the same time at night. Even WSM was totally wiped out. I found Carribeans on most frequencies that weren't regionals. I'd guess Mark's comments about the ground wave may be correct. I did a little experiment. (I'm really sleepy so excuse it if I'm really rambling) I use an old EICO signal generator as my "AM broadcaster", and it unfortunately it does not have very good modulation, nor is the frequency response that great....but it works. I use 1 section of my half wave 10 meter ham antenna to get a tad better radiation. So here's the TEST. I set up on 530 and I took the truck and backed out the driveway and around the corner, and it maybe went 100 to 150 feet before going away. WVOC on 560 5 miles away was chattering it. SO then I went to 1610. I backed out the driveway and ZOT, the signal fell out. I could hear only a very trace of it. When talking to John Higdon, he said it didn't really test GROUND wave since I really had no ground, per se, but the way the BC band goes throught the air, and that the low end of the BC band is so much better than the high end.
On another note, the other night I was playing with my SuperRadio II on 560. WVOC is 5000 watts, DA pattern not my way....so I tried nulling it. When I hit the null, I had selective fading! This is at 5 miles. And these fools whining on rrb and in Radio World have NO idea what the value of a clear channel is to the *L O C A L* area is.

I haven't seen the commercial, but I can tell you WNEW-FM
is still rocking with "All The Rock You Need".
They currently play a mix that favors classic rock, but mix
in plenty of today's current rock.

"Grandfather" Scottso?? I don't know if he'd be too much of a happy camper about that one, Bill(g). But seriously, if I was PDing at 'NEW, I would cut the traffic reports by 1/2, and let Scottso do what he does best and has done since his W-A-Beatle-C radio days, which is "schtick". He's got the gift; always had it and always will.

This is a reference to a slight variation in the classic rock format...
the positioner is "The classic rock you love, the 90's rock you need"
The playlist includes acts like Sheryl Crow, Gin Blossoms, Counting
Crows, all of which have been characterized as "instant classic rock".

* New Boston Bruins' radio voice for this year....

A 39-year old Maine native Dale Arnold who hosts weekday 3-hour
show on all-sports WEEI AM 850 is doing NHL's Bruins play-by-play
on a semi-sister station all-business WBNW AM 590 for the remainder
of the regular season and the playoffs. Arnold succeeded the
legendary 28-year B's voice Bob Wilson who retired from the job earlier
in January. Former Bruin Johny "The Chief" Bucyck remains as the
color oanalyst.

Arnold's contract with WEEI expires at the end of July but ARS which
owns SportsRadio 850 is expected to resign this very knowledgeable
and articulate sports-talk show host.

As a side note : On January 30, Arnold was named as the home TV voice
of the Bruins on the regional cable New England Sports Network which
televises around 40 Bruins' home games. Arnold will succeed a Hockey
Hall of Fame Broadcaster 76-year old Fred Cusick who will remain doing
play-by-play on B's road telecasts on the local UHF superstation
WSBK-TV38. Two summers ago Arnold turned down an offer from SportsChannel
NJ to do play-by-play of NHL's NJ Devils which he did before coming
to host a sports radio show in Boston. Arnold was hoping if he stayed
in the Boston area, he'd get a chance to work the Bruins games on
TV or radio. His wait has paid off...

* New Boston Bruins' radio voice for the next 5 years....

As The Bruins prepare to move into the brand new Shamut Center for 94-95
season, their radio picture will drastically change as well.
The team will shift its broadcasts to Westinghouse' 50K watt
clear-channel WBZ AM 1030 for the next 5 years. It's been revealed
that WBZ's TV4 weekend anchor/reporter Bob Neumeier will be the next B's
radio voice. Neumeier has done work for ABC and ESPN covering hockey
in the past few years. Neumeier also worked as Hartford Whalers(then
in WHL) play-by-play man in the late 70's on WTIC 1080.
WBZ will need to find a backup voice since Neumeier also has horseracing
deals with both, NBC Sports and ESPN and is likely to miss half a dozen
games. Dave Shea, formerly with the old all-new WEEI 590 and the old
sports WEEI 590 is a leading canditate.

No word yet on who'll be paired with Neumeier as a color analyst.
Though former Bruin Barry Pederson who's been on WBZ's Afternoon
Weekend Sports blocks is probably a front-runner.

Johny Bucyck is expected to have some sort of pre-game and
in-between periods role...

* New Celtics Voice? :

Glen Ordway who succeeded the late great Johny Most a few years back
as the main radio voice of the NBA's Boston Celtics wants to know
from American Radio Systems if he'll have a new deal before this season
ends. Ordway's deal expires at the end of this another dreadful Celtics'
year. Apparently, Ordway has been looking over other lucrative
options(NBA Radio, other NBA clubs). ARS owns the Celtics rights
on WEEI AM 850 for 4 more years and Ordway wouldn't mind staying if
he was offered some job security by his current bosses. Side note :
Celtics' flagship all-sports WEEI 850 is bypassing NBA Radio's
coverage of the All-Star from Phoenix this weekend. Not to worry :
it'll be picked by WBZ AM 1030. Ordway has prepared special
features for NBA Radio's broadacst.

* Brud Coverage :

WBZ-AM's evening talk show David Brudnoy is back on full schedule
as of Friday, Feb.3rd. : 7pm to Midnite. Very competent radio man
Steve Leveille who's filled full-time in fro Brudnoy since late October
to early January and for the last 2 hours of the show since then,
was sent to the beach.[It's a shame].

Brudnoy who has the HIV-virus is in this week's issue of People(2/6/95)
with a 3-page story. ABC's 'Day One' will have a piece on him this
Thursday(2/9).

Speaking of WBZ Radio, CBS Radio's Charlie Osgwood will be doing
his syndicated report out of WBZ's studios this Friday morning, Feb.10th...

* New morning voice on WJMN :

February 1st brought in a voice into town -- 27-year old Modesto,Calif
native Baltazar Ibanez who was doing nights on NYC's WRKS for the past
2 years is now a morning voice at Pyramid's CHUrban WJMN 94-5FM. He
simply goes by...Baltazar. He also did some work at KIIS in LA and
WBBM in Chi-town.

Marc Clark who did mornings since very popular JR Edwards(now in Dallas)
skipped town in September moves to nights. WJMN's current line-up is goes
something likes this :

6-10am Baltazar with Lori Duschene doing the news and traffic
10-3pm Diana 'Lady Di' Steele
3-7pm JoJo Kincaid
7-10pm Ralph Marino
10p-2a Marc Clark
2a-6a Christina Fox

* New Wish? :

Granum's Soft AC WSSH-99.5FM is not so soft anymore. Eventhough they
still tag themselves as the 'Easy Favorites of Yesterday and
Today', their new on-air, TV and print campaign stresses more
livelier, upbeat sound of 'The New Wish 99.5'. WSSH and sister

station AAA WBOS 92.9FM conducted a very extensive marketing research over the summer. The format adjustmen is probably the result of that study...

A change at the helm took place on Thursday, January 19th as PD Chuck Morgan was sent to the beach and Bill George, former OM at WPRO AM/FM in Providence was brought in to program WSSH.

WSSH is among 4-5 FM stations in the Boston market which are basically fighting for the same demo : women 25-54. WSSH's main competitors : Greater's Media WMJX 106.7(Magic 106.7) and ARS' WBMX 98.5FM(Mix 98.5); secondary market signals WLYT 92.5(Lite 92.5) in Haverhill and WPLM 99.1(The New Variety 99.1) in Plymouth....In the last few books, WBMX has been beating up on the old AC mainstay WMJX with a Hot AC sound. Now, WSSH decided to take some slice out WBMX's success hoping to leaving a less-popular side of AC - soft AC - to Magic...

* Couple new stations :

Communcom's 50K watt WSSH AM 1510 has finally dumped Spanish language sound and is running religious music service off the satellite. No word on what the finished procduct will be(local/syndicated Jesus talk? Christian music?). One thing is fore sure : the new calls will be WNRB.

WBIV AM 890 is about to become the second all-sports signal in the Boston. The station is about to be sold to Douglas Broadcasting from Satellite Radio Network. 'BIV will become 'BMA and drop its current Spanihs language programming in favor of Dallas-based Prime Sports Radio 24-hour talk/features format similiar to ESPN Radio(no longer heard in Boston). 50 employees at 890 will apparently lose their jobs when Douglas take over the station.

SportsRadio 850 WEEI's GM Ross Elder has already publically dismissed any potential threat from weak-signal WBIV eventhough 2 stations are next-door neighbors on the dial...

Happenings in the #40 market:

*As promised,a bit more on the Big Radio Change:

George Bergantz,senior VP of administration/marketing for the Sabres, said that the team has heard them,but until something definite happens,they will operate as usual.
Sources say that the sales would open up a number of programming possibilities-including the Bisons,Sabres and other WGR programming jumping to what is now 'KB. What isn't known is what will happen to The Big 1520's syndicated programming(Howard Stern/Sports Babe/Dr.Laura Schlessinger/Tom Leykis);what _is_ known is that most of the syndie stuff is under contact-and, in Stern's case,doesn't expire until next year and will cost lots of $$$ to break.
If it proceeds,it will also end the familiar KB calls(which started in the 1930s as WKBW(_W_ell _K_nown _B_ible(either _W_orks or _W_itness,I think it's the latter). WGR dates back to the 20's,and its calls refer to George Rand,the longtime president of Marine Midland Bank and a civic leader. His name graces a building downtown(where,ironically,WJYE and WYRK have their studios). One of my contacts(who used to work there many years ago)told me in private E-mail that he thought Keymarket would dump 'KB to Rich,rather than the other way around-but the effect is that WGR will now become a clear channel and what is left of the 'KB heritage will be gone(as if they had any left). I don't think that's the case:what may have hampered them is that fact that they tried to be _too_ agressive in making a name for themselves,in snapping up the radio rights for the Bills,Sabres,Bisons(obviously,no big deal,since Rich owns them). That may have given them cash flow problems(and that's only a theory on my part, I'd like to hear differences from those in my neck of the woods).
There's still more to come in this....

*Across the border:Toronto's Country 59 became The Fan 590 yesterday at 12 noon. Country 59 ended its life at 10am(on a classy note,too,IMO-noting that if its listeners wanted country,they could go to CHAM/820 in Hamilton or KX96 in the Durham region. C'mon,you don't think they'd mention CISS in T.O.,its main competitor,hmmm? :)). BTW,Wayne Gretzky was one of the guests who called in-yesterday just happened to be his birthday. Speaking of The Fan: its owners,Telemedia,will _NOT_ air any Blue Jays replacement player games on any station in its network(which includes CHML/900 in Hamilton and CJRN/710 in Niagara Falls,Ont.)-even The Fan 590. The station did a phone poll of its listeners,and 85% of the respondents said they wouldn't listen to the games.

*About Tom Snyder's show:WBEN(NewsTalk 930)is airing the show(with Tom & Elliott Forest)only on Sunday nights at 11pm.

*More on Alan Pergament's decision to leave coverage of the radio beat at the Buffalo News to someone else:He noted that "most of the changes(in the 12

years he's been there)haven't been positive ones. It's all about making noise these days. Obnoxious noise." Also,he said he was disappointed in the Planet (CKEY/101.1),becasue he tried it and gave it up when even he could recognize several songs in the playlist.(Well,what the hell did you expect,Perg? No station that I know of doesn't use computerized lists-save maybe WBNY.) He also asked why the same garbage still happens at WGR,saying:"Why does the Rich family allow it? Is it because it's a business and inflammation makes more money than information?" To quote Butthead:"Uh..yeah. Huh huh huh." He also said,in reference to Rocco Pendola(who,contrary to Perg,was NOT in high school-least as far as I know-when hired by WGR;he also worked at WJJL in Niagara Falls),"At WGR,anybody with an outrageous opinion is welcome." (Considering that Randy Michaels-of WLW in Cincinnati-has been consulting them,can it be anything _but_ a surprise?)

Even the news departments came in for criticism:in the past,Perg notes,vets like Don Dussias(now in Albany at an oldies station,I believe),John Zach and Jim Fagan were the leader,now the stations hire "young,inexperienced reporters who are willing to work horrible hours for low wages in the hope that some local television station will notice them." Much truer at WGR than WBEN:only 2 WGR reporters have any sort of experience(Ray Marks and Lou Herbert);in contrast,WBEN has Mark Lightner,Brian Meyer,Tim Wenger and Susan Rose with nearly or more than a decade of experience. Only 1 hire,Claudine Ewing,was relatively new(I don't count Joe Svaitko among them-he worked nearly 5 years in Binghamton,N.Y.). Also,there's Bert Gambini(also at WBFO)and Ed Little (retired)on weekends.

He also notes that the city is an aging town that isn't high on anything alternative,which is why it loves oldies,adding "Name one FM radio personality who has emerged as a major star in the past 12 years."(None,but keep an ear out for Kiss' Janet Snyder. She might be one.)

BTW,Perg's noted like for classical music was ridiculed by your friend and mine :>,WGR midday motormouth Rich Michaels,who proudly announced he had outlasted Pergament. If you're looking at this,Rich,I've got a message for you: you may have outlasted Pergament,_but you haven't outlasted me_. There's an old saying,"Ghosts are dead. I'm still on your ass." I'm no fan of that type of music myself,but why make fun of it?

I'm not looking forward to Tony Violanti on the radio beat,considering that a local 'zine-Slack-gave him their Slacker of the Year award(for his lousy job covering the local music scene). When I say,"It's not over yet",I mean my battle to prove myself the best at doing this.

TTYL...

C.K.G.

>Subject: Seen Gene Rump?
Forwarded From: rmorton@mixcom.com (Richard Morton)

Of KLZS, among other Wichita KS station fame. I lost touch with him and would like to find him again. I cannot believe he would be out of the business.

Last I heard, old Gene was doing TV news on a small station somewhere in Mississippi.

I'll never forget his broadcasting wisdom. Many years ago, during the time he was PD at 1240 (now KNSS then, KAKZ) in Wichita, he had the tremendous insight to tell me that I was wasting my time as a broadcaster and that I should go to another field. Well, I later did mid-days and afternoon drive here in Wichita and am still today, working part time in the business. Shows ya what he knew huh!

Personally, I was glad to see him pack his stuff and move.

ajjjr@netcom.com recently wrote the following about the Hartford market...

"Buying in this market is a seat-of-the-pants proposition at this point, and may well be for the next couple of books as this town, now full of duopolies, continues to find itself."

We're hoping that we can help with that. AccuRatings tentatively plans to enter the Hartford market by either the Spring or Summer survey, pending support from the market's broadcasters. We have signed a contract with WWYZ (Country 92.5), and are in discussions with a number of the market's other operators about signing deals.

Here are the Arbitron Fall '94 ratings for the Portland Market (12+):

STATION FORMAT SHARE
1. KWJJ A/F COUNTRY 9.9
2. KXL AM NEWS/TALK 7.5
3. KUFO FM ROCK 6.4
4. KUPL A/F COUNTRY 6.2
5. KKSN FM OLDIES 6.1
6. KGON FM CLASSIC ROCK 6.9
7. KEX FULL SERVICE AC 5.8
8. KKRZ FM CHR 5.3
9. KINK A/F NAC/AOR 5.2
10.KKJZ FM NAC/JAZZ 4.9
(The simulcasts are listed A/F.)

FORMAT CHANGE:

The former 620 KGW, which was simulcast for 2 1/2 years as KINK-AM, is now all talk KOTK (as of 2/6). Its "SuperTalk" line-up is all satellite, featuring Don Imus; Susan Loggins on Law; Dr. Laurie Schlessinger; Don and Mike; and Michael Reagan. (Sorry if any first names or spellings are wrong, this is from memory.)

North San Diego Reader's Post: Feb. 8, 1995

>FCC Lays Groundworkfor Satellite Radio:

Alan Haber's lead story in the Feb. 8 edition of "Radio World" reported that the FCC decided to allocate "spectrum in the 2310 - 2360 MHz [S] band for satellite digital audio radio services -- or called DARS. It calls for a delivery of digital radio via the bird in the sky.

Opposing the move is the National Association of Broadcasters -- the see it as a "grave threat to local radio." But in an inside editorial, the RW on page 5, called for the addition of DAR a logical step. "Radio went on to become a multi-BILLION dollar industry" after radio with pictures was introduced.

A 1998 roll-out date is slated.

ISDN: Integrates Services Digital Network is available in San Diego county from Pacific Bell. The announcement, made last September, hasn't exactly been a barn-burner. The up-front fees are about $500, plus the monthly line charge. But, PACBell promises that the costs will come down.

RW Feb. 8: The Europe community is ready for a launch of "pay radio" this spring. Millions of consumers will have access to multichannel music packages with CD-quality sound via the Astra satellite system.

K-Mart insert ads in the Oceanside Blade Citizen advertised the GE SuperRadio III, and Sony SRF-42 stereo AM radio.

>Hard disk crash. Bummer. I'm out of 420mb of data -- including my four-page San Diego Radio Log. I have recovered it, and if you have requested one in the last three weeks and haven't got it, please re-submit to me. I promise to turn this around fast.

I have a technical question for all you CE's (Cheif Enginners) out there....
I work for KEOM, a NCE station that is operated by the Mesquite School
district. We currently use a Harris Micro Mac console in the main studio...
We use ElectroVoice Mic's (the RE 20's), and the main studio mic has a Valley
People processor on it. Here's my question: is it or is it not true that
you should take the mic output, run it directly to the processor, then feed
that to the console? Upon observation, I have found that it looks like they
have rigged the mic output to the console input, then they pull it off the
console mic input and feed it to the Valley Processor, then they feed it
right back into the same Mic input....

What's the deal here???
thanks!

The following is a list of commercial classical radio stations in the US, including translator markets were stations can be heard. Most, but not all of these, are affiliates of the Concert Music Network. If we have overlooked any stations please E-mail us at CMNETWORK@aol.com.

KAVX-FM, Portland, 106.9
KHFM-FM, Albuquerque, 96.3
KBOQ-FM, Salinas Monterey, 95.5
KDB-FM, Santa Barbara, 93.7
KDFC-AM/FM, San Francisco, 102.1/1220
KFSD-FM, San Diego, 94.1
KFUO-FM, St. Louis, 99.1
KING-FM, Seattle, 98.1
KKBK-AM, Portland, 1230
KKGO-AM, Bakersfield, 1050
KKGO-FM, Los Angeles, 105.1
KKHI-AM/FM, San Francisco, 100.7/100.9/1510
KLEF-FM, Anchorage, 98.1
KQLL-AM, Tulsa, 1430 Classical from 12N to 7P
KRTS/KRTK-FM, Houston, 92.1/97.1
KSVY-AM, Spokane, 1550
KVOD-FM, Denver, 99.5
KVOD-FM, Colorado Springs, 103.9
KVOD-FM, Steamboat Springs, 98.3
KVOD-FM, Aspen, 101.7
KVOD-FM, Fort Collins, 96.7
KVOD-FM, Laramie, 107.1
KVOD-FM, Denver, 99.5
KXTR-FM, Kansas City, 96.5
WBOQ-FM, Boston/N. Shore, 104.9
WBQQ-FM, Kennebunkport, 99.3
WCLV-FM, Cleveland, 95.5
WCLV-FM, Erie, 104.9
WCRB-FM, Boston, 102.5
WFCC-FM, Cape Cod, 107.5
WFGR-FM, Grand Rapids, 98.7
WFLN-FM, Philadelphia, 95.7
WFMR-FM, Milwaukee, 98.3
WFMT-FM, Chicago, 98.7
WGKA-AM, Atlanta, 1190
WGMS-FM, Washington, 103.5
WLKW-AM, Providence, 790
WNIB/WNIZ-FM, Chicago, 97.1/96.9

WPKM-FM, Portland, ME, 106.3
WQRS-FM, Detroit, 105.1
WQXR-FM, New York, 96.3
WRR-FM, Dallas, 101.1
WSPB-AM, Sarasota, 1450
WSPB-AM, Tampa, 1450
WSYW-AM/FM, Indianapolis, 107.1/810
WTMI-FM, Fort Lauderdale, 93.1
WTMI-FM, Miami, 93.1

> : The Gainesville station is KECS. Based on what has been filed, KECS would
> : remain a C2 and KICI-FM-107.9 Corsicana would be reduced to a C2 from a C1
> : (why not kill off one and upgrade the other?).
> Interesting! What frequency and power is KECS due to broadcast on? Is
> it 107.9?? What will happen to 99.1? Will they both be "HOT TEJANO HITS??"

KECS is to be on 107.9, just as KICI-FM is and hence the requested changes
above to downgrade KICI-FM. KECS is a class C2 (492' tower and 50 kw or
equivalent). I believe Heftel will have the Tejano format on all the
FMs they will own that encircle Dallas: KDZR-99.1 Denton, KCYT-106.7 Granbury,
KICI-FM-107.9 Corsicana, and KECS-107.9 Gainesville.

> : KDZR-99.1 is licensed to Denton, but its tower is in Wise County around
> : Bridgeport and Decatur, so they are really 35 miles NNW of Fort Worth and
> : much farther away from Dallas, hence the need for KICI-FM in Corsicana to
> : the south of Dallas.
>
> What power and tower height does 99.1 broadcast at? NO wonder the
> eastern part of the Metroplex has a hard time receiving 99.1's
> signal...

I believe it's only slightly above 1000' from an article I read about them
when they signed on a few years ago as Jazzy 99.1 KJZY. I don't have my
M STREET JOURNAL directory around to verify.

> : And speaking of other Dallas move-in's, don't forget KKDA-104.5/730's
> : owners are buying KSTV-FM-105.7 Stephenville. KSTV-FM has a pending
> : application to change city of license to Decatur and build a 2050'
> : tower outside Fort Worth to cover all of Dallas/Fort Worth. The upgrade
> : will force country KICM-105.7 Healdton-Ardmore OK to have to relocated
> : to 93.7.
>
> What is the current power of this station? When they move to a location

It's 100,000 watts, but not with a very tall tower. I'm more likely to
get KICM and country KYKX-105.7 Longview-Tyler-Marshall than KSTV-FM.

> west of Ft. Worth, will they remain Country (I believe that the station
> is currently country). All D/FW needs is another Country station.
> In a market with 4 Full power country stations (94.9 KSNN, 96.3 KSCS,
> 99.5 KPLX, and 105.3 KYNG) and several rimshots (95.3 KHYI, Howe, 107.1
> KLTR, Terrel, etc....), I find it hard to believe that another Country
> signal would be successful. How about another CHR format to compete
> with Kiss-FM (KHKS 106.1 - #3 in last arbitron ratings)

I don't know if the new owners have decided or not. I'm guessing this may be the 3rd urban FM that is rumored about. When KJMZ acquired the Tom Joyner show, Russ Parr said he was thinking about going to the new startup urban station according to the DALLAS MORNING NEWS (Russ ended up moving to afternoons on KJMZ).

KECS will be on 107.9 FM. 99.1 I guess will remain the same...and they
may both carry the Tejano Hits format...99.1 and KICI are doing that now.

>What power and tower height does 99.1 broadcast at? NO wonder the
>eastern part of the Metroplex has a hard time receiving 99.1's
>signal...

99.1 is on an 1100' tower with 100k....but...they can upgrade that equipment
substantially from what I have heard from people who worked there. They
should be covering DFW much better than they are....maybe Heftel will
foot the bill for that.

>What is the current power of this station? When they move to a location
>west of Ft. Worth, will they remain Country (I believe that the station
>is currently country). All D/FW needs is another Country station.

>KLTR, Terrel, etc....), I find it hard to believe that another Country
>signal would be successful. How about another CHR format to compete
>with Kiss-FM (KHKS 106.1 - #3 in last arbitron ratings)

KSTV is at 100k..but on only a 400' tower...so they don't get to much of
FW right now. I would doubt that KKDA would keep them country. CHR would
be a hard sell on a station like that I think....but I really couldn't guess
what they are going to put on there.

>Cecil Heftel is one of the most exciting, audience driven owners I've ever
>know in contemporary radio broadcasting.

I have heard nothing but good things about him...but he is not the one really
running the stations here in Dallas. Mr. Rodriguez is doing that. I can't say
I have heard anything bad about him. My posting was only to point out that
these people seem to be using an extrodinary amount of stations to serve
a small audience and they are bringing stations from small surrounding
towns into this market that have not been considered part of the DFW market.

936. New montage WAV via FTP

Canadian announcer with eleven years experience in most on-air shifts and a good voice seeks employment in either AM or FM STATION. Format or location unimportant; although would prefer working in Canada. Have been attending various educational institues during the last four years. Personal commitments to family force me to re-examine my future.

Tapes and resumes available upon request. If interested, e-mail loganc@mi.net.

WBT in Charlotte (1110 same as KFAB...they protect each other) cover up and down the East coast well. When I lived in South Georgia, they were one of the strongest on the dial. Not much else to listen to at all. Still the same in VERY rural areas....

What has always amazed me about the Eureka market (what, #202 or 212 or something) is that such a small population can support 15 radio stations and 5 TV stations. While I'm sure they're not all making much money, I was amazed to find KINS & KEKA being run by real board ops, considering both could have been automated easily. (KINS runs live network talk; KEKA country from a tape service.) I'm glad to know that there are places where live people still run radio stations.

Actually, Henry Broadcasting had owned the station for several years until it was sold to the Spanish broadcaster. I was in the San Bernardino area yesterday. Henry (for years) had owned the billboard outside the old AM 590 broadcast towers (near the intersection of I-10 and I-215) and used it to advertise the AM and FM stations--I remember way back to the old #1/KFXM boards, then it was used for KRSO (newstalk), KDUO (one of the last all-beautiful music stations), and K-Hits (as oldies and country). Now the board simply says, "It's coming. . ." Is Henry purchasing another station in the area or is this board now something completely different??

Like many of the old Top 40's KKRZ/Z-100 has teens by default. Portland teens and young adults have no station serving them in this city/market. Not that the move towards adults is a bad move for KKRZ, but what an opportunity for someone who thinks they could sell a Top 40 station that's rated top 3 in a city the size of Portland!!!

I've been watching this market since I moved here in May...with the growth rate of Portland you're going to see many major changes ahead!

I read in a freebie music Northern Va. music rag that Annapolis-based WRNR was going to boost its power sometime in the summer of '95. Does anyone know when--or if--this is going to occur.

I would welcome 'RNR's incursion into DC airspace. The station is as close to free format as you're likely to find on modern FM radio--especially in DC, with its collection of corporate-programmed stations......

Not true! In 1972, I was summer replacement engineer up in your neck of the woods for WBOS 92.9/WUNR 1600, where we carried a late night call-in talk show once a week where only one side of the conversation was on the air -- deliberately, not by accident! Of course, I was at the transmitter site, while the host did his show from his home over a leased telephone line. It seemed as though he got a lot of calls. But you might speculate that the whole show might have been bogus. Since I never handled any of the calls or heard the callers, I couldn't prove you wrong.

Even though the callers were never put on the air, I was actually ordered by the GM to put the show on tape delay one week. That was after the host slipped through a record with a nasty word on it at about 1:55 a.m., five minutes before the end of his show and sign-off time on Sunday night/Monday morning. Fortunately, that was the one and only time I had to do that.

Not so!

Shortly after dirt was invented, KAJN in Atlantic, Iowa started a daily talk show at 7:30 am called the "Worry Bird." However, callers were not put on the air. Instead, you just heard the host's responses to what the callers were saying.

I was tipped off to this by an article about it in the Des Moines Register.

I used to hear this on KAJN-FM (103.7), a full Class C, in the early 1980s. The FM station has since been sold and is trying to rimshot Omaha. So I don't know if it's still on the air.

I think it beats arguing over KDKA or KQW or CFCF or LR1 Radio Belgrano was first....

Here in Western New York, Buffalo News sports columnists regularly appear on local evening sports talk shows. Long time columnist Larry Felser does "Monday Night Quarterback" on WBEN-AM (930, flagship station of the Buffalo Bills radio network) from 7 to 9PM, talking mostly football. Felser also writes for a national football weekly (Pro Football Weekly?). Jim Kelley (no relation to the Bills QB) is the News' hockey writer (and Buffalo correspondent to The Hockey News), and he spend an hour a week taking listener calls on WBEN, usually Wednesday or Thursday (depending on the Sabres' schedule). Vic Carucci and Jerry Sullivan, also Buffalo News writers, have gigs on WBEN and WGR-AM (550AM) respectively. There may be others here as well.

I can't understand why American radio continues to push 60-second spots, instead of 30's. The Canadian norm of selling 30's makes the stations here much easier to listen to, since the breaks only last a couple minutes at a time. As well, it gives the advertiser a better value for his money, since he can use the 30 - 40% saving to increase his frequency or buy complementary advertising in other media. It also means that for every 60 seconds of airtime sold, the station takes in more from 2 30's than from one 60, an important consideration during sellout periods. And the fact is, while a 60 might be required to convey all the important details of some messages, there's a lot of boring filler junk going on in the 60's I hear on U.S. stations. Take a listen, I'll bet 70-80% of the time, the message could be delivered in a 30.

The shorter spots here don't clutter things, they actually make the breaks more interesting due to the transitions. And while the U.S. breaks are intolerably long, I find that the Canadian stations are often back into the programming before you've actually become aggravated enough to punch out.

Only listen to GOOD radio, and your copy and production will improve.
Get all the RAB material you can, and use their sample ads as specs for clients and to fertilize the imagination of your in-house creative people.
PD's swear to their pet theories: Play the :60 first in stop-set, play it last, keep jockvoices separated just as you protect clients (no 2 restaurants back-to-back, for ex.) have music behind every spot, never use music, music from instrumental bridges in our own playlist only (can you believe that one?).
As soon as you create a cute 2-voicer, your sales people will try to put ten more like it on the air. Beware overdoing a good thing!
Even a fluent or likeable client's own voice can be a good ad, but beware again. If they sound awful, how will you tell 'em they can't do their own ad?
Just my ideas based on 20 years of radio copywriting & creative work.

Hey, Max, you ol' Prodigy alum! Glad to find you again.
The conservative guy from Denver is Ken Hamblin, a Rush wannabe who carved out a niche here as a black conservative targeting a white, blue-collar audience. He delighted his target audience by calling inner-city blacks "cockroaches" and their neighborhood "darktown." He was local here on KNUS for a while but his numbers didn't cut it -- but on the strength of a puff piece in the New York Times and a couple TV interviews he went national.

We have Leykis out here as well, and he's quite different than most. His show is tape-delayed here, though -- do you know when the live feed comes?

Everybody-
At our high school, seniors are required to get an
internship at
an company or organization outside our school. Members of our
school
amateur radio club have expressed an interest in working at a
shortwave
broadcast station. These students have advanced class amateur
radio
licenses and are knowledgable of basic radio and electronics
principles.
They are willing to learn, and most importantly, work for free.
If
anybody out there knows people who work for a shortwave
broadcast station
anywhere in the world, please respond to my e-mail
(mattd@branson.org).
Internships in any aspect of the shortwave broadcast industry
would be a
fantastic opportunity for these students.

Hello from Ecuador and shortwave station HCJB. Our
organization has a summer program for COLLEGE students (I think
you have to have completed at least one year of college). We
also have a "working visitor" program for others who want to
come here on a short-term basis to work in any of our
departments. We currently have two working visitors from England
who can be heard on the air. Anyhow, for information on and
applications for either program, write: Mr. Ed Giesbrecht, HCJB,
Box 39800, Colorado Springs, CO 80949. We will look forward to
hearing from you. --Ken MacHarg

There are a number of kits available, Ramsey Electronics has a kit, the
FM-10 which is a stereo F.M. transmitter, it's low power, it might reach
up to 1KM, depending on your receiver. The number is 716-924-4560 to
order one. They also have an AM transmitter. Both these kits are less
than $50.00

There are other kits available which work better than the Ramsey, but
cost more to buy and are more difficult to assemble. If you want info
on them let me know.

From: wdp@airwaves.com
Message-ID: <3h9gv1$3ur@vixen.cso.uiuc.edu>
Source record: 34716

I have received several personal email notes asking me to call a halt to the constant bickering on the WOWO fiasco.

So as of this mailing, no more WOWO articles will be posted unless they are information on the current status of that siutuation. No more of this bickering (of which I have admitedly taken substantial part) over whether it is ethical to downsize WOWO or whether Inner City is right to buy a station just to downsize it.

I, like many of you, have strong opinions, but I (and several who have written) agree that all major points have been aired and there serves no purpose in continuing to fight with one-another. What will be will be.

If you have any interest in this from the perspective of saving the WOWO signal, contact Scott Fybush (fybush@world.std.com). Other than that, lets just wait and see.

>>1. KDKA *still* has its Clear Channel status.

>There is no such thing anymore. Clear channel means you're the only one
>on the frequency. NOT ANY MORE. Check M street or Broadcasting and see
>how many stations are now on 1020.

Well what the clear channels DON'T sound like the old regional frequencies or
the old IV locals. If that were so, Fred might be in a different profession
or making LOTS less than he is now.
Clear channel also can mean that you actually can serve your local area (if
you are the region's dominant station) with the power you have. Lots can't
even with 50,000 watts because of such a highly directional array.

>>And could this possibly
>>spread to the FM band where the FCC could begin to downgrade 50 kW and
>>higher stations to allow more low powered "local" stations onto the FM
>>band?

>There are no FM clear channels. FM doesn't travel as far as AM that's why
>the max. power for FM is 100 kw not 50. FM travels in line of
>sight...straight line. Apples and Oranges.

The 100K / 2000 foot HAAT ones are the closest to that. Lots of the 3K / 6K
deals are being smushed in into areas they don't belong, and adjacent
channel ones. The 80-90 docket stations for "small towns to have local radio"
are a failure. NOT ONE here even serves it's local area / city of license.
They were put on and pretend to be in a nearby metro area.

>DO distant stations really serve small towns? NO. They are just fun to
>listen to (they really are)!

There's LOTS of areas that just don't have ANY radio reception. Theres areas
of the NC / GA / SC / TN mountains that get NO daytime reception. I stopped
along a scenic overlook in NC on state 28 and the SuperRadio didn't get
anything on AM I could listen to FM had multipath so bad I couldn't understand
anything. (3 stations)

>This is all about a company trying to maximize its radio station in the
>nation's largest market...where revenues are MANY times greater than Fort
>Wayne.

This about a company that has LOTS of money that had the chance to buy other stations, could have gotten excellent nighttime coverage, but seems bound and determined to destroy WOWO for reasons unknown...

960. More on WOWO

Newsgroup: rec.radio.broadcasting
Date: 1995-02-08 04:23:00 UTC
From: "updbaskind@cc.memphis.edu"@msuvx2.memphis.edu
Message-ID: <3h9gv4$3ut@vixen.cso.uiuc.edu>
Source record: 34718

I have been reading with incredulity the numbers of broadcasters wringing their hands and gritting teeth at the coming demise of WOWO in Ft. Wayne. While I, too, will be sad to see the end of an institution, I am realistic about the business, and life in general.

I look at it (and perhaps you should, too) from a near-Darwinian perspective. There is a degree of natural selection in radio. In short, small market clear channels have been selected against. The more fit in the jungle (read that: "larger market stations") have won in this battle. Like Homo Sapiens Neanderthalensis, WOWO has been crowded out. It may be a shame, but it's simply fact.

Natural selection made man (and all other animals) stronger. The process is continuing here.

Radio... It's war -- just like life. Get with the program.

Sounds unbelievable irresponsible for a HEALTH CARE PROVIDER to come out
against condom ads...unless they fear missing the revenue from potential
abortions, aids patients, venerial diseases and deliveries... Who is
the health care provider...are they affiliated with a church or religious
group?

I guess you guys haven't really lived until you have turned on yr AM radio at
midnight and heard NO DX!!!!. Yes, and I thought it would be so interesting
living in Alaska.

No. Hardly all the time I can hear no skywave at all. The first indicator of
any skywave in Anchorage is an occasional peep out of KRAK or KKHI. Usually,
it lasts just a short while, and then back to silence.

You may want to contact the folks at Century 21 in Dallas and ask them about an educational discount on their UDS (Ultimate Digital Studio) system. I don't know if they offer such a program, but it's worth the phone call.

UDS does a great job automating almost any format, and can be used in tandem with most digital audio sources.

Yes 820am was part of the sale although the station has not been sold yet. What I am saying is that they are merely in an LMA with WXTR and are negotiating a sale.

The AM is positioned as "Fredericks Great Country" and is a member of the Sattelite Music Network. The company fired the staff about 8 or 9 months ago and plugged them into the sattelite.

>From what I hear they are not planning on changing the format and are staying with SMN. Hope I answered the question for ya!

: : Here, BTW, is what can be heard locally (not counting religious relays):
: : This was all written down by memory, and shows the flaws of said
: : memory... I'll have better info by the end of this week.

: What has always amazed me about the Eureka market (what, #202 or 212 or
: something) is that such a small population can support 15 radio stations
: and 5 TV stations. While I'm sure they're not all making much money, I
: was amazed to find KINS & KEKA being run by real board ops, considering
: both could have been automated easily. (KINS runs live network talk;
: KEKA country from a tape service.) I'm glad to know that there are
: places where live people still run radio stations.

First off, the TV stations: 2 of the 5 local stations are relays similar
to KGOE on FM- KAEF (23) relays stuff from both KRCR (7, Redding) and
KFWU (8, Fort Bragg, Ca.), all owned by the same company (and the
local-news provider for KGOE FM); KBVU (29) relays KCVU (30, Chico).

It's a nice little market, but it would be nicer if there were some
full-time live local programming here, instead of the morning shows
only on 4 of the stations, at least.... Supposedly, the only local
station that still has live DJs full-time, is KFMI 96.3 FM in Arcata.

No problem there. Either configuration is fine. While I'm not intimately familiar with the Micro Max console, most consoles offer some sort of patch point for outboard processing. It is usually unbalanced, which can cause problems in a high RF environment. While the advantage to the Valley 400 mic preamp is its superior design, the preamp in your console is more than adequate.

After re-reading your post, when they take it off the mic input, is it before or after the mic preamp? Is it going to the high or low level input to the Valley? Is the valley output level set for mic or line level? If they are using the console preamp, then line level to the Valley, then back to the console at line level, it is fine.

972. Info wanted re '70s F.M. radio station, Boston

Newsgroup: rec.radio.broadcasting
Date: 1995-02-08 21:57:29 UTC
From: gilman@bwc.org
Message-ID: <3hbeo9$20d@vixen.cso.uiuc.edu>
Source record: 34730

I hope this is the right group to ask. I just read a piece in the 30 JAN 1995 issue of "The New Republic" about the emergence of stations which reprise music from the 1970s (the CBS "arrow" stations) around the U.S.

This made me recall my youth in southern New Hampshire, where, during the 1970s I was greatly enamored of an "alternative" F.M. station in Boston (not WBCN) which featured disc jockeys such as Lisa Carlin and Robert Desaderio (sp?). Does anyone recall that station? Sure wish I could remember more about what they played; somehow they managed to create an ambience that was deeply engrossing. But, then, perhaps it was just that I lived in a small town and hadn't seen or heard much in the world.

If you want to email me, I would appreciate hearing from anyone who may have shared that radio experience or who might have some information on it. Thanks.

Message-ID: <3hbeor$221@vixen.cso.uiuc.edu>
Source record: 34733

Datacount Inc. has a traffic system that has been on the market for over 12 years. I believe their system DARTS (Datacount Accounts Receivable and Traffic System) is second in the traffic software market with over 1600 stations worldwide. Their system schedules, bills and handles the accounting. They have a general ledger, Accounts Payable and Payroll system that integrates with their traffic system. They also provide a pleasant interface with most major digital audio systems such as DCS, Smartcaster, etc. (over 20 interfaces). In our dealings with the company their SUPPORT department by far has been their greatest strength. They took the time to walk me step by step thru my SBM billing when my traffic operator had to take an emergency leave of absence.

>I would welcome 'RNR's incursion into DC airspace. The station is as close
>to free format as you're likely to find on modern FM radio--especially in
>DC, with its collection of corporate-programmed stations......

I was wondering if someone could clear up a question I've had about WRNR-FM:
Do they have any relationship at all to a WRNR-AM in Martinsburg, West
Virginia? When I worked for them briefly in the early 70s, that station was
a top-40/CHR station. (If there is no relationship, and if 'RNR-AM still
exists, how can the Annapolis FM also have those calls?)

On a more basic level...what's the frequency of WRNR-FM, and if its been around
a while, what is the history of the frequency?

Learn something new every day!

Cheers,
Max

978. <ad> GUARANTEED CREDIT REPAIR BY LAW FIRM

Newsgroup: rec.radio.broadcasting
Date: 1995-02-09 10:47:21 UTC
From: ccapc@cyber.sell.com
Message-ID: <3hcrrp$o8l@panix.com>
Source record: 34736

Consumer Credit Advocates, PC
11 Pennsylvania Plaza, Suite 2101
New York, NY 10001
(212) 629-5261 (telephone) (212) 629-4762 (fax)
E-MAIL: ccapc@cyber.sell.com

Our LAW FIRM offers direct guaranteed effective credit restoration services by experienced attorneys. THIS IS NOT A DO-IT-YOURSELF KIT.

What can we do?

We have successfully facilitated the removal of Late Payments, Charge-offs, Foreclosures, Repossessions, Collection Accounts, Loan Defaults, Tax Liens, Judgments and Bankruptcies from our clients' credit reports. WE GUARANTEE THAT YOUR CREDIT CAN BE RESTORED!!!

Who needs our services?

Anyone who has experienced the inconvenience and embarrassment of being turned down for a credit card, a lease or a purchase of an automobile.

Anyone who is unable to buy the house of their dreams due to denial of a mortgage application or who has to pay thousands of dollars more in mortgage interest than someone with good credit.

Anyone who has been turned down for a job or promotion due to derogatory credit items on a credit report.

Anyone in business who has lost a deal because a person or firm wanted to see his/her credit report before doing business.

Anyone who has been unable to establish credit.

THE FOUR GREAT MYTHS OF CREDIT:

Myth #1: It is illegal or immoral to have your credit report cleared.

Fact: It is not illegal nor immoral. In fact, that is what the Fair Credit Reporting Act is all about. The act was enacted by Congress in 1971. One of its purposes as to give consumers the protection of the law and to help guard against

any unwarranted invasion of a consumer's right to privacy.

Myth #2: The information on a credit report cannot be changed.

Fact: Actually, the opposite is true under the Fair Credit Reporting Act. Federal and State laws require that items be removed if they are not 100% accurate or cannot be verified in a timely manner.

Myth #3: It is impossible to get a bankruptcy off a credit report.

Fact: Bankruptcies can come off credit reports like any other derogatory item. The nature of the derogatory item has nothing to do with its removal under the Fair Credit Reporting Act.

Myth #4: Credit Reporting Agencies are empowered with some kind of governmental authority.

Fact: Absolutely Not!! They are simply large corporations whose primary goal is to make a profit like any other business.

If you have ever applied for or received credit, a file exists in one or more of the credit bureaus. These companies collect, store and distribute as much credit information as they can find, retaining negative information on a credit report for 7 to 10 years. This information is evaluated by potential creditors to determine your credit worthiness.

Credit reporting agencies are in business to protect the interests of the creditors. the LAW FIRM's goal is to help and protect the individual consumer from inaccurate credit reporting.

The president of our LAW FIRM has been practicing consumer law since 1984. The staff of our firm has successfully processed, disputed and challenged thousands of client credit reports.

Our legal fee is based o the number of negative items that appear on a client's credit reports, issued b the three national credit bureaus. Our retainer agreement offers a MONEY BACK GUARANTEE stating that if any negative item is not deleted, upgraded or corrected from a client's credit file, it will give the client a full refund for that item or continue to process the client's file at no additional fee until that item is

corrected, upgraded or deleted. THE ONLY THING YOU HAVE TO LOSE IS YOUR BAD CREDIT!!

PLEASE CONTACT THE LAW FIRM AND LEAVE YOUR FULL NAME, MAILING ADDRESS AND TELEPHONE NUMBER SO WE MAY FORWARD FURTHER INFORMATION AND INSTRUCTIONS TO YOU ABOUT OUR SERVICE.

979. ADMINISTRIVIA: SEEKING MEDIA WEB SITES

Newsgroup: rec.radio.broadcasting
Date: 1995-02-09 12:01:21 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <3hd06h$1o5@vixen.cso.uiuc.edu>
Source record: 34737

Hello all:

I have once again started updating the glorious AIRWAVES web page
(http://radio.aiss..uiuc.edu/~rrb/) and am again seeking any and all
radio/television/media related links to add.

Specifically I am looking in the following areas, but if you have
something you are not sure of, please send it.. Note that I am
seeking links to http/FTP/gopher sites and am *not* offering to store
large files locally on this machine. Smaller files of interest may be
housed here if nothing else is available, but disk space is not unlimited.

1) Anything related to radio broadcasting.
a) Station web sites
b) Archives/web sites of personalities/talent
c) Links/sites for programs, networks, even companies doing
business related to radio broadcasting.
d) Playlists, program schedules, general information
e) Informative links, Broadcast law, news services,
databases, archives of same..
f) Talent resources. Bits, alterhative news sources, info
about other lists, digests, and media resources on the net.
g) Technical resources, archives. Are you willing to answer
technical questions? We'll post your email address.
h) Personal information, Resume's, 'get aquainted' ads, etc.
i) Links to other media/radio sites.

In other words.....Anything and everything that is radio related.

2) Television: Networks, Programs, News sources, Stations, Talent

3) E-Zines: Anything that is related to media even slightly. All
points ov view, levels of quality.

4) International: All links to International archives on media,
especially (but not limited to) radio.

5) Directories: Fax numbers, email addresses <provided they are
legitimate and OK to use> of entities involved im media.

Please check our pages before sending to be sure we dont already have them.

SEND ALL WEB INFO TO web@airwaves.com

Please fully explain what sort of resource you are sending in.

==========

-=*=- Coming Soon -=*=-

A 'marketplace' segment on the AIRWAVES web page, expressly for
commercial vendors to communicate with AIRWAVES readers about their
products and services.. Write for details..

Message-ID: <3hd06h$1o6@vixen.cso.uiuc.edu>
Source record: 34738

Those with access to the international edition of RadioWorld should
note that on page 47 of the Feb 22 1995 edition, there is a full-page
article by James Careless focusing on rec.radio.broadcasting and
AIRWAVES RADIO JOURNAL. It is a quarterly feature called Radionet..
I understand Mr Careless will focus on a different Internet
Broadcasting resource each quarter.....

It is a very positive piece and James did a great job of distilling
the facts about the group and the participants. It also contains a
side-bar describing how to access our archives via FTP/GOPHER and WWW.

Many thanks to Mr Careless for the fine piece. Now if anyone wants to write
about us in the USA edition.... send me email.

Around here, we call AP the Radio OJ Network. It's getting annoying. A reporter from the station I work for recently played us comparison tapes of what UPI and what AP were doing in the same hour. AP led off with another OJ report and UPI covered a number of meatier topics. He told us that UPI was concentrating specifically on radio, while AP sees radio as a lower priority. I think it shows.

These views are my own and aren't necessarily those of the station I work for.

982. RE: WRNR Power Boost - An answer to my question!

Newsgroup: rec.radio.broadcasting
Date: 1995-02-09 12:01:23 UTC
From: Max Cacas - NPR News Operations - 202-414-2218 <MCACAS@npr.org>
Message-ID: <3hd06j$1o8@vixen.cso.uiuc.edu>
Source record: 34740

Boy, talk about the power of the Internet!

I came back from a meeting to find on my PhoneMail a message from an anonymous deep voice (nice pipes, whoever you are!), answering my questions about WRNR-FM and WRNR-AM.

The deep voice told me that the FCC had indeed loosened its regulations to allow stations in different markets that are *not* co-owned to have the same calls as long as they are not on the same band (AM-FM). Any idea what year this rule change happened?

WRNR-FM AT 103.1 is licenced to Graysonville, Md. (on the Eastern Shore of Maryland, across the Chesapeake Bay from Annapolis). In previous incarnations, the frequency was home to the old "Bay Country 103", WBEY. Its currently being LMA'd by the legendary Jake Einstein, owner of WYRE/Annapolis, and the previous owner of the old progressive rock WHFS-FM (102.3 in Bethesda, Md./Wash. D.C., now classic soul WMMJ). A power increase for WRNR would definitely put Jake in competiton with the Liberty Broadcasting WHFS here in the D.C./Baltimore/Annapolis areas.

My thanks again to the anonymous caller who offered this info!

Cheers,
Max

985. Broadcast Audio Processing & Codec Compatability?

Newsgroup: rec.radio.broadcasting
Date: 1995-02-09 12:01:25 UTC
From: cuttedge@aol.com
Message-ID: <3hd06l$1ob@vixen.cso.uiuc.edu>
Source record: 34743

A subject that has become more than a "water cooler" discussion at our organization is the issue of the audio codec and the broadcast audio processor. Can they co-exist?

The issue at hand is actually two possibilities. One, using an audio codec in front of an on-air processor, where the unprocessed audio is "coded" then connected to the processor. Second, the use of the on-air processor through the codec, wherein the codec provides an STL (studio transmitter link) service. This configuration has the processed audio, which has tight level control, as well as bandwidth control, to be "coded", and then finally connected to the transmission system.

Questions to ponder. How do these systems sound? Any distortion? What do they add, or substract? The issue of overshoots, are they there? If so, how are they removed, or are they?

For those interested, or those who have experience with any of this, please share. As an industry, there is plenty to be gained for ALL involved! I believe that this forum would be a good place to begin some discussion.

%emailbbs.ucs.csufresno.edu:Eric_Seaberg%FATNet@deja-vu.aiss.uiuc.edu
(Eric Seaberg,FATNet) wrote:

|: Is there anyone here wanting to discuss the aspects of audio
transmission via
|: ISDN lines and CODEC? I'm in the midst of trying to get a connection with a
|: company in LA that basically is a network for tying studios together
|: throughout the country. It's a great concept for sharing market voice
talent
|: and such, and I'd love to hear from anyone regarding their experiences with
|: the appropriate gear!

We looked at a bunch of systems including IDB, the Telos Zephyr, and even Digital Generations. For our purposes (advertising studio) the Zephyr was the best choice.

While the IDB 3d2 system sounds a little better, it's considerably more expensive both per hour and for the equipment. They wanted $500/month for the box and to maintain the lines, plus a quarter-hour connect charge.

The Zephyr costs $5000 flat, so in ten months (compared to IDB) it's paid for itself. (Some dealers also have lease packages.) The sound is 15k stereo, bi-directional, on a single BRI line. Or it can run dual mono, or G.722 (the so-called 'Switched 56' 7.5k codecs that a lot of male talent uses). Audio quality is quite fine -- better than 15ips tape -- tho the stereo imaging suffers slightly through the codec. More than adequate for broadcast production.

3d2 requires three simultaneous BRI lines, but gives you a 20k bandwidth and pristine stereo separation. Much better for a music studio, or a commercial studio who can bill the higher rate back to non-budget-conscious clients.

Music studios seem to prefer 3d2. Typical rate charged is $350/hour, plus the two studios.

There are more broadcasters and freelance talent using Zephyr. I charge my clients $100/hr, and sometimes even throw a short transmission in for free.

I am _not_ a Zephyr employee. But for the heck of it I started compiling a listing of stations, commercial studios, and vo talent using that system... just the ones who are willing to accept feeds or send for a fee. In the two months that the list has been active, I've accumulated 76 sites. (I've made this list PD, by the way. I should have a Web site up for it -- Zephyr is paying for that -- by next month.)

Digital Generation wasn't even in the running. Very low cost, but a) not realtime, and b) outrageously expensive on session-length transmissions. However, they seem to be the best solution for distributing spots.

Hartford broadcaster "Jack Mitchell" died suddenly of a heart attack on Monday, February 5. He was 38.

Mitchell had been promotions manager for WTIC-AM 1080 for several years, and was a veteran of the 50KW powerhouse for over a decade. Before joining WTIC, he had been with WDRC and several smaller Connecticut stations.

He leaves a wife and son behind.

[Author's personal note: Jack and I worked together for a long time. He didn't like me from the day I walked into the station until the day I left, a move that he had a major hand in. But WTIC is a pressure-cooker; it can take people out of character. It's sad when someone, anyone --- irrespective of your personal feelings --- dies at such a young age. News like this reminds all of us in this passionate business to smell the roses: A wake-up call from a man who, one morning, didn't.]

DC1051@AOL.COM Suggested calling TM Century about getting an "educational discount" on their UDS (Ultimate Digital Studio) system....

We are using this UDS system at KEOM now... but we had to pay full price... We are an NCE station...

Actually we got the system on sale... but then we had to use the money we saved, to buy an additional computer to make the music playlists...

TM Century waits until the last minute to tell you that the computer for the UDS system itself, can only run the music that has been scheduled... it is not designed to create schedules for music and run them simultaniously...

If you have any questions about UDS... again I may be able to help in some ways, as we have UDS at our station. Just drop me some e-mail...

|: opinion of it against ISDN

Comrex, Telos, and CCS all make equipment that might be applicable. Check with a good broadcast supplier like Allied. They've got tons of remote equipment, from multiline frequency extenders through full ISDN, in their catalog.

We bought a Telos Zephyr from Allied are are very happy with it.

Switch 56 and ISDN are operationally similar -- data transmission over a dial-up line -- but use very different equipment at the telco. Because ISDN is a much more sophisticated system, you get considerably more data capability at lower cost. The extra data translates to a better sounding signal, or the possibility of two simultaneous sends. The lower cost means that an ISDN connection and monthly charge isn't much more than a standard telephone. If your phone company gives you a choice, go with ISDN.

Generally, ISDN and Sw56 numbers can call each other. So there's nothing wrong with havinig ISDN at the studio and Sw56 at a remote site... except (of course) the signal quality will be limited by the Sw56.

From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3heh6u$et6@vixen.cso.uiuc.edu>
Source record: 34604

The station that Mark eluded to was "Stereo 94 and a half" WCOZ, "Boston's Best Rock !". It was a great station until it became the Top-40 of AOR under the reign of John Sebastian. Sure, for a very short while...it had monsterous ratings under the moniker "Kick Ass Rock and Roll". But the problem was that the jocks could only read their cue cards and nothing else. For example..... "94 and half COZ, with fewer commercials and no disco", "94 and a half COZ, Kick Ass Rock and Roll", "94 and a half COZ, with fewer commercials and no B.S.", "And don't forget your new COZ belt buckle, available at Strawberries or give us a call here at COZ".....and you get the idea. When WCOZ came on the air as an AOR station, Clark Schmidt (Radio Advisor) put on a fairly good mix of Modified AOR....more well know stuff, you understand....not so off the wall as WBCN (104.1 FM). The jocks had free reign, dont read an epic novel but dont be a no-name jock. But, in the early days of consulting for FM I gues they wanted the fast buck. It was a novel idea but people were soon bored by the station without any personality. In 1984, WCOZ (on the rock format) was no more. It became "The Best Show in Boston", AC/oldies. It sounded good. But it was so short. WZOU came to the air on Labor Day weekend with Top-40/CHR. BOOOOOORING ! For awhile later on, "The Rock is Back on 94.5/WZOU !". Not for long. Z-94 went back to top-40 and now is WJMN (Jammin'94). How ironic that the Mighty COZ died so fast and now is playing the modern day version of disco (RAP!).
I used to listen to COZ myself, but when Clark got the boot and the personality was gone, replaced by cue cards....I moved to WAAF !

At WCRB we run a (hot-rodded) Optimod 8100 into a Dolby DSTL (which incorporates their AC-2 codec). We used to use a Moseley PCL-606 composite STL with the same Optimod; the Dolby sounds noticeably better, but...

... that's after we changed out all the op-amps in the audio stages of the Dolby. When we plugged in the Dolby with its original chips, it didn't sound quite as natural as the Moseley.

I hooked up the two STLs in such a way that I could, while sitting in my living room, tell the remote control system to dump from one to the other in the middle of a piece of music. I can't hear any negative effects of the AC-2 "compression" at all.

Mind you, we're all-classical and we don't do a lot of processing. There's a station in Providence (106.3 I believe) that uses the same Dolby (with the chips we use) on a CHR format. Last time I was down there they sounded much cleaner than their competition (92.3) and louder too. Again, I didn't hear anything I didn't like.

There's one other thing: the Providence engineer told me they weren't as loud running the Optimod into the Dolby as running it after the Dolby. He thought the AC-2 codec might be introducing overshoot on clipped audio. With the Optimod at the transmitter he does his clipping after the codec, so there's no overshoot.

WKBW = Well Known Bible Witness. My weekend boss, Stan Jasinski, used to work at KB in the 50s (weekday late night polkas at 50 kW!), when Doc Churchill ran the place from his tabernacle at 1430 Main Street, later the original home of Channel 7. According to the Broadcasting Yearbook, WKBW signed on in 1925. At the time, Stan co-hosted the nighttime polka show with the late Dan Lesniak, who went on to build Buffalo's first stereo FM station in 1962, WADV-FM 106.5, which is now WYRK. Stan helped put WWOL-AM 1120 (now WHTT-AM) in 1946, and built WMMJ-AM 1300 Lancaster (now WXRL) in 1964. (MMJ are the initials of Stan's daughters Marie and Michelle Jasinski). Stan sold WMMJ in the late 60s to Ramblin' Lou Schriver (WXRL: RL = Ramblin Lou) as he was one of the major investors in building WUTV Channel 29, now the Buffalo Fox affiliate.

BTW, when the Buffalo TV stations separated from their original radio owners, the *other* TV stations changed calls (WBEN->WIVB, WGR->WGRZ). The WKBW calls *belong* on radio, not TV, IMHO. Change the TV calls to WWKB (We Watch Knowing Buffalo??!!). Or, as Joey Reynolds once commented (not so politely) on the air during a visit to Buffalo a few years ago, after Channel 7 was sold to minority owners, call it WEBE: We Be Seven!

I don't know for sure about GR standing for "George Rand" (WGR=World's Greatest Radio? Maybe now World's Grossest Radio!!). It signed on in May 1922, licensed to the Federal Telephone and Telegraph Company, on two frequencies. Looking at the call letter assignments in order of issue, WGR doesn't appear to be out of any logical sequence. They broadcast entertainment shows at 360 meters (833 kHz), and shifted to 485 meters (618 kHz) for weather and information. At that time, *all* broadcasting stations were assigned those frequencies (WGR is currently the 24th oldest station in continuous operation in the US). As the airwaves became very crowded,

the AM band as we know it evolved around 1925, as did the FRC (Federal Radio Commission, predecessor to the FCC) in 1926. In the 1940s, WKBW and WGR broadcast in partnership for a time, as the BBC...Buffalo Broadcasting Company. (BTW, a lot of this info is in the r-r-b FAQ and archives)

Despite all the negatives about the Snooze, unfortunately for the majority of people there ain't no other source. At least Tony recognizes that there are radio stations in town. I miss the Courier-Express, typos and all. Jim Baker was one of the best media critics, fair, not hateful, and a radio listener. Gary Deeb, Hal Crowther and Mary Ann Lauricella were also pretty good at the Snooze. Of course, times and attitudes change. Oh well....

(Begin shameless plug)

Without a doubt, we are the best college radio station
(at least according to the arbs) - 92.7 WUVA FM. We receive no
funding from the university, and therefore we must cover our
operating costs solely by advertizing. In 1989, we were #2 in
the ratings (#1 in pm drive) against 8 other ranked radio
stations. While our stance has slipped in recent years, we feel we
are poised to regain that ranking.

Formerly a CHR station, we now play a mix of 60's,70's
and 80's.

~ -Andrew Dickens, GM 92.7 WUVA

1001. Ground Conductivity

Greetings!

It's been a while since I asked around on this subject. Thought it was probably time to do so again.

What I'm looking for is simple Windows digital audio editing software. Along the lines of SAW but even more simplified. A stand alone app that could does easy edits and can link to text files. Yes, this would be used in a radio news operation.

No, I DON'T want a full blown system that 'does it all'. I want something that is cheap, can run along side AP Newscenter, is cheap, and easy, is cheap and a no brainer. Oh, and is cheap. This IS a radio newsgroup, is it not?

I'm almost to the point where writing such a thing myself seems worth the trouble. Can't believe others have not already written this sort of thing.

Please feel free to shoot me some e-mail on this. Any interested VB/Access/C++ hacks who can see how easy this could be please feel free to jump in here.

Thanks much.

1004. Changes To Broadcast Regs.

Newsgroup: rec.radio.broadcasting
Date: 1995-02-10 01:58:05 UTC
From: fcclaw@cais2.cais.com
Message-ID: <3heh7d$eua@vixen.cso.uiuc.edu>
Source record: 34612

FCC STUDY RECOMMENDS CHANGES TO BROADCAST REGULATION

A special FCC study group has released a list of recommended changes to certain broadcast regulations. Here is a list of the proposed changes that would affect broadcasters:

Legislative (Changes to the Communications Act)

Modify Construction Permit Requirement. Presently, the FCC must issue a construction permit whenever a broadcaster proposes certain changes to its station. The Commission would like to modify the Communications Act to waive the requirement for a broadcast construction permit in some cases. In circumstances where prior approval is deemed unnecessary, broadcasters would only be required to file a license application within 10 days of completing construction.

Limit Silent Station Authorizations. The Commission would like to limit the amount of time a station can remain silent. Under its new approach, a station would receive a one year silent authorization which could not be extend and, unless the station had returned to the air, the authority would automatically cancel.

Extend TV License Term. The FCC would like to extend TV license terms from 5 to 7 years.

Expedite ITFS Processing. The FCC would like to expedite processing of ITFS applications by delegating to its staff certain routine, comparative ITFS cases. This would streamline agency processes by eliminating current, final review by the full Commission of routine comparative ITFS cases, thereby expediting new ITFS service.

Modify Anti-Lottery Provision. The FCC would like Congress to consider permitting broadcasters to air lottery advertisements if the lottery enterprise being advertised is lawful where conducted.

Simplify Broadcast License Renewal Process. The Commission would like to simplify the broadcast license renewal process by establishing a two-tiered process: first, the incumbent licensee's performance during the preceding license term would be compared only against statutory standards and not against any competing applications and second, the renewal application would

be automatically granted if the statutory standards are met or exceeded, or designated for hearing if the standards are not met.

Make License Modification Uniform. The Commission is considering eliminating the public hearing requirement concerning changes in the frequencies, authorized power, or times of operation of any station so that the written procedure provisions of Section 316 of the Communications Act will uniformly apply to any appropriate modifications of broadcast authorizations.

Administrative (Changes to FCC Rules or Policies)

Eliminate the Table of Allotments for FM stations and substitute a one-step application process.

Simplify and clarify the criteria used in comparative hearings to choose among competing applications for new broadcast facilities.

Revise the rules to simplify filing requirements for making specific modifications to FM facilities.

Revise the rules to simplify procedures for AM stations to verify the proper performance of their directional antenna arrays.

Authorize the use of electronic mail and electronic filing.

Now if KFAB only had some programming worthy of its signal. It seems to be a station in crisis; a very mediocre staff that's even moreso given a high turnover rate in the last two or three years. Competition from news/talk KKAR (with Rush Limbaugh and Bruce Williams) and music-of-your-life KOIL have cut heavily into its traditional audience. What's left of that audience (largely 55+) isn't gonna live forever. Without the exclusive contract for Nebraska foootball, this station would be on life support.

: There was also WCAS, an _AM_ in Cambridge that played some fairly
: alternative stuff.

Boy, this doesn't sound like the FM or AM dial in Boston when I was
there.

WBOS was the sister station of WUNR-AM 1600 when I worked there in 1972.
At that time, they played easy listening music through the rather
heavy-handed low-pass filter on their turntables. I don't think they were
much different from 1970 up until the time I spent the summer with them,
and I don't think they changed substantially until at least 1978, the last
year I was in Boston. But I admit that I could be wrong after 1972, and
especially after 1974, since I didn't spend much time listening to them.

WCAS was an all-oldies, 250 watt daytime station at 740 (now WJIB, I
believe -- and, in fact, it was co-owned with WJIB-FM during at least part
of the '70's). I think it may have had several format changes in the
1970's, but they were mentioned once in a New York Times article about the
popularity of "oldies" radio. If I remember correctly, the NYT article
said that WCAS became the most popular station in Boston using that
format -- a statement I found incredible, in view of the station's power
and daytime schedule.

1010. SoCal Update

Newsgroup: rec.radio.broadcasting

From: LanceBKOST@aol.com
Message-ID: <3heh7m$eur@vixen.cso.uiuc.edu>
Source record: 34618

It appears that they are about ready to fire up the new format on the former KHTX-FM (97.5) Riverside/San Bernardino. About a month or so ago, the former Country station and it's AM partner (at 590) were sold and signed off.

A couple of weeks back, the AM returned in a Spanish format, I posted the call letters once before, but my memory has gone bye-bye... It is believed that 97.5 will also be Spanish.

AS WE SPEAK, they have turned the FM transmitter on (in stereo) and appear to be testing. It sounds like they are trying to set up a satellite or an STL, as I hear static sporadically in both channels..

More to come....

Fred Honsberger's suggestion about TALKERS is a good
one...however you might also check the monthly listings
in Randall Bloomquist's column in Radio and Records
newspaper. He surveys about 100 stations across the country
and asks them what their hot topics are. Also, individual
hosts (myself included) post the hot topics in their market
on a more frequent basis on the Internet or on various e-mail
prep services.

I thought I sent a reply, but I don't see it here.

I researched a variety of systems as recently as 2 years ago. We went with RCS/Decision on an RS/6000. It's ok but the hardware is pricey. As I recall there are PC systems from Marketron (which I've heard been recommended highly) and JDS (haven't heard anything on their PC system)

>I was wondering if someone could clear up a question I've had about WRNR-
FM:
>Do they have any relationship at all to a WRNR-AM in Martinsburg, West
>Virginia? When I worked for them briefly in the early 70s, that
station was
>a top-40/CHR station. (If there is no relationship, and if 'RNR-AM still

>exists, how can the Annapolis FM also have those calls?)
>
>On a more basic level...what's the frequency of WRNR-FM, and if its
been around
>a while, what is the history of the frequency?
>
Can't answer to the first part of your question, although I would suspect
that WRNR-AM abandoned its call letters. Judging from the other AM
stations in our area, it's probably a religious station now.....

As far as the present 'RNR, the dial position is 103.1 FM. My experience
is you can get the station clear as a bell driving west from Annapolis
until you hit the capital beltway.

WRNR is at 103.1 on the dial. It is owned by Jake Einstein, former owner of WHFS. Damien EInstein is doing mid days 10-3 on WRNR since he left WHFS last fall. They have had the current freeform/alternative format since late summer or early fall. The call letter change occured around October.

From: TOMLACKO@delphi.com
Message-ID: <3hgfce$578@vixen.cso.uiuc.edu>
Source record: 34625

***** WWRC AM 980 (Local & Net. Talk) is getting closer to their 50,000 watt goal. The station has already increased it's daytime output a few thousand watts while testing continues. Hopefully by next week they'll be cranking out 50,000 watts.

***** Alternative rocker WHFS FM 99.1 morning man Wes Johnson, aka Wild Wes, is helping out sister-station WXTR FM 104.1 (Oldies) with his wacky array of voices. Johnson will continue his regular morning shift at 'HFS while he moonlights. Wes also does a lot of the characters heard on Wolfman Jack's syndicated show.

***** The Washington Redskins have yet to find a new home on the radio dial. Struggling all-sports station WTEM AM 570 had the exclusive Washington rights for the broadcasts until last year when the contract ended. Among the stations still in the running for the season rights for the next three years are: WJFK FM 106.7 (22,000 watts) & sister-station WJFK AM 1300 (5,000 watts); WGAY FM 99.5 (21,000 watts) & sister-station WWRC AM 980 (soon to be 50,000 watts); WMAL AM 630 (5,000 watts) & sister-station WRQX FM 107.3 (34,000 watts). WTOP AM 1500 is no longer in the running for the broadcast rights. And WTEM AM 570 decided earlier not to even attempt to re-sign the Redskins.

***** Fans of the nationally syndicated Don & Mike Show now have a WWW page to toy with. I don't think Don & Mike are even aware it exists. I heard about it through ALT.FAN.DON-N-MIKE. To connect, open the following URL: http://b65173.student.cwru.edu/donmike.htm The page is on a personal machine so, there are some down times. It's loaded with a lot of fun jingles from the show and includes pictures of D&M and Sherry too.

***** Station spotlight. Since things have been a bit slow around here, I thought I'd take a closer look at one of the area stations.

WKMZ FM 97.5 is licensed to Martinsburg, WV, which is approximately 40 miles NW of Washington, D.C., and their 12,500 watt signal does stretch down to the suburbs. They are the station I choose when I'm looking for 70's music. I favor this "ROCK & ROLL YOU KNOW WITHOUT THE HARD EDGE" format of over WARW'S "ARROW" format for this simple reason: variety. Songs repeat far too often for me on WARW.

WKMZ is owned by Prettyman Broadcasting Co. in Salisbury, MD. Prettyman also has properties in Salisbury and Havre De Grace, Maryland, as well as in Deleware. They've been running the "Rock & Roll You Know Without The Hard Edge" format for about a year and

according to Program Director Gary Michaels the response has been "overwhelming."

All on air jocks are local-- no satellite music or jock service at all. The jocks are a bit green but, hey, that's small market radio. I've actually heard a lot worse on the air in D.C.!

Here is their on-air lineup:

Midnight-6 a.m. Chris Buckland
6 a.m. - 10 a.m. Gary Michaels
10 a.m. - 2:30 p.m. Rob Mario
2:30 p.m. - 7 p.m. Cliff Maxwell
7 p.m. - Midnight Ron Baker

Weekenders:

Pat McBee, Jack Thomas and Larry Banks who hosts the popular Blues Program Sundays from 7-mid.

On Wednesday night, February 8, I listened for about an hour and a half. Here's what was played that night.

This is old news, but there are no doubt plenty of us who grew up listening (and didn't know to call it DX'ing) to faraway AM frequencies, especially at night; KOMA, WLS, KSTP, and a station from Arkansas with background sound behind announcer and cool radio dramas in a show called "Bleeker Street."
So what a shock it was to tune in that one, KAAY (1090) from Little Rock over a decade ago and find out it had gone religious...with a deep-voiced ID proclaiming it had "The Power...and The Glory!"

Still an AM Fan...
Stella (no, we don't make up these airnames) Starr
StellaStar @AOL.com

[Moderator's Note: That was 'Beeker Street' on KAAY-1090. It was hosted by Clyde Clifford (air name) and was very psychodelic. He told me that Beeker refered to the making of LSD in a Beeker. Bill]

FWIW - I ha ve long held the opinion that the Stereo Generator and
Final Peak limiter should be as close to the Exciter as possible. IE in
the rack above it.
We are uisng the Loved and Hated Optimod 8200 and like the sound it
produces. The STL is a Microwave Radio DS1 at 23 Ghz. So there is no
digital Compression of the audio. My experiance with digital compression
of audio has shown me that Processing will reveal any artifacts that
exist in the data compression. So I would Pick a compression mode and
stick with it. I use APTX, but have had good luck with MUSICAM. Never
mix these the will really distroy the audio if you do.

FWIW. That's my $0.02 worth.

At WEXP in Plattsbugh / Burlington, I am using raw console output into a dolby DSTL then into processing at the transmitter site. I did not want to place another AGC in the system. It sounds fantastic with one catch (and there is always one). Dolby recommends 12 DB of nominal board operating to "clip" level before a built in limiter that keeps the unit out of digital clipping kicks in. Do yourself a favor and give youself 3 or 6 DB more headroom then they suggest. The limiter sounds really bad on voice (I mean REALLY BAD). They do mention in the setup portion of the manual how this is done and it only takes a few extra seconds over the standard setup. I do appreciate the fact that at least dolby did include some sort of safety limiter in the unit. I have experimented with Mosley's DSP 6000 and when the encoder goes into clipping the decoder muted - I would rather have ratty sounding audio!

The quality of the Dolby DSTL is just fantastic. No complaints on quality or artifacts problems from anyone. I cannot say the same with my test of the DSP 6000. Even with out being able to compare to the original source material, it was clear the system output was in some cases (saxaphones) seriously degraded. I do not know if this is characteristic of apt-X compression or just the implementation of it in the DSP 6000. I have heard demo stuff direct from apt-X and I know several people who run it other digital audio work and they both sound fine. One thing I will say in Mosley's favor is you can cram a lot more channels in the same spectrum. I understand dolby's new schemes have similar spectrum efficiency but I have not heard them yet.

Regards, Joe.

I really cannot imagine what would posses them to want to add another urban
station here....I am not sure what urban AC is though.

furthermore....I am not sure when this is going on the air...it is dependant on
the station in Ardmore moving to 93.7 fm....I am sure they will soon..but it
still could take a year. Maybe they are going to put Z-Rock back on the air.

Hiya! :D

I do a show called Love Songs on an AC station. The caller response has been fabulous, however, we just got our ratings back, and the ratings for our first quarter were low :(The station I work for has never really accepted callers, and of course, my show depends upon caller response. I don't have a lot of latitude in what's played, I can change just one song per hour, and the song I'm allowed to change is one of two current songs per hour.

What I'd like is some ideas on how to spice up the show, and improve ratings. My format is this: I have 2 beds per hour for my dedications, and *those* dedications, I read myself. I put recordings of calls in for the live sweeps during the rest of the hour, maybe 2-3 per hour. My target audience is men, 30+, but I get a *lot* of kids calling. I rarely put these on, as they are usually pretty childish. I try and put only the most romantic calls I get on, and of those, the ones that sound the best. We have a mellow sound, and I 'm limited to what I do play, for example, I get *many* requests for Bon Jovi's latest, but, we don't play Bon Jovi. He doesn't fit with the format. We also use the AXS system, all our songs are on the computer. I simply *LOVE* my job, but I'm very concerned about our first ratings. Any suggestions from anyone who has run a similar show, PLEASE, let me know :) Reply either here, or preferably, in direct email, or both.

Thanks!

Can't tell you about all other countries...but Canada
has what's called BBM (Bureau of Broadcast Measurement)
ratings, taken spring and fall, which closely parallel Arbitron
in methodology and report format. The Accuratings organ-
ization is also providing some competition in Canada as it
is in the US.
In Britain, they have an organization called RAJAR which
measures ratings both nationally (since most radio listening
is to London-based national networks) and in the largest local
markets (London, Liverpool, Birmingham, Glasgow, Belfast,
etc.). They do daypart and hourly breakdowns similar to
Arbitron, and similar demographic breakouts by daypart as
well.
Don't know what they do in continental Europe, Asia or
the Pacific. In a lot of the world ratings don't matter since the
state still has a virtual monopoly. Where commercial radio is
just coming on line, stations do a lot of their own research.
My guess is eventually the big services like Arbitron will be
operating everywhere...

XETRA-FM [91.1, 100kwERP] new morning line up on Feb. 13, will include Howard Stern's radical radio show for six hours. The live broadcast starts at 3 a.m.; with a re-broadcast at 6 a.m.

As announced, this is the 18th station that Stern and his crew will be on, and the first foreign broadcaster. XETRA AM/FM often claim San Diego as their broadcast base, but the transmitters are south of the international border. [The Nobel owned broadcasters have studios in San Diego, and micro-wave the signal to the Mt. San Antonio for the FM; and Rosarita Beach for the AM.]

Before, San Deigo county fans of Stern had to set their dial to 97.1, in Los Angeles, but reception was spotty at best because of KSON at 97.3.

Let go by 91X was Bryan Jones, who headed over for cross-town [nation?] station XHRM [The Flash]. Russ T. Nailz remains to do live appearances and part-time air work.

>

At MW frequencies losses which cause the signal to weaken are mainly due
to absorption in the ionosphere for skywave signals and losses in the
earth/ground for all signals. It is well known that the better the
conductivity of the ground the better the ground wave signal gets out.
However at MW frequencies, since the ground is not a perfectly conducting
medium, radio waves actually penetrate quite some way underground and the
effect on the radio signal depends on the characteristics of, say, 30feet
of topsoil, rock, clay etc.

It is possible to see that MW signals penetrate the ground by comparing
reception of MW versus FM when you are in a tunnel or cave underground

At this depth, the ground is largely unaffected by either short-term
temperature or rainfall changes. Indeed most short term weather effects
have no impact beyond about 3feet down from the ground surface. Seasonal
changes in the water table or unfreezing of winter "perma-frost" on the
otherhand will have an impact on ground conductivity and thus the
efficiency of signal radiation.

In winter I'm sure that two factors can give rise to apparently enhanced
ground wave reception. Firstly in deep mid-winter at higher latitudes is
is possible for residual sky-wave signals to still exist and this can
indeed increase the coverage of a station. Secondly much reduced
atmospheric noise (less thunderstorms) can make reception much clearer
from crackles etc.

Hope this helps

Can't say I've personally heard it...but I can tell you from
direct info supplied me by station PD Gary Burns that it
will be up and running, and in full operation, before the
start of the spring Arbitron survey at the end of March.
Could be a lot sooner than that. It's possible they'll be
able to raise their night power above 5,000 watts before
too long as well, since a co-channel station in Albany that
they're now protecting, has decided to move to the ex-
panded band and received authorization to do it. Should
be interesting...'RC may well be a contender for format
dominance in DC sooner than people expect.

Happenings in the #40 market:

*Tony Violanti reports in today's Buffalo News that Brian Burns,PD at WKSE(contemp.hits,Kiss 98.5)and sister station WWKB-AM(hot talk,The Big 1520), is leaving the stations. Burns' last day is Feb.24,as he heads to Raleigh,N.C. to be the PD for a station owned by Prism Broadcasting. No replacement has yet been named,but Burns has touted music director Sue O'Neil for the post. Burns brought in alternative(albeit safe,MTV-ish)music to the playlist, such as Barenaked Ladies,Pearl Jam,Nirvana,etc.in addition to the dance and traditional top 40 stuff,as well as the first woman in well over a decade to be the top banana in AM drive(namely,Janet Snyder). He added his departure had nothing to do with the possible changes in Buffalo radio(re:Rich Communications getting out of radio,sellling off WGR's programming and staff to Keymarket,who'd transfer it to WWKB and switch calls;WGRF(97 Rock)and WUFX(103.3 the Fox)being sold,as well as WGR and WWWS(3WS)-who'd then go religious),saying there would be changes,"but that's not why I'm going. Prism made me a great offer,they've been recruiting me for 3 months." He became a dad for the 3rd time in December and felt that the move would be in their best interest. Burns,who says he'll miss the area,adds that he hopes that the people put aside their differences for the area's good. He adds that "it's tough trying to change things in radio here,because a lot of people have to be dragged kicking and screaming into the future(or,at least,the 20th century-CKG :))."

*Speaking of The Change:everyone's favorite talk show host :>,WGR's Rich Michaels,complained bitterly over 2 reports in the Am-Pol Eagle last week noting the possible switch. Apparently,Joe Macielag,president of the local chapter of the Polish-American Congress,sent a letter to WWKB/WKSE GM Terry Rodda asking him to consider not hiring Michaels,noting the controversy he's created. Michaels went after Macielag and the paper,calling the latter a "rag" and mispronoucing the former's name and called him a Communist. Am-Pol,form my experience,has a conservative editorial policy. And,Rich,let me spell it out for you:free speech is for ALL people,not just the ones we like and/or hold to. The group is expressing an opinion,as it has the right to. Mind telling me what's wrong with that?

*So,what's going to happen next-format wise at WBUF(B93)? PD Steve Wiersman says he's heard rumors that 'BUF would switch form AC to rock geared to the 18-34 year-old,but he's denied them. However,he did say that the station is pursuing possible changes-yet he didn't see any dramatic changes now. Well, I would. IMO,they will change before '95 goes into the history books-maybe to modern rock,or to hot talk(just my guesses).

*Tip o' the mike to Ralph Hubbell,celebrating his 65th year in broadcasting today! He's worked at many stations in the area,has done Bisons baseball(on two stations at the same time,no less)among many,many other things. And another

one to "Ramblin'" Lou Schriver(memo to Tony Violanti:_not_ Shriver)whose WXRL (1300,Lancaster;country)turns 25 this year. The RL,BTW,stands for his nickname.

*In the Buffalo ratings,I noted what the non-comms got and what their rank would be. For Rochester,WXXI-FM(91.5;classical)pulls a 2.5 share(about 79,400 listeners/week),good for 11th place between WBBF(950;adult standards) and WRQI(95.1/95.5;classic rock/Stern). WXXI-AM(1370;news/talk/jazz;NPR)would be in 13th place with a 1.8(53,000 listeners/week)ahead of WJZR(105.9;jazz/rock/ instrumentals)and behind WRQI(Rock-It 95). Eugene Marino noted in the Rochester Democrat & Chronicle that even with overlap,"you still come up with well over 100,000 people who listen to public broadcasting in a given week. That's about 1 of every 8 people in the market-hardly the tiny elite that public broadcasting's detractors would have you believe."(BTW,WNED-FM gets about 92,000 listeners/week.)

*WYRK-FM,WJYE-FM and WECK-AM are moving soon...to new office space. The three stations,owned by American Radio Systems,will soon be moving into new offices in the Rand Building downtown,according to Jim Fink's column in today's Business First. WYRK had their offices on the 5th floor,while WJYE/ WECK were up on the 17th floor,but Ralph Christian(the stations' GM)said this has been in the works for a long time. THe stations will now be based on the 9th floor,with 9000 square feet of space. Christian said,"This makes the most sense. Both our towers are already there." Where WECK's studios will be (currently in Cheektowaga)is unknown.

*WNUC(107.7;translators at 105.3 and 107.3-new country)has brought on board 2 new air personalities,one of them not so new. Carol Williams,a vet of the Taylor & Moore days on WPHD(now WUFX-103.3 the Fox),joins along with Buddy Shula. He'll handle Hot Country Nights from 7pm-midnight. Nice to see that 'NUC isn't relying on the bird that much.

TTYL...

Well, that's what you'd think to tune in AM 1510 here in Boston. Yes, they've finally changed calls to WNRB(AM), "Boston's Blessing." Programming is satellite-delivered contemporary christian music, although one liner mentions that there will also be some religious teaching, both national and local.

WNRB is the only station currently owned by Communicom, and as such it now ID's as "The 50 thousand watt flagship station of Communicom."

A quick bit of history (well, as quick as you can be with this profoundly ill-fated station):

1934 - signed on as WMEX, 5 kw on 1470
1941 - moves to 1510 under NARBA, 50kw day/5kw nite
1960s - becomes one of Boston's great top-40 stations (Woo Woo!)
1970s - format changes to news-talk
1978 - calls change to WITS under new ownership
1981 - transmitter moves from Quincy to Waltham, power increases to 50 kw day/night, but sharply directional -- can't hit the whole market
1983 - calls change to WMRE, format to big bands
1986 - station goes dark
1987 - Noble Broadcasting (WSSH-FM) buys station, returns it to air as big-band WSSH(AM).
1989 - calls change to WKKU, format to country. Stereo added.
1990 - calls change back to WSSH(AM), // WSSH-FM. Mono.
1991 - format to leased Spanish.
1993 - station goes dark for several weeks, returns with Talk America satellite talk
1994 - station flips to Spanish again. Noble sells to Communicom a few weeks later.
1995 - station flips to contemporary christian, then changes calls to WNRB and adds promos, spots, and liners.

What a checkered history...

By the way, I suspect this post will be of more value to our readers in Europe than in North America. The 1510 signal beams northeast at night, catching a small bit of the NH and Maine coasts before shooting over the ocean to Europe. I'm told it's one of the very best US AM signals there.

>I am advisor to a small campus station (WWHS-FM) that would like to
>upgrade its operations to provide more professional sounds and
>transitions. It appears to me that the general topic of station
>automation covers some of this.

Incorrect. To me, automation is the worst thing you could do if you want a professional sound. I've never heard -- and I've WORKED at a couple -- any automated station that sounded anywhere near professional.

Your best bet is to spend the money you would waste on automation for better equipment, and bring more student volunteers on staff. Properly trained, students can really sound professional. After all, that's what you're supposed to be doing with campus radio, isn't it?

>[Moderator's Note: That was 'Beeker Street' on KAAY-1090. It was
>hosted by Clyde Clifford (air name) and was very psychodelic. He told
>me that Beeker refered to the making of LSD in a Beeker. Bill]

I don't want to appear pedantic, Bill; but I think this fellow MAY have
been "putting you on" a bit. My understanding of the reference to "Bleeker
Street" is that it refers to a street in manhattan in greewich Village and a
center for counter culture and pop music stuff during the 60's. In an indirect
way that might involve or imply illicit drugs, but ... I offer this for what
it may be worth.

BTW, I understand there is a move under way to resore the old Gilloiz
theater! Saw many a movie in there during the early to mid 1960's.

Contact Premiere Comedy Network, Los Angeles, CA
Phone number: 818 377-5300, or 377-5343

Someone in your market may very well have this syndicated service, which is market exclusive. Premiere provides several types of comedy product on a weekly basis, catering to AC, CHR, Rock, and probably Country. Each is markte exclusive. Don't know if they have a version for Talk, but they're not picky as to who gets which version. In other words, you can get CHR, even though you're a talk station. The CHR version is where you'll find Carl. Good luck.

> cancellation as it relates to CODECS.

What do you mean by echo-cancellation? The ISDN line is full-duplex, so unlike analog phone lines there is complete isolation between the send and receive paths. If you refer to acoustic echo-cancellation (i.e., feedback) the problems are similar to analog lines.

Cross-posted to: rec.radio.broadcasting,ba.broadcast

As part of the "defunding" of CPB, pbs stations were given a questionnaire to fill out, including questions about how many of their employees had previously worked for Pacifica broadcasting stations and how many had ever worked for "Christian" broadcasting stations. The congressman who distributed the questionnaire later rescinded the questions, but not before they left a lasting impression on all who knew about them. These are the same folks who seem to have launched a full frontal attack on Pacifica by calling them "hate radio."

I have heard/seen very little coverage of this story, except from my local Pacifica station (KPFA). If you want more information, call your nearest Pacifica station and they can send you the entire questionnaire.

As a sporadic reader of media newsgroups, I'm surprised to see little or no discussion about the issue. If I were a broadcast professional, it would certainly scare the hell outta me, and I'd be making lots of noise, before they came for me.

Where is John Henry Faulk when we need him?

Some of you may remember my original post with a question about how our microphone is wired at to the processing gear at the station I work for. Basically I stated that it appears that the mic output goes to the Harris Micro Mac console, then goes to the Valley People 440 processor, then it goes back to the Harris console on the same mic input that it went to, in the first place...

I have some more updated information regarding this....

There are VU Level led lights on the Valley Processor. They will come on when someone is talking through the mic IF and ONLY IF the mic's channel slider is up at nominal. If the slider is brought down completly, there will be no VU Leds response on the Valley processor. Shouldn't it be that you would see the VU leds no matter where the mic's channel slider is?

Also, for fun... I turned off the Valley processor. This killed the mic's output completly, when I had the slider up at nominal and had the channel open. HOWEVER if I brought the mic slider down to cue mode, I could hear myself talking through the cue headphones...

Our console does allow two sources per channel, and the mic is on source A of the channel. Source B is something non-directly related to the mic. Only one channel cna be used at a time...

The Valley People processor is the model 440. It acceepts balanced or unbalanced mics, as it uses a barrier strip. Input impedance is 100k ohms balanced, and 50k ohms unbalanced. I could not find anywhere if it takes both line and mic levels, however I would assume it can take mic levels because it is a mic processor.

Finally, I have found that with the proxessor supposedly on and running, it is still way to easy to peg the VU meters on the board, with the channel slider at nominal. Isn't the processor supposed to stop you from being able to peg the board VU meters, no matter how loud you scream into the mic, with the mic slider at nominal?

Thanks to everyone who has submitted replies to this question... I really appreciate your knowledge and help.

Our dynamic, high-tech company is looking for a Customer Support Engineer to provide our customers with product and systems information and after-sale technical support.

Us: The world's premier manufacturer of digital telephone interfaces for talk-shows and call-in programming. And (if you've been on the moon all year and don't already know) we make the Zephyr (tm) for ISDN-based programming and production. We offer:
* Over a decade of technological innovation and a track-record of superior customer satisfaction.
* Competitive salary in a city where your paycheck goes farther than it would in, say, LA.
* A very cool work environment with a view of a Great Lake, a great ball park, and the Rock and Roll Hall of Fame.

You: Have broadcast audio engineering experience, preferably in radio; are a good problem solver who wants to use this talent to help others; can explain technical concepts to other people over the telephone and in writing; know your way around a Mac or Windows; have strong organizational skills; and last but not least, are willing to take on new challenges. You want a job where:
* Initiative, leadership and creativity are rewarded.
* Everyday is dress-down day.
* You never have to wear a beeper again.

If you're interested, send your resume or qualifications letter to:
Telos Systems
2101 Superior Avenue
Cleveland, OH 44114
Fax: +1 (216) 241-4103
Email: telos@aol.com
No telephone calls, please.

In the spirit of our commitment to diversity, we welcome applications from all individuals.

I just wanted to comment on a little "one liner" that lance Ballance (LanceBKOST@aol.com) threw in at the end of his letter...

He said, "If it ain't broke, BREAK IT! Give the engineers something to do"

Let's just say that I moved an Otari tape deck from studio A to studio B during an emergency (the engineer should have had this done for us) and then he chewed me out for it. I'm still counting his lies form that little power trip... :) But basically he told me that moving the deck could have messed up something in the studio? Oh really? You mean I could mess up something in the studio, after the power supply on the main console fried, while a technician was trying to fix something, and caused us to have to broadcast from studio B to begin with?

I mean hey I respect technicians and engineers... I'm not after the guy's job, and I am certinally not qualified to apply for it. But I do know a few things... and moving a tape deck is one of them. I have very similar equipment in my home studio... I'm not sure this guy knows that though...

Oh and he had the nerve to accuse me of changing settings on the Optimod... What....me? No way!.... and even if I did... how can he proove it? I mean he's the one who leaves the key to the darn thing in the studio, where anyone and everyone can see it...

I'd love to break something for him... :) But maybe it would be better not to... ;)

: *LOVE* my job, but I'm very concerned about our first ratings.

This is most amazing. Here's a station getting *many* requests from listeners, but the station doesn't play what the listeners request. Is it any wonder the ratings are low? Whatever became of the market driving the company? Hewlett Packard didn't set out to make printers, but does so today because an early experiment took off and people kept buying printers. The station's not playing listener requests is like H-P telling customers "Sorry, printers aren't on our playlist. Why don't you buy a scientific calculator instead?"

Lisa, can't say I've run a similar show, but here are some things that can work to raise listener interest in your show.
First, a note; your young callers may expect their kind of programming; do other shows on your station cater to them? Their calls reflect a habit of calling, even if they haven't caught on to your show's emphasis.
A) Have a contest or promotion. Even if you can only give away some free promotional records (sorry, CD's) have a "love letters" contest or something that could get you word-of-mouth attention for your show's theme.
B) Cross-promote. Will your PD schedule promos in other dayparts for your show? Let morning, mid-day listeners know that their "love connection" is coming up tonite, and use a quick clip of a good caller or two.
C) promote in other media; get sales to trade out a billboard or print ad featuring your show.
D) Be the news; send out regular releases on neat comments and events heard on your show, to a media columnist or Radio/TV dept of a local paper. That's an idea from Dan O'Day, who gives great seminars for humble airpeople (free plug) and I found it really works. They like to print things that make them look knowledgeable about their local media people. When I had a baby on the air (almost literally) I got a write-up in a VERY small paper that was so nice, I keep in my Job Applications file.
Good luck next book!

: Either way, doesn't look like we're going to hear him up north again
: any time soon.

During the summer, Group W bought KKHI AM & FM, former classical music outlet since 1962, and changed it into a news/new age music station. This is quite odd considering that not more than 15 years ago a similar format was tried here (anybody remember Norm Woodruff's "Trendformation Radio" on the old KYA(AM)?) and it bombed very badly.

Anyhow, the radio stations quite naturally became KPIX AM & FM to complement their long-running TV station. The radio stations also simulcast the TV news. They do a lot of cross-plugging. But if indeed they have snagged Ronn Owens, this could mean a big increase in visibility.

Hi,

in order to receive FM stereo broadcasts I'm in need of an outstanding stereo pll demux chip. I've tried National - seems they dropped their demux chips, among them the LM4500 which I know some expensive tuners used.

I went through the Motorola databook with no luck. I went through the Philips databook and found only one not market "mid-fi" - the TDA1578A (of 1983 vintage). I hope there must be other chips available but I need help and pointers finding them. So all advice is very welcome :-).

Thanks,
john 015

Yes, in fact Gene Rump is doing news at a station in Mississippi. However, I don't know that I'd call it small -- it is the #2 station in the state's largest metro area (Jackson).

He goes by "Gene Edwards" now, and co-anchors the 5pm news on WAPT-16. Please tell me Rump is his real name and the backwaters conservatism that kep NYPD Blues off the same station forced him to adopt an airname...

I grew up in the Wichita area (Pratt, KS, 75 miles west), and always liked him on KAKE-TV. I'd forgotten he'd also been in radio -- you must've been there during the time KAKE sitll owned 1240, or shortly thereafter. As I remember, there wasn't a lot of visionary programming going on there or on (now KRBB) KBRA when he was there.

Now I live in Jackson, and enjoy seeing him again. Unfortunately, he has no phone lisitng under Rump (which I find a little suprising) or Edwards (which doesn't suprise me at all). So the only conact info I can provide is the station, WAPT, Channel 16, 601-922-1607

Best,
Scott

1065. Re: Sony SRF-A100

LanceBKOST@aol.com wrote:

: Since there are numerous folks in here who own the Sony SRF-A100 AM Stereo
: Receiver, I have a plea......

: HELP!!!!!!!!

: I need to find a replacement antenna mast for mine. The cat knocked it over
: and severed it at the base of the radio itself.. I still get some interesting
: AM Stereo, but FM sucks like a vaccum....

: Can anyone tell me where to find one?

Sure- First, unscrew the back, and unscrew the antenna off the inside
back cover (yes you can! It won't damage the wire!), then take the
remains of your whip to Radio Shack, where there are plenty of
replacement antennas to choose from. This radio's antenna is fairly
generic, so you shouldn't have to pay more than $5 for a comparable
antenna with the same base...

Good luck! :)

Now, my turn for a request WRT AM stereo:
I do miss using my SRF-A100 (it needs to either be repaired or reworked),
but nevertheless, I still have an interest in AM Stereo. The request?
Well, I'm looking for any information on known AM Stereo modes (I know
C-QUAM has become the de facto standard, but I'm still interested in
other stereo formats, too), scematics for radio projects involving AM
stereo, sources for radios and chips, etc., and nationwide/worldwide
lists of known AM stereo stations. I can provide an FTP site for the
above (including HTML pages with pointers, if offered, so my own
resourses aren't taxed)...

Maybe an AM Stereo Listeners'/DXers' mailing list or some such should be
in order? ;) Discussing one's AM Stereo listening/DXing experiences, and
sharing one's radio projects? ;) Anyone interested, like me? ;)

The whole concept of copywriters has to be examined, first. As Production Manager of WHJT-FM/WSLI-AM, my dealings with radio commercial copy is simple...MAKE IT CREATIVE, MAKE IT DIFFERENT, AND MAKE IT UNIQUE. If it matches something already out there, it probably won't do the client any good. If a copywriter takes a different appraoch from the norm...well, magic can happen!

> I can't understand why American radio continues to push 60-second spots,
> instead of 30's. The Canadian norm of selling 30's makes the stations
> here much easier to listen to, since the breaks only last a couple minutes
> at a time.

The :30 is better, but there are times like for concerts and big promotions that a listener can be better informed and reached with a GOOD, CAPTIVATING :60 spot.

> As well, it gives the advertiser a better value for his money,
> since he can use the 30 - 40% saving to increase his frequency or buy
> complementary advertising in other media. It also means that for every 60
> seconds of airtime sold, the station takes in more from 2 30's than from

Actually, a station makes more off :60's, depending on the package deal.

> And the fact
> is, while a 60 might be required to convey all the important details of
> some messages, there's a lot of boring filler junk going on in the 60's I
> hear on U.S. stations. Take a listen, I'll bet 70-80% of the time, the
> message could be delivered in a 30.

True, goes back to a good copywriter, though.

> The shorter spots here don't clutter things, they actually make the breaks
> more interesting due to the transitions. And while the U.S. breaks are
> intolerably long, I find that the Canadian stations are often back into
> the programming before you've actually become aggravated enough to punch
> out.

Be creative in the ad copy and sell :60's when an emotion or impression of value needs time for devlopement that a :30 can't hold...

: question, our call letters are XTRA." And that's what it says on the
: stationery, too. Didn't know nuthin' 'bout no E's, Miz Scarlett. :)

Those were the days of Gordon MacLendon, broadcasting legend. Anyhow, the slogan used to go "This is EXXXXXXTRA music...over Los ANNNNgeles." They weren't anywhere near LA; in fact they were nearly 150 miles from LA with two major cities in the middle. So, it doesn't surprise me that he had his staff people believing there was no "E" in XETRA as well. I chalk it up to his trying to get people to write the call letters in ratings diaries -- nobody wants to feel embarrassed at doing the wrong thing, and some people might not have written down "XETRA" since the call letters just didn't "look right" to Americans.

Datacount Inc. has a traffic system that has been on the market for about 12 years. Datacount is #2 in the market of traffic scheduling systems with over 1500 stations worldwide. The system handles scheduling, billing, reporting and accounting. They also provide an easy interface to transmit their traffic logs to most digital audio systems. They also provide for automatic log reconcilations from automation systems. They have both single and multi-user versions and run on lantastic, Netware, Token Ring systems. But by and far their greatest asset is their support staff. They will walk you through procedures and explain in English (Broadcast English) how to accomplish most any task. The support department is good at getting the system to fit a station's needs.

For more information you can call Debbie Hamby at 205-749-5641 tell them you were referred by the Internet.

1072. Re: Weird AM reception

Newsgroup: rec.radio.broadcasting
Date: 1995-02-12 04:36:21 UTC
From: whitetho@med.unc.edu
Message-ID: <3hk385$shg@vixen.cso.uiuc.edu>
Source record: 34780

I believe that both cases of unusual reception can be traced to the ionsphere, specifically the D Layer. WARNING: The following is a simplification. If there are any real science-type people out there, feel free to jump in with a more accurate review.

First a recap: the ionosphere, surrounding the Earth, is composed of a number of concentric layers of ionized gases. Each layer has distinct characteristics. For AM band (aka mediumwave) reception, the inner D Layer and outer F Layer control skywave reception.

The F layer is responsible for reflecting medium wave signals back to Earth. It is always around, day or night. It is actually stronger, thus more reflective, during the day, because of the increased ionization due to solar radiation. In fact, if it weren't for the D layer (see below), AM band skywave would be stronger during the day than at night!

The D layer is closer to the Earth than the F layer. More intense radiation is required to form the D layer, so it normally appears only during the strong solar radiation of daytime hours, then disappers at night. Unlike the F layer, the D layer absorbs AM band signals. This is why skywaves normally disappear during the day--the D Layer absorbs the radio waves before they can make their way to the reflective F layer. But at night, when the blocking D layer normally disappears, skywaves become possible. The best analogy is that the F layer is a mirror, while the D layer is a curtain drawn in front of it during daylight hours.

The are a couple of not-too-uncommon exceptions to the standard no-skywave-days/strong-skywave-nights setup, and our esteemed moderator witnessed both of them in a 24-hour period. First the daytime reception of Chicago stations. During winter months the sun at is at a low angle, so there is less solar radiation. Less solar radiation => a weaker D Layer => less D Layer skywave absorption => some of the signal makes it thru the D Layer to the reflective F layer => limited daytime skywave reception occurs. >From my experience this works best for signals about 1000 kilometers away, since it is easier to reflect signals coming in at a low angle. It also helps if the stations are 50 kw, and static levels are low.

The second report is that during the night there were no skywave signals coming from the North, but unusually strong skywaves from the South. This was due to a solar flare. The radiation from flares tend to collect around the Earth's magnetic poles, and spread towards the equator. The stronger the flare, the closer to the

equator the effects are felt. (Think of it as a sort of "Sherwin-Williams Covers The Earth" effect, but using electrons instead of paint). Radiation from the flares strengthen the layers of the ionosphere. In this case, it caused some of the absorbing D layer to form during nighttime hours, which snuffs out skywave signals just like it does during the daytime.

The strength of the flare determines how widespread the effect is. In this example, the D layer had formed over the upper half of the U.S., snuffing out skywaves trying to make their way from Chicago to Missouri. But the flare wasn't strong enough to create the D layer farther south, so skywave signals from south of Missouri weren't absorbed. In fact, they were stronger than normal, because the reflecting F layer had been strengthen by the flare. (During really stong flares the D layer does spread far enough to block out ALL nighttime skywave, which it really a eerie effect, since the only thing left are a few groundwave signals.)

[Moderator's Note: This distrubance has been fairly regular here in Missouri. Tonight, all Chicago (and North) signals have been missing and Cuba has dominated 890, and 720. Bill]

interesting to see someone with a fairly accurate knowledge of the history. 24th is a good number for WGR.

Are you in position to learn for sure about the alleged meaning of the calls? While it is most likely it was not a requested, there are two things to note: KOP is considered one of the first, if not first, requested, and that was only four days after WGR. Also, some have suggested that KNX was requested to stand for "Annex".

The other potential thought is that things were more "informal" in some ways in those days. A license could be had by walking in during the morning, and taking the train home with license in hand that afternoon (WOR, for example). It is also possible that an application could have been "timed" to qualify for issuing in sequential, although "preferred" order.

Also, does anyone know the whereabouts of Al "Jazzbeaux" Collins, who worked the Denver, San Francisco and L.A. markets in the '60s? Thanks for the help.

1076. One WOWO Moment.....

Newsgroup: rec.radio.broadcasting
Date: 1995-02-12 04:36:25 UTC
From: "PETER Q. GEORGE" <PGEORGE@WELLESLEY.EDU>
Message-ID: <3hk389$shu@vixen.cso.uiuc.edu>
Source record: 34784

I think the time has come for a "cease-fire" on the WOWO situation. Admittedly,my "flaming" comments about Fred Honsburger's opinion on WOWO were NOT proper for this forum called "Airwaves Journal". The WOWO situation is, and always will, be a sensitive issue for those of us who really appreciate that BIG GIANT from that Little City on Indiana. Now, it time to let the FCC decide the fate of that great radio station. I would like to say that the Listeners' Guild really gave its' best shot in trying to let the FCC know that sometimes there is something more important than money... it is public service and 1190/WOWO best exemplifies that need. Today, radio is nothing more than an idiot box with the same 200 songs played in rotation in what ever format you choose. "Another ten in a row, with NO TALK", "Traffic and weather..together", "Traffic on the NOINES", "Today's HOT NEW COUNTRY with NO TALK"...etcetra, etcetra. It has gotten to the point where all programming is dictated by some computer genius from Dallas or L.A. and the fact that NOBODY has the "gonads" to try something new and home grown. Sure, WOWO has some of the taste of a consultant but it STILL maintains that distinct "Hoosier" flavor that makes it so special. But alas, for how long.

Bill Pfeiffer is a true gentleman. He basically bent over backwards to allow all sides of this crazy scenario to be heard. Some of it good, others not so good. But he should be commended for the fine job he does day in, day out. That is no easy task. But now it is time to lay down our arms and get back to the business of living in the nineties. There is SO much happening in this industry that we need to emphasize on these pages, rather than putting people down. The Guild WILL keep you informed of any developments on the WOWO situation as they develop. But for now, lets get back to keeping a watchful eye on this business...i.e....deregulation, ownership limits, "The O.J. Simpson Show" and more. I wish to thank Bill for the great job he is doing on this newsgroup and be assured...it does not go unnoticed. And to Fred Honsburger of KDKA, may the better man win. And if I do not win, the next time I come to Pittsburgh..the lunch is on me. Take care, one and all!

Peter Q. George (N1GGP)
The WOWO Listeners' Guild

[Moderator's Note: I usually dont post articles that praise me like this one, but I have posted this because Peter has more to say than stroking me, and because he specifically asked that it be posted. Source record: 34786

I learned to ski this weekend...OK, I learned to fall down a lot, and you don't want to know how sore I am today, or where. ;-)

What's that got to do with radio? Well, I learned at Mount Wachusett ski area in Princeton MA (northern Worcester County, about 40 miles W-NW of Boston). And in addition to having the transmitter of WXLO-FM 104.5 Fitchburg-Worcester up at the top of the mountain, Wachusett now has an FM TIS of its own.

It's on 88.3, and gets out for a couple of miles, far enough to be heard for a bit on nearby Rt. 2, the main E-W artery in the northern part of the state. No calls were heard, it's in mono, and the "programming" was a repeated loop of traffic and ski information.

Call me obsessive...but I do have it on tape. :-)

I've heard a couple of stories as to the origins of the name (and show), that's
a new one.

One story has it that they aired a late-night program Saturdays trying to
recapture the "Golden Age (TM)" of radio with theatre-of-the-mind stuff.
Allegedly in those days (early-to-mid 60s) it was the Beaker Street Theatre.
The show drifted towards an "underground" attitude, and by '67 the "theatre"
was dropped, and it became a music program.

The other story I heard was that since KAAY was 50kW/directional, they needed
a first ticket operator at the transmitter. In the interest of saving money,
they decided to have the transmitter engineer also do Saturday overnites
(apparently the Sunday-morning PSA ghetto originated from a pseudo-studio
at the transmitter, anyway). Since Dale Sidenschwartz, the original "Clyde
Clifford" (there were others later) was a big fan of "underground" radio, and
was the overnight engineer who'd get to do the show, apparently was able to
convince the PD to give it a shot. Who knows the real story, the second one
sounds the most plausable.

Somewhere, I have a tape of one of these shows, you can even hear the cooling
fans for the transmitter in the background. He used some psychedelic background
music to partially drown it out, but they were still audible.

Steve
grew up in Vermont where considerably less daring fare was heard on 1090 from
WBAL/Baltimore.

Just for your listening enjoyment....
"Beeker Street" can now be heard on KMJX 105.1 "Magic 105" in Little
Rock. It's still hosted by Clyde Clifford. I'm not sure of the time.
Maybe late Sunday nights. (It's been a while since I've been down there to
hear it.)

After Clyde, the show was hosted by Stuart McRae, a onetime colleague of mine at TM Century in Dallas, TX, now with Computer Concepts (the DCS people) in Lenexa, KS.

I worked at KAAY in the 70's and, resultantly, add that the "background sounds" (sounded almost like vari-speeded ethereal radar pings) were aired from cart for a very special reason:

- During most of the broadcast day, KAAY's programming originated from the studio site in Little Rock with a 1st class engineer on duty once our 50 kW signal went directional at local sunset from the transmitter site ~30 miles south of the city in Wrightsville, AR. From 11 PM-5 AM, though, as cost-cutting measure, we would originate the programming from the transmitter. The carted background effects were there to help cover the noise generated by the big old RCA 50 kW transmitter!

I also found it ironic that a program as progressive as "Beeker Street" was (for its time) actually came from a pastoral setting of transmitter site (on the MacDonald Farm, no kidding) in the bucolic Arkansas town of Wrightsville.

And...now you know the rest...of the story.

Good day.

I want to publicly thank you, Scott, for relocating my transmitter for me. I thought I would never get it up there...it's all public land, after all, under the control of the Commonwealth of Massachusetts. And it was all so easy...I never had to lift a finger...just had to read your post.

For the record, WXLO's transmitter is in the Leominster State Forest, in Leominster near the Princeton border. I don't know what, if anything, is on Wachusett, but it isn't WXLO.

Not illegal...for the lottery. The current rules permit advertising of state lotteries within that state, but not other legal forms of gaming.

Thus, it is illegal (in California) to advertise card rooms, although they are legal in the state. Usually they do advertise the same way the Nevada casios do, by promoting their restaurants, etc., but never mentioning or implying the gaming.

Seems a bit silly. I am not a fan of state lotteries, but if state gaming can be advertised, why not other legal forms? If I had to bet, I would bet that no change is made now...it is the kind of issue that generates a lot of heat and I suspect it will get lost in other larger issues now in Washington.

Source record: 34652

As part of a project to establish an alternative news and information service for Latin American radio stations I am currently putting together an inventory of useful Spanish-language sources available on the Internet. Among the types of sources I am looking for are:

Inter Press Service: IPS is an international news agency with an alternative perspective. Its daily service places emphasis on the Third World and on issues related to the environment, women, development, etc.

El Diario de Hoy: El Diario is an Ecuadorean newspaper which daily posts its major news stories on the Internet.

CERIGUA: CERIGUA is a Guatemalan news service that reports on events in the country from a progressive perspective. As a result of the repression in Guatemala CERIGUA has been forced to operate from a base in Mexico.

Other services that I am looking for include daily or weekly summaries of the Latin American press (I have seen some produced in Brazil and Venezuela but I don't know how to get them on a regular basis) and specialised news and/or feature services.

If you have any such sources or if you can point me to a list of them, please let me know. I will make the results known to anyone who requests them.

Thanks.

The Inland Empire has a new Spanish Signal.....

and it's one of the best.

97.5 FM is back on the air in Riverside and San Bernardino. It is Spanish, but I can't nail down the call letters because they say them (en espanol) too damn fast. You can hear the station all thoughout Orange County and the eastern part of the L.A. metro. The stick is on a hill between Riverside and San Berdoo and pumps out about 70kw. BTW: the sound is VERY clean. It appears to be a pop-oriented Spanish, not a Banda/Spanish Country like L.A. market leader KLAX-FM (97.9)

{observation} The new 97.5 will make an impact. The Inland Empire has never had a full power Spanish signal, and this one's the fullest. The market is VERY Hispanic, and they will make a HUGE dent. There are a handful of little AM'ers that don't completely cover the market, and 97.5 should be the nail in the coffin.
Interestingly, they are next door on the dial to KLAX (97.9). Could this cause diary confusion? Both stations are using their exact dial positions. Expect some L.A. #'s for the new 97.5 too. In time, they WILL be top 3 in the I.E...

BTW: They played a Spanish version of "Cracklin' Rosie" today.....

Hello there. I need your help. I am currently in a Ethics of Communication course and I need to do a simple 3 page paper, but I need a person to answer a few simple questions. unfortunately everyone here has give me a run around. It would be really great if any of you could help me out. All you need to be is a Program director or basically any employee at a radio station throughout the country.

This is what I need to know:

Basic Bio info. (i.e. your name, station you work for, schooling, years in business/position, experience, etc.)

Have you ever faced a moral dilemma in your career and how did you solve it?

What do you think is the biggest moral dilemma in your filed and how do you suggest it be solved.

That's it. nothing major... just enough to help me write a 2-3 page paper. If you could send your response to me through email that would be great and if you could write it tonight or tomorrow before 3 that would be even better. (That would be 2/14 or 2/15)

Thanks you so much, and please answer ASAP.

But I argue a possible first for KDKA in this category! :)

KDKA used to carry a program called "Party Line" from the early 50's through the mid 70's hosted by Wendy King and her husband, the late Ed King. As the name implies, this was not a precursor to any type of hot talk format.

Instead "Party Line" was a few hours of chit-chit, contests, trivia, word pictures, stories...and all the stuff radio's good at. Though far from compelling listening, it was comfortablei to know it was there. (Not unlike the Cracker Barrell(s) on the Great Empire stations).

And...no...the voice of the caller was not heard -- part of the charm of "Party Line".

IC>6 a.m. to whenever Howard's rantings and ravings are done.

Chris,
I wouldn't be so sure. I used to be Program Manager of XTRA-AM and helped put 91X on the air. While they may not have to worry about the FCC, the Mexican version of it is far more restrictive when it comes to "moral" issues.

There's even a restriction about "perverting the language." Of course, the language they're concerned about is Spanish, but anything seen as immoral (it's open to all kinds of arbitrary interpretations) can literally put you off the air.

Remember, Mexico is the place where strikes are enforced by the government. When the Peso was first devalued in the early 80's all Mexican broadcast engineers went out on strike. The Federales came in and padlocked all stations until it was settled. Fortunately, it only lasted a couple of hours.

I'd much rather face the FCC on issues of "morality" than the Mexican government.

I believe five years ago when Rush went on vacation he would have the "no caller format" where someone would call up, gets to go on the air automatically and talk for a certain # of minutes. OF course he had someone in the studio pressing hte buttons and bleeping out any expletives but that person never said a word. Ng

>for XETRA-FM [91X] and "XE T R A, Baja California, meh-e-co."
>[or XETRA-FM, Baja California, Mexico, and XETRA, Baja
>California.]

Please consider this confirmation from one who was there:

By international treaty, every nation is assigned one or more "prefix" which begins every radio/T.V. callsign. In the U.S., we are assigned W, K, A and N. Our FCC assigns W and K to broadcast and auxilliary services, while A and N are generally used for military stations. Mexico's prefixes are XE and XH. All Mexican stations have callsigns beginning with one of those. When I was at XHIS, XHERS and XEPRS in the mid-70's, there were similar questions concerning our dropping the H and E from our advertising of the 2 stations with 5 letter calls. We did it because our programming was aimed at the San Diego audience, and U.S. listeners are accustomed to seeing (and entering in diaries) four-letter calls. By the way...There is nothing to prevent the FCC from assigning five-letter (or longer) callsigns to broadcast stations should it ever become necessary, but it's awfully damned unlikely!

Hope this clears it up for good...

Yep! Sounds like: "Eck-eez aie te air-aie ah"
X E T R A

These pronunciations aren't exact, but you get the idea (aie == long "a").
All Mexican AM, FM, and TV station calls begin with either XE or XH, and
can be a total of 3, 4, or 5 characters. For example, 92.5-The Flash in
Tijuana is XHRM 92.5.

The Noble AM/FM LMA Combo, transmitting from Tijuana ARE licensed by the Mexican Government are legally called X-E-T-R-A A-M and F-M, there is NO such station in Southern California with the call-letters X-T-R-A....never has.....never will. Mexican call-letter prefixes are XE and XH, with XH more commonly used for FM and TV stations exclusively and "XE" used all around the band.

Hope this might clear things up.

1109. KC and St. Louis Radio Watch, February 16, 1995

Newsgroup: rec.radio.broadcasting
Date: 1995-02-17 09:17:05 UTC
From: transvox@interstate.net
Message-ID: <3i1pih$t0@vixen.cso.uiuc.edu>
Source record: 34667

First, a note about my observation regarding the KKCJ studio-transmitter-link (STL) antenna: someone involved in the original KKCJ STL installation has told me that when the STL antenna was installed, there was extra coax that was rolled up behind the antenna. So while it may look like the antenna has been disconnected, my correspondent said that might not really be the case. It's hard to tell from the street.

In whatever case, the three-year original lease term on KKCJ expired today. It's still operating as usual, indicating that Sconnix, owner of KFKF, continues to run it. Sconnix will soon be an LMA partner with KBEQ-AM/FM once EZ Communications buys the combo.

Now, over to St. Louis, where today's Post-Dispatch had a feature article on WIBV(AM)'s Bruce Bradley spread over three pages of the "Everyday" section. It's interesting to note that there was no byline to the story -- no indication of who wrote it.

(In my opinion, the article also suffered from sloppy editing.
You will see one example in the last extended quote in this article.)

The article focused on Bradley's remarks on KETC-TV that led to his dismissal from the public TV station. Here is the article's account of that incident.

> ...Bruce Bradley...erupted in anger at a caller on Jan. 26 during the
> fourth week of a new venture, a call-in show on KETC, Channel 9. The
> subject was race and crime.
>
> Citing statistics, national and local, indicating that the rate of violent
> crime is substantially higher among blacks than among whites, Bradley said
> that "young black males are destroying the city of St. Louis, and
> destroying the schools of St. Louis, and now, through busing, they're
> destroying the suburban schools."
>
> He mentioned a recent stabbing at Clayton High School involving students in
> the city-county desegregation program as an example of the "epidemic of
> black crime," but his main focus was the brutal killing of 15-year-old
> Christine Smetzer two days before at McCluer North High School.
>
> ...Christine Smetzer was "one more killed by a young black punk," he said,
> clearly angry. "My question is: How much more are we going to take of
> this crap before we stop and say 'That's enough!'"
>
> A woman who identified herself as Carla, the mother of a young black man,
> called to complain that he was unjustly smearing a whole group, and his
> message was that young blacks were "inherently" criminal.

>
> Bradley erupted in anger, and told the woman she was "lying through her
> teeth" about what he had said. For a few seconds, both talked at once.
> Then, the woman said, "You're right. Most of the crime currently is
> committed by young black males... But what are you suggesting everyone...do
> about that? Would you like to have them lynched? [Ellipses newspaper's]
>
> Hearing "lynched," Bradley exploded: "This is racial, this is bigoted ...
> Cut her off, cut Carla off...This is bigotry of the worst order, this is
> why white people are afraid to speak out, why black people are afraid to
> speak out, we get trashed every time we point out the statistical, factual
> truth...Such garbage rhetoric. I cannot stand it." [Ellipses newspaper's]
>
> Less than 24 hours later, after Bradley got a phone call from station
> manager Michael Hardgrove and senior vice president Ted Garcia -- the
> "Common Sense?" show had been Garcia's project -- Bradley was through at
> KETC. He said he was fired. Hardgrove said Bradley agreed to step down
> after it became clear how unhappy management was with the way the program
> had gone.
>
> Over the next week, KETC received thousands of phones calls, most of them
> backing Bradley, and about 500 letters. The letters ran more than 4 to 1
> in support of Bradley. Most of them, Hardgrove said recently, "said we
> fired him for telling the truth."
>
> "That's not what happened," Hardgrove said. "The subject of crime and race
> is more than fair to talk about. It needs to be talked about. But in the
> process of talking about it, (Bradley) crossed the admittedly hard to
> define line between dialogue and being inflammatory. I also felt he had
> crossed the lines of good taste."

The article goes on to describe Bradley's present life at the age of 60.
Bradley described himself as a "mad moderate," an "equal opportunity
basher," a far cry from his role at KMOX when he was paired with
fellow Rochester native Anne Keefe in 1988. Bradley had actually started
at KMOX before that, in 1986.

According to the Post-Dispatch article, the Keefe-Bradley team broke
up in 1991 amid reports of conflicts between the afternoon hosts,
and Bradley told the newspaper, "Was there conflict? Yeah,
there was, and it was my fault, and I have apologized to her...."
Bradley quit for a while, but longtime KMOX boss Robert Hyland
hired him back in 1992. After Hyland died, controversial new CBS
management installed the Rush Limbaugh show during Bradley's midday
slot and Bradley moved to WIBV.

A quote in the article from Bradley provides a snapshot of the frame of
mind that so much talk radio represents these days:

> Does talk radio's power sometimes worry him Bradley? [sic]
>

> He nodded. "Yeah. Although one day, we'll probably look around and wonder
> where all the talk shows have gone. But what I'm going through right now,
> this scares me. It's astounding that people's emotions are so readily
> accessible. That makes for good radio, I suppose, but it brings home the
> fact that very many people are close to the edge.
>
> "I hear them on the radio, and sometimes what I hear on the radio is myself
> very close to the edge, because I'm very emotional these days. Talk radio
> provides an outlet for anger, but it also provides an impetus for it to
> continue."

Top 40 is alive and well in the smaller markets. Yes, music has gone in all different directions, but there still is a way to play all the hits on one station. There still is that question though; can you play Pearl Jam and Boyz to Men on the same station? Well think back to 1977 when Aerosmith and Gloria Gaynor were on the same station. It's all in the scheduling.

Also, Top 40/CHR isn't all about music. There's the personality too. Thank god we're beginning to move away from the liner cards of the late 80's.

I applaud any owner/group in a major market that has the balls to do CHR.

Rob Olson 93QFM-Milwaukee

1113. Denver and Top 40

Newsgroup: rec.radio.broadcasting
Date: 1995-02-17 09:17:09 UTC
From: Jon Jacobs <jonj@snark.wizard.com>
Message-ID: <3i1pil$t8@vixen.cso.uiuc.edu>
Source record: 34671

Denver is such a competivite market, yet a fun one. It needs alot of help, actually only the Top 40 needs help. I guess this goes with what Dallas Kincaid was saying - "what is happening to Top 40 Radio". Orginally when Y-108 was on KS-104 had competition, which I guess is the reason it sound good. Even when I worked at KS-104 last year it was going way down <and that was with no direct competition>. Only close to KS-104's sound was Mix-107.5 (the old Y-108) -- this is not completly KS-104's fault, just people did not want the rap and station did not wanna do the advertising to get a new core. Now KS-104 has major competition - ALICE @106 (hard to describe the music - Hot AC) and 96.5 The PEAK (Alternative with a layed-back aproach). Neither one is a "Top 40", but is defintly haveing an affect on the KS-104 audience. KS-104 has not changed their sound much ... in fact it sounds like they are going for a young audience -- <<is that where Top-40 is going again - get those 12+ numbers ???>> A lot of this generation is going for the Modern Rock sounds which explains The Peaks good numbers (even though it is said they are too layed back- They are music driven, but personality should play a part?) and Alice @106 has increadible telent on the air : mornings - Frosti (cool, yet sick sense of humur) mid-days - Chris Davis (I won't comment - ex-PD of mine <<grin>>) Af-Drive - Alan Kabel ("God" - just call him "God" to any one in Top-40) Nights - Dino ... (He get's the women ... enough said) weekends have increadible talent too ... Mary "cha-cha" chavez (ex-PD of KS-104), Steve Douglas (ex-PD, been around), Shannon Stone (ex-PD - smooth), TJ (Kevin Kincaid, formally of 98.9 Magic/Colo. Springs - ex-MD).

Not sure why I am going on about them ... Is it Talent which will determine the new face of Top-40 or music ... how about a unique combination of both (Alice is starting to do that, KS is lacking the talent end) ...

Just my $.02 worth,

Jon Jacobs (jonj@wizard.com)

The Audio Signature is a nice unit. I have one at a station I do
contract work for. It's got a good sound, like any audio squash box it
can be mis-adjusted to produce less than a high-fidelity signal.

The SMP-850 is a "softly spoken" peak limiter, if you are in a loudness
war it's not the box for you, however if you are going for a quality
sound, and don't mind being a little less "loud" it might be a good
choice for you.

IT> Read in today's Daily News that PD John Mainelli is leaving
IT>WABC in April. Wonder who will take his place and what effect
IT>it will have on the station.

I've known John for nearly 20 years. What surprises me is that he stayed as long as 4 years. Normally he works a couple of years, then takes a year off to travel, consult and write.

John is a wonderfully talented Program Director. I've always envied his ability to leave a successful career to do things important to him personally.

His leaving WABC doesn't surprise me a bit. Nor does his success. With his track record at KSDO, KCMO and WABC he'll be able to write his own ticket any time he wants.

No one but Don Bouloukos (GM at WABC) has a clue as to who will succeed John. I don't envy the next PD who'll have to live up to John's track record.

Controversial KSFO morning host J. Paul Emerson has been taken off the air. Apparently he railed against co-owned KGO-TV on "Donahue" for not allowing that episode of "Donahue" (dealing with talk radio) to air in the Bay Area.

Emerson's been in hot water with Bay Area community organizations over comments he's made favoring the quarantine of people with HIV and insisting that HIV can be spread by casual contact. Before his morning gig at KSFO, he was fired from KFRC AM/FM for anti-Japanese comments.

The mayor and Board of Supervisors of San Francisco have demanded explanations and apologies from KSFO/KGO management, which remains mum on the subject, preferring instead to enjoy the free publicity at whatever cost, in this writer's opinion.

Processors are a lot like cars: some like a Ford, some like a Chevy. I've never had much luck getting CRL FM processors to sound the way I wanted them to. I like their AM limiters, especially the PMC-450 which is NRSC compliant. It is loud and sounds pretty good. -- plus it's not very expensive compared to its comptetitors. Plus, CRL processors from 7 to 10 years ago are avilable now DIRT CHEAP on the used market. What does that tell you?

For FM processing I like an Orban 8100 A/1 preceded by TEXAR Audio Prisms. If you really want to sound great, get a Unity 2000i from Cutting Edge.

I've noticed that with some LA-city funded artwork: "art for art's sake"
takes a back seat to "art as social work" programs, and some of the local
artists have complained about it.
>
> Since it's plain to me that we're never going to stop electing narrow-minded
> fools to Congress, I don't think any artist or journalist will be free to
> express himself if he is dependent on public funding. Better no art at all
> than Socialist Realism;

My solution: get a day job if you can't sell your art. "Cultural
enrichment" aside, a lot of these projects, at least to me, seem
more like hobby time at the very least.

> better silence than the Horst Wessellied. Let's
> not have _public_ broadcasting but rather local community radio and TV,
> locally funded.

How about this idea:

1. Buy up an AM-FM combo for sale somew
2. Run Limbaugh, Liddy, Burce Williams, or whatever makes a profit
on the AM side.
3. Use those proceeds to partially subsidize some community-oriented
programming on the FM side.

Rob Landry wrote:

: market. The disappearance of CPB would probably mean the further erosion of
: local community service by broadcasters, and as such would be a tragedy.

OR...it could do just the opposite. How many "public" stations do little or no local community service at all? One of the biggies in SF, KQED does exactly 2 hours a day of local service (aside from Metro Traffic reports, literally available on 35 other stations in the market). All the rest of the time KQED runs and reruns NPR programs. I mean, how many times in a day can you stand to listen to ATC? They must run it 4 times. Back before CPB, NPR, and PBS, KQED-FM and TV had local programming.

I have listened to many West Coast "public" stations, and the ones which run NPR are often the most blatant in their callous disregard for any kind of local community. In Oregon, OPB (a statewide network formerly owned by the state, now private) devotes 1/2 hour a day to a local news magazine and a couple stories during Morning Edition, repeated often. I believe there is no excuse for such meager service.

IC>One thing the Howard Stern doesn't have to worry about is the
IC>FCC. XETRA-FM, based in Mexico, doesn't have them to worry
IC>about. 91X airs the show from 3 a.m. to 6 a.m. live, and taped from
IC>6 a.m. to whenever Howard's rantings and ravings are done.

Chris,
I wouldn't be so sure. I used to be Program Manager of XTRA-AM and helped put 91X on the air. While they may not have to worry about the FCC, the Mexican version of it is far more restrictive when it comes to "moral" issues.

There's even a restriction about "perverting the language." Of course, the language they're concerned about is Spanish, but anything seen as immoral (it's open to all kinds of arbitrary interpretations) can literally put you off the air.

Remember, Mexico is the place where strikes are enforced by the government. When the Peso was first devalued in the early 80's all Mexican broadcast engineers went out on strike. The Federales came in and padlocked all stations until it was settled. Fortunately, it only lasted a couple of hours.

I'd much rather face the FCC on issues of "morality" than the Mexican government.

>[or XETRA-FM, Baja California, Mexico, and XETRA, Baja
>California.]

Please consider this confirmation from one who was there:

By international treaty, every nation is assigned one or more "prefix" which begins every radio/T.V. callsign. In the U.S., we are assigned W, K, A and N. Our FCC assigns W and K to broadcast and auxilliary services, while A and N are generally used for military stations. Mexico's prefixes are XE and XH. All Mexican stations have callsigns beginning with one of those. When I was at XHIS, XHERS and XEPRS in the mid-70's, there were similar questions concerning our dropping the H and E from our advertising of the 2 stations with 5 letter calls. We did it because our programming was aimed at the San Diego audience, and U.S. listeners are accustomed to seeing (and entering in diaries) four-letter calls. By the way...There is nothing to prevent the FCC from assigning five-letter (or longer) callsigns to broadcast stations should it ever become necessary, but it's awfully damned unlikely!

Hope this clears it up for good...

I believe five years ago when Rush went on vacation he would have the "no caller format" where someone would call up, gets to go on the air automatically and talk for a certain # of minutes. OF course he had someone in the studio pressing hte buttons and bleeping out any expletives but that person never said a word. Ng

Yep! Sounds like: "Eck-eez aie te air-aie ah"
X E T R A

These pronunciations aren't exact, but you get the idea (aie == long "a").
All Mexican AM, FM, and TV station calls begin with either XE or XH, and
can be a total of 3, 4, or 5 characters. For example, 92.5-The Flash in
Tijuana is XHRM 92.5.

Message-ID: <3i1pj8$u4@vixen.cso.uiuc.edu>
Source record: 34690

The Noble AM/FM LMA Combo, transmitting from Tijuana ARE licensed by the Mexican Government are legally called X-E-T-R-A A-M and F-M, there is NO such station in Southern California with the call-letters X-T-R-A....never has.....never will. Mexican call-letter prefixes are XE and XH, with XH more commonly used for FM and TV stations exclusively and "XE" used all around the band.

Hope this might clear things up.

Hey Gang,

Always been a stickler for correct pronunciation. Here's two of my favorites:

Often: So many people say "oft un" instead of "off en"

Actually: People say "ak shall ee, " instead of "ak shoo ah lee"

Funny story: I'm a news director at a small-town station. The day after Thanksgiving I did the obligatory "Shopping Day" story. I had called my mother, and decided to use her comment as well. She started by saying, "Well, actually, we're not going to shop. We just like to get caught up in the excitement."

My PD was able to tell it was my mother solely by the way she said "actually."

REBEL RADIO: THE STORY OF EL SALVADOR'S RADIO VENCEREMOS
by Jose Ignacio Lopez

The following is the back cover blurb from a book recently published by Curbstone Press (USA) and due to be published by the Latin American Bureau (United Kingdom) in April. The book was originally published in Spanish under the title "Las mil y una historias de Radio Venceremos".
================////////========

El Salvador. The civil war. The guerrillas need a radio station to win hearts and minds. Radio Venceremos. An underground station that keeps broadcasting whatever the cost, under helicopter attack, against high-tech jamming, on the run from endless army offensives. Fast-moving, in turn funny and tragic, these stories are about history in the making as the men and women of Radio Venceremos relive their war.

'These remarkable stories tell a tale of almost incredible courage and ingenuity in the struggle to keep the spark of hope alive in a country being turned into a living Hell. It is a real tribute to the human spirit.' Noam Chomsky, author of Turning the Tide: US Intervention in Central America

'The work of Radio Venceremos is legendary and the stories of how it became so are rich in humanity, wit and, above all, heroism.' John Pilger, award-winning filmmaker and author of Heroes and Distant Voices
================////////========

In the month since its US publication, Rebel Radio: The Story of El Salvador's Radio Venceremos has won plaudits from the New York Times, Los Angeles Times, Miami Herald, Boston Globe, Toronto Globe and Mail and many others:

'...something unexpected for the form: engrossing, self-effacing and hilarious.' - New York Times

'One picks up this volume expecting a dull, propagandistic account of noble peasant resistance... but Rebel Radio is in fact casual and comical, with enough bravery to make it gripping and enough anger to make it credible.' - Los Angeles Times

'I did not merely enjoy this book. I revelled in it. I suspect that almost any other reader, however unfamiliar with Latin America or its conflicts, will react in much the same way... [It is] a trove of compelling, horrific, and often dazzling stories.'

Toronto Globe and Mail

The Author: Jose Ignacio Lopez is a broadcaster, writer of radio soap operas and author of books on radical radio in Bolivia and Nicaragua. Based in Quito, Ecuador, he is the Latin American coordinator of the World Association of Community Radios (AMARC).

1136. Inexpensive reel machine - recommendations?

Source record: 34694

For my own purposes, I have a small at-home audio studio, in which I had been using a 30-year-old Sony reel machine for the purposes of editing. However, this machine has finally died, and I am now looking for a replacement unit to serve its purpose. However, I am not crazy about the idea of the $$ I would have to produce for, say, a new Otari. Therefore, if anyone has any recommendations as far as a *reasonably* priced .25" reel-to-reel machine? I would like one capable of 15ips, though 7.5ips max is fine also.

Any suggestions?

: >You mean.... The ads for the California State Lottery on Californian
: >broadcasters is currently... Illegal??? Interesting.....
: >
: Not illegal...for the lottery. The current rules permit advertising of
: state lotteries within that state, but not other legal forms of gaming.
:
: Thus, it is illegal (in California) to advertise card rooms, although
: they are legal in the state. Usually they do advertise the same way the
: Nevada casios do, by promoting their restaurants, etc., but never
: mentioning or implying the gaming.

Not entirely true: I have heard advertisements from a San Jose "casino"
that mentions it's the largest such gaming facility in the State, as well
as for tribal gaming facilities in Trinidad (Cher-Ae Heights), Redding
area, and in Lake County, all mentioning some of what they have in the
gaming vein, but using carefully-worded statements to avoid saying they
have slot machines... "Videogames" is one term I've heard used.... KGO
has advertised the San Jose facility as having "card rooms"...

Thank you, Corey, for saying so eloquently what some talk-show-hosts have yet to learn. I would allow some leeway on point 3, because some hosts pride themselves in being real and will tell the audience when they are in a pissy mood or not feeling well, and that can work for some personalities. Points 1 and 2, however, ought to be the rule for everyone.

I get really annoyed also when a talkshow host deliberately misdirects the arguments of callers with whom she or he disagrees, or disses and then cuts off a caller without giving the caller a legitimate chance to make his or her point. This applies equally to liberal and conservative hosts.

BTW, wouldn't everyone out there love to see Rush get into a fair debate with a well informed articulate liberal, and without the benefit of a fader? Won't ever happen...Rush has always refused to do this. Perhaps a televised public debate between Rush and Tom Leykis? Just a thought..

IT> This is interesting from several aspects. Mainelli has burned
IT>out and walked away from WABC before...after his first stint at
IT>PD, which lasted three years. Come to think of it, he came back
IT>almost exactly three years ago, if memory serves, so there may
IT>just be a cyclical career pattern at work here, and he may come
IT>back a third time if he's needed.

Bob,
John has not "burned out." He regularly takes sabaticals to write and travel. I've known him for nearly 20 years. It's clear you don't. I spoke to him yesterday.

You can read all sorts of things into his resignation, but it's nothing more than a desire to travel. He's not upset with ABC. He's not "met with resistance" of any kind. And, he's not especially concerned with radio being "far right." You're letting your own political views cloud a very simple desire to take some time off.

He's taken these breaks as long as I've known him. I've envied his ability to walk away from great jobs to enhance his "quality of life."

IT>he just wants to quit while he's ahead. You can only take so many
IT>complaint calls about Bob Grant for so long before saying "enough."

Where in hell do you get this stuff?? I realize you hate conservative radio, but any Talk program director would bask in the joy of getting listeners so riled up that they actually get off their butts to do something. Even if it's something so simple as complaining about improper thought.

IT> Who will be the next PD at WABC? Ed Walsh, formerly of WOR,
IT>is on the beach and looking, he'll certainly be interviewed.

Very unlikely. Ed is a newsman, not a hot-talk programmer.

IT>>But watch
IT>to see if they decide to promote from within the CapCities/ABC
IT>organization. For management positions, especially for New York,
IT>LA, or network positions, they usually do.

Good grief! You pull this stuff out of thin air! John Mainelli was not a CapCities guy when he was hired. He came from Gannett. Tyler Cox was not a CapCities guy. He came from Greater Media. When ABC hired me for the network, I wasn't a CapCities guy. I came from Tribune. Tom Tradup at WLS wasn't a CapCities guy. He came from KRLD in Dallas. Al Brady Law at KABC/KMPC wasn't a CapCities guy. He came from managing a station outside the company.

IT>on Tyler Cox, currently PD at another of their O&O stations, WBAP
IT>in Dallas/Fort Worth. He's had a lot of success in turning it from
IT>full-service country into full news/talk programming, and improving its
IT>demos in the process. He's also programmed talkers in several

However, Tyler isn't known as a hot-talk programmer. WBAP and WABC
are vastly different stations.

IT>Don't know the man myself, but I know a number of people who do...
IT>they're impressed, and they say CapCities/ABC is impressed as well.
IT>So if Mainelli does go, don't be shocked if Cox moves in to succeed
IT>him. He's almost completed his job at WBAP, has only one key air

I do know the man. Tyler is a great guy and very talented. Somehow I
find it hard to believe the job of programming WBAP will ever be
"completed." Tyler would ream you another anal vent if he heard that.

Bob, as you know, I find your posts here and on other online
services to be stunningly inaccurate. I wish you'd do a little more
research before pronouncing things to be true. You're certainly within
your rights to express opinions, however tinged with political coloring,
but when it comes to factual accuracy they fall far short of basic
journalistic standards.

The call letters are, indeed, XETRA and XETRA-FM
^ ^
By international agreement, each country has been assigned one or more prefixes for stations of all sorts (radio, television, ham, etc.). Usually, when you see these prefixes listed, you will see them listed as a prefix of three alphanumeric characters. Thus, the United States has been assigned the prefixes AAA-ALZ, KAA-KZZ, NAA-NZZ, and WAA-WZZ. What this means is that, for those radio stations that are assigned call letters by the governmental licensing authority (i.e., the FCC), it has free reign to assign any call sign beginning with the letters W, K, or N (the latter now common for ham radio call signs, including mine). It can also assign any call sign beginning with the letter "A", provided, however, that the prefix "A" is followed by a letter from A through L. (Some U.S. ham radio call signs have two-letter prefixs beginning with "A".)

Thus, if the FCC assigned call signs to broadcast stations beginning with the letter "N", which it theoretically could do in the future, it could assign a station any of the following calls (excluding conflicts, of course): KMOX, WMOX, or NMOX. It could NOT assign the call sign AMOX, because M follows L in the alphabet. Any call sign assigned by the FCC that begins with A has to have another letter following it, and this letter must be between A and L. It cannot be an "M". You could, however, have ALMOX, if you allowed 5-letter call signs.

The United States has the largest call sign prefix group assigned to any country. A few other countries have entire letters assigned to them (e.g., the United Kingdom has GAA-GZZ, and France has FAA-FZZ), but there are simply not enough letters in the alphabet to give each country an entire letter prefix. Thus, not only do some countries have only part of a letter assigned to them (such as the United States having AAA-ALZ), but some of them have numerical prefixes (e.g., Israel, which has 4XA-4XZ, and possibly more -- I don't have a list handy at the moment. But you can look these up in many amateur radio books.)

Mexico has (at least) XEA-XEZ and XHA-XHZ, and perhaps other segments of the "X" prefix assigned to them. For this reason, the "XE" prefix is like "W" or "K" in the United States and should be thought of the same way. Of course, not all countries assign real call letters to all classes of radio stations, or they assign codes outside of their assigned range of call letters (e.g., Australian broadcast stations). But Mexico does assign call letters to their broadcasting stations, and they do follow the international agreement.

As to why *these* stations choose to call themselves "XTRA" and "91-X" in English, I refer you back to the "NMOX" call sign example I used before. Although this *could* be a legitimate call sign for a radio station in the United States, because you haven't heard of any broadcast stations that begin with "N", it sounds strange to you. Well, most people in the U.S. are used to hearing 3- and 4-letter call signs, and to them, a five-letter call sign sounds strange -- although, as I explained above, the XE should be considered together as a prefix taking the place of a K or W.

In fact, when I first received my amateur radio call sign with the "N" prefix, it was several years before the FCC started issuing them in sequence as part of the regular call sign series. Since my call sign was shorter than most others, started with an "N" rather than a "W" or "K", and didn't have the right number in it for the local area (I was a student in college at the time), many people thought that I was either illegal, or some sort of special events station, or affiliated with the Navy. Even people I had talked to before wondered why I traded in my "normal" call sign for that "strange-sounding" one. (Today, of course, it sounds quite "normal," and even a bit old-fashioned, because they stopped call signs from this series quite a few years ago.)

It is probably the fact that most U.S. citizens would find 5-letter call signs "odd", as well as the fact that their call sign is pronounceable and easily remembered without the "E", that influenced XETRA's decision to drop the "E" in their English-language, unofficial station IDs. Of course, their call sign would be pronounceable *with* the "E" as well, but then it would either look dyslexic or have to be pronounced in a different, unfamiliar way!

Probably neither station has to say their call sign in English at all. But 91-X probably uses "XTRA-FM" whenever anyone asks for many of the same reasons XTRA-AM does, and probably also because people are familiar with "XTRA" and with AM call signs that have an extra "FM" suffix. I'll bet, however, that most people outside of the Mexican government refer to them as "91-X," because someone a long time ago decided that it was too hard for people called by ratings services to remember both a complete call sign and an exact frequency position for FM stations. I consider that a sad commentary either on the intelligence of the typical radio listener, the respect that promotions departments have for their stations' listeners, or both. But that's an argument for another time.

The Mexican government authorises 5-letter callsigns for commercial broadcasters, hence the correct callsigns are indeed XETRA, both AM and FM. The transmitter site is in Tijuana, Baja California Nord (?), Mexico. The studio is in San Diego. For US usage, "XTRA" is acceptable.

It should be noted that XETRA is one of the last remnants of the old 1940's Mexican "superstation" phenomenon, where many Americans got around the 50kW broadcast limit imposed in the US by buying broadcast lisences in Mexico, transmitting all manner of junk....

As one who worked at Mexican stations beaming into the US in the 70s, I thought you would like to hear this story.

I was working at CKLW during its legendary years. Our only signal weakness was from having to protect XEROK, also on 800kHz, in Ciudad Juarez. Well, as luck would have it, XEROK came up for sale. (Well, one of those infamous US sales rights agreements.) Ed Buterbaugh, CKLW's totally excellent CE came up with the idea to buy the Juarez plant and use it as a satellite transmitter for CKLW. He sold the concept to CKLW's GM at the time, Herb McCord.

They were not only going to satellite-feed the CKLW audio to Juarez, they were also going to feed the pulse from CKLW's transmitter in Harrow, Ontario to Juarez to control the Mexican transmitter as well. That would have all but eliminated the hash as the two transmitters beat together (somewhere around Missouri, as I recall).

When it came time for our infamous CKLW 20/20 News, which was more highly localized than most radio newscasts of the day, a separate 20/20 News feed from the west coast would air on the juarez transmitter.

The daytime power at Juarez was to be reduced, the nighttime power was going to be increased. The Mexican government of the day had given its blessing to the plan because we had planned to aim much of the daytime programming to a Mexican audience, something XEROK was certainly not doing at the time as X-ROCK 80, EL PASO.

At night, one could have been anywhere between LA and NY, and anywhere between southern Canada and Guatamala and have heard CKLW on 800 kHz. An absolutely stunning concept.

It had been worked out to the smallest degree by Buterbaugh and McCord, right down to the Mexican government OK, before it was ever presented to the board of directors. They didn't want to be faced by a board with a bunch of questions for which they didn't have answers.

Then came the big day: the board of directors meeting. McCord and Buterbaugh haul it off to Toronto and make the presentation of their lives. Nothing was left to chance. Every possible question had an answer. It was a done deal; all the board had to do was say "yes".

The presentation went well. The questions were answered. This was a stunning, complicated concept but could be implemented smoothly.

That;s when John Bassett stood up and said..."I have enough trouble with the Canadian government. I don't want to have to deal with the Mexicans, too!"

End of discussion. Period.

Too bad. It would have been the world's most awesome station.

1149. Sacramento RadioWatch

Newsgroup: rec.radio.broadcasting

Source record: 34590

Joey Mitchell, whose nearly 20-year-stint at country-formatted KRAK radio was the longest run in the Sacramento market by any current jock, has a new gig, at KHYL (Cool 101), an oldies 50KW FM that covers the Sacramento market from Auburn, up in the foothills. Mitchell, who won several jock-of-the-year awards, joined the old KRAK (AM) several owners ago around 1975, then a year ago moved over to the newly acquired KRAK-FM 98.5 (formerly KNCI, and before that KZAP). The original KRAK-AM (50KW fulltime, 1140 kHz) changed call letters to KHTK (Hot Talk) and has been programming Imus mornings (when else?), Don and Mike middays and local sports talk in the afternoon. Well, owner EZ Communications opted for less talk and more music on KRAK, so Joey's contract wasn't renewed.

(Interesting sidebar on Joey: In 1970, when Joey got his first radio job at the station where I worked--then KVFM, now KMJX, a little Class A FM in San Fernando, north of L.A.)--he had as an on-air guest Peter Herkos,the renowned psychic. Herkos predicted that Mitchell would one day work for a 50 KW AM--which at that time seemed to Mitchell an unreachable goal. Four years later, he was hired by KRAK.)

Cool 101, which made room for Mitchell, was purchased only a couple of months ago by Chancellor, which owns the number 1-2 combination in the market: KFBK, a 50KW personality-oriented news-talk operation (1530 kHZ) that runs Rush, and KGBY, a 50KW FM (92.5 mHz) that has the market's most recognized two-man team, Robbins and Cowan. Seems that Mitchell will fit neatly into that fold.

That's all from Sacto for now.

>
> The technology sounds perfect for our application. But can a similar
> technology be built (fairly inexpensively) to monitor AM listenership?
> How would one go about building such a device?

I remember reading an article on this newsgroup about that system. The system works by tuning in the frequencies of the radio's local oscillators. On almost all FM receivers, the IF (intermediate frequency) is 10.7 MHz, so the local oscillator is at 10.7 MHz above the station being received. The system won't work with AM radios because the AM local oscillator signal is attenuated too much by the shielding effects of the auto body and the metal enclosure of the radio. To aggravate the problem more, AM car radios use either 250 kHz (approximately), 450 kHz, or 455 kHz IFs, so even if there were enough local oscillator leakage, you'd be stuck monitoring three frequencies. Say that the system detected a signal at 1860 kHz. Is that someone with a 250 kHz IF receiver listening to 1610 kHz (1860 - 250 = 1610) or is that someone with a 450 kHz IF receiver listening to 1410 kHz (1860 - 450 = 1410)? You can't tell!

W.E.S. Harman:

To a certain extent I believe what you are saying, but atleaset in the markets I have experience it is not the whole situation. For example in Denver, KS-104 (Top-40)(or shall we say CHR) is not really dying, it just can not get the numbers it needs. I spoke with ex-PD, Craig Jackson (now with AC KOSI/Denver) today about the station and it sounds the main problem for KS-104 is the GM is not following what the PD wants to do (or that has been the case with the past three PD's - don't know Mark Feather) ... The station has a few jocks who 'puck' on the air (the way Top-40 was at one point) and airs alot of young callers ... just adding to their abiolity to attract teens ... If they are to go against stations like Alice, then they need personality ... that is all I am saying ... TOP 40 needs PERSONALITY!

You talk about the music ... ion Denver for example, KS-104 has a very rap-py sound ... in many cities that works - look at New York and Hot 97's numbers ... Denver has a big inner-city. Las Vegas, where I just moverd back from has - KLUC, in my opinion the worst sounding Top-40 in the country ... but obviously they are doing something right! Only station that consistantly beets them is KJUL (a big-band station, running Unistar satalitte!) Their music is all over the place ... Their personalities are not the best, but they are known, people listen to listen to these jocks (and I will call them jocks, they 'puck' too!) .. When KEDG (The Edge) went on the air in Las Vegas - they have been giving KLUC a tough time .. They are alternative ... but their jocks are all personality (I worked for them for a while) They have a very upbeat aproach (and sarcastic) on the air ... Denver's alternative stations are more laid back ... do you think an alternative with not a Top-40 aproach, but up-beat would win even more ... what is your station like?

I guess I'd also like to make a plug for "best college station". My vote goes to WMSE 91.7FM in Milwaukee, WI.

WMSE broadcasts 100% free-form programming, which means that the jocks play _whatever_ they want to. A huge range of music is played, with the only criteria being "nobody else will put it on the radio, so we will".

Specialty shows include: reggae, italian, spanish, new age, experimental classical, flok, women's music, jazz, techno, hip-hop, etc.

WMSE receives a small amount of funding from Milwaukee School of Engineering (the license holder) but raises all other funds ($40k out of a 60k budget) from private donations and underwriting.

If you're in Milwaukee, do yourself a favor and try out Milwaukee's _only_ alternative, free-form station....WMSE!

Jim,
Dolby makes a unit (The 740) that is called a Spectral Processor. It does exactly what you mentioned, but with a neat twist. It lets you set the threshold (say -50db) and runs all the low level detail at that user-defined threshold through a side-chain with a three-band EQ. The original material goes through untouched and then the processed low level detail is remixed in at the output and ran throgh thier excellent single-ended noise reduction. I have quite a few broadcaster customers of mine using these, and they all love them. Sounds like some of thier listeners might like them too.

Source record: 34594

Rob,
I haven't used the boxes you mentioned, but overall every CRL piece I've ever used did what it was supposed to do. Best of all, the people at CRL are super! If you want to form your own opinion, I would give Bill Ammons at CRL a call and tell him you would like to demo the mentioned processors. He will probably direct you to a dealer in your area which will get you a loaner. I've been playing with the Amigo lately, and with a little processing in front of it (ie audio prisims or some other multi-band processor) it would make a very clean and competive air chain. Incidentally, I have had about three Orban 8200-U3's and the Amigo has had a better noise floor than any of them. The AGC, Limiter, and most of all Stereo generator in the Amigo are very good. It also has a stereo ehancement processor in it. I would highly reccomend that you get a demo and give them a try.

Later,
Darrin Tebbe

Just added to the AIRWAVES WEB SERVER.

There is now a World Wide Web site that is an exchange for radio broadcasting equipment. You can post "ads" for equipment that you want to sell, as well as read ads that other folks have posted. This is a free service that is available to anyone.

The types of equipment on the Micro-Broadcasting Equipment Exchange (MBEX) are broadcasting audio equipment like carts machines, transmitter, antennas, etc. Anything that has to do with broadcasting can be on the MBEX.

This is yet another link in the expanding AIRWAVES Web Page...

http://radio.aiss.uiuc.edu/~rrb/

Enjoy

1159. KSFO/J. Paul Emerson

Newsgroup: rec.radio.broadcasting
Date: 1995-02-19 06:19:35 UTC
From: richwood@commspec.com
Message-ID: <3i6ntn$o9m@vixen.cso.uiuc.edu>
Source record: 34599

IB>Controversial KSFO morning host J. Paul Emerson has been taken off the air.
IB>Apparently he railed against co-owned KGO-TV on "Donahue" for not allowing
IB>that episode of "Donahue" (dealing with talk radio) to air in the Bay Area.

Blake,
Emerson was fired for using obscenities on the air. As we all have
come to know, using a nasty word on the air is worse than suggesting we
shoot Mexican citizens at the border to avoid paying their funeral
expenses after shooting them on American soil.

Unfortunately, excess works very well in Talk Radio. KGO-TV had
absolutely no obligation to air anything it felt violated their sense of
propriety. WABC-TV would have done the same thing to Bob Grant in New
York. When I was at ABC, WABC-TV would not allow any WABC-TV personnel
to appear on WABC radio.

IB>Emerson's been in hot water with Bay Area community organizations over
IB>comments he's made favoring the quarantine of people with HIV and insisting
IB>that HIV can be spread by casual contact. Before his morning gig at KSFO,
IB>he was fired from KFRC AM/FM for anti-Japanese comments.

Since Emerson isn't medically trained, it would appear irresponsible
to spread such information. The kind of all-encompassing hate expressed
by this creature should embarrass any broadcaster with any sense of
community responsibility.

IB> and Board of Supervisors of San Francisco have demanded
IB>explanations and apologies from KSFO/KGO management, which remains mum on
IB>the subject, preferring instead to enjoy the free publicity at whatever
IB>cost, in this writer's opinion.

KSFO has no obligation to explain anything to the Board of
Supervisors. It's little more than political posturing that hopes to
capitalize on the same kind of free publicity KSFO hopes for.

For KSFO there is no cost. It's one of the best ways for a new
station to get instant notoriety. A street full of pickets offers
publicity you couldn't get at any price. I'll have to admit to actually
hiring pickets to get attention. It's much cheaper than a full page ad
in a local newspaper and much more exciting. Not very responsible, but
exciting.

Nothing sells a book faster than having it "banned in Boston" with
lines of religious picketers outside.

Source record: 34451

Anyone know why Arbitron doesn't rate noncommercial stations? Of course, Arbitron is primarily used to set ad rates, so from this perspective there is no need to rate noncomm stations. But presumably station managers also like to see how their numbers compare to those of other (competing) stations, including noncomm stations. It would seem that it wouldn't require any additional cost or effort for Arbitron to rate noncommercial stations. Curiously, Arbitron *does* rate PBS stations in its television book.

IR>Nobody has yet tackled the suggestion several weeks ago that if the
IR>government should not fund radio/tv networks then we should also
IR>privatize the VOA and Radio/TV Marti.

Bill,
A very interesting point! I've seen nothing in any contract with
America (or anyone else) that suggests defunding Radio/TV Marti.

Those of us who deal with AM radio stations realize all too well the
damage the Marti's have done to AM broadcasting. Castro has taken his
revenge by interfering with our stations.

Like most arguments about government funding, it falls along
political lines. Being anti-Castro fits the current agenda so proper
conservative thought goes out the window and exceptions are made to fit
the political agenda.

If we're going to defund PBS, then we should defund EVERYTHING. I'd
vote to defund politicians. Make junkets illegal. Make em actually work
for a living. I've offered to write a book for Newt's publisher for half
the advance he was offered. The response must have gotten lost in the mail.
I guess I can't offer the same political advantages to Rupert Murdoch
that Newt can.

If we privatize the VOA we'll end up with yet another religious
shortwave broadcaster hawking doodads. They're the only ones who can
survive commercially on shortwave.

Good day, or good evening...Depending on when you read this..

Does anyone remember The National Lampoon Radio Hour? It was on for about a year, maybe a year and one-half in 1973-1974. I'd love any information anyone remembers about this nationally syndicated show.

I'm presently heading a group of writers who are trying to re-create some of the fun of radio comedy. Not a morning show, mind you, but a half-hour of comedy like in the early days of radio.

Our only problem is a lack of knowledge in the radio industry up until this point.....Basically, I have almost zero idea of how to go about putting together a show beyond the writing stage. We do, however, have a very funny group of 17 writers.

I'm hoping someone...anyone....has ideas about a good first step. I would love any advice from those who know more than I.

Thanks...and thanks to William Pfeiffer for providing this forum.

All O.J., all of the time:

WMAQ, one of two news radio stations in Chicago, has decided to give the listeners what the listeners apparently want: full time coverage of the O.J. Simpson trail. Competitor WBBM goes live only on an as needed basis. Their coverage consists of top and bottom of the hour updates.

The personality watch: good news for some; bad news for others:

Matt Bisbee, jack of many trades at WLUP since 1978 (a lifetime in radio) has been promoted to the newly created position of "Director of Programming and Production" at WLUP. Dave Logan had been dumped by the station as Program Director in November.
Matt may be best known as the voice of WLUP commercials.

Also at WLUP, Kevin Matthews' morning show is now simulcast in Springfield Illinois on WYMG.

Ken Cocker has signed on for three more years at WPNT.

Maxx Myrick is now the Program Director at WVAZ. He replaces Ron Atkins who landed at WAMO in Pittsburgh.

Lou Brutus, most recently at WMMR in Philadelphia, replaces Terry Gibson at WRCX afternoons. Station manager describes Lou as a "vicious competitor". Considering the station asks it's jays (outside of morning host Mancow Muller) to simply fill about 10 seconds between music and commercials, it will be interesting to see how Vicious Lou improves the station. Terry Gibson, formerly of WLUP survived the initial transition when the station changed from WWBZ (the Blaze) to RCX. He wasn't so lucky this time.

Ric Tower adds the title Assistant Program Director to his business card at WBBM-FM. This is in addition to his job as morning producer at the station.

WLUP personality and former Partridge family member Danny Bonaduce has joined the television talk show circuit. His show will mainly focus on "relationships." The show is scheduled to be offered for syndication shortly. Danny will continue his spot mid-mornings on WLUP.

Breaking up is hard to do:

Wesley South former CEO and GM of WVON filed a 1.2 million dollar suit against Pervis Spann, owner of the station. South claims Spann sold commercials during his overnight blues show and kept the money.

Wanted: Investors: Opportunity: One of the largest Ponzi schemes in history.

Agent Saul Foos has pleaded guilty to bilking investors out of approximately 7.2 million dollars. Many of Saul's clients were radio personalities in Chicago. Among those filing claims against Foos read like a who's who of Chicago radio:

Robert Murphy: WLS-FM, formerly of WKQX.
Fred Winston: WPNT
Irene Mojica: WGCI
Doug Banks: WGCI
John Landecker: WJMK
Don and Roma Wade: WLS-AM
Tom Joyner: WGCI

Authorities noted that Foos had executed one of the longest Ponzi scheme in history. The chances for recovery by any of Foos' investors was termed "slim and none". Fred and Irene held the dubious pleasure of being bilked out of over $200,000 each. Ouch.

Here's what's happening in the 55th market:

As posted last week, KJQY [103.7] dropped it's "Sunny 103"
and Adult Contemporary format for the "Mix 103" contemporary
rock. This non-format format plays a combination of 70s, 80s and
90s rock. Announcements on the radio saying if you are looking
for soft rock, turn to "Kick-see 96." [KYXY 96.5]

The first rumors surfaced that KJQY would turn to a straight AAA
format, like KKOS [95.9, Carlsbad]. But, the format,
on since Thrusday, plays mostly rock hits from the above mentioned
time frame.

Both KYXY and KJQY are owned by the same company, but I
don't have the correct information. This marks the second
set of FM stations owned by the same company.
[KKOS parent company has filed with the FCC to move to
95.7. As a differerent class of station, it could have up to
25kwERP of power, vice the 3.8kwERP presently.]

When last we left this sorry excuse for 25 kilowatts, WBMA-890 Dedham/Boston was still running leased-time Spanish-language programming....with a promise to flip to Prime Sports "sometime."

Well, sometime is now, or at least Saturday afternoon 1/18. The local Spanish is gone, and in its place is satellite-delivered Prime Sports. You may recall that the management at WBMA had preferred to keep identifying their station by its former calls, WBIV, which were the legal calls when the station was on 1060 in Natick (until October 1994). The legal ID on 890 (when they remembered to run one) was "WBMA Dedham WBIV Natick."

Early press reports about the switch to Prime Sports claimed the station would "change its call letters from WBIV to WBMA" (sic). Later reports (as in last week) mentioned neither set of calls and referred to the station under its new format as "WBPS."

You will be unsurprised, I think, to learn that the station has solved that tricky dilemma by simply not using call letters at all. So far, the two local IDs during Prime programming (at about :54 and at the top) simply identify the station as "Prime Sports 890 Boston." I suspect the FCC will find that somewhat interesting :-)

Now...perhaps someone would like to explain why the management of 890 thinks listeners will bother with a satellite-delivered format (including promos for shows at "8 pm Central!" and time-checks of "10 before the hour"), when just 40khz lower on the dial, WEEI-850 delivers local sports talk on a 50kw signal much of the day?

One more note: now that 890 is in English, they have picked up USA network news at the top. USA is already available locally during the day on 740 WJIB. It had been on 1510-WSSH (now WNRB) during that station's yearlong stint (1993-94) as a Talk America affiliate. My excitement is boundless. That's why I'm about to fall asleep :-)

Yet another "classic rock" station graces the San Diego airwaves. (As if we really needed another one).
On 2/17, longtime soft hits (and beautiful music before that) KJQY/San Diego changed its format and moniker to "Rock Mix 103.7," a mix of so-called classic and new rock. The format seems to be about 80% classic rock artists and about 20% other. (That other category would include artists like Genesis (Phil Collins fronting), some late 80s/early 90s rock, and artists like James Taylor, Alanna Miles ("Black Velvet"), and today I even heard the 1989 version of "Rock On" by the soap opera star (for some reason the name escapes me now but it will come back to me) I haven't heard any 1993 or newer songs on the station. . .yet. But the on-air promo describing the station claims that they have researched and planned every hour carefully and that people wanted to hear newer rock mixed with he older stuff and that all old rock wasn't what people wanted to hear (a stab at "Classic Rockers" KGB-FM and KCBQ).
At about five minutes to the hour, in a stopset, they run a quick KJQY San Diego ID which will probably change soon. At the top of the hour, they say "If you tuned in hoping to hear Sunny 103.7, turn your radio to KyXy, 96.5. We're now the new Rock Mix, 103.7." (KYXY and KJQY are owned as a duopoly now and were basically playing the same format so we knew something was going to give)
That now gives us a breakdown into the Classic Rock scene here in San Diego:

KGB-FM, the only station that calls itself "Classic Rock."
KCBQ-FM, Rock N' Roll hits of the 70s and 80s (an Arrow/Classic type format)
KCLX, The Beach, all-70s (quite a bit of classic rock here)
KKOS, Carlsbad, an AAA format with quite a bit of classic rock
and now the new KJQY, the New Rock Mix.

Who leaves this classic rock ratrace in the next 6 months? Any guesses?

Ah, but Arbitron *does* rate noncommercial stations. They just don't break out the numbers in the published book because it can make commercial stations look bad, and after all, they pay the bulk of the money for Arbitron's service. (Last year KQED-FM, a noncommercial station in the SF Bay Area, was #3 in morning drive.) There is a breakdown available via NPR which allows noncommercial stations to check their numbers.

If public broadcasting went commercial, I imagine they'd have to pander to the same broad audience that regular commercial stations do. NPR would probably have to adopt the short, snappy format of a commercial station, and produce snappy, entertaining news gathered oh-so-freshly from the New York Times and whatever local paper was lying about. They couldn't do stories on AIDS or Bosnia; the public needs to know about O.J. Simpson. I've studied commercial journalism, and found that it often under estimates what the public does and does not want to know. Not every listener (or even most of them) is a mouth-breathing idiot. NPR is one of the only responsible, credible, intelligent news sources available in the U.S., and, as such, I'd hate to see it lose its edge to attract a wide audience. The real issue--the fact that Newt and co., are aiming at a soft target to look like heroic budget-balancers--is often overlooked. Considering the fact that the Republicans want to increase military spending and wouldn't dream of cutting social security, their attacks on CPB funding illustrate their true moral cowardice. As a taxpayer, I hate to see the government kill one of the only programs I really value. Maybe if we're all lucky, they'll scrap a B-1 Bomber and keep Big Bird and Nina Totenberg employed. Ihope they will--but I'm not betting the farm on it.

Actually, Arbitron *does* rate all stations in a given market, but only publishes ratings for the commercial stations in its ratings books.

The ratings for non-commercial stations is provided by the Radio Research Consortium, which publishes ratings and diary information on diskette, to be used with RRC's proprietary software. RRC is funded by non-commercial stations. They might also receive some funding from the Corporation for Public Broadcasting.

Pat, this is the Big Problem in most forums is lack of guts and lack of creativity. Top 40, or Hot Talk, radio in America is lacking the drive and guts to create new and innovative programing. In Chicago we have WLUP, which broke all the rules and left a lot of gaping mouths and a lot of eaten words when they soared to the top of the ratings game with programing that they all said bound not be done.

Intense personality, comedy, and fun. Not the traditional cookie cutter comedy of 'morning zoo' formula, but new, fresh and pushing the envelope. Result, they created a highly loyal, affluent, intelligent audience who was very much in demand. Evergreen (parent company) made several major blunders in mucking with the formula, and still the audience stayed loyal.

WLUP has paved the way for personalities like Don and Mike, Greaseman, and others to gain national following. The main reason Stern bombed in Chicago (and I know we will hear from Stern fans who will disagree with this) is because Chicago was already used to top-notch cutting-edge comedy-talk and Stern was anti-climactic <so to speak> after the likes of Steve & Garry, Kevin Mathews, Jonathan Brandmeier and such, all of whom were totally local, talking about Chicago things.

But like Stern or hate him, he and the other national pseudo-shock jocks (including Imus) prove that the listening public DOES want something different. Stern's amazing success in major markets like NY and LA and elsewhere prove that people are looking for new and unusual programming.

But radio programmers are stuck in a rut. Many (if not most) are stuck in a rut and cannot see beyond so-called proven formats like AC, Hot Country, EZ, and CHR. Some have, such as pioneer NAC's like WNUA in Chicago KTWV <the wave> in LA and others, who took an unproven and different format and have made a great deal of money with it. WNUA scores in the upper top-10 during drive times.

Still the programmers tell themselves and everyone else, the same old party line about consultants, and trends and research. They tweak and

fine tune the same old warhorse formats and claim to be doing something new. I believe that the future of radio's success will belong to the innovative, adventurous and strong.

Remember... If you cant do, teach... If you cant teach.. consult!

Broadcasting needs broadcasters, not bean-counters. The ironic thing is, that the unwillingness to expand formats is costing stations the listeners that they are afraid of losing *by* expanding formats. People are going to CD's, tapes, Cable Radio, and college radio to find what they want. Then these same programmers who are unwilling to try something new, are crying that they aren't making money, and they tighten and restrict their formats more. Which is kind of like trying to put out a fire with gasoline! These bean-counters are bean-counting themselves into the poor house.

Hi Grant...
I think we all remember your million-dollar voice from the days of the Big 8...you might want to let us all know what you're doing these days, and where.
BTW, since XEROK has changed programming but I believe it has NOT changed hands in the interim, a deal like that may be still viable. CHUM Ltd. (the Waters family) now owns CKLW and its various sisters as part of Canada's only duopoly arrangement, and they are well known for doing things differently and creatively. (You just have to spend a little time watching CITY-TV in Toronto or MuchMusic on cable to know what I'm talking about.) They're running it as a talker and doing pretty well with it, but I'm sure they'd like a wider North American audience potential for it. I wonder if their local boss, Warren Cosford, and the folks at 1331 Yonge St. would be interested in doing something like that now?

Hi Folks,
In response to your thoughts on dynamic range altering of digital audio, I think where ever there are systems that allow comparative listening (e.g. AM radio, FM radio, Broadcast TV) there will be loudness wars. Some, like classical music formats, will not use as much. Others will use more.

Back when I was at WIYY Baltimore (AOR), I fielded a call from a listener who said he preferred the sound of our station to his vinyl. As such he liked taping music from the radio. I think a big part of that was that the compression allowed him to get audio higher over the cassette hiss than he could with his turntable. Since the lawyers diverted our attention from the real benefits of DAT as a consumer format, thereby eliminating the possibility of having a large consumer base equipped with digital recording capability, we'll have to wait until a consumer-based digital recording format takes hold to see if dynamic range compression artifacts are still as attractive to the listener. By then, hopefully, the digital dynamic range control devices will sound better than the first ones we've heard.

Thanks for the shout!

How about putting it in your own www page? I think www is gonna
replace ftp for most applications. On several systems I've tried, you
can put files in a directory called public_html. You'll have to use
chmod to make the directory and its contents world readable. If you put
a file called index.html in the public_html directory, users can access
it using the URL <http://site.name/~username/>. For example, my URL is
<http://slonet.org/~hhallika/>.
This seems like a great way to make all sorts of files (including
voice-over demos) readily available to the net. Perhaps our esteemed
moderator could put pointers to all the voice demos in the rrb page.

: country was moving right wing and that they he would hire only
: right-wing talk show hosts in the future. Well, looks like that didn't
: work! What next for KSFO?

That was his line anyhow. Swanson also mentioned (and rightly so) that he was the first to put a gay talkshow on KGO-FM. I think that all-in-all, he's trying to do what he's paid to do: generate ratings. While he probably isn't going to generate much for KSFO, the subsequent protest did merit a 1/2 page story in the New York Times the other day.

But, your paraphrase appears to be correct -- to put it more directly, "It's like coming into a town where nobody thought to put up a McDonald's." Hmmm...the venerable KSFO, now the McDonald's of radio. I hope Gene Autry isn't lurking here -- he'd have a heart attack to hear what his pride and joy became.

"What next for KSFO?"
Indeed...what next for all of talk radio? If Emerson's strident rant doesn't work (and I've heard some tapes of what he does), could it be that more intelligent and rational radio---with energetic and entertaining people on the mike to keep it moving along, whatever their politics ---is the next wave?
Come to think of it, isn't that what Swanson himself has been doing down the hall at KGO all along? He's well known for making that approach work and building audiences with it. He's damn good at it, in fact. Just a crazy thought from a host in the trenches, for what it's worth (and since I AM a yakker and not a PD, it's probably not worth much)...why not just a high energy format with people from all over the spectrum reflecting a younger and more iconoclastic point of view?
In that context, Jay, I think I'd put YOU in the morning drive slot...

Rich, I think your flame-colored comments are
letting your OWN political leanings shine through...
each of us has his own sources, and interprets them
as they will. Sorry if I tread on your conservative sen-
sibilities, but what I talk about is not only care-
fully checked out prior to posting, but often confirmed
by public comments by those involved directly or in-
directly. Sorry you missed some of them. Evidently
you don't read the trades, or you missed things Mr.
Mainelli has said for public consumption. It's also
possible that he's got a lot of different reasons for
moving on, and shares some with you, others with
Randall Bloomquist in the pages of R&R.
We've both worked for CapCities at one point or
another...I only know what people in the organization
have told me themselves at various times and pass
it along as appropriate and relevant. I'm an admirer
of Tyler Cox's work myself, and all I said was, he seems
like a logical choice to take WABC beyond a concept
that has served them well but now seems to be limiting
them somewhat and keeping them from #1 12+ and
25-54. If you disagree, fair enough. If you end up com-
peting against him, and I'm right about his eventual
ability to dominate NYC with his concept of personality
talk, oh well...
Bottom line is, each of us could be right or wrong,
each of us has info and sources (on and off the record)
who could be all right or all wet. Apparently only one of us
chooses to raise the temperature of the discussion bey-
ond rational discourse, and it's not me...

>What a checkered history...

One tiny little era you missed in this historical account, WMRE didn't
go dark until very early 1987 when it was then bought by Noble. In fact
prior to going dark the station (as WMRE) made an all out attempt with a
format with the likes of Eileen Prose, Pat Whitley, Tony Pepper, Bob
Gamere, and even Dana Hersey from Ch.38. I know, I was an intern there
when it crashed and burned in Feb. (maybe March) of '87.

AIRWAVES E-PUBLISHING wrote:

: However, as usual, David Kaye has brought up an angle to this that
: none have seen, even myself. Frankly, there is nothing *public*
: about public radio, even less about public TV. Well nothing other
: than public monies supporting it. Members of the *public* have no
: access to the network, and in most cases have little or no access to
: individual NPR member stations.

Thanks <blush>. These NPR stations have gotten so arrogant in their striving to identify themselves as "PUBLIC radio" that a whole other tier of non-commercial stations has appeared, namely the "community stations".

True, Pacifica was an early leader in this movement long before NPR came into being, but this stagnated for many years. After NPR came into being, lots of low-power stations began springing up across the country to try to serve those community needs which the big-guy NPR stations appeared not to be serving.

Thanks go in large part ot Lorenzo Milam and Jeremy Lansman, their disciples, and followers. But there has also been a movement to set up community stations apart from them as well.

So, today, there are NPR affiliates whose main reason for existence appears to be perpetual fundraising, and community stations whose purpose seems to be programming.

I'm reminded of a very successful community station in Portland, KBOO. They have strived to provide a forum for all kinds of opinions and cultural programming, and have become not only well-loved in their community, but financially strong as well. And when they do their pledge drives you don't get to sit by and murmur "But what have you done for us lately" because you KNOW what they've done.

I'm going to be spending a week in Ohio and Northern Kentucky, and I was wondering if any of you who may be familiar with the current state of radio in these areas would do me the favor of mailing me a list of stations in your area, or just the recent (in the last year) changes. Specifically, I'd like information on Columbus and Central Ohio, Dayton and Cincinnati, Ohio and Louisville, Frankfort, Lexington and Northern Kentucky areas. If you do have such information and you think it worthwhile for the newsgroup, please also post it. Again, just the recent changes would be sufficient, if a complete station list would be too long. Thank you very much in advance...

Chris
Chris.Bessert@cmich.edu

Rumors are flying that Trumper Communications is about to announce the sale of KKCW-FM to Citicasters and KXYQ A/F to Heritage.

Citicasters owns KEX-AM, 50,000 full service home of Trailblazer basketball and KKRZ-FM, the leading CHR station in the market.

Heritage owns KKSN A/F. KKSN-FM is 60's Oldies. KKSN-AM is "Sunny 910," home of nostalgic music of 50's.

This would bring the total number of duopolies in the market to three, breaking up one of the two existing duopolies in the market.

Still, just a rumor.

Japan uses C-QUAM, and several major brands market pocket and full-size
radios, radio-cassette combinations, boom boxes, etc. featuring AM stereo.
Providing the digital tuners can be switched to 10 KHz channel increments
("worldwide synthesizer tuner") they work just fine in the US ... I've got
Japanese domestic AIWA and Sony units right here.

I am just curious about the policies of various talk stations and hosts in terms of:
-- are there limits on the number of times per day, week, or month someone can call a station or particular show?
-- does your station or show have a policy on whether callers can be banned? If so, under what circumstances? Is this recorded somewhere?
Just wondering,
Brian Maloney weekend talk host KSCO AM, Santa Cruz

Sure, write it yourself. Here's the algorithm that KGO uses on Bernie's show:

```
if (caller_agrees_with_Bernie())
put_caller_in_queue();
else
if (last_200_callers_agreed_with_Bernie())
put_caller_in_queue();
else
hangup_on_caller();
```

Very simple, eh?

IJ>BTW, wouldn't everyone out there love to see Rush get into a fair
IJ>debate with a well informed articulate liberal, and without the
IJ>benefit of a fader? Won't ever happen...Rush has always refused to
IJ>do this. Perhaps a televised public debate between Rush and Tom Leykis?
IJ>Just a thought..

Not with Leykis. I wouldn't mind seeing Mario Cuomo or Lowell Weicker debate him. Rush would eat Leykis alive and it would degenerate into a shouting match.

If we could only cross a Weicker or Cuomo with Mark Russell we'd have an entertaining debate on a level playing field.

IJ>Ban homophobes from the military.

Never happen - they're too entertaining.

IJ>[Moderaotr's Note: I have a 45 minute tape of Rush being interviewed
IJ>by (and gently taken apart by) Bob Lassiter. I taped it on a C-90, and
IJ>didnt have auto-reverse (I was not home) so I didnt get more...
IJ>Interesting. It was also interesting when Rush took over some TV
IJ>talk show a (Pat Sajak??) nd was heckled by the audience to the point
IJ>where he had to clear the place. No, Rush doesnt do so well when he is
IJ>not in absolute control. Bill]

Bill,
The Pat Sajak show was a major turning point in Rush's attitude. Before the Sajak incicent, Rush was mean spirited. He couldn't understand why people were so upset. After all, he was just an entertainer. The Sajak show seems to have convinced him that people did take him seriously and he devoted more time to being entertaining and less time being mean.

I believe it's the single biggest reason Rush is the success he is today. His show, above all else, is entertaining. I'm not a Rush fan, but I've got to give him the credit he deserves.

Rich

[Moderator's Note: Rich. I agree that Rush made his mark with his humor. But I have seen Rush steadily reduce the humor and increase the stridant preaching and partisan ranting. His humor, these days, is merely produced sarcasm aimed at Clinton. He has essentially gotten very tedious to listen to IMHO. Bill]

1195. Have Talk Show Software

Happenings in the #40 market:

*Here's the Arbitron ratings for Syracuse in the Fall '94 book(I'll
leave it to others to comment):

```
# Stn./freq. Format/positioner was is +/-
-- ---------- ----------------- --- -- ---
1 WSYR/570 News/talk 11.2 13.2 +2.0
2 WYYY/94.5 Hot adult contemporary(Y94) 11.7 11.1 - .6
3 WNTQ/93.1 Contemporary hits(93Q) 10.6 10.0 - .6
4 WAQX/95.7 Album rock(95X) 9.8 9.4 - .4
5 WSEN/92.1 Oldies 6.8 6.2 - .6
6 WBBS/104.7 Country(B-104.7) 6.5 6.0 - .5
7 WFBL/1050 Adult standards 4.8 5.3 + .5
8 WHEN/107.9 Country 3.3 4.0 + .7
9 WHEN/620 News/talk;Bills/Crunch(Talkradio 620) 2.5 3.2 + .7
10 WKRL/100.9 Album rock(K-Rock) 3.6 3.0 - .6
11 WFRG/98.1 Country(Froggy 98) ! 2.6 2.0 - .6
12 WOLF/1490 Urban contemporary .7 1.8 +1.1
```

!-Utica
*-Re Talkradio 620:Crunch is the city's AHL team

*WUFX(103.3,album rock;103.3 the Fox)is adjusting format a bit,adding some
modern rock to its playlist(i.e.Bush,Tragically Hip,and giving a major push to
the area's own Goo Goo Dolls;with its latest album nearly 3 weeks away,4 tracks
are being aired). This might be a pre-emptive strike at anyone else looking to
change format(read:WBUF-B93).

*A lot of people are looking to become the next PD of WKSE(Kiss 98.5).(I got
this tidbit I got in private e-mail from ex-Kiss morning man Dr.Maims.)
Besides MD Sue O'Neil,Dave Gillen(PM driver/asst.PD at WMJQ(hot AC;Q102)has also
applied(which might be sweet revenge if he gets it;he was fired from Kiss
a couple of years ago). He adds that the inside track,at present,is on the PD
of a Keymarket station in Lima,Ohio(an FM with a Hot AC format);he's done AM &
PM drive,but is currently handling middays. If he gets it,it might be an on-air
PD dual role-which means that either Doc Reno(PM drive)or O'Neil(middays)will
go. Reno doesn't have a contract,while O'Neil is signed 'till the fall. Also:
ex-PD Brian Burns,had he not left to go to Raleigh,N.C.'s G-105,would have been
fired-with the way he handled the Dr.Maims firing being keyed as the cause(he
would have been let go on April 1st;Burns is making less in Raleigh-only $50,000
compared to $70,000 at Kiss). Speaking of Burns:that message had some nasty
stuff about him-I won't reveal it,but suffice it to say that if Tony Violanti
of the News(who considers him to be a near-god)read it,he probably wouldn't
believe it.

*CIDC in Toronto moves from AC to dance-based CHR as Hot 103.5. Randy Brill is the MD-he has 20 years in the dance music industry. Previously,he consulted CING(107.9,Burlington/Hamilton,Ont.,dance-based CHR;Energy 108).

*Back out of the area:
-WQBK-FM/WQBJ in Albany moves from classic rock to modern-leaning AOR, positioning themselves as The Edge. Ron Bowen is the new PD,arriving from WRNR in Maryland(well,one more reference doesn't hurt :)),replacing Joe Sussman.(No idea if Howard Stern's still on there.)
-WEQX(Manchester,Vt./Albany;102.7;album rock)is looking for a new PD,as Alexa Tobin leaves. Music director Gary Schoenwetter is acting PD.

TTYL...

12	WOLF/1490	Urban contemporary	.7	1.8 +1.1

!-Utica
*-Re Talkradio 620:Crunch is the city's AHL team

*WUFX(103.3,album rock;103.3 the Fox)is adjusting format a bit,adding some modern rock to its playlist(i.e.Bush,Tragically Hip,and giving a major push to the area's own Goo Goo Dolls;with its latest album nearly 3 weeks away,4 tracks are being aired). This might be a pre-emptive strike at anyone else looking to change format(read:WBUF-B93).

*A lot of people are looking to become the next PD of WKSE(Kiss 98.5).(I got this tidbit I got in private e-mail from ex-Kiss morning man Dr.Maims.) Besides MD Sue O'Neil,Dave Gillen(PM driver/asst.PD at WMJQ(hot AC;Q102)has also applied(which might be sweet revenge if he gets it;he was fired from Kiss a couple of years ago). He adds that the inside track,at present,is on the PD of a Keymarket station in Lima,Ohio(an FM with a Hot AC format);he's done AM & PM drive,but is currently handling middays. If he gets it,it might be an on-air PD dual role-which means that either Doc Reno(PM drive)or O'Neil(middays)will go. Reno doesn't have a contract,while O'Neil is signed 'till the fall. Also: ex-PD Brian Burns,had he not left to go to Raleigh,N.C.'s G-105,would have been fired-with the way he handled the Dr.Maims firing being keyed as the cause(he would have been let go on April 1st;Burns is making less in Raleigh-only $50,000 compared to $70,000 at Kiss). Speaking of Burns:that message had some nasty stuff about him-I won't reveal it,but suffice it to say that if Tony Violanti of the News(who considers him to be a near-god)read it,he probably wouldn't believe it.

*CIDC in Toronto moves from AC to dance-based CHR as Hot 103.5. Randy Brill is the MD-he has 20 years in the dance music industry. Previously,he consulted CING(107.9,Burlington/Hamilton,Ont.,dance-based CHR;Energy 108).

*Back out of the area:
-WQBK-FM/WQBJ in Albany moves from classic rock to modern-leaning AOR, positioning themselves as The Edge. Ron Bowen is the new PD,arriving from WRNR in Maryland(well,one more reference doesn't hurt :)),replacing Joe Sussman.(No idea if Howard Stern's still on there.)
-WEQX(Manchester,Vt./Albany;102.7;album rock)is looking for a new PD,as Alexa Tobin leaves. Music director Gary Schoenwetter is acting PD.

TTYL...

1201. Denver Radio Watcher + Top 40

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:21:42 UTC
From: Jon Jacobs <jonj@boulder.earthnet.net>
Message-ID: <3if37m$jv1@vixen.cso.uiuc.edu>
Source record: 34458

Well, there is no stability in radio ... as if we did not know this already ... just a few days ago, I put a posting up about Alice at 106 (no, not Alice 106, but Alice at 106) and their PERSONALITY Line-Up ... since then, Night Dude - Dino .. has been blown out ... I know NO details on it. It is reported that he is on friendly terms with the station. Mary "Cha-Cha" Chavez (former KS-104 PD and Mid-day's) has been sitting in the air-chair temporarly ... could it be long-term???

Jon Jacobs

...Or, "If there were ANYTHING else exciting going on in this
market I'd be listening to that instead."

After I posted Saturday night, two things happened. One was that
890 signed off sometime just after their 1am legal (I walked away
from the radio for about 30 seconds and came back to find WLS!)
The second is that they remembered that tiny little point about
why a legal ID is called a "legal" ID...ya gotta do it!

Their legals over the last few days have been either "WBMA Dedham,"
"WBMA Dedham-Boston," or the still-inexplicable "WBMA Dedham
WBIV Natick."

Meanwhile, it's an indication of the quality (low) of the radio coverage
in print here that neither the Globe nor the Herald has mentioned
anything about 890 in their radio columns (indeed, both papers
still list the station as WBIV-1060, which was last on the air
in October 1994). Both papers' sports-on-TV-and-radio columnists,
Jack Craig at the Globe and Jim Baker in the Herald, loyally
regurgitated the press release calling the station "WBPS" and
promising a power increase. Baker's Sunday Herald column, which
hit the streets a few hours after 890 flipped from Spanish to sports,
said "Prime Sports is coming in a few weeks." Nothing in the Globe
or Monday's papers to indicate that either columnist has noticed
that the station actually flipped Saturday...guess they'll wait for
the press release :-)

What articles are "taboo" for advertising in your area? Here in the UK, the absolute no-nos are basically pornography, gambling (except the National Lottery) and cigarettes (although cigars get through). Alcohol is OK although the ads shouldn't be targeted to appeal to under-age people (legal drinking age here is 18).

Source record: 34463

Keep in mind that AM tuner sections of modern DIGITAL car radios use
an I.F. of 450khz, rather than the traditional 455khz of analogue xceivers.
This change occured as 450 can be devided by both 9 and 10. All international
band-plan channels for the medium wave BCB, as of a few years ago, are
divisible by either 9khz or 10khz depending on your area.
In your case I suggest monitoring 2062.5 khz with broad selectivity. You
could also try running several million watts on 452.5Khz AM and 10.7Mhz
FM and force-feed every radio in your state. I feel that my first
suggestion is a byte more practical.

Sir, perhaps you can clear up some confusion; not being of a technical mind, I barely grasp why my AM signal reaches Canada but not five miles east of the Xmttr site. Nonetheless, I have been assured that in many European countries, owners of radios are charged an ongoing tax based on their listening time, and have also been told that a vehicle cruising streets with detection equipment can accurately pinpoint households where a radio is operating and which frequency it's tuned to. c'mon...can this be? This would be a fun discussion string to begin on the radio broadcasting net, and I'd like to begin with some knowledgeable data on the subject..
Thanks!

>if this is the best way of connecting the antenna or do I need some sort
>of transformer (300-75), balun, etc. between the antenna and the radio
>receiver.

I could bombard you with lots of electronic theory, but the real question is:
Does it work? Does hooking up the outside antenna the way you describe bring
in more stations? My guess is that it does.

You are probably hooking up the coax correctly. Since there's only one wire
leading from the whip, that is where the center conductor should go.

Hope this helps.

I just want to point out that noncommercial stations are included in our reports. (Anyone who doesn't think that public stations take advertising dollars out of a local market has never sold against a good one!) We believe that including the noncommercial stations in our reports provides a more complete view of a radio market. In Boston, for example, WBUR has consistently grabbed the first place slot in the Adults 25-54 rankings!

I don't think that satellite DAB poses much of a threat to traditional radio because it can't accomodate local advertisers. If it were to survive as a free, advertiser-supported service satellite DAB would have to rely entirely on national ads. Advertisers in general, and national advertisers especially are starting to rely on target marketing using databases and interactive media. These concepts fit traditional local radio much better than satellite radio. Even for a company like McDonalds there are many more ways to use a local station to promote the company's products and image than there are on satellite radio.

I will go so far as to predict that satellite DAB will be most successful as a subscription (pay) service targetting widely disapersed groups not well served by traditional radio.

The real threat to local radio, I maintain, is from corporate buyouts and mergers. Not duopoly, but _monopoly_ is looming in our future as Congress and the FCC prepare to throw the gates open to multinational corporate giants.

The bottom line is the simplest of all. As far as callers on the air, you want, and should screen calls that SOUND best for your station. "Club" callers tend to call for no other reason than to check in, while a first time caller may be put off because he/she may not feel welcome. The key is to find the diversity to work everyone in who has something good to add to your program. Anyone else should be NICELY blown off, or coached into what you need. Remember, this is suppose to be show biz, and everyone wants in.

Source record: 34472

OK, I started this, So I guess I better share some of my opinions concerning Top 40 radio.

First off, Why in the hell are we researching ourselves to death? I mean it's ok to use research to give yourself an idea of where to start but don't depend on it to run your radio station. if someone can explain to me how research conducted in auditorium tests or call-out in Atlanta, Georgia can help the programmer in city x in state x.

The consultant at the last station I worked was under the opinion that our biggest songs and all of our library should be the best testing songs from mediabase research. I'm not puttting down mediabase. If you have ever seen the disks it is an amazing wealth of information but like I said, None of it was from markets anywhere near mine. Why should I program my station with Chicago research???

Someone said in this discussion that there needs to be more PD's who take chances. I don't think it is the PD's as much as it is Management and Ownership. No one is willing to take chances anymore. There are so many choices now in radio they feel they can't afford to. I think the way things stand they can't afford not to.

Give the station back to your market, train sales to sell the format, and let your programmers program and the people will come. I promise you. Change formats every year and you will gain nothing but new letterhead.

If Alternative replaces Top 40, then what will it be alternative to? There is plenty of room for both Alternative and Top 40 in most markets, if both are done well. When you speak of Alternative's "better" demos, I'm assuming that you mean "older" demos. Top 40 has always been a youth-based format. The problem in recent years has been the inability of many radio sales staffs to successfully sell those teen demos. Yes, it's true that most advertisers want to hit the Baby Boomers, yet other teen media (magazines, MTV) seem to have no problem selling out their inventory. Teens spend billions of dollars a year, and as the baby boomers continue to have baby's, look for another boom (echo?) of teens to hit as we approach the turn of the century. I believe that there is a solid future in store for youth-based radio, and now's a great time to start! Successful Top 40's often beat adult oriented stations in adult demos. Why? Because a compelling, exciting, personality-driven Top 40 is a whole lot more interesting to listen to than the oldies based drivel that is often programmed to attract the baby boomers.

Lets face it, Top 40 radio is BASED on the Michael Boltons, The Janet Jacksons ETC.....

TRUE top 40 radio stations play the hits, it should not matter if it is an urban song, a rock song, or a pure pop song. You tell me how many radio stations in large markets are playing the hits without leaning alternative or urban. The only stations that are doing top 40 radio are in small markets. Since the larger stations have more weight in the charting methodology it is nearly impossible to see what really is a hit.

I predict that the alternative trend is just that a trend. In five years after every station has jumped on the bandwagon, changing its direction to cater to the newest fad, after Greenday has gone the same path as technotronic did, only the stations that were real top 40's will be around and billing a profit.

Dallas Kincaid

>time, Herb McCord.
>
> A very interesting story. However, as I recall in the 1970's CKLW had another signal they had to protect: CJAD, a 50 kW station in Montreal. In fact I think that CJAD also had to protect CKLW. To make maters even more complex, CJBQ in Belleville, Ont. was also on 800, with a power of 10 kW. Diring the early 1970's I lived about 50 miles east of Toronto, nidway between Windsor and Montreal, and about 75 miles west of Belleville. This was in the null of both CKLW and CJAD, if it could be heard at all at night, CKLW was very week, and CJAD could not be heard at all. Often CJBQ was heard at night (it was always in during the day with a fair signal) but the station that dominated 800 was PJB, a 500 kW religous station operated by Trans World Radio from Bonaire, a island in the Caribbean off the coast of South America.

Many stations split the audio bandpass into several segments and compress each with a different characteristic. This often alters the listener's perception of fullness especially in the bass. Many stations (even FM) also use some form of aural excitation such as APHEX or EXR which make radios sit up and do tricks. The net effect of all this is a sound very unlike the "raw" CD.

1221. Re: CPB funding...a different perspective

Rebecca Golden of Boston University writes that if NPR lost its CPB funding, perhaps it would have to "produce snappy, entertaining news gathered oh-so-freshly from the New York Times and whatever local paper was lying about.....it often underestimates what the public does and does not want to know. Not every listener (or even most of them) is a mouth-breathing idiot..."

I agree that NPR is a valuable resource. However, your slam at commercial journalism is an insult to those newspeople in commercial radio who respect their audience, work under less than ideal circumstances and still manage to put out a responsible, credible, and intelligent product. They may be somewhat rare, but NPR doesn't have a monopoly.

We certainly don't think of our audience as a bunch of "mouth-breathing idiots." But we do air lots of short snappy stories in amongst the somewhat longer, more thoughtful reports crafted by our reporters. What we've discovered over the years is that when we try to do what NPR does so well we run up against constraints imposed by our commercial load and our ratings GO DOWN. The fact remains, when you're playing the numbers game, short and snappy is what works.

I haven't seen any others in quite a while, but two that I used to use were
the MC1310P and the LM1800P. They will, with some modification to their
peripheral components, work for MTS TV stereo too.

Hope this helps.

**** ****** ****** ** **
** ** ** ** **
** ***** ***** *** COMMUNIQUE # 4 - 8
** ** ** ** **
**** ** ****** ** ** February 20, 1995

International Freedom of Expression eXchange Clearing House

GROWTH OF RADIO FOLLOWS EMERGENCE OF DEMOCRACY IN AFRICA

"INDEX ON CENSORSHIP" LOOKS AT EMERGENCE OF INDEPENDENT RADIO

Radio broadcasting in Africa is struggling to keep up with the democratisation of the region, according to a special report in the latest issue (No. 1, 1995) of "Index on Censorship". In the report, entitled "Making Waves", Richard Carver of ARTICLE 19 and Adewale Maja-Pearce of Index on Censorship say that "radio is the most effective means of disseminating information and ideas in Africa," since poverty and illiteracy render television and the press inaccessible to the majority of the population. "This is why African governments refused to open up the airwaves to private competition until the last two or three years, when the pressure for liberalization became too great to resist." The report says that President Robert Mugabe of Zimbabwe was one of the last to resist private radio, reportedly waiting until the end of 1994 to change his mind.

"Hate radio" is one of the outgrowths of relaxing the controls of the radio, the authors note. South Africa had been an exception to the region's ban on private radio, having had private stations since the 1970s. But this exception had its downside since right-wing Afrikaaners took advantage of the freedom of the airwaves to promote hatred. They further used broadcasts to incite their followers to violence, a tactic used by the now infamous Radio Mille Collines (RTLM) in Rwanda. The "Index" report argues that "If a waveband is being utilised by a station which is inciting its listeners to acts of violence, then a legitimate community or commercial broadcaster is being denied that same air space." Such occurrences indicate the necessity of an independent broadcast body to regulate access to the airwaves.

The report notes that freedom of expression becomes an issue when discussing restrictions on "hate speech," but points out that "hate radio" can cross the line between freedom of expression and incitement. "By this point the broadcasters had moved from the

protection of article 19 of the International Covenant on Civil and Political Rights, which guarantees freedom of expression, to the opprobrium of article 20, which prohibits advocacy of racial hatred and incitement to violence," write the authors.

Carver and Maja-Pearce conclude that commercial broadcasting has been opened up throughout Africa, "but the victory has proved a hollow one." They write, "As most governments have realised, the international community is more concerned with the form than the substance of political change." Thus, in most countries broadcasting licenses go to the ruling party's friends "who will reap advertising revenue from pop music shows or evangelise on behalf of fundamentalist religion." The crucial struggle now is to open up the publicly-funded national radio networks, and this will prove immeasurably more difficult.

"Making Waves" is a shorter version of a joint-publication entitled "Who Rules the Airwaves? A report on broadcasting in Africa" and is available from A19 for UK L9.99 + 2.40 post/US $15+ 3.60 post at 33 Islington High St, London N1 9LH; fax: +44 171 713 1356. Some copies are available free to countries of the South. To apply, send details of your organisation to Index at 33 Islington High St, London N1 9LH; fax: +44 171 278 1878.

1225. KABC's Ira Fistel arrested in Los Angeles

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:23:28 UTC
From: hmspencer@CCGATE.HAC.COM
Message-ID: <3if3b0$k5m@vixen.cso.uiuc.edu>
Source record: 34483

Many may have already heard of the tragic accident that eclectic talk show host Ira Fistel of KABC-710 was involved in Thursday 2/16 on the way to do his 11pm - 4am talk show. Apparently, although the details are not all in yet, his car was struck by another at an intersection. That car then got the worst of it by bouncing off Ira's and into a utility pole. It flipped over horribly and the driver was instantly killed. After briefly talking to paramedics and calling his wife to come to the scene, Ira caught a cab and went to the studio and did his show. He reportly told paramedics, "I have a show to do, the police know where to find me" (L.A.TIMES). I listened to a good deal of the show, like all listeners not knowing what had happened and believe me, you could NOT tell anything was wrong. During the commercial breaks he was apparently being questioned by the police who showed up at the station, but he sounded perfectly normal during his show. He was arrested at 4am for leaving the scene of an accident. Also, apparently his wife told police on the scene after Ira left that she had been driving the car. She later recanted that story and denied that Ira told he to say that. Ira will probably be off the air for a while until this thing blows over. He didn't do the show Friday night and I don't know if he will do it tonight (Monday). This is certainly an extreme example of "the show must go on". Bay the way, Ira has always been a vocal opponent of mandatory seat belt laws.

After 6 months I have decided it is time to get my ass back into radio. I have nearly 10 years experience in every airshift. I prefer an MD/Air Personality position with a Top40 formatted station but will consider any offer. I'm willing to relocate.

I have been nominated for several national awards including Gavin Music Director of the year and Bobby Poe Music Director of the year. My last two jobs I have increased ratings by at least 10 shares in the target demo and even more in some of the others.

I do killer production (including digital and Multi-track) and I am fluent with Auto-Jock, Selector, and Powerplay (Powergold) music scheduling systems. I also have experience with Mediabase Research and independent call-out research.

I do fantastic remotes and am a great club dj for mix shows.

What I can learn is more important that what I can earn.

If you have a position open or are considering a change, please get in touch with me so I can show you what I can do for your company.

Adrian:

Mark St. James at KQSB should be able to shed some light on the goings-on at the station. Inasmuch as national ratings, Westwood One is very tight with supplying them to listeners. contact someone at the station and have them send off for them. PDs or GMs can do this, and for a good WW1 friend like KQSB the clearance manager for CA in Arlington had better get up and do it.

Let me know if you find anything out. I have some ratings here, but am loath to just send them out there for the sake of posterity.

From: avsystem@rain.org
Message-ID: <3if3b7$k6g@vixen.cso.uiuc.edu>
Source record: 34491

Why are the liberals wasting time and money trying to find a liberal counter to Rush Limbaugh when the greatest part of his success is based on the fact that he has struck a responsive chord? True conservative talk show hosts, and not the bomb-thrower bad imitators, are popular everywhere if they prepare, but some jerk coming to the microphone with no facts, concepts or showmanship is going to die and give the class a bad name.

Adrian Vance (formerly a daily conservative talk show host at KQSB AM 990 in Santa Barbara who left the air to pursue money.)

1234. KYNN, Lincoln/Omaha Nebraska

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:23:37 UTC
From: graziano@unlinfo.unl.edu
Message-ID: <3if3b9$k71@vixen.cso.uiuc.edu>
Source record: 34492

About a year or so ago, KFMQ (FM), Lincoln, NE switched formats from AOR to modern country, changed their call sign to KYNN and moved the studio to Omaha. They have tried to position themselves as an Omaha station, with very little success in either of Nebraska's two largest cities. This weekend, KYNN dropped all programming in favor of an old-fashioned computerized/mechanical voice giving a countdown. Currently, it says "T minus 1 day, 8 hours, 29 minutes, 28 seconds and counting." So whatever is going to happen to 101.9FM will occur at 6:00PM Central Time on Tuesday 2/21. The countdown is interrupted ever so often by a non-sequitor of the voice saying something like "I'll make him an offer he can't refuse" or "Paper or plastic".
I'll let you know what happens.

Government funding should be content neutral. Anything less is interference by government in freedom of expression. The Pressler letter, and comments by Newt G. make clear that political viewpoint drive the desire to cut CBP. (As if CPB were the only funding for the stations!)

These kind of comments alone are sufficient to raise questions as to the propriety of future government funding.

That NPR and PBS affiliates have, or don't have any particular kind of programming, local programs, or anything else, should not be a consideration in government funding. These stations are owned by non-stock corporations, universities, state governments, and other local government entities. They alone should control content. If you don't like the content, you should start your own station, and stop bitching. (Assuming you are complaining now)

I place Larry Presslet and Newt Gringrich in the same catagory. If they don't like the "liberal bias" of these stations, whey didn't they and their friends build their own stations? Why? Because it is more "politically correct" to close down a voice with which you disagree than to open your own mouth.

I would like to know if any who complain about local content, liberal or conservative bias, or other aspects of Public or Commercial broadcast outlets own a station? Who are you to tell the owner or manager of a station what to do? If you have a station, tell us how great your are compared to all others. Be positive. If not, then get active, and build one. If the spectrum if filled in your area, then deal with FCC restrictions on freedom of expression. File petitions for rulesmaking restricting ownership limits, and allowing more diversity of ownership (present political drift is the other dirrection). But stop complaining. Get FCC form 340 or 301. Fill it out. As the New Republican Right says, take responsibility for your self.

Jeremy Lansman
KYES-(TV)

[Moderator's Note: As much as I oppose the defunding of PBS, I must say that your assessment of 'starting a station' is ridiculous. It costs in the high six figures and is virtually unavailable in most areas. Also, would your request to "stop complaining" also apply to NPR stations and their displeasure with potential de-funding? C'mon Jeremy.... get real. Bill]

1239. Aspiring producer seeks advice

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:23:41 UTC
From: Jqpresc <jqpresc@nando.net>
Message-ID: <3if3bd$k7i@vixen.cso.uiuc.edu>
Source record: 34497

Hello all.

I'm looking for a little advice from all of you out there in the business. This is especially directed toward those of you who are either producers or hosts of radio shows, whether they be morning shows or talk radio shows.

If you are a producer for a show in a medium market (or larger), I am looking for a little career advice. This, I guess, consists of what skills are most important, what stones should I be looking under (i.e. who should I be talking to in addition to the regular "networking", how much previous experience is generally required, what should/can I be doing in the meantime, etc., etc., etc.

If you are a host, what qualities and skills are essential in a producer. Obviously this depends somewhat on the situation (show, host, format, etc), but I'm just looking for general advice.

Also, what is the typical day like in the life of a producer? How much of your day is spent in production, on the air, in meetings and on the phone? Again, this probably is contingent on the type of show and the station's format. However, I'm looking for any general or specific advice/situations anyone can offer.

Just a bit about my background to give you something to go on with your advice: I'm a recent college graduate (last May), with a degree in broadcasting from UNC-Chapel Hill. I worked for nearly 2 years during school at a local commercial news/talk radio station (WCHL-AM--Raleigh/Durham/Chapel Hill, NC market) in various roles: board operator, announcer, producer/production assistant for various programs (sports coverage, morning show, special events coverage) and have experience as a studio engineer/producer for the morning show as well as an afternoon talk show, drive-time news program and live coverage of sports events. I also have some experience as an on-site engineer/producer for remotes. I also acted as public affairs director at this station for about 3 months. I left this station 6 months ago (last August), and I'm in the process of beginning another broadcast job search.

I am particularly interested in morning show production in a medium market but advice on this or other types of show production is enthusiastically welcomed.

Any response can be posted here and/or emailed to jqpresc@nando.net

Thanks in advance for your help and advice,
Jonathan Prescott

: Lou Schneider
: KCBS/KRQR

According to this analogy, isn't the fact that your sister station KMOX (St. Louis) carries Rush Limbaugh evidence that it "shot itself in its foot?" How, and why, do they get away with it?

Why didn't CBS just buy another AM in St. Louis and put the syndicated shows on there? Or better yet, start a credible all-news station that St. Louisans might choose not to ignore?

Steve--this is one time I truly agree with you 101.1%. But you, as a very intelligent and knowledgeable individual, have to realize that
1) Joe McCoy and most other radio types aren't as creative as you;
2) Most of WCBS-FM's listeners have the IQs of cracked eggs (need I say more??)
I suspect that when the new ratings come out (end of March), Joe McCoy might not be smiling in his glasses; my guess is that 98.7 Kiss-FM (urban gold) will be #1 at least in 25-54 age group, maybe even 12 plus.
Keep in touch.
Andrea

I sort of remembered that he did, but wasn't sure. Well they can make it a
TRIBUTE weekend, can't they?

> Guess you could always rename it the Roger Craig or Felix Mantilla Weekend.

Or Rod Keneil or Jerry Koozman.

> And St. Louis or Philadelphia could always counter with a Bob Uecker
> Weekend. :-)

Oh, no! Uecker would come in for a 5 minute interview and hog the mike for
5 hours. He'd proably give up when they figured out that he would get
upset when questioned about Christopher Hewitt.

1245. C. Brennan on KMOX/StL

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:23:46 UTC
From: ajlee@husc.harvard.edu
Message-ID: <3if3bi$k7v@vixen.cso.uiuc.edu>
Source record: 34503

Hey all,
I had heard that Charles Brennan on KMOX in St. Louis was at one time on the air in Boston, does anyone know what station and during what time frame he was on? I remember that he joined KMOX for the 8-10 PM talk slot in the late '80s, perhaps '87-88, but where was he before that? Now he is heard in the mornings.
Just curious,
- jay

1246. Re: Imus and Leykis ratings?

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 10:23:47 UTC
From: chriscarm@aol.com
Message-ID: <3if3bj$k81@vixen.cso.uiuc.edu>
Source record: 34504

In San Diego, Tom Leykis is on two stations:

KMPC- LA from 3 p.m. to 7 p.m. [Live]
KSDO SD from 7 p.m. to 11 p.m. [taped delayed]

The last ratings I saw from KMPC is that they went from a null to a 1.8.
Considereing the competition from co-owned KABC and cross town KFI
plus KNX and KFWB, I would consider that a success in the LA market. I
have said that Tom Leykis will pull at least 3 in spring 1996 books.

KSDO's books have increased as well, but I don't know the exact numbers.
At night, KSDO is limited to San Diego metro because of a DA-II signal.

In a previous article in alt.rock-n-roll.oldies, (jay@rain.org) asked:

>Oldies jock the Real Don Steele has been playing this little ditty on L.A.
>radio for years, most recently on KRTH. Anyone have a clue as to the
>identity of Ms. Delgado?

That is a good question... that might get answered in
rec.radio.broadcasting.

I remember (and I may even have an aircheck) listening to Don Imus on
"w..N..bc" in 1976 while on a trip to NYC. This was in his cache of
drop-ins, too. Where did it originate?

From: leslie101@aol.com
Message-ID: <3if3bl$k86@vixen.cso.uiuc.edu>
Source record: 34506

DC101 in Washington carried the show for the first time this past Sun. night at 11P. Very eclectic music. Mostly mainstream "cutting edge" artists. Todd needs to loosen up and the edits make his interviews sound as canned as they come. Still a worthy idea and a compelling host.

Wonder who else is carrying the show and what formats the stations are because 101 is a "heritage rocker" adding newer rock to its base. Rundgren's show no doubt confused a few listeners when it began its first segment with one of the singers from Arrested Development. If more straight-ahead rock stations than AAA stations carry the show Todd may want to consider starting out with rock music and guests, then gradually slip the others into the mix!

Hi Kevin:

For my money, the best system to put in is Digidesign's Protools. You can get 8 tracks of it, including the cpu for around 12K. Outboard fx are a subjective thing, but I always like DBX squeezers...the 166 is a nice unit. I also like the Digitech TSR 24 processor and the Eventide H3000B. A Symmetrix 528 mic proc will round you out nicely too.

Lots of stations have had excellent results with the Orban workstation.

Its biggest drawing card for stations seems to be very high productivity -- it's both very fast for editing, and very easy to learn -- so more people get more spots out of it, compared to systems where you have to undergo a few days' training.

I have one here and love it because of its power, but I'm doing network promos and high-end agency spots.

Allied Broadcast has a couple of Orban workstations in road cases and will actually leave one in your station for a few days so you can try it out at your own pace. As far as I know, they're they only ones willing to leave a loaner unit behind after the salesman walks out. That's the only way to tell for sure whether something's going to be comfortable in your facility.

Other _really_important_ gear:

a good analog compressor/limiter. (I'm partial to the Orban 424, but you can't get them any more).

a good hi-quality multi-effects box. The Eventide H3000B is the standard -- and relatively cheap, now -- and their DSP4000 is an absolute killer.

a good outboard equalizer. Don't rely on digital workstation eq for everything -- there are a lot of things you want to do to a sound quickly and before digitizing, and DAWs are neither of the above.

a DAT recorder. You'd be surprised how many stations invest $multi in a digital production studio, and then master onto an old 5050.

1251. alt.fan.greaseman FAQ

Newsgroup: rec.radio.broadcasting
Date: 1995-02-22 20:55:33 UTC
From: jcastro@mason1.gmu.edu
Message-ID: <greaseman-faq_793486474@rtfm.mit.edu>
Source record: 34509
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man
Big Dick Brannigan-
the Grease tells about his flashback to his past
life as a private dick
Emperor Tocasfacius-
the Grease tells about his flashback to his past
life as a ruler of the Holy Roman Empire
Irving Greasemanawitz-
the Grease tells about his flashback to his past
life as the first Yiddish Lawman
Wheel Chair Warrior-
Super Hero fights for the rights of the handicapped
West Virginia- Greaseman shows his respect for the people of WVA
My Daddy- Description of how Oscar Greasemaneli gets into trouble
Ugly Women- Recounts of how The Grease and his daddy picked up
and enjoyed ingus with ugly women
Good Ship Grease-
stories about how the Grease spends his lesiure time
in his boat.
South of the border-
stories about how the Grease spent time in Mexico
Toe Monster- The dreaded Toe Monster is exposed for trying to
eat the Greaseman's toes
Blastapiece Theatre-
stories told by Sly Stalone
Sylvester Stalone sings the classics-
Sylvester Stalone sings the classics.
Rag Nad- stories about Grease's half space alien love child
Six Minute Workout-
A unique workout for men
Baby talk- Conversations with the unborn

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time
==== ======= ====
Washington DC 106.7 WJFK 1900-2300
Baltimore MD 1300 WJFK 1900-2300
New York NY 92.3 WXRK 1800-2200
Philadelphia PA 94.1 WYSP 1800-2200
Los Angeles CA 95.5 KLOS 2300-0000
Atlanta GA 92.9 WZGC 0600-1000

Q: I like what I have read so far, but the Greaseman is not currently in my city. Is there another way I can get hold of this zanyness?

A: Sure there is, there is currently a Greaseman Web server at http://absolut.gmu.edu/greaseman/ where you can listen to some of his bits.

1252. FAQ: Old Time Radio (OTR) Newsletter

Frequently Asked Questions (FAQ) File for OTR
The Old-Time Radio Newsletter
(FAQ Edited by Lou Genco (lgenco@crl.com))

Last Modified Sat 02-25-1995
---------------------

Copies of this FAQ are distributed monthly to rec.answers and other
newsgroups, and are on file at bloom-picayune.mit.edu in the file
/pub/usenet-by-group/news.answers/radio/old-time-faq. Updates may
occur more frequently than the normal distribution schedule. The most
current version is available by anonymous FTP from ftp.crl.com,
directory: users/ro/lgenco. See FAQ for more info on ftp and WWW
access.

---------------------

Table of contents:

Q1. What is "OTR"?
Q2. You haven't mentioned OTR music, why not?
Q3. Where can I buy recordings of old radio shows?
Q4. Which vendors have (lower prices) (higher quality) (faster
response)?
Q5. Are OTR shows rebroadcast? If so, where and when?
Q6. I remember a great show called (x). When was it aired?
Q7. Are there any books about OTR?
Q8. Does anybody trade tapes of OTR shows?
Q9. What's this stuff about Copyright?
Q10. How can I get my local radio station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
Q16. Is there a World Wide Web page (URL) or FTP address that I can
```

access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from the OTR WWW page or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is ongoing, and is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations and three satellite feeds rebroadcast OTR. Check my OTR WWW page or FTP site for current info. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville,

N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program database (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books
acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. We hope to get a database of private traders as well. Leave a note in the OTR newsletter if you want to trade, or send email to me if you

want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. A few copyrights have been renewed. Examples of the latter include The Shadow and some of Arch Oboler's productions.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing unit (DSP) between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping

Q12. Are there any OTR clubs near me?
A12. Check the two club listings in my WWW page, and leave a note in the OTR Newsletter asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the larger vendors / collectors may have this data. If you find such a publicly available source, we can make it available in the Internet OTR file repository.

Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou-pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman))

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?
A16. Yes, there are four WWW sites, as well as two anonymous FTP addresses and a Gopher. The four WWW sites are independent, and contain different information. The FTP directories each contain different files & information. My FTP site holds OTR station lists, catalogs / libraries, bibliography, the most recent FAQ, etc. The Airwaves FTP site holds archived copies of the OTR digests as well as other files relating to -Airwaves- and rec.radio.broadcasting. The Bellingham page is described elsewhere in this FAQ. Jim Widner's page has text, pictures and

sound clips.

If you learn of any other sites, I'd appreciate your informing me
via email!

For subscribers without normal FTP access, there is a
FTP-by-mail server that will automagically send you a copy of the
latest OTR FAQ. To receive a FAQ, send email in -exactly-
this format (the case of the file name IS important):
To: lgenco@crl.com
Subject: Request otr.faq
(the body of the message is ignored)

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above.

Q19. What is the best way to archive OTR programs?
A19. The most popular way seems to be reel-reel tapes, using each of the four tracks to record monophonically. Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake

the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?
A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono
newsgroup, created by Bill Robie. His FAQ may also be found at my
WWW site.

The WWW site, "The Bellingham Antique Radio Museum" is also
available through my WWW site, or directly via URL
http://www.pacificrim.net:80/~radio/. This site contains info and
GIFs on old radio hardware, as well as soundclips (.au files) of
OTR show intros. Well worth visiting!

(The Bellingham Antique Radio Museum is a private collection
gathered over the past 20 years by Jonathan Winter. The collection
is a historical journey through time; from the beginning of radio
to the early 1940's there are over one thousand radios to view,
and in some cases to play.)

Q22. What is the best radio / antenna to get distant OTR stations?
A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to
other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna
antenna advertised in several magazines, and the Grove Catalog.
The S-A-T seems to be rather directional, and may eliminate
off-axis interference. Ham Radio magazines sometimes carry
information about small loop antennas for AM DX-ing.

Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, drop me a stamped,
self-addressed envelope: Dan Hughes, P.O. Box 933,
Urbana IL 61801.

1256. RE: Top 40

Newsgroup: rec.radio.broadcasting
Date: 1995-02-26 08:03:21 UTC
From: George Achaves <gachaves@CapAccess.org>
Message-ID: <3ipck9$c0s@vixen.cso.uiuc.edu>
Source record: 34514

A number of posters have discussed "whither Top 40" these last few weeks, and it inspired me to reach for my trusty (and rusty) copy of "Rocking America" by the late Rick Sklar, who programmed WINS and WABC in the 60s and 70s. He discussed the early days of Top 40, and how they came to play the same 40 records over and over again. He quotes Todd Storz, owner of a chain of midwest stations, who noticed that patrons to his local bar would regularly play the same 40 songs over and over again all night. That'show they came to pick 40 as the number. He describes true Top 40 as mass appeal hit songs, without respect for typical musical classification. That's how one could hear Bob Dylan, Roger Miller, The Beatles, The Monkees, and even Paul Mauriat or Roger Williams all together on one radio station. The book's appendix lists "The songs that got the ratings," and it's an incredible variety of music that made up a common social heritage for people who grew up between 1957 and about 1980. It was radio with regard to age, race, sex, or economic class. Just the 40 most popular songs. How things have changed. I tend to agree that Top 40 does not exist not, nor has it since the fragmentation of formats divided the audience into neat target demographics. Each format has it's Top 40 approach (even Top 40 country, Top 40 classical, and yes, Top 40 talk). But few major players are truely willing to cross format boundaries yet to provide America with a single station that seeks to serve the varied taste of the American radio listener. Is there no audience for a station that programs hit music of all classifications and even gives you the latest world and national news in a consistant pattern? According to Professor Sklar, that's what Top 40 radio was. Rick Sklar's "Rocking America" was originally published in 1984 by St. Martin's Press.

I agree that that teens are a very powerful demo. Instead of talking about Top 40 radio being adult oriented, lets talk about ways to influence other people in the industry.

Also if a 16 year old is driving a car with the parents as passengers, what type of format is likely to be on the radio?

If the teen is at home doing homework or housework, what station would the teen be listening to? Keep in mind that parents will probably be hearing this station in the background, AND PARENTS ARE ADULTS.

The paragraph of mine that you quoted out of context was NOT referring to
the types of "modern rock" being played by the stations you describe.
Guitar-based rock is guitar-based rock, no matter who's doing it.
Deconstruct Stone Temple Pilots and Led Zeppelin and they come out much
the same.

How many times do the stations you reference play 777 (USA name for System
7), Sun Electric, Gipsy, Orbital, etc. etc.??
THAT is the music I am saying is not "ready for prime time" yet.
It's getting better--more musical, less self-indulgent.

Good heavens, considering the amount of material I've written about the
LACK of a "modern rock" format in Kansas City until 1995, I am amazed
that you could leap to the conclusion that you did about what I was saying.

Hmmm...have you ever considered a career as a talk-show host? :-)
>
> Modern Rock, alternative, new rock, whatever you want to call it is HERE
> and will be for some time to come. Get used to it!

But how ALTERNATIVE is it? Will it go the path of 70s progressive rock
that turned into 80s album rock and a 90s dinosaur?

Hey Hey.... I'm Back :) <evil grin>

Briefly, since it's 3 AM. Classic rock WNCX/98.l5 and modern rock WENZ 107.9 have entered an LMA... (I believe that's the correct term... they're sharing sales staff and consultants now) WENZ has moved from its original digs at 1510 Euclid Avenue across from the Palace Theatre and Cleveland State University, but remains at Playhouse Square. They now share space with WNCX at the Halle Building, a few blocks west at 1041 Huron Road.

They also, for the first time in the two and a half years since they went modern, now have a toll-free studio line. 1-800-440-1079, in addition to the local 216-578-1079.

1262. Byron and the Hall of Fame

Newsgroup: rec.radio.broadcasting
Date: 1995-02-26 08:03:40 UTC
From: scottw@jax.jaxnet.com
Message-ID: <3ipcks$c3p@vixen.cso.uiuc.edu>
Source record: 34520

My buddy, and "Radio's Best Friend" Art Vuolo, Jr. sent me a fax today with the list of nominees for induction into the Radio Hall of Fame. There are several categories with a list of candidates well known to many of us: Contemporary Netowrk or Syndicated Personalities (Nominees: Jack Buck, Rick Dees, Karl Haas, Susan Stamberg, and Bruce Williams), Pioneers (Eddie Cantor, William Conrad, Bing Crosby, Stan Freberg and Wolfman Jack), and Regional or Local Personalities (Jim Dunbar, Hordon Hinkley, Bob Steele, Jerry Williams and Byron MacGregor).

A number of us who grew up listening to CKLW are encouraging those who vote to support Byron's nomination in the Regional or Local Personality category. Knowing the reputations of the other candidates, for many the choice will be a hard one. But Byron's stature as a pioneer in "rock and roll journalism" at the Big 8, his legendary recording of Gordon Sinclair's essay "The Americans", and his untimely passing this year, make the time right for his recognition among the elite who are inducted into the Hall.

Having been out of the mainstream of radio broadcasting for over a decade, I'm unlikley to get the chance to fill out a ballot. But Art and I wanted to share our opinions with the gang here in the newsgroup with a soft encouragement for those of you who may be able to vote to consider support for Byron.

Best regards,

Scott Westerman

In article <3ill5i$4ou@mango.aloha.com> "Robert W. Zix" <kong@island-tele.com> writes:

>If you've even been to Osaka, you've probably heard FM802. I'd like to
>read your thoughts and/or opinions about this station.

>Thoughts about J-WAVE in Tokyo would also be appreciated.

I hate so-called "bilingual DJs". It is pointless to use English
when they play Japanese music for Japanese audience. FM 802, if my
memory serves right, makes time announcements of time "jihou" in
English, saying "Time is now 7 o'clock", instead of "7 ji desu".
So stupid.

I remember Al Jazzbo Collins during the late 60's. He was on a Los Angeles AM station. One would call in and talk to Al and He would ask the person if he wanted to become a "Majuber" (sp?). If the answer was yes then he would say to raise your right hand and say "I don't have to wear no stinkin badges" And you had to say it with the right accent (as in Treasure of the Sierra Madre (Bogart)) or he would make you say it over and over until he approved. What a guy - 1 of a kind !

I became a "Majuber" around 1968 and some where I have the sticker that he sent out to prove it !

I would love to get that album of his or any other information..

best Regards,

Mike Ferraro, Montecito CA

1267. KCFX owner buys KKCJ; format to change

Newsgroup: rec.radio.broadcasting
Date: 1995-02-26 08:03:58 UTC
From: transvox@interstate.net
Message-ID: <3ipcle$c64@vixen.cso.uiuc.edu>
Source record: 34525

Written February 25, 1995

After weeks of speculation involving most of the broadcasting chains doing business in Kansas City, soon-to-be LMA orphan KKCJ(FM) will be going to Heritage Media, owner of KCFX(FM).

According to an article in the Kansas City Star, no purchase price was disclosed. An article speculating on the purchase in last week's Kansas City Business Journal estimated the purchase price at more than four million dollars.

The sale was announced Thursday (Feb. 23). KCFX general manager Bill Newman told the Star that Heritage will take over the lease on the station "starting around the middle of March."

KKCJ went into play after Sconnix Broadcasting, which leased the "hot country" station to complement market FM country leader KFKF, entered into an agreement to lease KBEQ-AM/FM.

The leasing agreement also involves a one-year option for the new owners of KBEQ-AM/FM, EZ Communications, to buy KFKF. During that year, Sconnix will operate the KBEQ combo.

The terms of Sconnix's lease on KKCJ include a provision preventing any subsequent operator of the station from programming a country format. No programming plans for KKCJ were disclosed. KKCJ is one of five country stations in the Kansas City market, and the lowest-rated FM country station.

KCFX is a 70s classic rock station that refocused its format away from 70s and 80s classic rock on Christmas Eve (1994). KCFX is also the flagship station for broadcasts of Kansas City Chiefs football games.

Some published speculation has centered on an alternative format for KKCJ. However, the market is now served by modern hit station KISF, and a fringe modern rock signal is available from KLZR(FM) in Lawrence, Kansas. In addition, indications point to another modern-rock attempt in the Lawrence market with the impending reactivation of KZTO(FM) at 95.7.

Other unserved format niches in the Kansas City market include adult album alternative (AAA) and smooth jazz. An attempt at an urban-oriented format is unlikely, given the tremendous amount of audience loyalty toward locally-owned KPRS(FM).

KYSR 98.7 (Hot AC) 2.6 2.4
KTWV 94.7 (NAC) 2.5 2.3
KXEZ 100.3 (AC/EZ) 1.9 2.2
KLSX 97.1 (CR) 2.4 2.1

12+ AM Drive

Station/Talent Share
KLVE 107.5(Pepe Baretto) 5.0
KFI 640(Bill Handel/Rush Limbaugh) 4.8
KPWR 105.9 (The Baka Boyz) 4.7
KABC 790 (Ken & Barkley) 4.7
KIIS-FM 102.7 (Rick Dees) 4.3
KROQ 106.7 (Kevin & Bean) 4.3
KLAX 97.9 (Juan Carlos Hidalgo) 4.2
KLOS 95.5 (Mark & Brian) 4.1
KLSX 97.1 (Howard Stern) 3.7
KKBT 92.3 (John London) 3.7
KFWB 980 (Brailer/Ford/Avey(News)) 3.7
KNX 1070 (Sirmons/Haule(News)) 3.5
KOST 103.5 (Mark & Kim) 3.3

KRTH 101.1 (Robert W. Morgan) 3.3
KBIG 104.3 (Bill & Sylvia) 3.0
KZLA 93.9 (Garabo & Murphy) 2.7
KKHJ 930 (?/Spanish) 2.6
KCBS 93.1 (Gary Moore) 2.2
KTNQ 1020 (?/Spanish) 2.1
KYSR 98.7 (Jim & Melissa Sharpe) 2.0

OBSERVATIONS:
The biggest would have to be the rise of Spanish KLVE (107.5) and the plummet of former market leader Spanish KLAX (97.9).

"What happened to Howard?" Howard Stern saw an unprecedented drop in this trend, falling to a tie for 9th in the market. Howard was beaten by such foes as Rick Dees & Mark & Brian, and was one of the reasons for the drop of KLSX (97.1)..

1270. re: should we lie to our listeners?

In my hometown of Athens, Georgia, I started up a lovelines/dedications party about two years ago. The PD gave me the go ahead to play my own stuff, but limit the dedications. I came up with a loose list (working from a category shell - heavy on golds) but was flexible in changing them to fit requests. What I found over about a year was that the requests that were coming were all the same and were all currents or recurrents (i.e. I will always love you, Everything I do, Freak Me, etc.)
The rest of the week, however, jocks were absolutely lambasted for breaking the format at all. no requests permitted, although management encouraged us to say so. Interesting nonetheless -

: WDRE Garden City, NY is a flagship of what it calls the "Underground
: Network" or "UN" for short. Modern rock, with some modern rock
: oldies thrown in. In promos for this, they said "Many alternative
: stations think that, you, the listeners can't hack a large playlist.
: We know better.". I've listened to it, sounds good. Good satellite
: radio, also good non-satellite radio.

Unless things have changed drastically over the last few months,
the last I heard, WDRE was playing the standard "modern rock"
play-list, which I wouldn't say is that large-30 to 40 songs in
heavy rotation. Perhaps I'm just spoiled by having a local station
with a much larger playlist.

There are a slew of commercial stations popping up
which have a huge playlist and are actually a real alternative.
E.g.: WBAC, Albuquerque (last I heard them a year or so
ago), North Shore radio (someone help me out I forget the
call and freq.) in Rochester, NY, and WRNR(103.1), Annapolis,MD.
I'm sure there are more. These are the few I've stumbled across in my travels.
Anyone know of others?

Of course, the buzz in the EE trade journals is direct satellite
delivery of radio. I suspect that within 10 years the big guys
will be on the satellites. Hopefully that will leave FM stations being
locally owned and less "formatted". What do you think?

1272. Twin Cities Public vs Commercial Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-02-26 08:04:14 UTC
From: MHz@bitstream.mpls.mn.us
Message-ID: <3ipclu$c8p@vixen.cso.uiuc.edu>
Source record: 34530

From a previous post...

>With the exception of...our local public radio stations are playing
>commercially available Classical music. I view this as a waste of federal
>funding that would be better off spent somewhere else.

I'm glad you brought this up. I've thought about the concept of public radio's role with regard to "filling commercial holes" because, until just over a year ago, Minneapolis/St. Paul (market #16!!!) had no commercial stations with these established (and generally major) formats:

jazz
urban
news (in the "give us 22 minutes and we'll give you the world" style)
classical
modern rock
AAA/NAC

Now, am I to believe that it's ok for a noncommercial to program a format until a commercial entity decides to do it? That then the nce should drop it and move on to something else? Are nce's prohibited (not formally, of course) from doing programming that conventional thinking considers "commercial" (see examples above)? Or that it's ok to do it if no commercial outlet in the market ever does it? Is public radio relegated to the "Hmong Feminist Polka Hour" and such?

However, until just over a year ago, 5 of the 6 formats I listed were available from noncommercials!

Even as I write this, 4 of the 6 formats are still unavailable *commercially,* in Minneapolis, yet *are* offered on a *full-time basis* by *noncommercials*.

In this market (under-radioed by most accounts) noncommercials are filling sizable holes that commercial radio has ignored. Yet they are not going the traditional "public radio" route. Is that wrong? Remember that we have 4 country signals (K102/WBOB/KJJO-F/A...7 if you include rimshotters 98.1, 106 & 107) and 4 modern rockers (the REV combocast/Edge/Radio K) [and 2 religious on the commercial FM band, for good measure]. Even noncommercials overdo things; did I mention that we have TWO fulltime classical noncomm's? Further, we have 5 wasted AM bombardments in the form of simulcasts (690/900/950/980/1440). So, under-radioed or not, facilities are available for some other things. Let me say that I'd like to see well-programmed commercials do a few of these formats; better signals, better promotion, better talent & programming would increase audience from existing, respectable bases.

Everyone complains about radio in their area because familiarity breeds contempt (and often it just plain sucks), but here in market 16, commercial radio is really dismal. Noncommercial radio in MSP plays a big role in providing a U.S RDA well-balanced programming diet.

Hey guys...If you made your systems so as to include the top three used algorithms, so that box "A" could talk to box "B", you would all be VERY rich. Here's my idea.. we lock you all into a room and don't let you out until you come up with a satisfactory agreement. That agreement would also include the added feature of having an rj11 jack on your box so that a regular telephone could make a regular phone call on the line.

When you get around to it let me know and I'll write a big fat article about it in Radio World.

>
I have really had it up to here with the repeated and stupid lie that there is a "bias" in the output of PBS/NPR. Repeatedly in this forum and others lists of commentators, hosts and other participants on PBS/NPR programs have shown that the ideological gamut is properly run.

I think Pat Buchanan and his ilk are right down there with pond scum. But I think PBS/NPR has an obligation to make sure that the views of all ideologically notorious persons are heard--and they do.

What the present generation of ersatz conservatives really dislike is ANY airing of views with which they disagree--even in the balanced fora which PBS/NPR almost universally provide.

Part of the prolem is that the collection of prejudices that is now mistakenly called a "conservative" view implicitly includes the tenet that criticism of the powerful is subversive and thus--in this twisted version of reality--"liberal."

In fact, the constant exposure of the powerful to criticism, as codified in the Bill of Rights, is what the founders intended.

THIS is the supremely and legitimately conservative American position.

I really am enjoying the news items and reports. As a Canadaian radio listerner I have heared all the best. The legends of Top 40 radio! WGAR 1220 Celevand when they were ac. WLS, remember Uncle lar and Little Tommy! Maybe the mot copied station format at KHJ AM L.A. With Robert W Morgan! KHJ (RKO Radio) which owned at one time CKLW formated 20-20 news.

WNBC and WABC in their top fourty days. Here in the Toronto market we saw upstart CFTR take on and beat Legend Top 40 CHUM in the ratings at the end of the 80's. CFTR is all news now while CHUM is now Oldies, talk. Keep up the good ratings and thanks for making my day a little brighter! As it was written in the Toronto Sun a few days ago. Top 40 memories are alive on the internet.

Message-ID: <3ipcma$c9q@vixen.cso.uiuc.edu>
Source record: 34535

I'm the executive producer and host of "STRAIGHT TALK--Recovery Radio for the Northwest," which is on-the-air 5 nights a week, M-F / 10PM til Midnight. The show deals exclusively with issues surrounding addiction, from alcohol and other drugs to sex amd gambling. We've been on for nearly four years. Our 1,000 show is coming up 3/17.

The show is produced by a non-profit group (National Foundation for Alcoholism and Addiction Communications), and although the time is donated, the show is advertiser driven, and has been very successful. Lots of great guests, including recovering celebrities, sports figures, authors, treatment professionals, etc. The second hour usually includes a 12 Step gues in recovery (first names only).

We have rotating hosts/co-hosts. I do the show two or three times a week, depending on when the Seattle Supersonics, and/or Mariners play at home. I cover all local Seattle pro teams for Prime Sports Radio and ESPN Radio, and other networks/stations.

With our 4th anniversary coming up May 20th, I'm convinced that it's a natural for syndication. My questions are many. How do you go about getting time on the bird? Should I shop it to a programing service that syndicates other radio programs? How does that work, cost/revenue-wise? How expensive is uplink equipment? etc.

Any help would be greatly appreciated. We have an internet address and get mail regulalry from listeners!

Since this question has come up about open reel decks... I have one to add myself....

I am looking for a couple (well ONE anyway) of good quality machines, (preferabbly used of course) that allow me to callibrate to the brand of tape I am using, without having to tear off the back cover to access the controls.

I know Otari's 5050's have that capability... but alas I have no desire to spend 4 grand on new 5050's...

I have an Ampex ATR-700.... but I am still not confident that I have it correctly calibrated... Heck how DO you calibrate this machine..?

It has to be taken apart and laid flat on it's back... that's too hard for me, I need something easier...

if you have any suggestions, please leave e-mail.

thanks
R. Bass

It is against FCC regulations to advertise casino gambling on radio or TV.
If you watch/listen to the casino ads, they never mention the gambling.
The food, the atmosphere, the entertainment, sure. But not the gambling.

>acquire a guide to Great Britain's broadcasting companies, and apply for a
>job there?

Well, we don't have a lot of American broadcasters but Paul Gambaccini does stuff over here (at least, he certainly used to), and the Canadian chappie David Jensen is on London's top commercial station. I'm sure we've got others but I can't think of any more off the top of my head.

For a list of UK commercial broadcasters, try phoning the Radio Authority and if you send them enough postage they'll probably send you a copy of their 1994 (latest revision) handbook which lists all the current stations. Their number is +44 171 430 2724.

You can also subscribe to the UK "Radio Magazine", which is a rather tacky weekly magazine which has all the industry gossip, news and (importantly) job openings. It's a bit pricey, especially overseas but that reflects its rather limited circulation. Their number is +44 1536 418558.

Hope this is helpful,
Dave

I, too, ran into to this question and have yet to find an answer.

I wanted to start an on-line CD reviewing site on the net. I wanted to give a textural review of new releases and 'non-commercial' artists. As well as the text review, I wanted to offer some short sound bites (or is that bytes) of a few songs from the reviewed CD to go with the review in question. I also thought it would be good if could display the cover art of the CD in question (for the graphically minded net surfer and for those of us who shop used CD stores that don't know how to alphabetize).

I ran the idea past a few net guru types I know, and they thought it had potential. So, I ran it past an MIS friend of mine at MoTown and he said that I'd probably have trouble getting releases for the cover art, but I could probably get clearing for the songs through ASCAP or BMI. Plus, if I wanted to sell the CDs I was reviewing there would be big problems because the labels are afraid of piracy, etc, etc, etc. (to be honest, I hadn't thought of that, but when he mentioned it I thought "hey! maybe I could make money, too (?)")

So I tried ASCAP, thinking either they or BMI could tell me how to 'be legal' about it. I called ASCAP and they had a hard time pigeonholeing (sp?) what type of licensing would be involved. After playing phone tag for a couple of weeks, with each contact saying it

was someone else's problem, I was finally told that their legal counsel would 'be in touch' to discuss it.

That was about two months ago. Not a peep.

If you, or anyone else out there has better luck, let me know.

Marty

The NCAA LACROSSE RADIO NETWORK will present the NCAA Lacrosse Championships from Byrd Stadium, at the University of Maryland, May 27 - 29, 1995. This is the culmination of the Collegiate Lacrosse Season, with the best Lacrosse teams competing for the title, at both the Division I and Division III levels. This year marks the 25th Anniversary of the Tourney, and will add special events addition to the exciting contests. Last Year, an NCAA record crowd for ANY championship contest, including the NCAA Division I Basketball Championship, saw Princeton defeat Virginia in an exciting contest. Lacrosse is gaining in popularity, and is spreading outside the traditional East Coast Boundaries. The added interest in the professional sport and added TV coverage has increased interest at all levels.

The NCAA LACROSSE RADIO NETWORK is offering this broadcast to ALL STATIONS carrying the feed on a live or taped basis. The broadcast is formatted for commercials or local underwriting announcements to be inserted throughout. It is available to both COMMERCIAL and NON-COMMERCIAL stations. We will also have end of half and end of game summaries for your newscasts or for stations that want these summaries, and the games may be excerpted.

The games will be uplinked to stations via satellite or a phone feed will available. In addition, it may be possible to get the feed from another station in your market.

There is no cost for non-commercial stations. Commercial stations will have a VERY low cost for the games, as mandated by the NCAA.

We are asking stations that may be interested to please get in touch with us soon. On a separate note, we would like to inquire of any commercial interest in your market. If your area has an interest in high school, college, or MILL lacrosse, this broadcast will appeal to your area.

Here are the broadcasts All times are EDT.

Saturday May 27 1995

1145AM NCAA SEMI FINAL GAME, Division I

Pregame at 1145

245PM NCAA SEMI FINAL GAME, Division I
Time App. 45 minutes after first game

Sunday May 28, 1995
145PM NCAA FINAL GAME Division III

Monday May 29, 1995
1045AM NCAA FINAL GAME Division I

We MUST have official Notification of any excerpts, broadcast or use for the NCAA, PRIOR TO ANY Broadcast! If you are thinking of any use of the broadcasts, excerpts, or reports, please contact us so we have you on record with the NCAA.

Please indicate as soon as possible your desire to air this program send,fax or Email to:

fireweed@alaska.net (Jeremy D. Lansman) writes:

:I got KYES, a TV station, on the air for less than $100,000. Radio cost
a lot
:less. I remember some things that might amaze you!

That might work in Anchorage, but not in the lower 48! I showed your post to a friend of mine who after court fights, dealing with the F.A.A. and the F.C.C., is still trying to get his station up and running. And this doesn't include the cost of equipment, land, tower site, and the tower itself, since it is in a rural area. This is just the cost of the legal haggling because there were four other applicants for that particular FM construction permit. His question to me was "Is this guy smoking his front lawn?" Obviously so.

:A friend of mine, a radio engineer, liked to pirate broadcast, because,
he
:said, it was a "great way to meet women". I suggested he might consider

:filling out a form 340, and get legal. He did. The station is now
KAZU-(FM),
:in the Monterey Bay area. I believe, it started as a used exciter,
:scrap antenna, mixer and turntable. It has grown since.

A bit different in the Non-Comm. end of the band (90.3). Had that been between 92.1 and 107.9 Mhz, he wouldn't have stood a chance of doing that. The same with KKUP (91.5).

:KSHE, Crestwood (St. Louis), Mo., was started by a couple who had the
:station in the basement of their home. Mom and Pop did most of the air
:shifts.

You failed to mention that this was in 1961, when few people knew or cared about FM. Would they be able to do this in the commercial part of the FM band today? NO!

:Come to think of it, if Bill and Sonia Florian still own WNIB , Chicago,
ask
:them how much they spent to get on the air. Although commercial, I
remember when most of their revenue came from hawking program guides.
:Yep, they started in FM when FM was new. Now it would be hard to cram a
:new station into Chicago.

Once again, that was in 1955. This is 1995! Try do duplicate that! It seems that you are not living in today's reality. You can't do what you could 40 years ago.

:So what. Move. I have channel 5 in Anchorage becasue channel
:5 in New York was already taken!

You couldn't get channel 5 in New York even if it wasn't! You are comparing apples to snowballs. It sounds as if your idea is to move to a remote area just so you can put up an antenna and "play radio." Maybe the Canadian Government will sell you a piece of property near Snow Lake, Manitoba, so you can grow reindeer and have a one-lung station.

:Thus, if the ownership cap in the US goes much higher, I'm sure the
:Moderator will be right. Ordinary people won't have a chance to own a station. Then, indeed, I'll have to "get real".

Always a possibility! But seriously, "Ordinary People" don't have much of a chance to own stations as it is. Except in small town areas where it's nearly impossible to operate one financially. The only way some could do it would be to run an automation system or have a sattelite operation for programming, and then you are back to the complaint of no local programming.

BTW, in response to the Moderator's comment about funding of the VOA or Radio or TV Marti, I personally feel that the time has come to de-fund that as well. It served it's purpose, and with the fall of Communisim everywhere except in China, Cuba, and the halls of the Democratic Party, the money could be used elsewhere, like going towards paying off the National Debt.
(Just trying to kill two birds with one post) :-)

1288. Past Lives of Radio Studios

Newsgroup: rec.radio.broadcasting
Date: 1995-02-26 08:04:48 UTC
From: mhtv3@aztec.inre.asu.edu
Message-ID: <3ipcn0$cas@vixen.cso.uiuc.edu>
Source record: 34546

In a recent Phoenix Radiowatchers, I reported on the growing trend away from buildings constructed as radio stations to new facilities(usually in office buildings).
I thought it might be fun to start a thread on stations that converted unusual or historically significant buildings for their use. Some examples:

* The KHJ-Los Angeles studios at 5515 Melrose. This was the Capitol records recording studio during the 1940's and early '50's(until the opening of the Capitol Tower on Vine).Most of the really great Sinatra sides were done here. It is now administrative offices for Disney-owned KCAL-TV(formerly KHJ-TV). The old KHJ-FM(now KRTH)is at the AM transmitter site on Venice Blvd(does anyone know if that was in fact the original (1928) KHJ-AM studio?). Real trivia...KCAL-TV's staff is so much bigger than KHJ-TV's that it had to build a newsroom on a soundstage on the neighboring Paramount Pictures lot. That soundstage was Desilu back in the 50's and 60's.

* The KMPC-Los Angeles studios at 5858 Sunset. This was the original Warner Brothers lot, before WB moved to Burbank in the 40's. Paramount acquired it and built KTLA-TV(channel 5) there. When Gene Autry bought KTLA in the early 60's, he undertook a huge renovation of the soundstage on the northwestern edge of the property...where Al Jolson's "The Jazz Singer" was filmed. It took years(and probably millions) , but in 1968 KMPC moved there from its tiny(was this the original, too?) digs further east and across the street on Sunset(this survived a 1972 fire and is now KWHY-TV(channel 22). KMPC moved to the new KABC/KLOS studios on LaCienega last year when CapCities bought it from Autry. Does anyone (Lance B. perhaps) know what will become of the big white mansion on Sunset?

* The KGBS(and later KTNQ)-Los Angeles studios on Western. A converted mortuary. Honest. KTNQ moved out prior to its switch to Spanish in the late 70's.

* And the one that is probably the reason I find this stuff fascinating to begin with. KCBS-TV in LA took over the adjoining Bank of America branch on the corner of Sunset and Gower...keeping the building...just knocking out a wall and putting the news studio on the bank floor. The floor where my mom worked as a teller until the week I was born...waiting on CBS radio personalites like Arthur Godfrey and Tennessee Ernie Ford.

There's only one that I can think of here in Phoenix:

* The old KOOL-AM-FM-TV combo was in a converted Cadillac showroom in downtown Phoenix. The TV station(now KSAZ Channel 10, FOX)is still there. It's been about 10 years since I was inside, but the news studio is

the old showroom floor...and looks it...the anchor offices are the
old car salesman offices just off the showroom floor. All the techincal
stuff is across the alley...in what used to be the service department.

How about your market? Any interesting conversions to studio space?

From: TRRadio@aol.com
Message-ID: <3ipcn3$cau@vixen.cso.uiuc.edu>
Source record: 34547

The first Winter book trends are in and it's a big ratings smooch for KISS-FM. WRKS' 'Smooth R & B & Classic Soul' jumped up to #1 less than a month after the format change. Here's the rundown:
1) WRKS (5.2 up from 3.8)
2) WQHT/Hot 97
3) WCBS-FM
4) WHTZ/Z-100
5) WSKQ
6) WABC
7) WLTW
8) WQCD
9) WPLJ
10) WINS/WCBS-AM (tied)

Emmis' two stations rank 1-2.
While this is only the first trend of the winter, KISS-FM has a right to be happy with it's accomplishments. Also, it moved to #2 25-54 behind WCBS-FM. One other note--WYNY moved up from 2.1 to 3.0 in adults 25-54.

WAXQ welcomes Ron Valleri as PD from WAAF in Worcester, Mass. Speaking of the Hard Rocker, their edited version of Tool's "Bottom" will be released on an EP. Music Director Vinny Marino edited the 7+ minute cut down to 5:50, editing out the dirty words in the process.

Hot 97's MD Tracy Cloherty adds APD stripes to her uniform.

WPLJ's Al Bandiero moves into the weeknight 8p-12mid slot, replacing AJ Hammer. Bandiero will continue his Saturday Night 70's show.

Z-100's 7-10p guy Chio is leaving the station to go to Philly. Ops Director Steve Kingston is quoted in the NY Daily News as saying they might hold open auditions for the slot.

Jerry Crowley is named GSM at WOR.

Th-Th-That's all, folks--

But you can certainly lease airtime or set up an LMA. I was in the process of trying to do this with one of the Tijuana (San Diego) stations when the owner hit a mountain with his airplane.

Part of the original business plan had allocations for the relatives, who got upper management titles but were essentially paid to stay _away_ from the station. Other allocations included creative 'donations' to certain officials to make sure that the paperwork went through in a reasonably quick manner with the powers that be.

All in all, the per-month amount they wanted to lease the station wasn't too bad. Including the amortization amount involved in doing xmitter, studio and link upgrades, it looked like we could easily make money on the deal. Unfortunately, when the original owner passed on, it turned into an annoying battle of sons and in-laws, and ended there.

The Radio Authority published its Complaints Bulletin for the fourth quarter of 1994. 76 programming and advertising topics gave rise to written complaints. The Authority upheld 15 programming and 12 advertising complaints. If a complaint is upheld the Authority can request a broadcast apology or correction. It can impose a penalty which can include a fine or shortening or revocation of a licence.

One advertising topic attracted complaints from eleven listeners who thought that an advertisement for liquer chocolates was in poor taste to portray a person being shot and 'put in a box'.

IM>I wonder if Satellite DAB will bring us the return of GIANT stations kinda
IM>like WLS, WABC, WCFL, were in the 60's and early 70's.

IM>Those stations ran mostly network spots at night when they were covering
IM>huge areas of the country.

Mark,
Those stations ran network spots at night because the daytime
inventory was too valuable to give to a network. Network compensation is
far lower than local rates. In networking we call that "ghettoizing."
The network spots are supposed to run throughout the day, not in the
nighttime ghetto where the time is less valuable. Even with the added
coverage at night it doesn't come close to a daytime New York or Chicago
audience.

IM>Could there be an MTV radio type of thing? Could this take "radio" to a
IM>new higher level, beyond the current "cut the costs and LMA another
IM>facility" mentality.

Actually, it'll be another factor that will force cost cutting on
the station level by adding yet another competitor. Currently, MTV is
little more than a video jukebox. Most good radio stations are far more
interesting than MTV in their audio. I would see an "MTV Radio" as a
giant step backward. Without the video, MTV is very dull stuff.

I've never heard of a cart recorder without a stop signal(1 kHz, usually for one second). There would be no other way for the cart to cue to the beginning of the audio without a stop signal. It sounds like the tone generator in the recorder has stopped working.

If carts recorded elsewhere stop at the beginning of the audio, then the tone detector on the playback side is working.

What kind of cart recorder is it?

1298. Re: Cart stop signals

Source record: 34406

NAB defines several tones for tape cartridges. The "stop tone"
is 1 KHz for about 500 mS. The tape stops immediately on detecting the
tone, so when the tape is started again the tone detector has to be
disabled for a second or so.
The EOM tone is 150 Hz. The duration varies. The beginning of
the tone starts the next source while the end of the tone drops the audio
on this source and, on some machines, puts the cart machine into fast
forward, speeding up the cue. Such machines either switch to a wideband
cue detector or have a bandpass detector that increases frequency with
the motor speed as the cart speeds up.
The tertiary cue is 8 KHz. Again, the duration varies. It is
typically used to advance slides in a TV station.
Finally, 3.3 to 3.7 KHz is reserved for logging signals. These
typically use on-off keying or frequency shift keying with ASCII signals
to print a program log as to what aired. The duration varies depending
on how much data is present. The system we manufactured 15 years ago
used 300 bps ascii with frequency shift keying. The carrier was brought
up 500 mS after the cart started, which placed it immediately after the
start (or stop) tone. The carrier was keyed starting 1 second after it
was brought up. The 1 second delay allowed the logging decoder to detect
the tone, send a carriage return, line feed and the current time to the
printer. The demodulated data was then sent to the printer.
I haven't thought about this stuff in quite a while! I just saw
some of our old logging equipment advertised in the used equipment
listings in the latest Radio World.

|:
|: I know Otari's 5050's have that capability... but alas I have no desire to
|: spend 4 grand on new 5050's...

Contact any of the good used-equipment dealers (particularly Boynton, but also Allied Broadcast and some others) and get yourself a used MCI JH-110 or Ampex 440 or Otari MTR-10.

All of these are heavy-duty, rugged decks with much better transports and electronics than the 5050... plus easy calibration... plus the availability of plenty of service manuals.

OTOH they're larger, heavier, and consume more AC than a 5050.

You can get a machine in decent condition for about a grand.

I cast my vote for Digidesign. Had it 2 years, it's never crashed <except when I confused it..."save" your edits right after you do them>. It's fast, I learned it ina weekend. Drawbacks: spring for a larger screen. They're the biggest, and the support help is good. ProTools III is now out and it looks fabulous! Plug-in DSP cards are available from several companies to take the place of outboard boxes.
For the money, it is still the best buy. Orban does a good job...but 35K? For that kind of $$ you can get ProTools III, a Quadra <with larger screen>, mikes/processors, DAT, Magneto-Optical backup... an entire room, and still have a bunch left over.

I had been wondering why I hadn't seen or heard much of Kenny Everett
for quite a while until I recently read a report which related that
Kenny has admitted that as time runs out in his battle with AIDS he is
haunted by the prospects of dying with no money. He was diagnosed HIV
positive six years ago and has gone from being employed by London's
Capital Radio for UKP 120,000 a year to surviving on a small pension.
He seems particularly agrieved that his medical insurers refuse to pay
out for anything that arises from being HIV.

Richard Park, Head of Music at Capital, is reported to have said, "If
he is in trouble we will rally around and help."

Another sad loss to the airwaves. He is one of few modern radio / TV
comedians who regularly had me rolling on the floor with uncontrollable
laughter with his irreverent, larger than life characters.
To quote one of his best know catch phrases, 'all in the best possible taste'.

1307. Get *One* Newspaper Editor... a Challenge

Newsgroup: rec.radio.broadcasting
Date: 1995-02-28 03:13:07 UTC
From: billp@kaiwan.com
Message-ID: <3iu4c3$o5q@vixen.cso.uiuc.edu>
Source record: 34415
Cross-posted to: alt.radio.networks.npr,rec.radio.broadcasting

I offer a challenge to all who have strong views on whether or not the government should fund public media as they do through the Corporation for Public Broadcasting:

Get one newspaper editor to ask his staff and news providers to bring in more news about the debates which are now going on about this subject. Ask for more coverage of both day by day events and background pieces.

Why the challenge?:

-You and I are free to debate this issue here on the net. Many of "us" are reasonably well informed as to the issues, the status of the debate, the players, and their positions. We are the lucky ones!

-The larger public doesn't know these things and, by virtue of ignorance, is unable to participate.

-Newspapers are the only medium available to almost all the electorate irrespective of geographic location or financial circumstance which may feel they have space available for additional coverage of this or any topic.

-Newspaper editors and publishers are the only individuals whose daily choices could work to add people to those we count as "an informed electorate."

-There must be understanding and participation in the debate by more than us with internet access or who receive special-interest malings and faxes.

-The need is now! It is today! In another days we may not have the means to preserve democracy.

II>Management was generous enough, due to my longevity at the
II>station, to sit down with me a few days later and offer me an opportunity
II>to have my position back if I conceded to run "Family Matters"
II>without the disclaimer. I refused. In fact, I suggested that it had
II>become a religious issue with me. I suggested that someone else,
II>perhaps someone in management, tape a disclaimer that I could use so
II>my voice wasn't associated with it, then sandwich it in-between a
II>PSA-the feature-and music so that my voice wasn't even a part of
II>the stop-set. Management refused and I gave up my shifts.

Ira,
First, you're correct. Your actions were a fireable offense. Until your name is on the station's license, you'll have to obey the management's orders.

I respect your convictions, but I always wonder who loses in situations like this. Outside the station you now have no influence and you've lost something you obviously loved doing.

I run a Talk Radio network. Every day there are opinions expressed on my air with which I violently disagree. However, if I forced my opinions, because of religious beliefs, on my hosts I'd have some very dull programming.

Is there a Jewish feature the station might run that could add a different perspective? Judaism, as I understand it, is very different
>from Christian Fundamentalism in that Judaism doesn't prosletize (sp?) where Fundamentalism's goal is to convert those who don't believe in their form of religion.

It's a little like whites moving out of neighborhoods when a black family moves in. They complain that it's turning black, not realizing that they made it happen by moving out. Had they stayed, it would be a mixed neighborhood. You, as a Jew have "moved out" of the station to make room for more Christian Fundamentalism. You have no voice in the process.

If you had stayed and offered the management an ongoing Jewish perspective he might be more sensitive in the future. Not so much to remove the Christian perspective, but to add others. Fundamentalism is a tiny percentage of the world's religions. It just happens to be a very active one that gets more attention than its numbers would normally command. By leaving, you cleared the way for their views at the expense of yours.

(Gleaned from the pages of Playback Magazine)

Saga, the company which specialises in holidays for older people, is planning a major push into radio. Saga plans to apply for all four regional licences due to be advertised in the coming months by the Radio Authority, as well as for the remaining Londonwide FM licence. If successful it will offer radio services for people either in or approaching retirement.

Studies conducted with investment partner Infinity Radio reveal radio listening declines significantly among the older age groups. Both Saga and Infinity believe this is because existing radio programming fails to address the needs of older people.

WFLA(AM) and WFLZ(FM) in Tampa share a converted lumber/hardware warehouse store with a Bally's health club. The store was part of a local chain that went out of business just a few years before the advent of Home Depot, Builders Square, and so on. The interior of the store was completely gutted, and I believe converted to two stories.

The sign out on the street remained in place...the top portion, which is square, has the WFLZ logo, written diagonally; on the bottom rectangular portion, the upper half has the WFLA logo, and the lower half proclaims the existence of the Bally's.

:True, WWDB's narrowcasting can get on your nerves if you're "out of the
:box" - working in radio, I don't even HAVE any money to ask Harry Gross
:about! But I wouldn't call them the only talk station in town, since
:WHYY's revamped format is almost ALL talk on weekdays.

But the REAL tragedy here is that CBS never really gave WCAU a chance to overcome years of dullness. I haven't lived in Philly for years (it's my hometown)...I worked at KYW in the ate 70's. In he 80's CAU was on track to becomeing one of the GREAT talk stations. frank Rizzo was actually beating KY in the PM drive ratings. BUT --- the geniuses at Black Rock in N.Y. refused to take further losses. WWDB is just doing what it needs to do to survive. selling blocks of time --- info-mertial like -- in some time periods. DULL radio --- but the money comes in. With no real talk competition --- what have they got to lose? I remember when CAU and WWDB both did talk at times....it's where I got much of my interest in the BIZ. I share the frustration and maybe--just maybe --- some owner will realize Philly needs GOOD talk radio and that it WILL make money!

>
>Even as I write this, 4 of the 6 formats are still unavailable
>*commercially,* in Minneapolis, yet *are* offered on a *full-time basis* by
>*noncommercials*.

There is nothing WRONG with anyone trying alternative radio formats so long as the taxpayer isn't being forced to subsidize it. Often times non-commercial stations create the next "niche market" in radio...witness the quick on-and-off explosion of New Age stations in the 80's that started with public stations.

The question is, should tax dollars be used to support these entities...or could that money be spent better in utilizing technology to keep the nation better informed, or in (heaven forbid) lowering taxes a bit?

If fundraising can support it...I'm sure there'll be plenty of non commercial stations around. However, perhaps the better answer is to change the licensing rules for commercial stations to make it easier to get a license? After all, most underwriting announcement are simply commercials stuck at the beginning and end of the program-might as well make them legitimate.

IR>Yes, that's right; it's the new way to legally steal money in radiio.
IR>It's in the form of research companies. The more PD's read the research,
IR>the more they seem to lose their gut felling. There is no way can you put
IR>a record on the radio because it sounds good. It has to pass a test
IR>first.

IR>C'mon people, it's so simple. Pick up the phone and call record stores.
IR>Find out what's selling in your market. Get out and talk to people too.
IR>Find out what's happening in your city, not what's going on in the city
IR>the where the research was conducted.

Rob,
Who in blazes do you think the research companies are talking to?
They're doing, on a much larger scale, exactly what you're proposing.
Every song on the radio has to pass a test. The first one is "does the
PD like it?"

The reseach companies I've used have always done their surveys in
my city. They've done Focus Groups, in the street interviews, music
testing in auditoriums, etc. They provided me with more information on
my current and potential audience than I could ever hope to get on my
own.

It's very easy to blame research companies for stagnant radio.
Usually the complaint comes from PD's who simply want the freedom to
play what they like. Or, it comes from listeners with such esoteric
tastes that no station could survive playing what they like.

If research companies are "stealing" my money, they're leaving
plenty of value behind.

The subject of royalites is a long, drawn-out and somewhat tedious one, but I will attempt to pass along some info from the radio side.

1) Radio Stations pay "performance royalites" to songwriter and publishers thru ASCAP and BMI (and SESAC, a secondary entity), based on total billing (sales of commerical time). This money is distributed to the publishers through some bizzare formula only ASCAP and BMI know. Record companies and performers DO NOT get any of this money (unless the performer is also the songwriter.) The licenses are "blanket" giving the station the right to broadcast any song liscensed by each agency.

2) However, prevailing legal opinion while I was a PD says that right mentioned above only applied to performace of the entire song to entertain an audience. Using portions of the song in commericials etc was NOT covered, and demanded a seperate rights purchase from the songwriter AND the performer. (I'm sure Phil Collins got a lot of money from Michelob, etc.)

3) What you (or anyone else on the net) are proposing is something completely foreign to these agencies. I suggest you contact artist management directly, show them how the artists and/or record companies will benefit from your endevor, and ask for their cooperation in your effort. Of course this implies a benefit for the artist. If you're planning to use someone else's efforts to make money for yourself, you're a scum and deserve the fate chosen for people who don't pay shareware fees.

Hope this helps.

Rich,
Great advice! Now if we could only learn to follow it :) I don't know how many times when I was at WFLA and here (on the am) on WLS it showed us either in good shape or bad shape only to have it change when the books would come out. But even if it's only a trend it still sucks when it doesn't go the way you want. But again great advice!

We have been using TM's UDS system at our Oldies station for almost 3 years.
I, too, find it incredibly easy to use and (usually) error-free. It allows the air personality the precious commodity of time to prepare a great break, every time! We have had a few static problems, but a humidifyer & a spray bottle with a 50/50 mix of water and Downey fabric softner fixed that problem. We use Digicarts for our digital audio source, and the only complaint that I have is that TM and 360 Systems (the makers of DigiCart), cannot seem to make UDS II and DIgicart II "talk" to each other; they haven't been able to work out an interface. I'd be interested to know if other stations have had any problems with their UDS/digital audio interface.

Driving home to suburban North Shore of Boston the other night after 7pm, I wanted to tune in the news.

But alas, WBZ had switched to talk.

Thus tuning around the dial, it was all talk on am band.

Now we all know the old WEEI finally gave up on all news at 590 on the dial after CBS sold it to the Pizza magnate who finally threw in
the towel.

Too bad. WBZ does a peculiar brand of all news from 5am-7pm.

They have an anchor person doing a feature interview each half hour, intro the spots, intro traffic on the 3's, etc.

Then the news anchor half of the team comes in on the hour and the 1/2 hour to do the hard news for 14 minutes up until sports on the
1/4 hour.

Big voiced Gary Lapierre is on WBZ so much, I can't believe he can continue to read the same stories over and over.

WBZ has very few commentaries or political/national discussion segments. I miss the old CBS features like Spectrum and
Cronkite's commentary, etc.

Which leads me to believe that Boston needs another all news station. ARS made a mistake moving the sports to 850. They
should have kept the sports on the left side of the dial and let the old WHDH go head to head with WBZ.

If you want to hear something interesting, listen to the cryptic exchanges between news anchor Gary Lapierre and sportscaster Gil
Santos on the early 5-6 am segments. Quite a bit of animosity shows through. I guess they figure the brass aren't listening at that
hour? John Gallagher

> Services), and I was wondering if anyone else is concerned about the future
> of local/regional radio?

IMHO, the future of local stations is more dependent on creativity in programming: how to get local folk to listen in the face of so much competition from (usually) more sophisticated radio stations, and from the rest of the flood of communications outlets -- even the Internet!

As a community newspaper editor of more than 25 years, I have faced sort of the same kind of issue, only our competition is less fierce than is radio's. I have always been much more a fan of radio than of television, and have thought a lot about what I would do if I were ever *cursed* with the job of trying to run a local station, and have it be affordable and profitable.

And I guess the direction I'd take would be similar to the direction taken by a lot of regional daily newspapers in recent years: keep the station as local as possible. Offer things that listeners can get nowhere else -- community news and comment , and lots of it. Music, you can hear anywhere (too much in my market in Fairfield County, Conn., 50 miles NE of NYC). But really local news is seriously lacking.

Our local station, for instance, has about two "local" stories on its main morning newscast each day. The rest of it is state and national wire news--junk you can hear or read anywhere.

I know news staffing is expensive, but news is what people want from a local station. For instance, I have never heard one station in our area carry routine obituaries as part of the news. Why not? The obituary page in a newspaper has one of the highest reader rates of any page. Why shouldn't radio -- which can be more timely than many newspapers (such as weeklies) -- carry local obits? (I know they do in some parts of the country, but around here, I think the news directors think that's unsophisticated. They're wrong. It's real and important local news, and they are missing out on it.)

Local news ought to cover more of the routine of police and fire departments, more of what's happening in the schools, more town hall news, etc. Much of that news is easy to get -- just a matter of using the telephone effectively and often. Instead, we get junk ripped off the wire.

Local talk shows, more local interviews, more local sports, etc.

Expensive? I guess so. But what would happen if you tossed out the AP wire service and instead of having people plug in songs, have them answer phones

over the air?

1325. Cart Stop Signals

Bill Anderson wrote to ask what tones cart machines use as a stop signal.

Bill the cart machines that I have personally worked with, use a 1 kHz frequency as the stop signal. Duration times were about 1 to 2 seconds.

this cue signal is automatically recorded on the tape, when a recording is made, on most cart machines. I have never seen a cart machine that didn't have tis capability.

One cart machine I worked with, had a "bypass: option, where you could set it up NOT to record the cue signal...

what brand cart machine do you have....?

Generally most cart machines record the cue signal on a seperate audio track from the actual recorded audio....

Most mono cart machines use two track... one as the cue track and one for audio. Most stereo cart machines use three tracks. One for cue tones and the other two for audio...

Yes, your cart recorder needs to generate a 1Khz signal for about a
second on the cue track. Most cart recorders have this, sure yours
isn't broken?

What model is it?

That might be swell, but it seems to me you could just buy several
codecs and a V.35 switch and you'd be all set. I guess it would
probably be cheaper if it were all in one box.

My gripe is that all the ISDN Terminal Adapters that I've seen are a
pain in the ass to use. What were these people thinking??? The
trend seems to be to use as few buttons as technically possible and
to use twisted long, interweaving heirarchical menus to set up
parameters and make calls.

DOES ANYONE OUT THERE IN RADIO BROADCASTING HAVE A TERMINAL ADAPTER
THAT THEY *LIKE*??? The switched-56 CSU/DSU's that I've used, on
the otherhand, have the most simple, easy-to-use, user interface
in the world. Why can't ISDN follow suit?

> ...That agreement would also
> include the added feature of having an rj11 jack on your box so that a
> regular telephone could make a regular phone call on the line.

This sounds like a feature of a Terminal Adapter, not a codec. It's
my understanding that there exists such TA's on the market.

1328. Re: What is Happening to Top 40 Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-02-28 04:40:06 UTC
From: hoeffel@aol.com
Message-ID: <3iu9f6$7qn@vixen.cso.uiuc.edu>
Source record: 34436

While it may be more difficult to program a Mainstream Top 40 station in a big market, it can be done quite successfully. Cases in point: Kiss 108/Boston; PRO-FM/Providence; KRBE/Houston; B94/Pittsburgh; KDWB/Minneapolis; KHKS/Dallas; Q106/San Diego... all top 3 stations 12+. You can make the arguement that some of these stations lean Adult or Modern, but Top 40 stations (even in the '60s and'70s) often had a "lean," or "flavor" to them that varied from market to market. And there's nothing wrong with that. Some towns like to rock more than others. Other places are more R&B oriented. Many observers speak of "Hot AC" or "Adult CHR" as relatively new formats. Those of us who have been around for awhile know that we've always had these types of stations. In the'70s, we called them "chicken rockers."

As far as reseach goes, it can be important, but it should not be considered to be the be all and end all when it comes to making programming decisions. It should only be one weapon in the arsenal. And, as in the case of any weapon, the skill of the person using it determines weather or not it hits the target. I've always been a believer in retail research. If someone raises their hand or turns a knob in an auditorium test in response to a song hook, thats good. If they punch a button on their phone to indicate their opinion of an over-the-phone, low fidelity song hook played by a computer, I guess that's OK too. But if they take the time to go to the mall to plunk down about $14 of their hard earned money on a CD, that impresses me. And by getting to know your local retailers, you'll discover that they can give you qualitative info as to who's buying what.

Bottom line: Top 40 radio needs to be entertaining, compelling, and fun; not steril, formulated, and over-researched. Where it is done properly, it is doing just fine.

Of course it will. Change is the only constant. What is hip today is doomed to be unhip tomorrow...that's what drives the music industry, fashion industry and even radio to some degree. Too many people have too much money riding on the planned obsolescence of music, fashion, etc. to allow this trend to cease.

Source record: 34439

>I read in last week's_Broadcasting & Cable_ -------

Both commenters raise legitimate concerns about current trends in the radio broadcasting business. However, my expectation is that the consolidation that we are seeing will not be stopped and that the stand-alone radio station will probably go the way of the independent gasoline station and the rural mom-and-pop store - replaced by Exxon or 7Eleven. I do not think that this is a "good" thing, particularly for diversity or local service, but I do believe that it is inevitable.

My quess as a former FCC official and someone currently involved in radio station ownership and financing is that we will see approximately twenty to thirty radio groups owning 95% of commercial radio stations within the next twenty years. A lot of this is inevitable because of government policies as well as economic trends. Government paperwork burdens on the station owner are forcing out many owners who might otherwise stay in broadcasting. The same with increased costs of maintaining employees. It is easier and more cost efficient to absorb those burdens spread among several stations. These burdens are in many cases not unique to broadcasters, but they still cause major problems.

DAB will eat at the margins of local broadcasting. Not enough to to put them out of business by itself, but just another drip of water on the rock.

Radio is also facing real comprtition for its spectrum from other uses. This is a consideration that may drive some to consider the benefits of owning large numbers of stations. The alternative uses do outweigh the current value as radio stations for many of these properties.

The FCC needs to open a comprehensive inquiry into the future of radio broadcasting. Everything that I have seen done in the last fifteen years has really been without real thought into a broader picture. What do we want radio broadcasting to be in 10 or 20 years? If we want to preserve some degree of localism let's do it. If not, let's put the patient out of its' misery and get onto other subjects. Everything should be on the table from EEO requirements to "preferences" in licensing to inovative ideas such as allowing locally owned broadcasters to escape all FCC paperwork burdens and renewal requirements as long as they are reasonably serving the local community.

Anyway, do write to the FCC and to Congress whatever your viewpoint. Sometimes, someone will listen.

If anyone is interested, I have collected over the years a sizeable library of movie and tv audio cuts. I've used them for drops or our station's "pick-the-flick" daily contest. If you are looking for a GREAT on-air contest, this is it. Drop me some E-mail and I can help you get it started with a good collection of cuts and an contest opener and bed. I'm always on the lookout for new cuts, so if you also collect drops and movie cuts, let me know! I'd love to do some trading with you.

1333. D.C./NBC WRITES OFF LOAN FOR WKYS PURCHASE - WASH. POST

Newsgroup: rec.radio.broadcasting
Date: 1995-02-28 04:40:15 UTC
From: "Max Cacas - NPR News Ops - Wash. D.C." <MCACAS@npr.org>
Message-ID: <3iu9ff$7rh@vixen.cso.uiuc.edu>
Source record: 34441

Saturday's (2/25/95) Washington Post Business section reports that NBC has decided to 'forgive' (read also: write off) most of a ten million dollar loan made to Albimar Communications, Inc., the company that bought WKYS-FM (93.3) in 1988.

Albimar recently agreed to sell WKYS to Radio One, Inc., the company that owns WOL-AM and WMMJ-FM here in D.C., along with other stations. Radio One is getting the station for $8.5 mllion less than the $42.5 million dollars that Albimar paid for the station 7 years ago. An NBC spokeswoman says the company decided to write off the loan because it was "overdue, and there was little chance of collecting". She said Albimar might have filed for bankruptcy if NBC had not forgiven the loan, and in that case, NBC might not have gotten anything. The Post also noted that at the time of the sale, NBC received $15 million dollars in Federal tax breaks under a program designed to encourage the sale of broadcast properties to minority owners. Three of the principals in Albimar are African-Americans, including Commerce Secretary Ron Brown (a 10% partner in the company, according to the Post).

The Post notes that Albimar's investment in WKYS was a losing one, citing former PD Donnie Simpson's move to Infinity's WPGC-FM, and a morning drive syndication deal, and WKYS' eventual slide in the ratings.

THIS WEEK ON THE DIFFERENCE - #9 (airs 27 Feb - 5 March 1995)
---
* He's a new wave legend. He's worked with everyone from Cash to Costello. And a Kevin Costner movie brought his work back to the limelight in the '90s. He's Nick Lowe, and he'll be performing songs from his latest album on "THE DIFFERENCE WITH TODD RUNDGREN."

PLUS:

* God Street Wine, the Dave Matthews Band, Vigilantes of Love and Greg Brown perform live in our studios.

* Pat Metheny and Kathy McCarty talk about their influences.

* Great music from U2, The Pretenders, David Byrne and more!

COMING SOON ON "THE DIFFERENCE WITH TODD RUNDGREN"...

*In-studio interviews and performances from Jethro Tull, Live, Graham Parker, Kirsty MacColl, Massive Attack, The Edge, Hothouse Flowers, Gavin Friday, Johnny Lydon and many, many more!

"THE DIFFERENCE WITH TODD RUNDGREN" is a weekly, two-hour music magazine heard on great stations across the U.S.A. including:

WRNX-FM - Springfield, MA - Tuesdays 11pm-1am
KZON-FM - Phoenix - Saturdays 6-8am
WNEW-FM - New York City - Saturdays 10pm-Midnight
WLUP-FM - Chicago - Sundays 5-7pm
KSCA-FM - Los Angeles - Sundays 8-10pm
WXPN-FM - Philadelphia - Sundays 10pm-Midnight

Check your local listings for the time and station in your area!

If you don't get THE DIFFERENCE where you live, then you can MAKE THE DIFFERENCE! Call or write your favorite station today and tell them you want "THE DIFFERENCE WITH TODD RUNDGREN!"

CABLE SUBSCRIBERS: "THE DIFFERENCE" is now available on the "MUSIC CHOICE" Digital Cable Radio service. Contact your local cable operator for more information.

"THE DIFFERENCE" ON THE WORLD WIDE WEB! "Difference" listener Roger Linder maintains the definitive WWW archive on the series. You can access his "Difference Companion" at...

Digital Workstations that are decent?

I've used digidesigns Protools and Session 8. Both are nearly the same
except, Session 8 is more affordable. Protools from what I understand
is high expandible and more in line for professional production studioes.

I've heard great things about SAW by innovative software and about software
called Deck II. All of these tend to be under $10K. Another good one
I've heard about is Roland's DM-80 and DM-800. Both are the same thing
just bundled differently for different budgets and expandibility needs.

If you'd like to talk more on what I know and how to reach certian people,
feel free to call me. 703-980-2702. I do middays from 9-2 ET weekdays so call
after that.

Message-ID: <3iu9fp$7s2@vixen.cso.uiuc.edu>
Source record: 34445

In article <3ik8ut$amv@vixen.cso.uiuc.edu>, WNUANews@aol.com wrote:

|: Our newsroom was blessed this last summer with a DSE 7000...and I hope never
|: to work without a digital editor again.
|:
|: It's allowed us to do some remarkable things in just a tiny fraction of the
|: time it'd take using razor-blades, tape and dubbing and redubbing.
|:
|: I do wish the interface adhered more closely to the cut-and-paste
metaphor we
|: in the word-processing world (particularly in the Macintosh/Windows world)
|: have come to know. Instead of "source in/out" and "destination in/out," I'd
|: prefer "cut" and "paste beginning/ending" or something similar.

The original designers -- who, by the way, are still releasing free
upgrades (have you gotten this winter's yet?) -- used a "tape" metaphor
rather than a "computer" one. That's because many jocks are scared of
computers, but nobody's scared of tape.

That's also why the DSE 7000 has features to adjust the splicing block
angle (also measured by the length of the splice), erase a section, or
overdub... rather than
"crossfade in milliseconds", "delete", or whatever the equivalent would be.

Hundreds of stations have remarked on how easy it is to for everyone on
their staff to teach themselves how to do sophisticated edits on the DSE,
just by looking at it. I'll wager you never even opened the manual.

By the way, there is a "language" feature in the DSE's control screen. It
was intended for instantly changing all the menus and on-line help to
Spanish, French, or whatever...
If you want to write a set of screens in Computerese, I'll get you
together with the programmers.

|:
|: It also could benefit from multiple-level "undo" commands.

It has that feature. It's hidden from the casual user, because it could
get very dicey if you undo some parts of an edit and not others. Timings
would be 'way off.
But there's an instant way to make any edits, on any section of a track,
non-destructive.

|:
|: Our engineers and production director chose the system, so I don't know much
|: about what else is out there. But I will say that--like almost any
|: software--once you get used to it, you won't want to do without it.

|:
|: Charlie Meyerson
|: WNUA-FM News Director

Thanks for the kind words, which I'll pass on to the developers. I wrote
the manual (as a free-lance gig; I'm not an Orban employee).

From: jgallagh@interserv.com
Message-ID: <3iu9fs$7sb@vixen.cso.uiuc.edu>
Source record: 34447

Well, I hear the Eagle format is now sweeping the country.

Here in Boston we have 93.7 fm booming in from 30 miles outside the city with the Eagle slogan, best hits of the
70's.

I guess that means no 60's and no 80's.

Curt Gowdy sold this station to this group who have purchased all new equipment and are really trying to make the old WCGY into a
Boston metro station. They may succeed.

It sounds pretty good, and I'll be WZLX and Oldies 103 are running scared...for good reason.

How long's it going to take before one of the two Boston fm country stations gets smart and dumps the contemp. country format.

Country is dead in Beantown--at least the market cannot support two big fm country stations. Possibly one.

If WVBF was smart they'd come back with a new version of the 60's top 40 format. Call it Urban Contemporary without the urban.

And do we really need all these traffic reports on every FM station ??? John Gallagher

Source record: 34353

Nova 101.4 is based in Omeath in north County Louth (in the Irish Republic) and began broadcasting at 8am on 30th January.

They currently broadcast live from 8am to 1am daily with a non-stop diet of adult oriented pop and rock music aimed at the over 20s.

Technically they are using an Italian made CTE 250 transmitter feeding into a six element yagi aerial which gives around 2250 watts of effective radiated power directly into mid-Ulster on 101.4 mHz stereo.

This thread should be of interest to the group "rec.radio.broadcasting"
as well as in scj

I was in Japan for about a week a few days ago, heard only a brief sample of
"FM802". Sounded pretty good to me, but heard only a few minutes.

Note: Japan's FM broadcast band ranges from 76MHz to 90MHz, they have their
TV channels 1,2 and 3 in the area of 90 to 108MHz. You can hear the sound
carriers of these channels with an "American" FM radio.

>I remember Al Jazzbo Collins during the late 60's. He was on a Los >Angeles AM station. One would call in and talk to Al and He would >ask the person if he wanted to become a "Majuber" (sp?).

Right. The station was then-stodgy KFI (640 kHz Class IA 50 kw Clear-Channel nondirectional fulltime), which ran a sleepy MOR-and-talk format. Jazzbeaux was on late at night (something like 10 p.m.-2 a.m. maybe) and convinced listeners he was broadcasting from the "purple grotto" several stories underground the old KFI studios down on Vermont or Western Avenue in Hollyweird.
What a great guy!

I, too, remember being "sworn in" as a member of the "banditos." And I do remember the term "majubers," although I can't recall what relationship a majuber had to a bandito. Maybe a subset of some kind?

Buenos dias, compadre.

Where does your playlist come from? My guess is that it comes from
some source that compiles ratings, sales, and other types of consumer
feedback, right? So, in essence, isn't that just like a request?
Someone's requesting it somewhere.

Ignorance is bliss.

Keep the listeners happy.

A) If you're that tightly formatted, you're working from a music log. There's a good chance you can, if you really want to try and please callers, zip thru that list and say "that song's coming up in the next hour-and-a-half, so sit tight." I've even offered to make sure and announce it ahead, suggesting they may want to tape it off the radio if they like it so much, and thus be able to listen to that great song whenever they want...
B) We must admit that listeners can be demanding, not realizing we play to a large audience. When they call again and again (they really think we won't know it's them AGAIN) and finally demand "when will it be on?" I sigh and say "seventeen minutes."
Nobody's ever called back to say they didn't hear the song. Maybe being so specific convinced them that they must have missed it!

Jay

I listen to you from time to time here in Grand Rapids as well as Don Wade and Roe Con. I wish WLS would have a better balance to its hosts. I guess my biggest complaint with conservatives is not that they are always wrong but that they always seem arrogant, without compassion, and simplistic in their answers. They never seem to have an ability to see the complexity of an issue and are willing to use the most unsavory tactics all in the name of truth to get their message across. Are Don and the others really so heartless?

This is a little off the track but reminds me of 25 years ago when I was living in a small village outside of Innsbruck, Austria for a few months.

We decided to pick up a used TV to entertain ourselves which we simply plugged in without benefit of clergy or other red tape. We were warned about the "cruisers" by neighbors and fortunately blew town before problems developed. The entertaining part of this is that the Austrian National TV Board took all of this piratical listening as a serious problem and chose to counter it mainly by pschological countermeasures in the form of "public service" ads declaiming the foul activity. The one I principally recall was done tongue-in-cheek with the announcer seated behind a desk with a large white foam head on the table in front of him. The main feature of this head was a huge ear on one side into which he would insert a finger which when withdrawn would have turned black. All the time he would have been denouncing the evils of being a "schwarzehoerer" (loosely interpreted as a black market listener). It was sort of the same approach as current PBS fund raisers. I found it to be the best humor presentations of the day.

Still not paying,
Syracuse John (formerly of Aldrans)

>You mean...the ads for the California State Lottery

One of the other problems for broadcasters with the current statute is that it is illiegal to advertise legal state lotteries for any state othert than the one you are licensed to so that a station in North Carolina could not carry ads for the Virginia State Lottery although a Virginia station may carry those ads. I worked with the House and Senate Judiciary Committees in 1986 in easing the statutory restrictions on lottery advertising and it was difficult to get even the current changes through. There is no "logic" to any of this.

I have posted a note in several groups to the effect that we are setting up our own net site and exploring several types of file structures and formats for digitizing audio as well as real-time broadcasts.

I have some interesting replies from everybody except broadcasting pros. We are looking for both technology ideas and content. I can't believe that nobody cares. BTW, don't let your lack of employment in the broadcast world scare you away from an answer. That only shows you to be more sane than those of us who call this a profession.

After only a little more than two years as an oldies station, WRVC-FM 93.7 in Ashland, KY has changed to a contemporary country format, and is now known as "The Dog", WDGG-FM. I don't know the circumstances of the format change, and I was hoping someone familiar with the Huntington/Charleston (WV) radio market could fill me in. Is the station still under the same management, or was it bought or LMA'ed by another station? Over the years, the station at 93.7 in Ashland, KY has been very unstable. Since about 1977, when they started as WAMX-FM, they have had CHR, soft AC, CHR (again), AOR, AC, adult rock, and oldies formats. The latest change seems to leave the Huntington/Charleston market without an oldies station. Can anyone verify this? There are numerous country stations in the area, and it seems like another is not needed. This makes it seem more like a buyout or LMA. It seems to me that whenever a station is "duopolized" or LMA'ed, more often than not, the new station gets a format that is already well-established and often one similar to the station doing the buyout, and the station's old audience is deserted. I guess this makes sense in that the station taking over is attempting to compete with a well-established competitor or keep someone else from attempting the format. Speaking of the Huntington/Charleston market, I would be very interested in any ratings for this area and/or southeastern Ohio. If anyone has this information, please send it to me or post it here. Thanks.

1357. [REPOST] NJ Voulenteer Station -- Disclaimer advice

Newsgroup: rec.radio.broadcasting
Date: 1995-02-28 04:40:57 UTC
From: ira7562835@aol.com
Message-ID: <3iu9gp$7vi@vixen.cso.uiuc.edu>
Source record: 34365

[Moderator's Note: This is reposted because the original one was corrupted with word-processor codes. Bill]

I wonder if I could get some advice from anyone out there. My name is Ira Segall. Up until a week or so ago, I worked as a volunteer for three-and-a-half years at WDVR in Seargentsville, New Jersey, a 3000 watt, soley listener supported, non-commercial, community FM. In addition to a full time job and my own part-time business, I got up at 4:30AM Monday and Friday mornings to do a diversified music program from 6 to 9AM.

For the three-and-a-half years I, and the others on the air at WDVR, operated in an environment of "you produce your own program". As long as we were within FCC language guidelines we were free to do what we wanted as stated in the WDVR station policy manual.

About three months or so ago, the station began running a 90 second feature hosted by Dr. James Dobson, you might be familiar with, called "Family Matters". It airs some places as "Focus On The Family".

Forgive me for treading into a sensitive area, but this is specifically the area on which I seek advice. Plainly speaking, I'm a Jew and "Family Matters" is a feature which I interpret as a fundamentalist, Christian evangelisticaly biased feature. Family values couched in religion. Dr. Dobson is, to my understanding, a psychologist, but he's also a Dr. of Theology. Speaking even more plainly, as a Jew, the feature is completely offensive to me.

When management began running the feature, I being the producer of my own program, regestered a complaint because I bacame offended during my own program as "Family Matters", one morning, got very Christian Evangelistic!!! I began running a very passive "disclaimer" stating that the feature was not necessarily the opinion of the One Eye At A Time Radio Staff (One Eye At A Time - the name of my morning program). An effort to put myself at arms length with a feature that, on a station where I produce my own program, wouldn't personally associate me with frivolous evangelistic programming.

The WDVR Radio policy manual ststes that no such features, as with PSAs, grant announcements and other programming, shall not be "commented on" by the air personalities. I believe that the disclaimer that I offered prior to the running of "Family Matters" was not at all a comment, rather a way of letting my listeners know that I didn't want them to tune out of MY program if they were as offended as I was. I immediately tune away from such religion on the radio and I'd spent three-and-a-half years going out of my way NOT to talk about politics or religion on the air.

Two weeks ago, after "disclaiming" it for three months, I was asked by management to no longer do the "disclaimer" prior to the feature. The request came during my shift, while I was on the air. I suggested that we sit and talk about it off the air after the shift. I was denied the oppertunity and there on the phone, literally minutes from a live-mic stop-set, management DEMANDED that I no longer "disclaim" the feature. It was a confrontational exchange. I quit there on the phone, and then on the air those minutes later, calling management ungrateful for the years I'd volunteered. Certainly and admittedly, a firable offense at ANY radio station in the country.

Management was generous enough, due to my longevity at the station, to sit down with me a few days later and offer me an oppertunity to have my position back if I conceded to run "Family Matters" without the "disclaimer". I refused. In fact, I suggested that it had become a religious issue with me. I suggested that someone else, perhaps someone in management, tape a "disclaimer" that I could use so my voice wasn't associated with it, then sandwich it in-between a PSA-the feature-and music so that my voice wasn't even a part of the stop-set. Management refused and I gave up my shifts.

The advice I sek is obviously in a very sensitive and personal area. Religion. Religion versus policy. At a small community station where we are the producers of our own program, is it proper to ask a person to run a feature which, for whatever personal religious reason, is so hideously offensive to him or her without giving that air personality the oppertunity to simply put his or herself at arms lenght from it. Don't I have a right to disagree? Isn't it true that a disclaimer won't actually hold up in court? If the station used a disclaimer to disassociate themselves from certain programming, can't I use it for the same purpose?

I appreciate it if anyone has made it down this far in the post. If anyone has any insight or advice I'd love to hear from you. The loss my program at WDVR FM is quite a shock to my system. It was a large part of my life. I can be reached at IRA7562835aol.com.
Thanx alot. IRA

After a long absence due to a contract dispute, Ronn Owens has re-appeared on KGO San Francisco. Owens is back in his 9 AM to 12 Noon time slot. Duane Garrett, who has been filling in during Owens' abscence, will move back to his regular 7-10PM slot. The down side of Owens' return, is that we probably will not be hearing as much from Gene Burns. Burns had been filling in for Garrett, and had been doing a fine job of making the 7-10PM
slot very listenable.

In 1936, KGBX in Springfield MO built the first building west of the Mississippi specifically designed from the ground up as a radio studio. Throughout the years, the building housed such notables as an anchor for the Ozark Jubilee national radio program, its own recording studio & record label, and countless "on-air singers", like Johnny Cash, Willie Nelson, Ray Price, Eddy Arnold, Red Foley, and even a young up-and-coming singer from Hollywood named Sinatra! The station's mascot thru the mid-70's & early 80's was a pig, and that 300-pound animal lived in the basement. KGBX, being at 1400 AM, finally went dark in 1988.
Today, the building, in all its 1930's architechtural splendor, stands empty. The current owners of the frequency felt the building was in need of too much repair, plus is now in a "less than desirable" neighborhood. Hopefully, someday, someone will put a broadcasting soul into this historic building.

> (Lance B. perhaps) know what will become of the big white mansion on
> Sunset?

KMPC commemorates the MacMillan Petroleum Company and MacMillan "Ring Free"
oil. It began licensed to Beverly Hills, and wound up in some trouble with
the commission in its early days.

Its first Hollywood incarnation was in the building which for many years
was the Old Spaghetti Factory on Sunset (is this now KWHY?).

The soundstage you're referring to (where some of the Jazz Singer was shot)
is stage 9, which still exists and is used as a scene dock. It is on the
northwest corner of the lot, but it is behind the white columns building
where KMPC occupied the first floor, and Golden West Corporate (before the
Tribune days) occupied the second floor.

The white columns building was originally a bowling alley, and was retrofitted
by Autry. The bowling alley predated automated pinspotters, and the pinboys
lived in small rooms on the second floor (where corporate ultimately moved).

There are some pretty wild stories about those days.

My favorite studio is the old Earle C. Anthony KFI facility on north Vermont.
Earle C. moved the station here from his multistory car dealership. He built
the KFI theatre, and some of the NBC shows were done from there (most were
done from the NBC studios where Home Savings now is at Sunset & Vine.)

It was bought by the owner of a daily Korean newspaper a number of years ago.
I met him because I was involved with an english-language Korean paper for
a while.

I toured the building and found all the studios still intact. He bought all
the equipment too. I asked him if he wanted to sell the equipment. He asked
how much. I said, oh $500.00 or so. He became very agitated and I didn't know

why. Then I found out that he'd been swindled into beliving that he had a state of the art broadcasting facility.

I wanted the equipment as collectors items...500 ohm ladder attenuators, and all the vaccuum tube lineamps in racks on the control room walls. You could replace the whole room with a tascam 8 in 4 out board, which they did. They were producing a one hour Korean radio show in one of the old announce booths (the coral I think), on a little solid state board and a 2 track recorder.

The last time I was in KFI before that, they wouldn't use cart machines, and if you wanted to send a spot in on tape, they'd charge you to cut a dub on one of the two Scully lathes, and play the spot off disk.

:How about your market? Any interesting conversions to studio space?

About the only one in this area is the building that houses WBAY-TV, along with WIXX-FM, and WGEE-AM & FM in Green Bay. It was the former Green Bay Catholic Central High School. After the school built a new building (Now Notre Dame H.S.) the Norbertine Fathers owned what was then WBAY AM-FM-TV. After they divested their broadcast holdings in 1974-1975, they still owned the building and rented space to the new owners of the radio and TV stations. The TV station occupies the first floor, including the the auditorium, which they use for their annual local CP Telethon. The classrooms on the second floor have been converted to studio and office space for the radio stations.

I'm a long-time fan of the radio industry currently working in Marketing for the cable tv industry, and I'm posting this message to ask for the help of any radio entrepreneurs out there.

I'm also a graduate student in Business at St. Mary's College in Moraga, CA, and I'm currently taking a class in Entrepreneurship. My final project is to write a business plan for a new business venture, and I'm writing mine on starting a radio station.

Would someone be interested in communicating with me via e-mail on some of the "tricks of the trade?" The more research I do, the more complex this project is becoming, and I'd like to get some first-hand information from people who've "been there" before.

Thanks for reading this, and thanks in advance for your help! Feel free to e-mail me at Maffeo@ix.netcom.com.

1372. Radio Caroline's Future (UK)

Newsgroup: rec.radio.broadcasting
Date: 1995-02-28 04:41:17 UTC
From: JayCee@midmarsh.demon.co.uk
Message-ID: <3iu9hd$819@vixen.cso.uiuc.edu>
Source record: 34380

Radio Caroline recently finished its latest RSL broadcast from the Ross Revenge (radio ship) with a message saying: "An alternative to gaining a licence is to move the ship to international waters where Radio Caroline can broadcast to the whole of Europe under a licence granted by a foreign state. Caroline management are, therefore, continuing to investigate a means of restoring a full time high power AM marine station to the air, in order to return Caroline to her rightful place in the European radio industry. Legal bodies working for Caroline have said that, while this option will not be the most straightforward, it is still possible."

This statement apparently reflects the fact that the Caroline organisation are still looking to get the station a licence to broadcast from a third world country. This may possibly circumvent the Broadcasting Act of 1990 which gave the British Government many powers, all of which are yet to be tested in a court.

Apparently the RSL broadcasts were heard over a much larger area than that normally obtainable with a 1 Watt transmitter. No doubt the fact that the service used the rather efficient aerial system erected onboard the radio ship helped provide a good signal.

I remember well the early Caroline days as I spent many a happy hour (or twelve) daily listening to the then only broadcaster of pop music with a decent signal strength in the UK whilst at training college in the 60s. Listeners could always tell when there was a storm in the North Sea by how much the poor old needle was jumping about in the groove, until they got better stabalized equipment ;-)

It has been reported that Steve Conway, ex-Caroline DJ and Head of News, looks set to publish a book on the station as at least three publishers have expressed an interest.

Apologies if this seems repetitive... Most *HiFi* VCRs are completely capable of audio-only HiFi recording, generating their own sync tracks internally, or at least that's been my experience with a half-dozen HiFi decks over the past decade.... Conventional decks weren't originally designed with audio in mind, so internally-generated sync tracks aren't usually incorporated.

Reading that last post about WBNC before it became WFAN made me
nostalgic for the station when I listened to it during the seventies.
I know that Dick Summer was on at night. He did some really
interesting shows about all sorts of stuff from Nostradamus to reciting
the "password" (Seven thousand Macedonians in full battle array!).
If I remember correctly, Cousin Brucie had already moved over
from WABC by 1975.
Who else was on the air back then? Imus, of course in the
morning, but who else? Twenty years is a long time to remember everything.
Please help me out here. Thanks.

Cross-posted to: rec.radio.broadcasting,uk.media,alt.radio.college,alt.radio.uk,rec.music.marketplace

Are you a record dealer? Are you an oldies/classic rock broadcaster?
Would you like to join a team to compile a monthly Top 40 chart including the
hottest re-issued albums, compilation albums and box sets?

The chart would be based on sales in your shop and playing times on
your radio station or show. Each member of the team compile a Top 10 and
email it to me at the end of the month. I'll compile the chart by putting
together the sublists and it will be released on internet in the beginning
of the next month. List of contributors will be released with the chart.

The chart would be open for each style of popular music, from rock'n'roll
to funk or country. Candidates for the chart must have been recorded
before the year 1985, and note: albums (vinyl or CD) only.

For further discussion on the issue, feel free to send me an email message
to silmala@halko.jyu.fi. Tell me whether you're willing to join the team.

To get you more excited :-) here's finally the Retro List of 1994
compiled by the critics of a Finnish rock magazine called Rumba:

1. THE PLATINUM COLLECTION Blondie
2. ? - THE BEST OF New Order
3. INSTANT MONTY PYTHON CD COLLECTION Monty Python
4. LIVE AT THE BBC Beatles
5. VERY BEST OF Marvin Gaye
6. ADD IT UP (1981-1993) Violent Femmes
7. THANK YOU FOR THE MUSIC Abba
8. TAISTELUNI/IN MEMORIAM M.A. Numminen
9. LAMA Lama
10. FIRST ALBUMS Melrose

Best wishes,

1380. Aspiring producer seeks advice

Newsgroup: rec.radio.broadcasting
Date: 1995-03-03 01:34:53 UTC
From: Jqpresc <jqpresc@nando.net>
Message-ID: <3j5rnt$ecu@vixen.cso.uiuc.edu>
Source record: 34390

Hello all.

I'm looking for a little advice from all of you out there in the business. This is especially directed toward those of you who are either producers or hosts of radio shows, whether they be morning shows or talk radio shows.

If you are a producer for a show in a medium market (or larger), I am looking for a little career advice. This, I guess, consists of what skills are most important, what stones should I be looking under (i.e. who should I be talking to in addition to the regular "networking", how much previous experience is generally required, what should/can I be doing in the meantime, etc., etc., etc.

If you are a host, what qualities and skills are essential in a producer. Obviously this depends somewhat on the situation (show, host, format, etc), but I'm just looking for general advice.

Also, what is the typical day like in the life of a producer? How much of your day is spent in production, on the air, in meetings and on the phone? Again, this probably is contingent on the type of show and the station's format. However, I'm looking for any general or specific advice/situations anyone can offer.

Just a bit about my background to give you something to go on with your advice: I'm a recent college graduate (last May), with a degree in broadcasting from UNC-Chapel Hill. I worked for nearly 2 years during school at a local commercial news/talk radio station (WCHL-AM--Raleigh/Durham/Chapel Hill, NC market) in various roles: board operator, announcer, producer/production assistant for various programs (local sports programming, morning show, special events coverage) and have experience as a studio engineer/producer for the morning show as well as an afternoon talk show, drive-time news program and live coverage of sports events. I also have some experience as an on-site engineer/producer for remotes. I also acted as public affairs director at this station for about 3 months. I left this station 6 months ago (last August), and I'm in the process of beginning another broadcast job search.

I am particularly interested in morning show production in a medium market but advice on this or other types of show production is enthusiastically welcomed.

Any response can be posted here and/or emailed to jqpresc@nando.net

Thanks in advance for your help and advice,
Jonathan Prescott

a
IM>new higher level, beyond the current "cut the costs and LMA another
IM>facility" mentality.

Mark-
There *is* an "MTV radio type thing," a syndicated show that runs on a lot of CHR's (including WPST here in Jersey). Lewis Largent hosts, and it's actually pretty well done. Lots of very new music, artist dirt, and - of course - cross promotion for the TV network.

IJ>I understand what you are saying....It's true that research companies
IJ>offer broadcasters incredible amounts of information. But for small
IJ>market stations the cost is not feasible. I don't think it is productive
IJ>for a small market station to use focus group or call-out research for a
IJ>market that is not their own.

IJ>Have you ever thought that their is such a thing as over-researching
IJ>somthing? Sometimes what looks great on paper sounds horrible on the
IJ>air.

Dallas,
I don't think you can over research. What I see is over response to
that research. A good PD knows what sounds good. Radio stations have
nothing to sell but that sound. The PD's responsibility is to take the
important parts of the research and massage it into a competitive
product.

Having said that, I have to warn PD's and managers to be careful
about who does the research. I don't trust research companies that have
formats to sell. I've yet to see those companies find data that doesn't
support the use of one of their formats. I want someone who's completely
objective.

To add to what others have said...Chuck Leonard was on WABC at least through 1978. He had a brief moment in the sun in the late 70s, as he was the guy on the air when New York City blacked out. I remember when the teletype at my station died as UPI in New York lost power. The only way to find out what was going on was to flip to WABC, where Leonard had stopped playing music and was into emergency mode. His performance that night was remarkable.

>3. Sonic Solution No Noise

>There is another software solution from Digidesign called DNR, but I'm not
>sure how well it works on impluse noise.

Richard Berwen designed the Berwen TNE7000 Transient Noise Eliminator, the most impressive hardware de-clicker. It's been out of production for several years, but still is circulating in the used market. I love mine, and wouldn't part with it without collecting an huge fee.

SAE also made a model 5000 Impulse Noise Eliminator which are also still circulating. By comparision the SAE handles huge clicks where the Berwen handles small ones, but the SAE is a rather brutal and clumsy device where the Berwen is quite graceful. During a click, the SAE switches to a delayed signal - splicing in a bit of what occured prior to the click. The 'splice' is hard and often ragged, but is in many cases less objectionable than the click. The Berwen eliminates small clicks completely by punching an inaudible 'hole' in the signal in place of the click. It also uses a delay, but delays the entire signal slightly. It does little to eliminate large knitting-needle size scratches, though.

Berwen pioneered single ended NR with the Dynamic Noise Filter, a filter that has program dependant cut-off. The early versions were low and high filters, the later were high only. The early were also pro units. Doubtful that you'd find any of these things anymore, and since the electronics were potted blocks and not user servicable, when the break, their broken for ever. The consumer units were much more conventional in construction and would be nice to have if you can find one.

Consumer marketing of Berwen products was take over by KLH in later years.

1389. WVIC Lansing Mich flips to Country

Newsgroup: rec.radio.broadcasting
Date: 1995-03-03 01:35:31 UTC
From: "Christopher J. Bessert" <343GRPW@CMUVM.CSV.CMICH.EDU>
Message-ID: <3j5rp3$ejh@vixen.cso.uiuc.edu>
Source record: 34327

Hi all.
I will try as hard as I can to keep my "dislike" of country music out of this and report the facts. This morning, March 1st, at 6am WVIC-FM 94.9 licensed to East Lansing, Mich (serving the Lansing area) flipped from a very well programmed mainstream CHR format to what they are calling "Wild Country." In an odd conincidence with the recently reported Ashland, KY station calling themselves "The Dog" WDGG, WVIC is now calling themselves "The Cat," even though no call letter change is planned. The only live person on the air currently is the news person in the former morning show time slot. According to the station receptionist, all on-air personnel will return on Monday, 3/6, including the popular morning show host, Mark Maloney.
Personally, I think this is one of the stupidest moves in Mid-Michigan radio in quite some time. Even with CHR on the low point in its cyclic ebb and tide history and the immense popularity of hot country, WVIC had a virtual monopoly on the CHR listeners in the market. Additionally, there are already several country stations in Lansing, with other high-power country outlets in nearby cities that reach Lansing with a clear signal.
When asked why they flipped formats, the receptionist said it was a "corporate decision arrived at after in-depth research." She went on to say that a hot country format "seems to be what 94.9 listeners wanted."
I'm sorry, but I have a hard time believing that several thousand CHR station listeners really wanted country music, but just didn't want to reach over and flip their radio dial to one of the other hot country stations in town. C'mon. I was one of their listeners (for 9-1/2 years straight) and I really dislike country. (Just my personal preference, mind you.)
I also asked why they picked this particular format, since, as I mentioned, they had a monopoly on CHR and there are several other country stations in the market. She said, "Oh, we're different! We're Wild Country!" Geez, another format! Now we have the completely different formats of modern country, young country, hot country, and now WILD country! I'm sorry, but Lansing and E. Lansing have a combined population of 175,000. I'd think that four hot/modern/young/WILD! country stations (out of 18 in the area, including non-comms) is quite adequate, but now there's a fifth! WVIC as a CHR was consistently a popular station, maybe not number one, but successful enough.
My question is how can five hot/young/etc... country stations survive in a medium-sized market in the middle of Michigan? I can see it happening in more Southern areas where country has always been more popular, but in Michigan? Even a market as big as Detroit only has three country outlets, and that IS counting CHYR-FM from Leamington, Ontario! Taking this one step further, a diverse market such as Chicago with over six million people only has TWO country FMs! Unless I'm missing some really key point here, either the consultant was drunk, or the station owners (Goodrich Broadcasting, who have owned 'VIC since mid-1981) were..

Sorry this post got a little long, but this just gets my dander up. Not just because I was a loyal listener, but because they changed to a format that is quite overdone already! AND they're going up against the no.1 in the market that has been country since Hank Williams Sr's grandparents were kids! All I can say is good luck and won't be surprised if they get a 0.3 in the next Arbs!

>Am I to assume that the wine column I see in a major national wine magazine is done by the former WABC jock: Dan Ingram. ?

It may very well be. I recall listening to the old WNEW, a few weeks before its unfortunate demise. They were doing a live remote from some restaurant, when out of the blue, I heard this fellow talking about wine, and actually sounding like he knew what he was talking about. When the fading cleared, the voice was unmistakeable: Dan Ingram(who kept sneaking the WCBS-FM call letters in, whenever he could).

>Well, I hear the Eagle format is now sweeping the country.

>Here in Boston we have 93.7 fm booming in from 30 miles outside the city with the Eagle slogan, best hits of the
>70's.

Actually, Boston is late in getting a '70s station. As far as '70s sweeping the country, don't be surprised if many of these stations wind up getting swept out over the next few years. Following strong debuts, most have leveled off, and some have begun to slip. The problem? High burn out. After everyone gets over their initial "oh wow" reaction to the music, the format can start to get pretty tedious. Lets face it... there are no new '70s songs. At least typical oldies stations can add more music as the years go by. And classic rock stations can play a cut from the recent Neil Young album, and identify it as new music from a classic artist. But '70s stations are limited to one decade. And much of the music of the early '70s has little to do with the music of the late '70s. The beginning and end of the decade were very different times. "Hold Your Head Up" by Argent sounds real funny crashing into "Night Fever" by the Bee Gees.

Thank God that Top 40 is showing signs of strength. New music has to be played, so that there will be product for the oldies formats of the future. It's a dirty job, but somebody has to do it!

1394. EBS/EAS FAQ

Newsgroup: rec.radio.broadcasting
Date: 1995-03-03 01:35:47 UTC
From: jsa000@colum.edu
Message-ID: <3j5rpj$emq@vixen.cso.uiuc.edu>
Source record: 34330

The trade press has made an attempt at covering the new EAS rules, but as is often the case, has not covered it succinctly. I have prepared this FAQ as a help to those who still have EBS/EAS questions.

1. Do I have to have my EBS equipment modified?
Yes. All current EBS equipment requires modification or re-calibration for proper operation under EAS rules. There is no known EBS equipment that inherently meets all EAS specifications.

2. How much time do I have to modify my EBS equipment?
3. How does the modification change how my EBS equipment operates?

To meet new EAS rules, EBS decoders must be capable of detecting an 8 second EBS tone after July 1, 1995. EBS encoders may begin transmitting the shortened tone after July 1, 1995, but are not required to. It is to every station's advantage to transmit as short a tone as is legal to avoid tune-out. The short tone must not be transmitted until after July 1, 1995.

Current EBS decoders are required to respond to at least 8 but not more than 17 seconds of tone. Decoders are now set for the middle of this range, 12-14 seconds. Thus, and 8 second tone would be ignored.

4. If I send my EBS unit out for modification, what do I use while it's gone?

The essence of FCC Rules part 73.933 paragraph (d) is that you have 60 days to operate without any EBS equipment while it's being repaired. An entry must be made in your log on the date the equipment is removed from service, and the date it is returned to service. You do not need to notify the Commission. While the equipment is out, you must still transmit weekly EBS tests comprised of the Test Script without the tone. You obviously cannot receive tests during the repair period.

5. Can I use a recording of the tone while the encoder is out of service?

You cannot record the tone on a cart and use the cart for tests or alerts. Carts have enough speed variation that the carted tone no longer will meet FCC specs, and will not trigger decoders. When the current EBS rules were written, digital recorders did not exist. Even though the audio performance of a digital recorder would satisfy the specifications of the tone itself, a strict reading of Part 73.940 would indicate that no recording method would fulfill all the requirements for an "encoder device" as outlined in this part, because the recorder would not have the "indicating device" of paragraph (i) nor the "switch guard" of paragraph (j). It is also unlikely that all digital recorders would meet the power

supply specs in paragraph (g). Even considering a digital recording of the tone as a "roll your own" encoder violates 73.943 since it has not been submitted for type acceptance.

While using a digital recording of the tone would result in proper operation of the system, and would in practice be indistinguishable from a real EBS tone, the equipment used is not technically acceptable to the FCC.

6. Once modified, can I still use the EBS equipment for tones and tests until July 1, 1995?

If the modifications are properly done, the equipment will operate acceptably both before and after the July 1 deadline. Shortening the decoder time to the recommended 3.5 seconds results in a longer audible received tone, but still provides reliable test reception. Proper encoder modifications provide the user with a special switch that can select the long or short tone. The switch must be left in the long tone position until July 1, 1995, after which using the short tone is optional. The FCC suggests that stations may wish to transmit a long tone for real EBS activations, and the short tone for tests, but this is not a requirement.

7. Once modified, does my EBS equipment meet all EAS rules for the future?

No. Using modified EBS equipment will get you through until July 1, 1996. On that date, all stations will be required to install digital EAS decoding equipment, and begin using digital EAS encoding equipment. As of this writing, EAS equipment is just becoming available, but the exact implementation and distribution of EAS data has not solidified. We expect much discussion of this at this years NAB convention. Stations should budget for new EAS equipment to be installed prior to July 1, 1996. Note that the EBS tone will still be required to be transmitted even after full EAS implementation.

On July 1, 1997, stations are no longer required to decode the EBS tone. EBS receivers will be obsolete. EBS encoders may still be used to generate the EBS tone (attention signal) as it will be required as part of EAS.

The following is the EBS/EAS equipment timetable:

NOW - Stations must transmit 20 - 25 second EBS tones, and detect tones longer than 8 - 16 seconds (decoders are set to 12-14 seconds now).

July 1, 1995 - All stations must be able to decode 8 second EBS tones. Stations are to generate tones from 8-25 seconds long. (Most will want to generate 8 second tones) Stations may start transmitting digital EAS codes.

July 1, 1996 - All stations are required to transmit and receive EAS codes. Stations still receive EBS tone, and generate shortened EBS tone.

July 1, 1997- EBS tone decoders/receivers no longer required. Stations continue to transmit EBS tone, but only as an audible attention signal.

EAS fully implemented.

End FAQ

So far, these top the list of EBS/EAS questions we have answered. The following is provided as Frequently Unasked Questions, or questions EBS participants have, but may not ask us.

1. Who can modify my EBS equipment for EAS operation?

Possible modification providers (in order of descending cost)

1. DIY - Do It Yourself. Many station engineers are able to modify EBS equipment. Modification do required some research, and in the case of many units, are not straight forward. The cost here is not only in time (it took us several hours of head scratching on one popular unit) but in cost of potential damaged units in the process of experimentation. Some stations lack the facility for complete checkout of the unit under FCC specs.

2. Return to the Manufacturer. This option may be the most costly in terms of money, but you are assured of having the modifications done properly. Most manufacturers are not set up to handle the volume of repairs that this is likely to generate, and turn around may be slow. At least two manufacturers of popular EBS equipment have gone out of business.

3. Use a third-party modification service. This is the lowest cost, most expedient of all options. There are at least two of these services in operation to date. Cost varies, but (at least in our case) costs can be held down by volume of mods. These services have the advantage of vast experience with all brands, and can (again in our case) offer comprehensive check-out and repairs as well. Also, these services have been designed to handle anticipated volume of EBS modifications (ours certainly, but we suspect others have done this too).

FUQ #2: I have and EBS unit at my studio and one at my home for unattended operation. Must both be modified?

Yes. Any EBS unit that is intended to be used after July 1, 1995 must be modified to decode the short tone.

FUQ #3: Since I will have to buy new EAS equipment before July 1, 1996, why spend money now fixing or modifying my old EBS gear?

Refer to FUQ #2 answer, but also consider that the first EAS equipment available may not be the most affordable, or the most desirable. It would make sense to wait at least until this time next year to select the optimum EAS equipment for you. There are far too many old war stories about the first Two Tone EBS units installed in 1975, and how expensive and trouble ridden they were. As EBS modifiers, we've seen the innards of many generations of EBS gear. It's impressive to see how the same basic design has changed and improved over the years. Don't be over-anxious. Shop carefully and choose the best unit from competative

field after it has a chance to develop.

Copying this FAQ and distributing it to your management,
engineering dept., and group is encouraged. Spread it around!

I invite any with further questions or comments to contact me my email,
fax, or phone.

To Steve and all who are in interested in the Radio Hall of fame:

You DO NOT need to be a radio professional to help your favorite personality
get into the RHOF. All you need to do is become a member of the
RHOF by April 1, 1995, and you will be sent a ballot. The very small membership
fee is the only requirement...so almost everyone is eligible. If you are
interested, contact Katy at (312) 629-6014, and she will make sure you will
get a chance to vote. Just do me a favor....when you call tell
her you read this message. :)

hoeffel@aol.com (Hoeffel) writes:

>Wow... both of you guys need to take a deep breath. You'd think that Big
>Brother was taking over the airwaves tomorrow.

Not Big Brother... Big business. There are a number of major corporations that appear to be preparing to buy up hundreds of local stations as soon as regulations can be changed to allow it. Among the restrictions targetted for elimination are rules preventing foreign owners from buying up stations. Your favorite local station may soon be owned by Germans, Japanese or even the Chinese Red Army.

>If networks and automation
>were going to take over local radio, it would have happened already.

Today we have satellites to distribute high-quality audio cheaply and computers that make it much cheaper to produce radio programming than it used to be. The end of the mass-marketing era and the advent of narrowly targetted marketing campaigns make radio, which of all the traditional media is most well suited for this type of marketing, very profitable. The end of regulatory barriers make the big money invasion of radio inevitable... unless the public acts to stop it.

>Why are we seeing duopoly and consolidation? Because too many stations
>were licensed in the '80s.

That's what Roy Stewart said at the New Orleans NAB Radio Show in 1992 when explaining the new duopoly rules. There certainly were too many stations built in the eighties, no one can dispute that. A lot of people lost quite a bit of money in this industry when the economy went south. However the big powers in the industry are clearly not satisfied with two AM's and two FM's in a market. They want to be able to own it all. The idea that the airwaves are a public resource is entirely rejected by these guys. _Broadcasting and Cable_ says there should be no social compact between broadcasting and the public

A lot of people lost quite a bit of money in this industry when the economy went south. However the big powers in the industry are clearly not satisfied with two AM's and two FM's in a market. They want to own it all. The idea that the airwaves are a public resource is entirely rejected by these guys. _Broadcasting and Cable_ says there should be no social compact between broadcasting and the public. When Reed Hundt criticized broadcasters at last year's Radio Show for not taking responsibility for the anger and cynicism some of their programming was promoting, members of the audience mumbled that he didn't understand what radio was all about. It is clear that too many of the people running our radio stations don't give a damn about serving the public; they're in it for the fast buck. They're like the rail barons of a hundred years ago: the public be damned.

Right now most broadcasters are still honest businessmen and women who got into radio because they care about their communities and take their role as public trustees very seriously. The problem is with the large, well financed money machines which care neither for worker nor neighbor but only for profit. These guys are bad news; if you want your children to grow up in healthy communities where hard, honest work is rewarded, write anybody you can think of and encourage them to keep radio in the hands of independent local broadcasters committed to community service.

There are managers, sales managers and even announcers who fear the heavy hand of the FCC and inhibit their racier comments on the air.
There are jocks, talk hosts and (yes, they know it's going on) managers who delight in pushing the edge of offending with shock shows, and occasionally may get reprimands, from the FCC or local listeners.
And then there are those who dash headlong into trouble from sources closer to home.
Hence the tale of KSTP-AM, St Paul/Minneapolis talk station that's remained a force on the AM band.
Pro wrestler Jesse "the Body" Ventura, who's also mayor of a Twin Cities suburb, hosts its morning show, followed at 9 AM local time by Barbara Carlson, ex-wife of governor Arne Carlson and the kind of woman who will say the most astounding things, just because she's a shock individual. She's followed by Rush Limbaugh, then Don Vogel, a humorous individual familiar in a couple other markets from his past, whose "stone blind and out of his mind" tagline is delightfully true.
But on January 25, there was a guest host, one Mark Zelenovich, on the air, chatting with his producer Matt "the Rookie" Michalski and callers about Native American treaty rights, a hot issue with regional sportsmen who think tribes get unfair rights to hunting and fishing. First there were remarks about Europeans's guns beating out Indians arrows, then about settling current disputes "by buying off the indians with more gunpowder and liquor."
A caller then said "my ancestors used to shoot Indians."
"Z" says he sort of chuckled and said "let's be kinder and gentler."
After a few more calls, the break included an ad for Treasure Island, a casino run by the Prairie Island Dakota indian tribe.
Casinos are big business in the midwestern reservation areas, and at least one listener contacted Marge Andersen, leader of a local Chippewa band (tribe). She contacted other tribal leaders and they listened to a tape of the broadcast. Several pulled their ads from KSTP.
There are estimates that the lost commercials could cost KSTP hundreds of thousands of dollars in ad revenue.
The tribal leaders are having discussions with KSTP GM Ginny Morris (a daughter of broadcast pioneer Stan Hubbard) and they're quoted as saying that they (the tribes) are pleased to "be in a position to try to generate cultural awareness and sensitivity on behalf of all Native Americans."
As of this writing, the ads are still gone. No word on whether the FCC has or will get involved. There may not be grounds for their intervention.
Money, for now, is the REAL bottom line.

All this reminiscing about great (and near great! <g>) radio station facilities brought to mind the situation of the old WMAL AM-FM-TV.

When it was owned by the Evening Star (which then became the Washington Star, and was then folded by Time Magazine in the 70s), portions of these the stations were located in an old roller-rink building on Connecticut Avenue in Northwest Washington. WMAL-AM's primary studios were located out in Bethesda, Md. just under the antenna array, and the jocks held forth in a studio that looked more living room than anything else. The AM news people and their studios, along with WMAL-FM's jocks and studios, were located at the roller rink on Connecticut Ave. NW. Some of the jocks and newspeople on WMAL-AM worked for years without ever seeing each other. There were many amusing moments when a jock would intro the news, and the newscaster would be stumbling to his or her microphone...or just not be there if the line fom Conn. Ave. to the AM studios was down for some reason! The arrangement on Conn. Ave. benefitted WMAL-TV, since it was able to periodically tap into the award-winning AM's news dept. for reports.

Later, WMAL-AM and WMAL-FM (now WRQX) separated from the TV station after the Star folded, and moved to their present facilities on Jennifer St. in NW D.C. A few years ago, WJLA-TV (former WMAL-TV) moved out of the old roller-rink building, and into plush new quarters inside the Intelsat complex two blocks down the street on Conn. Ave.

I am interested in hearing from other engineers about how they deal with telephones and multiple studios, multiple stations under one roof - same phones?, newsroom recording/couplers, interfacing broadcast phone systems (gentner/telos) with pbx's and key systems.
We are currently using the Gentner Peoplelink for our AOR FM and CHR/TALK AM combo. Contest lines all terminate directly on the plink. Private lines and pbx extensions on the plink come from a Siemans Saturn IIE pbx. Newsphones are a Siemans key system (for the 12 line appearances). Our telephone supplier came up with a one button record function for the newsroom that works incredibly well. Pushing the button on the set causes the line to be transfered to a 4 wire E & M port on the Saturn and then conferenced back to the set so the newsperson can retrieve the caller after recording them. The mixer is connected to the E & M for send and receive. All audio on the Saturn is distributed as 4 wire in the digital domain resulting in a hybrid null better than any broadcast hybrid I've heard.
I would like to replace or expand the news room key system with the on-air lines in the near future for the following reasons:
1. A completely separate system from the business pbx. If it is down, so is your news room and on-air.
2. Newsroom calls could be taken on-air without a lot of button pushing.
3. This system would act as a backup on-air system if I can figure out how to emulate the onair conferencing that I get from the plink.
4. Multiline digital sets could be used in the control rooms for screening/producer, etc.
I have found two pbx's that seem capable, the Rohme 9200 (4 music on hold sources max) and the Northern Telecom Meridian SL1 (music on hold ports unlimited?)

Comments and discussion please..

Thanks

--
73.1211 Broadcast of lottery information.

(a) No licensee of an AM, FM or television broadcast station, except as in paragraph (c) of this section, shall broadcast any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise or scheme, whether said list contains any part or all of such prizes. (18 USC 1304, 62 Stat 763.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or other thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners are required to furnish any money or other thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question. (See 21 FCC 2d 846 [18 RR 2d 1915].)

(c) The provisions of paragraphs (a) and (b) of this section shall not apply to an advertisement, list of prizes or other information concerning:

(1) A lottery conducted by a State acting under authority of State law which is broadcast by a radio or television

station licensed to a location in that State or any other
State which conducts such a lottery. (18 USC 1307(a); 102
Stat 3205.)

1412. Q107- Toronto No new rock no hard rock

Newsgroup: rec.radio.broadcasting
Date: 1995-03-03 01:36:49 UTC
From: HTGL77A@prodigy.com
Message-ID: <3j5rrh$f2k@vixen.cso.uiuc.edu>
Source record: 34324

Q107 has really hit rock bottom in it`s latest format change. Once a leader in North America for AOR , it has now degenerated into a basically a classic rock format with no edge and no energy. This decline has occurred over the last few years. While many stations have switched to the "real rock" format such as CFOX-FM (Vancouver} with the removal of day parting format , Q107 has taken the opposite approach . It`s time for all alienated listeners to call the station and demand a program change so that Toronto can have a real rock station. Phone Q107 at 416-221-0107 during business hours. Many of the jocks want this change also.

This past weekend, the local 70's station, KBGG, played the greatest hits of 1974. I'm sure that it was scripted because I found the same songs being run in the same order at different times.

What I would like to know is if this was a locally created list or if there are services that produce greatest hits sequences.

Thanks,
Rick

What needs to be done? I worked with Shep... briefly... in the mid 70s when I was on the FM side of WOR. The guy's a genius, and deserving of any honors which are out there. I still enjoy finding people here on the West Coast who know how good he is. The latest was fiction/horror writer Dan Simmons, who talked about an homage to Shepard in a book tour interview a while back.

1417. WNBC-AM in the 70s

Newsgroup: rec.radio.broadcasting
Date: 1995-03-03 01:36:59 UTC
From: MICHAEL COHEN <MC446@delphi.com>
Message-ID: <3j5rrr$f4n@vixen.cso.uiuc.edu>
Source record: 34329

If I remember correctly, back in the fall of '77 when the Bee Gees and "Saturday Night Fever" were all the rage, WNBC (660 AM) and WABC (770 AM) were the two main competitors in the Top 40 market, especially for the young teenagers with their AM-only transistor radios.

A few items I remember about WNBC -

1) They had a contest where they would chose a name randomly out of the phonebook and call that person - if the person answered "WNBC is going to make me rich" that person would win $50,000. Two people won within a few months, after which they discontinued the contest.

2) There was a show on Saturday nights at midnight called, surprisingly, the "Saturday Night Special" or something like that. It would feature the music and story of a specific artist, and never seemed to live up to the hype.

3) On Sunday nights, there was a public affairs show called "Focus on Youth", produced by college students. One memorable show featured Sly Stallone being interviewed in a gymn while someone was being pummeled behind him.

4) The station put together an album of local, unsigned acts, and was named "The Homegrown Album". None of the bands on the album ever made it big.

Does any of this stuff ring a bell for anyone out there?

> were the short sketches that were holdovers from NBC's golden age of radio.
> I used to listen to Monitor for the "Duffy's Tavern" duolog by Archie the
> manager....

Monitor did do the Bickersons sketches, which surprised me because comedy record were big at the time and yet they weren't from comedy records. I also remember NBC doing a "Chase & Sanborn's 101st Anniversary Presents Fred Allen" with Bergen/McCarthy hosting a Fred Allen retrospective. I taped it and had the tape for 20 years before it got lost in a move.

> short sketch. On Sundays, WCBS re-ran the radio versions of "Gunsmoke",
> and, "Have Gun Will Travel", but I don't know if they were feeding them
> down the network.

I don't know where else on the network they ran, but KCBS in SF ran "Have Gun" and "Gunsmoke" -- the radio Gunsmoke with William Conrad. I also very vaguely remember "Amos 'n' Andy"; I must have been about 5 years old. I do remember asking my parents and relatives about it and they thought I was hallucinating, but I distinctly remember hearing it on KCBS. At the time I didn't realize these were radio shows which went to TV; just thought they were radio versions of TV shows like Art Linkletter's "Houseparty" (which was identical except for 5 minutes sliced off for radio news). Funny how long it took for program radio to fade away -- Don McNeill's "Breakfast Club" lasted until 1969.

All this remembering has gotten me thinking ....

I used Dan "I hated working at WCBS-FM 101.1" Taylor's reverb when I worked as chief engineer at an AM in Westport, CT some years ago. Our op's manager was good friends with Dan and he borrowed the spring reverb for that 60's "flavor".

I urge all of you to get a copy (if you don't already have one) of the WNBC Retrospective. It's 90 minutes covering the entire history of 66-WNBC from inception to it's final fate. I have this on tape as well as the signoff of 'NBC and the sign-on of 'FAN with Imus doing his now famous Rev. Billy Sol Harkus routine. While I can't promise the world, if you want a copy of this tape email me and if I can scrape up the time, tape and postage I might be able to get you a copy. It's a must for any serious radio enthusiast.

BTW I also collect radio jingles and such so if you want to trade just let me know.

Evan Hammerman wrote:
> If I remember correctly, Cousin Brucie had already moved over
>from WABC by 1975.
> Who else was on the air back then? Imus, of course in the
>morning, but who else?

The WNBC Lineup in 1974-77 for the most part went as follows:
Mornings - Imus
Middays- Cousin Brucie (for about a year), then Joe McCoy
Afternoons - Walt 'Baby' Love (now with R&R)
Evenings - Oogie Pringle (while CB was middays) & The Cousin
Late nights - Dick Summer
Overnights - ????
Weekends - Norm N. Nite, Al Brady

Summer left in 1976, everyone else was blown out when the 1977 switch to a more music, no personality approach, with the exception of Norm N. Nite, who was off for a couple of months, then came back. Imus returned in 1979. Al Brady left in 1975-76 and later returned to program WYNY (NBC's FM sister) in the late 70's-early 80's.

Hope that refreshes your memory.

Fred,
Good to hear from you. I think someone is already doing a "live"
radio show via the Internet. I think it's called Internet Talk. I wonder
how well it works with the standard dialup connection at 14,400 or
less. Also, with the incredible growth of the Internet's user base, I
question whether or not the network can support very many such services
without very heavy compression.

How to turn 1 million into 15 million: Deregulation bonanza

Group W Radio, owner of WMAQ (news, Chicago White Sox and Chicago Bulls) has signed an agreement to purchase WXRT (Progressive rock-93.1 FM) and WSCR (sports talk-820 AM) for a reported $59 million dollars from Diamond Broadcasting. Principal owner of Diamond, Dan Lee noted it was a painful decision to accept the offer. Diamond started WSCR for a reported 1 million dollars in 1992. SCR reportedly brought 15 million of the 59 million dollar package.

Group W has targetted Chicago as a growth opportunity. The purchase will give Group W a trio of varying demographics to sell to advertisers. The new triumvirate will rival Evergreens' broadcasting stable of WLUP (FM-97.9), WRCX (FM-103.5) and WMVP (AM-1000).

Speculation has begun that Group W will use WSCR, which will become a 24 hour station this spring, as a shadow station for any Bulls/White Sox conflicts. There is also speculation that WMAQ will move its evening "Sports Huddle" program to WSCR. That would allow MAQ to concentrate on news. For now, Group W management has stated that no changes are planned regarding either WSCR or WXRT. Here's to hoping that Group W doesn't screw up either XRT or SCR. In particular, the MAQ sports huddle may be the worst sports talk programming in the city. Two of the main hosts (Steve Olken and a radio nomad who goes by the name Chris Cross) have an appalling lack of knowledge regarding sports.

Steve Rosenbloom, Chicago Sun Times columnist reports that Jerry Reinsdorf, owner of the White Sox and Bulls has reached an agreement to move both teams to WMVP. There have been rumors that Reinsdorf would receive an equity stake in the station in return for moving both teams to WMVP. MVP trailed rival WSCR in the fall ratings.

Comings and goings:

WLUP has added a new host to its personality stable. Liz Wilde, known as "The Wilde Thing" on Boston's WAAF takes over the 7-11pm shift from Tony Fitzpatrick and Wendy Snyder. Tony and Wendy produced the poorest ratings on the station during their evening show. Tony will be spending more time with the family while Wendy Snyder is expected to stay with the station in some capacity. Liz is described as a female "shock jock".

Christopher Michaels, formerly of WMAQ, takes over as morning news anchor on the Ed Vrdolyak/Ty Wansley radio show mornings on WJJD (AM-1160). Chris replaced Kurt Schaeffer who is now looking for work.

Lee Douglas takes over as program director of WCKG (FM-105.9). Douglas, who replaces Mike Dirkx, was formerly at KYCY-FM in San Francisco and WOFX in

Cincinnati. It will be Lee who decides whether to play Rolling Stones and The Who songs 4 or 5 times a day on Chicago's Dinosaur rock station.

Sue Wiencek takes over as morning news anchor on WPNT. Sue takes over from Eric Stallone. Reports of a previous deal with Wayne Messmer were premature.

Sean Ross has resigned as Program director of WGCI-AM. Sean is now the editor of the Billboard's weekly Airplay Monitor publication. Mike Watkins, former GCI PD returns to the station as PD. Mike was last at WALR-FM in Atlanta.

Cara Stern Carriveau, PD and mid-day jock at suburban WABT has resigned to become the PD at Shadow Broadcasting Services.

Back by popular demand:

All Spanish WIND (AM-560) has reinstated its half hour noon news program. News director Luis de Gonzalez, news director at sister station WOJO (FM-105.1) will handle the broadcast.

San Diego Radio Watchers: March 3, 1995

Here's what is going on in the 55th market:
[Oceanside, Carlsbad, San Marcos, and Escondido]

Howard Stern's morning show entry via XETRA-FM [91.1, 100kwERP]
has turned the rest of the airwaves on a sharper edge. As reported in
Friday's Escondido Times - Advocate, Nina Riba, the air traffic
reporter for Rock 102 [KIOZ Oceanside 102.1] gave a long -- and
detailed -- liason on a train. Riba, who is a lesbian, gives new
meaning to traffic reports in San Diego county.

The morning team at KFMB [760, 5kw-D, 50kw DAII N] Hudson &
Baurer have taken the harder edge. The usual barnyard banter has
turned to privey material in some aspects. Harder words for a
conservative market. In some circles, this could be the legendary
teams swan song -- I believe they have at least 20-years in this
market.

One important piece of information: XETRA-AM [690, 50kw DA]
has had the highest books for the sports station on record. This is
partially because of the SD Chargers football team; and continued
excellence on talent and sports programming. Their plate is full;
and it's QUALITY.

For the latest radio log for San Diego county, please e-mail me.
This week's special includes ASCII photos of a bare-naked antenna.
It's yours for the asking.

I have been real skeptical about MD's... Reading a few reviews about them in Radioworld leave the impression (on me anyway) they they shouldn't be fooled with.

I work part-time in radio.... We have replaced our NAB carts with 360 Systems "Digicart". These machines have hard drives in them, and can store 8 hours max of stereo audio.

there's no need for us to grab a "cart" and insert it into a drive, everytime we need to play something. The carts themselves are only inserted when we need to dub stuff off onto the hard drive.

this is a plus, because it helps reduce "wear and tear".

|: bad thing.
|: ...
|: I didn't say that the Roland was better than the Orban, just more powerful
|: and a third or less the price. ...
|: By all means look at both...
|: but trust me on this...any salesperson will try and steer you away
|: from the 8K unit into the 30K unitif he can...

The Orban workstation is available only from Harris/Allied in the US, and from other dealers worldwide. But once you buy it, you're supported by Orban directly.

And the price is much less than you specify. In fact, Allied has a complete system including rollaround cabinet for $18k. Check the ads in Radio World.

If you're comparing price, consider upgrade and support costs: _EVERY_ DSE 7000, no matter how old, gets the latest software upgrades FREE. No additional hardware or expense is required... even for such DSP-wonders as the excellent sounding, fast time compression they mailed out last week.

But I agree completely with your statement <<By all means look at both...>>.

Get both in your studio for a couple of weeks. See which one makes you more productive and better sounding, for the way _you_ work in the kind of station _you_ run.

Then do the numbers based on return on investment. It's the only way to run a business.

1433. Parabolic Disk antenna source

Date: 1995-03-05 10:54:28 UTC
From: MUENZLERK@thorin.uthscsa.edu
Message-ID: <3jc594$dcb@vixen.cso.uiuc.edu>
Source record: 34341

Greetings,
I am looking for a source of 3 or 4 foot wire parabolic
dish antennas. I need the wire-mesh type, not the solid
aluminum. Something like the studio to transmitter
links on 900MHz. Sears used to sell one as an ultra-fring
UHF TV antenna but they have since discontinued it.
Thanks

Kevin Muenzler

Why not get together with a broadcast engineer and work on a field
strenght project? Every so often, those engineers have to go out in the
field and measure how strong their signals are. They may be having a
problem in locating the spot where they took previous measurement.
If you want to go one better, get a programmable field-strength meter,
a GPS with serial output, and hook them to a PC. The truck can then
drive down the street, taking measurements, and the PC records the
readings along with the position. The data can then be processed to
generate a signal strength contour map.

1436. Japan's FM802, continuing thread in scj

Newsgroup: rec.radio.broadcasting

In The States one can usually pick a station that more or less covers one
or two broad categories of music (i.e. "a rock station", "a country
station", "an easy-listiening station", etc.). The most common critisim is
that they play the same group of specific songs over and over and over.

For reasons I don't know, there are almost not radio stations in Japan
(relatively speaking, of course). Perhaps that's why FM802 attemps to be
everything. But unless one likes all types of music known to man, they
virtually guarantee that they will play music you don't want to hear.

Now, if you knew they were going to start the acid heavy metal, you could
choose to tune in or out depending upon your tastes. But they don't segment
things all that much, and you're likely to get French show-tune music back
to back with old Ozzy Ozborn. Personally, I find that annoying.

Does anyone know why there are so few stations in Japan? Is the red tape
and/or taxes too much to make it worth it?

I like the bilingual DJ's. For me it is a great way to study Japanese
since the DJ's quite often do an immediate translation of what they have
said in both languages. Although I do notice that sometimes when
they interview foreign musicians in English, the Japanese translation
of course gets truncated quite badly.

I'm only in the Osaka regions briefly when I'm on business trips, but
I remember enjoying the Osaka FM802 better than Tokyo J-WAVE. I enjoy
J-WAVE but it just gets too wierd after midnight. I do a lot of my work
in the wee early hours and I usually switch over to the Armed Forces
Channel on AM. I'd rather put up with C&W and poor AM sonics than the
inane after midnight J-WAVE programming.

Just my 2 yen worth

Hmmmm...resent the "variety of music"? That is such an interesting
comment considering most radio stations usually get critised for playing
the same music (or the same type of music) over and over.

Perhaps the quesion should be..."What could FM802 do to be better"?

Bob

I thought it was great the first year, when every night had a taped program
from a different country. My favorite was the Italian radio station on Tuesday
(or was it Wednesday? It's been so long.) The next year was kind of dull.

So what's it like now?
--
Hisashi Todd Fujinaka (htodd@q7.com)
Home is where you wear your hat.

|> If you've even been to Osaka, you've probably heard FM802. I'd like to
|> read your thoughts and/or opinions about this station.

When I lived in Osaka (Takatsuki-city in northern Osaka-fu), I could get exactly three FM radio stations. Period. When I'd moved (summer '89) FM802 had just come on line. Other than that, there was NHK FM and one other rather nondescript station.

Compared to the others, FM802 was much better when I was in a non-classical mood, but I soon grew to really dislike FM802. They play a really wide variety of music -- more or less everything except the classical-type stuff. So, in the same hour, you might hear country, acid rock, blues, Japanese pop, cutting edge British alternative, contemporary, folk, classic rock, and of course, commercials. Classical was already on the dial, so they wanted to be everything else. Oh, and they want to be "funky" too (hence they call themselves "funky 802", and the bumperstickers on just about every four-wheeled vehicle around here attests to their success).

I've just moved about 10 miles north into Kyoto prefecture and now can't get FM802 very well (can get it, but not in stereo -- if I had better antenna placement I probably could), but now can get Kyoto's "alpha station" (whatever that it). It seems to be an FM802 wannabe (it came on the scene a few years after FM802) but their mix doesn't seem to be as bad as FM802, or at least I'm not sick of it yet. I even heard a great violin concerto the other day.

But for the most part, I stick with my CD collection.

Other threads mention the bilingual DJs. Indeed on FM802 a lot of the verbal "headings" are English. In the morning they say (in ultra-clear English) "At the tone, the time is seven o'clock", followed by a bit of dead air and then the tone. Once set my stereo to wake me up at 7:00 and I must have had the clock off by a few seconds, for it came on right before the guy said "at the tone..." and scared the _____ out of me!

They also announce "weather information", "headline news", "traffic information", etc. in English but give the info in Japanese.

It seems the Kyoto "alpha station" sometimes does the same thing. But they also have an English-speaking DJ that obviously can't speak a word of Japanese, and he gives the news, traffic, etc. in English. Seems very silly to me.

1441. KGO's Dunbar nominated for Hall of Fame

Newsgroup: rec.radio.broadcasting
Date: 1995-03-05 10:54:34 UTC
From: dk@crl.com
Message-ID: <3jc59a$dcr@vixen.cso.uiuc.edu>
Source record: 34349

KGO's Jim Dunbar has been nominated to the radio Hall of Fame. He has been with KGO since 1962 (32 years!) when he came in from rocker WLS in Chicago to try to do something with money-losing KGO. He developed KGO as a news/talk station, and the station has been a ratings winner for years.

Early in the KGO transformation, Dunbar saw that KGO had little if any local identity, so he hit upon the idea of doing the talkshows from nightspots about town. Owen Spann (later of ABC Talkradio) did a morning show from various famous local restaurants, and the late Ira Blue did a nightly show from the original famous "Hungry i" nightclub.

In later years, Dunbar helped develop the "AM" TV program, first on KGO-TV, then locally in the other ABC-owned markets. In the late 1960s he reputedly got a phone call from the famous Zodiac killer, though this has never been substantiated.

Dunbar now co-hosts the morning news on KGO.

Source record: 34251

Mike's experience working near the pizza ovens reminds me to mention that in the midst of the massive renovation/expansion that is now in its second year at WBZ TV and radio, the TV newsroom had to be gutted so it could be completely rebuilt. So TV news spent several glorious months upstairs in the area that would later become the new cafeteria. The assignment desk was what's now the lunch counter. Videotapes were stored in the industrial oven (before the gas was connected :-), there were 2-way radios in the fridge (before it was turned on :-)... but hey...it all worked!

Just back from Rochester NY, where I should mention that WDKX-103.9 is another funeral-home conversion. Nearby in Syracuse, WIXT-9 used to be in the basement of the Shoppingtown Mall in Dewitt, until they built a new freestanding facility in the late 80s.

And we can't let this thread go without mentioning WDME-FM 103.1 Dover-Foxcroft ME...housed in a railroad car! I've heard their sign-off. It talks about the WDME train pulling into the station for the night...and how the next trip begins at 6 the next morning. The car is actually welded to a short section of track. It is reportedly _larger_ than the station's former facility...yipes!

Also, a note that the land where WBZ's studios now sit was the transmitter of the old WCOP-1120/1150AM from the 1930s until 1948. And the current WROL-950 studio/tx site in Saugus was, until 1948 or so, the WHDH-830/850AM site. It was almost a straight swap -- WHDH moved to a site near the Needham town dump, less than a mile from the former 950 site!

Money is always the bottom line.

But KSTP is not a station you can roll over easily. Like my station, they are locally owned and very stubborn about who is in control.

There is no FCC problem here, just some folks who think they can use economic power to change a radio station's policy. And KSTP is in good hands.

David... Boy, does "hearing" your rendition of the old NBC Monitor jingle bring back some good memories! I'm barely old enough to remember hearing some of the weekend Monitor shows...and only now appreciating what it was I was hearing. It was particularly fun listening to "The Joy Boys", Ed Walker and Willard Scott, periodically re-play or re-create some of their better bits from their weekday afternoon-drive show on the old WRC-AM. I loved hearing the newscasters open their newscasts by saying "NBC Monitor News on the Hour...I['m David Rush". And speaking of jingles...one of my favorite was a kind of a long "song" jingle backtimed to the top of the hour, which the talent would use to close an hour just before they handed off to another part of the country... what sounded like a church chorus sang "YOU'RE ON THE MONITOR BEACON...(pause)....OHHHHHHHHHHH, YEAHHHHHHHHHHHHHHHH". Big musical flourish, just enough time for the local station to insert an ID, and then the news.

Does anyone remember when NBC finally pulled the plug on "Monitor"?

Cheers,
Max

The Blackout of 1977 was a very memorable night for me. I was 17 years old at the time living in Berkshire County of Massachusetts and was watching WPIX "11Alive !" from New York on cable. It was almost time for "Channel 11 Action News" with Pat Harper and Steve Bosh. It never made it to the air, Channel 11 was gone. All New York City stations including WNEW-TV (5) and WOR-TV (9) were gone also. So, time for the radio and naturally I turned to "Musicradio 77" WABC and sure enough the music stopped and Chuck Leonard switched into a more serious side of things. Apparently a major substation was hit by lightning and zorched a few transformers. This was apparently one of the main feeders from Upstate leaving New York City in the dark. Chuck was doing a "bang-up" job trying to piece all of the information with what little sources he could muster. He did still say "10:30, WABC Music Time" eventhough the music had stopped about 30 minutes earlier. The thing I remember was the "spooky" feeling I had, 65 miles north of New York. Were we going to get the blackout also, as the power grid system tends to fall like dominoes.
I think so many people kept their ears right on WABC throughout the night. One could only imagine the chaos that reigned in that City of 8 million souls. The next day, we all saw it live and in color.....the looters, the violence and the destruction. Thank God that great Clear Channel Giant on 770 was there with Chuck Leonard on the controls. It had all of the earmarks of radio history and YOU heard LIVE ! What a night!

Owned stations, last I counted were: KPFA & KPFB Berkeley, KPFK Los Angeles, KPFT Houston, WBAI New York, and WPFW Washington DC. There are also lots (dozens, hundreds?) of Pacifica affiliates which take various program offerings such as live events coverage or the national Pacifica news during the dinner hour.

Studio tidbits:

* I was told KFWB's studios and newsroom is in what used to be a supermarket in Hollywood, California.
* Z-102 in Tuscaloosa, Alabama (calls escape me) is in the middle of a giant cow pasture. A friend of mine who used to do afternoon drive there opened the studio window one afternoon, which was directly behind her as she faced the console, and when she opened the mic to do a break, a cow stuck his head in and grunted. The aircheck was pretty funny.
* CNN's first home, on Techwood Drive in Atlanta, used to be a Country Club. The old newsroom was apparently built over what used to be an indoor swimming pool. The network is now at CNN Center downtown, which used to be the OMNI International Complex. Part of the complex used to be home to Sid and Marty Kroft's World of Fun Amusement Park. When CNNRadio was expanding and workers popped out the ceiling tiles, you could see painted trees and other oddities left behind from one of Kroft's attractions.

I am helping a friend out with a project and am looking to speak with anyone who is familiar with Phoenix radio, circa 1987-1988. It is crucial that I get the information I am looking for by the early part of the week of March 6.

If you know anything at all about the market during that time, I would appreciate if you could write back via Email. Thanks!

It's time for me to admit something.

I was there for three days two weeks ago. Most of my time was occupied by
an IBM network workshop and I just did not have an opportunity to listen to
much radio (maybe about two hours' worth). I thought my resulting lack
of interest in writing about it was due to my hectic schedule when I was
at IBM in Cary. So when CSB wrote:

Hello Everyone:

For anyone interested, on Thursday March 2nd, WDCK-FM in Richmond switched formats from Oldies to AOR. This format was switch was accompanied by a change in call letters, from WDCK to WLEE. Benchmark Communications owns both WDCK-FM (96.5) and WVGO-FM (106.5). The change in call letters was accomplished through the purchase of WLEE-AM 1320 (in Richmond) by Benchmark from Max Pearson, former owner of a chain of Richmond automobile dealerships in Richmond, who also had owned AM 1320. Since the format switch on Thursday, AM 1320 has temporarily gone dark, while WDCK has acquired WLEE's call letters along with their new AOR format. WVGO, ironically, used to be an oldies station (Oldies 106) prior to switching to their current modern rock format. Both WDCK (now WLEE) and WVGO have been in a duoply sharing a common studio building for the past several years. The now defunct WLEE-AM recently came into the spotlight as being the station to host the now syndicated Blanquita Cullum show, a "Rush Limbaugh" look-alike in talk radio. AM 1320 in Richmond is expected to return to the air shortly, under a different format.

Issue #10 of the RADIO RESISTOR'S BULLETIN is now available by e-mail and
in a 10 page paper edition thru the post.

The BULLETIN is a publication devoted to the issues effecting
non-commercial radio in the Unites States and beyond. (We currently have
several hundred readers and subscribers around the world.) Originally
conceived of as a forum for the voices of the volunteers that make much of
non-commercial broadcasting possible, the Bulletin's readership has grown
to include anyone who feels passionately about the state of community,
public, college, pirate-micro -- well, all kinds of non-commercial
broadcasting.

Issue #10 includes:

The DARC look of radio.
Frank Haulgren writes about the evolution of
The Dublin Alternative Radio Collective.
"...The station is not the goal...
freeing up the airwaves is..."

Radio ZID under attack in Sarajevo, By Jo van der Spek
the war comes home to Sarajevo's alternative media

The CPB.
Is the future of non-comm broadcasting tied to its fate?
--- 3 Opinions:
Jon Bekken, Editor of the Democratic Communique
"...federal funds inspired a cycle of
dependence and professionalization that
has sapped the strength of many
community broadcaters."

Allison Kuttner, President of WDIY, Washington, DC
"Funding comes from funders who support things
they like and want to be identified with,
things that won't embarass them. It's the
same... whether they're 'members' or the
federal government."

David Piszcz, WERU-FM's interim Program Director
"If the non-commercial broadcaters are suddenly
non-viable financially, valuable licenses
could be sold off to interested parties
like Mr. Murdock..."

Bay Area micros lead movement
Judge Refuses FRB injunction By Stephen Dunifer

NO ALTERNATIVE, By Ken Nagelberg
The Death of Alternative Radio in Baton Rouge
"Despite commonly held beliefs that the
academic world is... more democratic than
the 'real world', it is in fact, as
autocratic and conservative a business
and industry."

Radio Briefs:
CURSE, KCMU, and closure in Seattle.
News from the 'Hammer'
more

And more... letters, Publication Notes, INFOBOX

For a sample copy of the RADIO RESISTOR'S BULLETIN send an e-mail request to the address below or if you prefer a copy of the paper edition send a first class stamp to the PO Box.

The Bulletin is a participatory publication. Readers are encouraged to provide ideas, comments, letters and articles. It's not about being a journalist or freelance writer necessarily -- it's about caring, passionately, about challenging and engaging non-commercial radio. Like it was supposed to be.

Subscription information provided by request.

Oh, boy. Here we go-- the start of a totally meaningless flame war on the subject of all-kazoo radio shows. <g>

>>There were, still, many nights when old Shep didn't have much to say. The 100% kazoo shows.<<

Didn't have much to say??? Words alone could not truly express the palm-to-the-forehead-smack reaction one experiences while listening to such classic musical selections as "The Sheik of Araby," "The Bear Missed the Train," or, heaven forbid, Shep's own beloved theme, "The Get Ready Polka." No, I submit to you, the most appropriate reaction, nay, the only course possible for an addled, junk-infested modern man or woman when confronted such transcendent musical masterpieces is to take out your kazoo and blat along! Shep is telling us we must, whether we want to or not, submit to the inevitabilty of our junk culture! One kazoo, my friend, is worth a thousand words!

<<Incidentally, I think Shep invented rustling papers and junk, which irritated most professionals, but I found very appealing.>>

Actually, Shep invented the United States Army's 103rd Messkit Repair Division, in which we all proudly served.

"EXCELSIOR, YOU FATHEAD!!!"

|: Lately we have seemed to spend too much time making cassettes at our studio,
|: then waiting for a messenger to take them to the agency for approval. It
|: would be so much nicer if we could send to the agency or client in
real time.
|: It seems like something as good as even CD-ROM audio would be acceptable.
|: Is there something short of the significant investment in ISDN equipment
|: that would make this a reality? I don't think our clients would want
to drop
|: too much money to make this idea work.

There's the rub: good quality will require:
a) your clients invest in ISDN with NT-1 and TA (~$600) plus have an
available computer and know enough about the system to receive a
:60/mono/8-bit from you and play it in something close to realtime
b) your clients invest in ISDN with an easy-to-use codec and receive
full bandwidth stereo in realtime, connected directly to their conference
room audio system (~$5500 -- OUCH!)
c) you hook up with a system like Digital Generations, give them a
guarantee of a certain minimum, and send spots with a mouseclick in one
hour. Low capital investment, but the per-spot cost is close to most city
couriers.
d) you use software compressors, educate your clients, and send via
ordinary 14.4k modem. Low cost, but very slow.

We've been down this road, and -- despite having solution B in place here
-- usually end up either:

a) Playing the mix via a high-quality home-brew phone patch, and
educating the client to listen for timing and delivery and trust us about
the mix; or
b) Sending the darn cassette.

You'd be amazed how many clients are willing to trust us about the mix,
after the first couple of jobs.

.....

> You failed to mention that this was in 1961, when few people knew or
>cared about FM. Would they be able to do this in the commercial part of
>the FM band today? NO!
.....

That is correct. But I can recall the time I turned down a chance to build an
FM in Sacramento because I felt the town was too small to be of interest.
Yes, that was a long time ago. In reality you will not be able to build a
station for little money in a valuable location, and to operate on spectrum
that is highly valued. Cheap start ups happened a long time ago
on FM because FM was undesirable. Today, nothing has changed. You must find
spectrum and location that are not highly valued.

A lot of people I know started LPTV stations in big cities. If you got a
license, you could broadcast for the cost of a transmitter and a VCR. Since
then, a few LPTV licenses have sold for more than $1,000,000. In 1985 many
felt LPTV licenses were a joke. Some still feel that way.

When I got into FM, FM car radios were not available. I remember selling FM radios so people could hear our station. In a sense, FM was a joke back then.

Back to LPTV today. An example. Starting in the mid 80's Richard Bogner filed for every channel in and around NYC he could get. His FCC filing fee was, at first, zero. Today it is $490. He filled out his application forms himself with a pen. Didn't even type 'em. His first transmitter was an old Acrodyne junker. Today he has a ring of stations around New York City, including a CP for the World Trade Center. And he is making real money from the things. Seems LPTV is less of a joke, today. Bogner is still pursuing new FCC LPTV authorizations in and near NYC.

My point is unchanged today from 1960. You can fight to obtain a valuable license, and the fight can be expensive. Or, you can go to the fringe and get on the air for very little.

But, I believe those who would rather complain than build are whiners. And, I was saying that those who bitch about "liberal" NRP stations are the same. Newt Gingrich and his friends could have built stations, including NPR affiliates. Instead they whine and bitch. So I think of them as people who don't want to take personal responsibility. Sorry.

.....
> Maybe the Canadian Government will sell you a piece of property near Snow Lake, Manitoba, so you can grow reindeer and have a one-lung station.
.....
Really. You want your first station to be in the big time. I understand that. Any your first job should pay over $200,000 a year. And your first car should be a Jag. OK. !!! If you have a spare $100,000,000 you can buy an LA Mt. Wilson FM!
.....
> Always a possibility! But seriously, "Ordinary People" don't have much
>of a chance to own stations as it is. Except in small town areas where
>it's nearly impossible to operate one financially.
.....
Right. If it were easy, someone else would have done it first.
Probably someone with more money. So, we agree. You grant the Exception for small towns. Exactly right. So, you agree, ordinary people CAN have stations!!!!!!
.....

By the way, a few years ago, for a lark, I filed for and got a Tampa and Salinas LPTV license on channel 6 (FM audio on 87.75 MHz. Or is 100 watts of FM in Tampa too small? Seems no one understands some FM radions tune that low. Anyone want to buy them???

Some additional news on the talk radio front with DC
and national implications;

While either party may have a change of heart, sources
within WRC/980 tell me that Ollie North and the station have
NOT done a deal and in all likelihood will not do a deal to
put him on 'RC in the afternoon and/or on a national satellite
hookup. This leaves a big hole in the schedule, although
the former afternoon host could be moved to mornings to
replace Mike Cuthbert, and the vacancy is now for all intents
and purposes an afternoon drive slot.
Where will Ollie go? Pat Buchanan is leaving his column
and will probably soon go off the air, having declared he will
once again run for President, so Mutual/Westwood One has
an early afternoon national slot opening soon...I can't believe
Ollie isn't interested...

Had the opportunity to use the DSE-7000 at WWNK in Cincinnati this past summer...and loved it! Had never used a DWS...but, within a half-hour of first sitting down at the "DSE," I had turned out a multi-element :60 (4 voice tracks, 2 music tracks, plus stereo effects) that would have taken twice that long to lay up and mix back on an old "analog eight." The DSE-7000 is very "user-friendly."

Add-on costs can be an issue. One thing to keep in mind is storage on the HD. You'll need to go with the DSE's optional add-on storage to archive. The HD for the DSE fills up fast! And to simply archive to reel, DAT or another HD takes away the much needed option of full 8-track storage. Had a client come in while I was at WWNK who needed to recut one line from a six-month old spot. All I did was drop in the new line...and mix! On the other hand, if all I'd had was a DAT archived 2-track mix...well, I won't think about that!

1467. WPLJ NY goes 70s at night

Newsgroup: rec.radio.broadcasting
Date: 1995-03-05 10:54:59 UTC
From: Paul Richards <72212.441@compuserve.com>
Message-ID: <3jc5a3$de4@vixen.cso.uiuc.edu>
Source record: 34275

As of Tuesday February 28, WPLJ-95.5 New York City is all seventies in the evening.

Al Bandiero, who came to WPLJ from Hot 97, had been hosting a Saturday night 70's
on the Adult CHR station that already played some rock 40 oldies (Steve Miller, Boston, "Smoke From a Distant Fire") on a regular basis. The show has now expanded
to six nights a week. The 70's show is on from 8p-midnight.

The fate of "AJ Hammer" who was in the evening shift before Bandiero, is not known.

1468. Old WRKO jocks from the 70's

Newsgroup: rec.radio.broadcasting
Date: 1995-03-05 10:54:59 UTC
From: jgallagh@interserv.com
Message-ID: <3jc5a3$de5@vixen.cso.uiuc.edu>
Source record: 34276

In a recent posting I was wondering about the current whereabouts of some of the big personalities at WRKO in their heyday as a
Drake consulted station (owned by RKO General).

I mentioned Bobby Mitchell, Johnny Williams, Dale Dorman, Shadow Stevens, Jerry Butler, Joel Cash...

then I got an e-mail from JJ Wright asking why I forgot him?

Good question. JJ has of course been on Kiss 108 for many many years now.

He mentioned a few other names from the big 68:

Tony Mann
Charlie Fox
Gary Martin
Chip Hobart
Harry Nelson
Mike Adams
Tom Kennedy

Other follow-up postings indicate that Joel Cash died of cancer....but then someone else recently heard him in Florida ???

I know I heard Gary Martin not too long ago in Southern New Hampshire on a (presumably) low-moderate power fm.

Other info indicates BIG voiced newsman John Masters retired from WRKO the talk station a few years ago. Masters was also the
shop union steward and a hell of a nice guy.

There was another big voiced newsman at WRKO for quite a while. Robert Stevens. Anyone know where he went?

John G. (sorry JJ about the oversight)

>Now, here is a cute song that some local Boston group (who was it ?)
>sang
>about "THE NEW W-R-K_O".....

>"It's the NEW W-R-K-O, in Bostontown.
>It's the NEW W-R-K-O, putting all the rest DOWN !
>WRKO is the one to listen to,
>You hear the greatest music, and man that's TRUE......
>NOW at 6-8-0.....W-R-K-O.......
>W-R-K-O.........
>W-R-K-O........."

I recognize that song. In 1965, when KHJ flipped to Top 40, they had the same song, the lyrics were set to the music of "Little Deuce Coupe" and the vocal group had an ersatz Beach Boys sound. After a couple of verses, the new KHJ jocks came in, each singing a verse, describing their new show.

"I'm Robert W. Morgan, and I'll be startin' your day, six to nine every morning on the new KHJ."

"In the afternoon baby, accept no substitution, get the Real Don Steele and wipe out air pollution!"

And so on.

This was probably a Drake technique for each station, at least in the RKO chain, when they adopted the Drake format.

Boys, Boys, Boys...

This isn't about democracy. This is about making money. And the owners of the station clearly think they can make more money doing country.

If you don't like it, do what I did. Figure out how to buy your own station.

Contrary to what I read here, it is not as difficult as people make it sound and if it was too easy, everybody would do it.

The truth is that Chinese Gong music is a great format if it will cash flow and nobody really gives a flip if your favorite music gets tossed.

It's called capitalism and it seems to work better than any other system I've seen.

Chris has accurately described the Mid Michigan Radio market, and unfortunately been the bearer of very upsetting news to me. I lived in Ionia Michigan when WVIC signed on the air. I listened to WVIC during my School years K-12. I heard them during their first week on the air. The market DEFINATELY does not need another @!* country station. They are served and have been served for years by WITL and several country stations from surrounding cities including powerhouses from Grand Rapids. I would like to bring up the possibility that this could be a publicity stunt of some kind.....It definately got my blood boiling all the way down here in Texas! If it's all for real, I can only hope that their ratings tumble, and boycotts are very publicly organized. But, I don't think that OJ will be found guilty either. Keep us posted Chris! P.S. first WOWO, now WVIC,
:-[RON in DALLAS.

1473. Coalition forms to oppose Exon "decency" bill, S314/HR1004

Newsgroup: rec.radio.broadcasting
Date: 1995-03-06 05:11:02 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <3je5h6$52v@vixen.cso.uiuc.edu>
Source record: 34281

Dear RRB READERS.

This is being sent by special note to the readers of RRB, despite
the fact that it is not specifically about Radio, it was passed along
to me by a collegue and I agree with him that it deem,s publicizing.
I believe that this bill is serious business, and should be dealt with
before it is too lat. Whether you are more Liberal or Conservative,
the net is something we have all come to rely on.

There are already successful suits brought over net-carried material
and it is clear that the anarchy we have come to take for granted is
frightnening to many who would choose to regulate all communication
and speech.

I urge all who value the freedom of speech we enjoy on the net to look
into this furhter and oppose any attempts to regulate net content by
law.

Please do not follow up to this note on rrb/RRB. It is sent out
for information only.

William Pfeiffer
Moderator rec.radio.broadcasting

=CONTENTS
= Introduction
= What you can do
= Contact Information
= Background
= Current status of S. 314
= Where can I learn more about the bill? (URL included)
= Where will I learn about updates to this alert?
= Current list of participating organizations
=
=--
=INTRODUCTION
=
=Dear Net Citizens:
=
=Legislation has been introduced before the Senate which would severely
=restrict your freedom of speech, halt the free flow of information on
=the net, and require all telecommunications carriers to censor your
=public and private communications.
=
=The "Communications Decency Act of 1995" (S. 314), introduced in early

=February by Senators Exon (D-NE) and Gorton (R-WA), would place
=substantial criminal liability on telecommunications carriers (including
=traditional telephone networks, Internet service providers, commercial
=online services such as America Online and Compuserve, and independent
=BBS's) whenever their networks are used to transmit any material
=which is deemed indecent or harassing. In order to avoid these penalties,
=carriers would be forced to restrict the activities of their subscribers
=and censor all public and private communications.
=
=We must act quickly to stop the progress of S. 314. The bill may soon
=be incorporated into Senate telecommunications reform legislation, which
=is currently being drafted by the Senate Commerce Committee. The
=telecommunications reform bill may be introduced as early as mid March,
=and is expected to be considered on a fast track. If S. 314 is included
=in this bill, it will be extremely difficult to change or remove and
=could pass quickly.
=
=We are asking you to join us in urging key members of the Senate to
=prevent S. 314 from being included in Senate telecommunications reform
=measures and to hold open, public hearings on the issue.
=
=--
=WHAT YOU CAN DO (IN ONLY FIVE MINUTES)
=
=
=
=1. Contact Sen. Larry Pressler (R-SD, Commerce Committee Chairman),
= Sen. Bob Packwood (R-OR) and Sen. Ernest Hollings (D-SC, ranking
= member) and urge them to keep S.314 from being incorporated into
= telecommunications reform legislation. You'll find their addresses,
= phone numbers, and fax numbers below.
=
= Also, if you live in:
=
= AK AZ HI KY LA MA ME MO MS MT ND NE NV OR SC SD TX WA WV
=
= you should also contact your own Senator from the Commerce committee.
= Remember, the best and most effective means of influencing a member of
= Congress is to write a letter in your own words.
=
=2. Write/Fax/Email them a letter or make a phone call. Try to mention
= as as many of the points below (marked with a *) as you can fit
= politely into communication.
=
=3. DON'T FORGET TO DROP A NOTE TO VTW@VTW.ORG to tell us who you contacted.
= We'll tally the results and feed them back to all participating
= organizations. It's crucial we have this feedback, even if you just
= got a form letter, or a "thank you" to your phone call.
=
=4. Feel good about yourself. You've just participated in democracy

= without leaving your seat.
=
=5. (Extra bonus activism) Reproduce this alert with the expiration date
= and contact information intact to other non-Usenet places. Fax it
= to your friends, post a copy to your local bulletin board. Please don't
= spam it to places like rec.pets.cats, but place it in places where people
= who don't read a lot of Usenet might see it. Non-net connected BBSs are
= great, as are physical bulletin boards. Please don't post it to email
= lists or newsgroups not related to politics, as this will annoy people.
=
= Most especially, try to reach people in the larger online services,
= such as America OnLine and Compuserve and the large PC networks, such
= as Fidonet.
=
=When writing a letter or making a phone call, try to include the following
=points in your message:
=
=* S. 314 must not be incorporated into the Senate telecommunications
= reform bill.
=
=* The bill would force communications service providers to limit or
= remove my access to file archives, discussion forums, and
= electronic mail.
=
=* S. 314 would dramatically restrict the free flow of information
= through out the online world and limit the free speech and privacy
= rights of individual users.
=
=* Placing criminal liability on communications service providers
= will force providers to censor the activities of their
= subscribers.
=
=* As a user of interactive communications technologies, I am capable
= of deciding for myself and for my children what content I wish to
= receive. The government should not be involved in deciding what
= kinds of content I may access.
=
=* Public hearings must be held to consider possible technological
= means and policy alternatives to government content restrictions
= in interactive media.
=
=---
=CONTACT INFORMATION
=
=Here are the Commerce committee members. Please contact Sen. Larry
=Pressler (the Committee Chairman) and Sen. Ernest Hollings at a minimum.
=If you see your state listed below, contact your own senator as well.
=

=--
=CURRENT STATUS OF S. 314
=
=The bill was introduced on February 1, 1995 by Senators Exon (D-NE) and
=Gorton (R-WA). It is currently pending before the Senate Commerce
=Committee (chaired by Senator Pressler (R-SD)).
=
=No committee action has been scheduled as of February 21, 1995.
=
=It may be included in the Senate telecommunications reform legislation,
=expected to be introduced by mid-March.
=
=A House of Representatives version of the bill has also been introduced
=with almost identical text, as H.R. 1004.
=
=--
=BACKGROUND
=
=S. 314 would expand current law restricting indecency and harassment on
=telephone services to all telecommunications providers and expand
=criminal liability to all content carried by all forms of
=telecommunications networks. The bill would amend Section 223 of the
=Communications Act (47 U.S.C. 223), which requires carriers to take
=steps to prevent minors from gaining access to indecent audiotext and
=criminalizes harassment accomplished over interstate telephone lines.
=
=If enacted, S. 314 would compel service providers to severely restrict
=your online activities. Your access to email, discussion lists, usenet,
=the world wide web, gopher, and ftp archives would be substantially
=reduced or cut off entirely. The bill would also force providers to
=closely monitor and pre-screen your electronic mail, and refuse to
=transmit any message or other content which may be considered to be
=indecent.
=
=This bill poses a significant threat to freedom of speech and the free
=flow of information in cyberspace. The bill also raises fundamental
=questions about the right of government to control content on
=communications networks, as well as the locus of liability for content
=carried in these new communications media.

=
=--
=WHERE CAN I LEARN MORE ABOUT THE BILL? (URL INCLUDED)
=
=The Voters Telecommunications Watch has set up a gopher page where
=you can get a copy of the bill (including analyses by the American
=Civil Liberties Union, the Center for Democracy and Technology, the
=Electronic Messaging Association, and others). Here's the URL:
=
= WWW URL: gopher://gopher.panix.com/11/vtw/exon
= Gopher command : gopher -p 1/vtw/exon gopher.panix.com
=
=If you have difficulty getting to this gopher page, or if you don't
=have access to Mosaic/gopher, drop a note to:
=
= vtw@vtw.org

Probably not exactly what you have in mind, but in the 1960s Robert Alda had a show in New York (WNBC?), and on one occasion had his son Alan as a guest. I remember this well because I called in. (Back in the primitive days of yore when there was no producer screening calls; if you were lucky and you rang through you just held on through hundreds of rings, until the talent picked up your call -- with the safety of a seven-second physical tape loop delay, of course.)

This was well before M*A*S*H; Alan Alda was around that time doing "The Owl and the Pussycat" on B'way; he had recently left "That Was The Week That Was" on NBC-TV to do the show. Robert, of course, was a veteran stage and film actor.

Jeff Caplan <jeff@pluto.njcc.com> writes:

>I don't know about Dan Ingram- Wine Critic. But I have heard (through the
>grapevine) that he's not long for CBS-FM. His contract is up, and
>considering how much he's being paid, renewal is doubtful.

Jeff--I would be very sorry if Ingram left the station (I doubt it will
happen).

>By the way-It was sad to see the blurb about the death of Bob Cruz. He was
>a great guy, who let me sit in on his WABC show way back when I was a high
>school radio geek. I remember he did incredible impressions. Among them:
>Dan Ingram.

Jeff--the big reason Cruz was hired at WABC by the late Rick Sklar in the first
place back in the 70's was that vocally he was a ringer for Ingram. But I will
miss him in any case. Can you E-Mail me any details of Cruz' death?? I write
for a local newsletter and I believe our readers would be very interested.

Thanks,
Andrea

I was very happy to hear of Jim Dunbar's nomination to the RHOF. I lived in the Bay Area in the early '70s and became hooked on Dunbar, Spann, Eason and the whole KGO gang. They played a big part in my eventually going into radio.
I'm also enjoying the discussion of "Monitor". I remember listening to it on WWJ-AM in Detroit. Anyone else out there who recalls the Detroit radio scene of the '50s and '60s? It would be great to hear from you.
Tim Espar (tespar@gandalf.rutgers.edu)

1481. Re: Industry consolidation: good for whom?

Newsgroup: rec.radio.broadcasting
Date: 1995-03-06 05:11:13 UTC
From: umar@tiac.net
Message-ID: <3je5hh$53n@vixen.cso.uiuc.edu>
Source record: 34288

I can think of some companies that have bought out many stations, fired lots of employees and demoralized quite a few of those that are left, treating them like dirt. Here in Boston, which is Duopoly Central, it's easy to find people in radio who are extremely pessimistic about the future. There was even a rumor that one large broadcasting company was forming a contract engineering subsidiary that would drive the local independent contract engineers out of business by deliberately operating at a loss for a year or so, by which time the independents would have given up the ghost. Needless to say, I am not as free to name names as you are.

The marketplace is not always as benevolent as its defenders try to paint it. I have read recent posts of yours, John, in which you've complained that broadcasters don't respect employees any more, that radio's no fun any more, and broadcasting as a career has no future. I understand and respect your faith in the power of the free market to enrich all our lives, but I do not share that faith. When duopoly becomes monopoly, when a company or a small group of companies acquires so great a share of the market that it can alter the rules of the game, everyone suffers.

There is also the problem that each company sees cost cutting as a good thing, a way to improve the bottom line and perhaps attract a buyer or partner, but when everybody starts cutting their payrolls and spending less money in their communities, there will be fewer potential customers for their products because fewer people in the country will be working and earning money. A large part of the economy seems to be locked in a vicious cycle of cutbacks and retrenchments which left unchecked could lead to a collapse of the whole system.

If instead of 1,000 broadcasting companies we have 15, as some have predicted, there will be a lot fewer people earning money by broadcasting. There will also be a lower quality of service both to advertisers and listeners. Businessmen are by no means obligated to provide the highest quality products and services-- their quality only needs to be good enough to sell.

Do not mistake me for someone who blindly advocates the intervention of big government in economic matters. Government is irrelevant. The marketplace is equally irrelevant. The only thing that matters is that people's livelihoods be protected. If someone can convince me that industry consolidation will mean more good paying jobs and a higher standard of living, then I'll applaud it.

Moderator suggested -- correctly -- that I add the rest of the
line-up. As of March 20...

6a-10a Howard Miller, Esq (Tulsa's longest opening argument)
Producer Tim Carroll (late of KRMG)

10a-11a AgriTalk (great live show from Kansas City, very
interactive)

11a-noon Paul Gonzolas (People's Radio Net)

noon-2p Pat Richardson (live) (You've heard this guy in all top
100 markets...great pipes but he lives in Tulsa

2p-6p Jeff Brucculeri (live)

6p-6a People's Radio Net (and maybe Kansas City Royals...)

Operations Director: Jim Fellows (formerly of KCMA)
And I am going to add a Netphone link in our studio very quickly...

Hello!

My customer is interested about doing radio programms with Macintosh.
Actually broadcasting.

I mean, he is looking for a programm with what he can do same things to
radio programms as for example with QuarkXpress to newspapers.

There is programm called "Dalet" in which you can do things, he is
looking for. But this programm is for DOS based computers.

If you know about these kind of programms, please contact me.

My adress is: jlepisto@cc.helsinki.fi

There are major issues of sonic performance and algorhythm compatability when it comes to the Sony Minidisc's. Someday, there will be an inband onchannel/adjacent channel digital broadcast system for FM. This system will most like mirror Eureka 147 and will be based on Musicam (ISO MPEG Layer #2). Sony's MD algorhythm (it has initials that I don't recall
right now) is not compatable with Musicam (it's also sampled at 32 kb and has less than CD performance).
Due to the fact that Musicam IS the algorhythm of choice in most digital broadcasting schemes, any station that contemplates the use of a digital storage medium for music and commercials, needs to pay attention to this issue.

And then, for himself, added:

> David... Boy, does "hearing" your rendition of the old NBC Monitor jingle
> bring back some good memories! I'm barely old enough to remember hearing some
> of the weekend Monitor shows...

I remember, driving the Mojave desert of Southern California
with my parents, when real estate lots in Hesparia and Hemet
were LA's new land office businesses, listening to Monitor Radio
on K F I.

I remember the sound of Selma Diamond, her sarcasm amplified by
the gravel in her voice, telling us who we were as a people. Joe
Garagiola being human, and the sounds of the archaic methods we
used to switch audio coast-to-coast in the days when I needed
the operator to call Los Angeles from a Southern California
suburb.

I remember that I felt connected to the world, even though I was
a child, miles from the nearest gas station, telephone, or human
being, adrift in a Ford Fairlane offroad from a Route 66 that
was two lanes of cracking pavement. We were on sand somewhere
amidst shimmering heat.

But technology, simple as we now know it was, connected us all.
There was an excitement in the monolithic society created by
instantaneous communications, and Monitor Radio exploited that
immediacy with a brilliance even Edward R. Murrow was unable to
realize with side-by-side video of the Atlantic and Pacific.

I venture to guess that is what sets the readers of this
newsgroup apart from the rest of cyberworld. We remember what
the limitations in bandwidth forced in the intensity of the
radio message. We remember how effective the spoken word...alone
or with the right music or sound effects can be to cut right to
the emotion of the listener. To communicate feelings more

effectively than thoughts.

In article <3jc59m$ddb@vixen.cso.uiuc.edu>, cnnbrian@aol.com (CNN Brian) wrote:

> * I was told KFWB's studios and newsroom is in what used to be a
> supermarket in Hollywood, California.

You may be right, while I don't remember it ever being a supermarket, the construction type and vintage seem about right. Before it was the new WB it was a recording studio.

Which reminds me...

There is (or used to be--I haven't been a denizen of Hollywood since the late 70s) a small concrete building behind the Hollywood Ranch Market on Vine. It had four concrete rooms in it lined with French plaster. It was four echo chambers.

You'd send your echo out on phone lines over to the building where your pgm was amplified, picked up by a mike, amplified, and sent back to your echo return.

BTW....

In a previous post on this thread I failed to respond: I never got the antique equipment from KFI. Speaking of KFI's transmitter, its a beautiful building in deco style in La Mirada. They were real smart. They went out to the very edge of Los Angeles county, and got land in a riverbed and built their two story building.

On the second floor were studios, for use in an emergency, and transmitters. On the first floor were transmission and maintenance equipment. But Los Angeles is now the nexus of urban sprawl, and land has become very valuable.

So KFI (read Cox Broadcasting) entered into a long term lease so that tilt-up concrete buildings could be built on the 27 acres that comprise its transmitter site. Those buildings now sit in the field that used to only serve as space for the guy wires of KFI's big stick.

The deco transmitter building is still there.

A friend in Los Angeles who is at least as crazy as I for the history of LA broadcasting has been doing some research. One reason that xmitter building, and the KFI construction is the way it is, is that Earl C. Anthony was not a used car dealer that found radio attractive. He had a degree in electrical

engineering from UC Berkely. He was an engineer who found that selling Packards could make him the money to manipulate the ether.

I would certainly hate to be the person who sold the dictating machine to the guy who has the office right next to the base of the tower where 50,000 watts of nondirectional, blood and guts RF enters KFI's big stick.

Why, asks your client, do I keep getting Rush Limbaugh in the spaces between my early morning dictation. If you're smart, you respond that it is because Rush Limbaugh is satan, and satan is the prince of the air.

BTW....

A post on this thread talked about mortuaries and stations in their former digs. KJLH is now said to "stand" for "kindness, joy, love, and happiness." Perhaps it does. It also stands for John Lamar Hill, the owner of the Angeles Mortuary, and the man who purchased the station and changed its name from KFOX-FM.

He ultimately got its transmitter moved to the Baldwin Hills, and its city of license changed to Compton, but until then, he had to find someplace in Long Beach, California, for its studios.

So he prevailed on his mortician friend, owner of Mottels Mortuary in downtown Long Beach, to let his automation equipment and control room coexist with the lying-in-state at the downtown Long Beach stiffhouse.

The aforementioned crazed Los Angeles radio historian, now an attorney in private practice, used to legitimize the existance of Mr. Hills' station with his 3rd class radiotelephone permit, in that same stiffhouse on dark nights in Southern California.

While I'm not sure of the past life of the old KYA San Francisco <One Nob Hill Circle...below the Mark Hopkins Hotel> I do have an interesting story. Back in the great old rock n roll days, legend has it that the song "Do You Wanna Dance" by Bobby Freeman was recorded in a record closet that opened onto the underground parking garage of the Mark Hopkins ...if you ever hear the record, you will notice there is no drum track ...the rhythm was provided by beating on a cardboard box! This was back in the glorious old Tom Donahue days.

It's great to know the old place is still there! When I graduated in 1979, we were transmitting at an extremely low power, because when the "new" transmitter had been turned on several years earlier, it apparently blew up several science experiments in the poorly-shielded building next door. Is it still very low power, or has that been resolved?

By the way, I have very fond memories of those meat lockers. But I don't think that building was a dining center. Before Wilson Commons was built, it was the student union. It MAY have been a dining hall a long time before that (we're talking 60's or earlier, I think).

Another by the way: although a small radio station at a school with no communications or journalism departments, WRUR was the launching pad for some not-bad radio careers. My friend Joel Lind, PD in the late 1970's, is an Ohio-based radio consultant. Paul Tuthill, news director there at the time, has been ND at WTAG in Worcester, MA for a long time. And I'm with the AP Radio Network ...

(Catching up here.)

KPLA(FM) in Columbia, Mo. started in a building that was originally
a drive-through chicken restaurant. (Chickens would drive cars through...no,
no, wait a minute!) Later, the building was used for a local Amway-type
operation that sold items relating to automotive safety. The drive-through
window was retained and became part of one of the studios.

The station, then KARO, tore down the building in 1986 after completing
a larger structure. The KPLA/KFRU/KBXR parking lot is all that remains.

Also in Columbia, KCBJ-TV (now KMIZ-TV) broadcast for nearly 15 years
from a converted storage room in the Tiger Hotel parking garage. It showed,
too.

Distinctive Kansas City area broadcast buildings (not many):

* Until Bonneville International bought KCMO-AM/FM, its studios were in
Manor Square, a yupscale shopping center that was a converted bakery.

* KCPT-TV's studios are in the building originally built for KCMO-AM/FM/TV.
The KCMO-TV (now KCTV) studios are now in Fairway, Kansas but the tower
is still at 25 East 31st. KCPT's tower is near Independence, Mo. Hence,
the Channel 19 (KCPT) studios are at the base of Channel 5's tower!

* Topeka's WIBW-AM/FM/TV are in a converted elementary school. The gymnasium
serves as the TV studio (with better acoustics, of course).

What about buildings that originally were radio stations? Here's
a boring memory from my past:

The original location of KCOG(AM) in Centerville, Iowa was in the southernmost
part of town, near the house where I lived from 1967-72. I remember when
the self-supporting tower was torn down in 1969. Nearby was
the original studio building at (if I recall correctly) 1908 South Main.
It had been converted into a rental house! All the studio tiles were still
in the building. This made a big mess when the building caught fire and
burned to the ground around 1970 or so. The owner, Ken Spring, did not
rebuild. The tower site now hosts Lakeview Elementary School.

Here's one: KELO, a broadcast empire built by a farsighted entrepreneur who got into movies, radio, tv, then cable and muzak when they were just coming over the horizon...and BTW had the largest geographical coverage area of any CBS-TV affiliate in the country, mainly by covering all of South Dakota and corners of other states via repeaters and part-local stations.
When they expanded in the 1980's, KELO not only remodeled their downtown Sioux Falls studios, but took over a large meeting hall/auditorium most recently used for religious services (they already had satellite dishes in its parking lot) and ALSO put radio in a former Shriners' dance hall across the street from their original location.

Ian, IMHO the problem with Q is the fact that they are the only game in
town when it comes to AOR. The FOX has to contend with CFMI and the
stations from Northern Washington and, on cable, the Seattle stations such
as KISW. That keeps them honest. Q107, thanx to the inane CRTC regs,
stands alone in the 4th largest CanAm market. So, essentially, they would
be, billings wise, remiss if they didn't soften their sound coz they're
going to get all the metalheads in Scarberia no matter what they play.

In AIRWAVES 1163, blaccs@acpub.duke.edu (Christopher Scott Blackburn)
wrote regarding Raleigh-Durham:
>
> It's aggrivated me for such a long time that the radio stations in
> this area are so mired in mediocrity.
>
It's time for me to admit something.

I was there for three days two weeks ago. Most of my time was occupied by
an IBM network workshop and I just did not have an opportunity to listen to
much radio (maybe about two hours' worth). I thought my resulting lack
of interest in writing about it was due to my hectic schedule when I was
at IBM in Cary. So when CSB wrote:

> I read every day that the Triangle area is expanding in terms of population
> and economic growth. Maybe it's about time the radio stations grow up,
> too.

...it confirmed my impressions of local radio. FM was bland and ordinary.
Even the student-run radio stations seemed awfully mainstream in nature.
One could find far more variety in Columbia, Mo., than in an area with a
stronger economic base and several fine universities such as RDU.
Aside from the smooth jazz station in Cary there just wasn't much of
interest.

The class act on the AM dial was WPTF (680 kHz, 50 kW, DA-N, CBS) but it
had to be the S-L-O-W-E-S-T all-news station I ever heard. While 'PTF
is a solid, credible station, you sort of wonder if it didn't sound the
